

AIR PROGRAM INFORMATION MANAGEMENT SYSTEM

Presented by

NORTHROP GRUMMAN

Mission Systems

MICHAEL BAGHOOMIAN
PROGRAM MANGER

NDIA 29th Environmental and Energy Symposium &
Exhibition

April 9, 2003

• Air Force Vision for APIMS/CCS

- Create a World-Class Integrated Environmental, Safety, and Occupational Health “System of Systems”
 - Develop federal, state, and local regulatory reports
 - Identify health trends
 - Provide environmental management tools
 - Provide pollution prevention management tools
 - Facilitate operational risk management
- Reduce operational costs by making *better decisions*

• The What of Command Core

• What is Command Core (CCS)?

- An integrated relational database designed to manage environmental safety, and occupational health datasets
- Rapid and versatile access to data
- Reports required by regulatory agencies are easily generated
- Allows Air Force to monitor and control hazardous material/conditions and monitor their effects on military and civilian personnel

• What is the history of CCS?

- CCS was originally developed for Hill AFB and then matured
- Use within AFMC
- AFMC deployment began in August of 1996
- CCS is now completely deployed throughout the Air Force

- **The What of APIMS**

- **APIMS is an air quality management tool that was designed to be flexible for use at any installation**

- Track and prepare Air Emission Inventory
- Regulatory Compliance
- Permit, Title V, NESHAP
- Automated Logs
- Checklists

- **Sharing the Data among Different Functional Areas**

- More Efficient
- Reduces Costs

- **Overview of CCS**

- **CCS Modules**

- Air Program Information Management System (APIMS)
- Employee (Demographics and Organizations)
- Material Management (TRI and TIER)
- Shared Functions
- Industrial Hygiene
- Occupational Medicine/Public Health
- Safety
- Waste Management
- Pollution Prevention
- Environmental Sampling

- **Structured Reports have been created for most Modules**

• Environmental

• Air Quality Management

- Source Categorization
- Emission Calculations
- Permit Management
- Air Source Tracking
- Process Definition

• Waste Management

- Waste Streams
- Container Tracking
- IAP Management
- Sampling
- Disposal

• Waste Water

• Pollution Prevention

- Industrial Hygiene

- Exposure Risk Management

- Avoidance
 - Controls
 - Special Surveillance

- Occupational Medicine/Public Health

- Health Risk Management
- Moving Toward Prevention vs. Prescription
- Identify Trends when Prevention Fails

- Safety

- Physical Hazard Risk Management

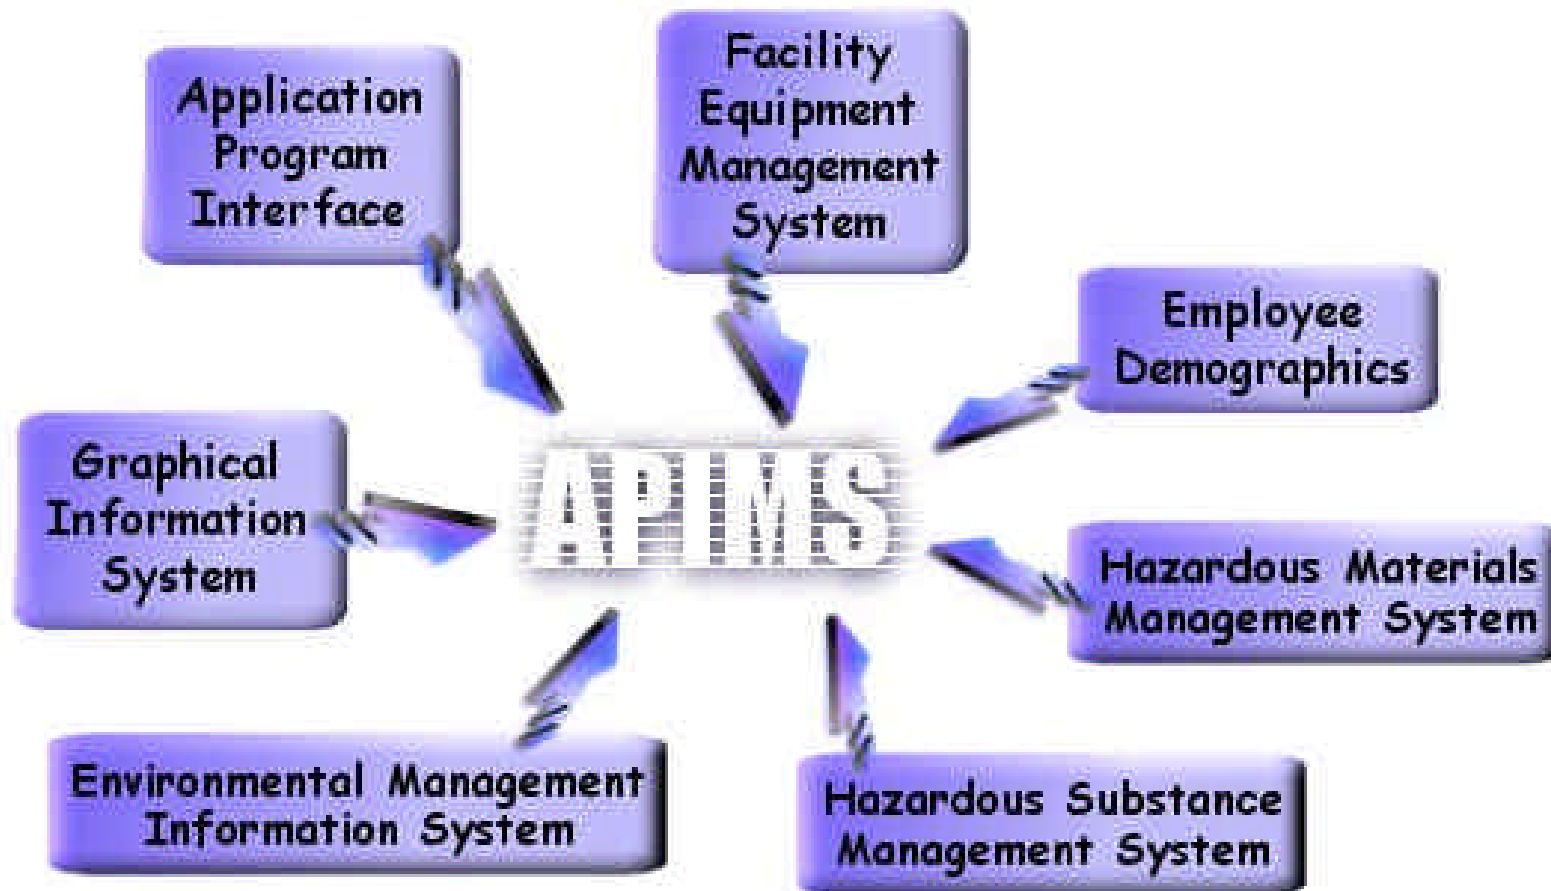

- Injury
 - Illness

- CCS External Information Sources

- APIMS External Information Sources

- Command Core System Functionality

- ESOH Community

- Base Business Practices

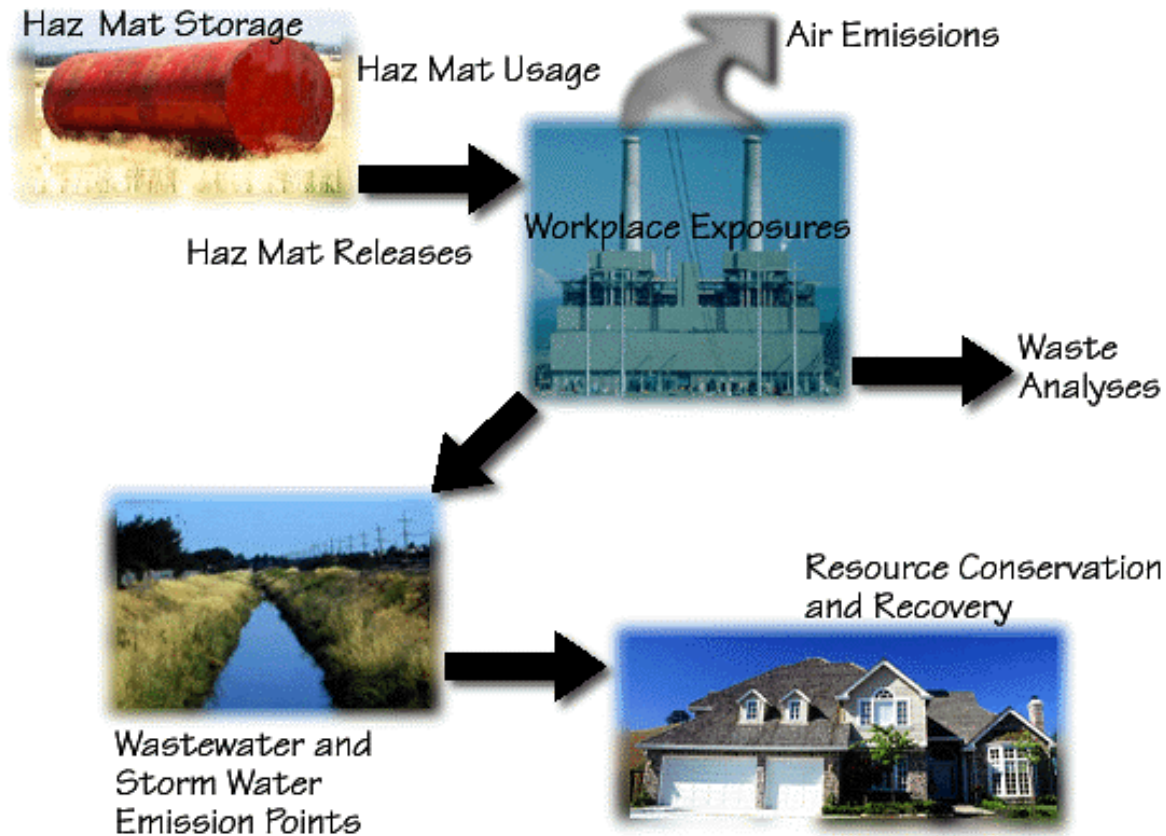

- Establish a Data Administration Working Group (DAWG) amongst the Functional Areas at each given location.

- Identify and Agree on Unique Activities/Processes
 - Identify and Agree on Equipment
 - Identify Locations
 - Identify Chemical and Material Product Information
 - Share Information in CCS

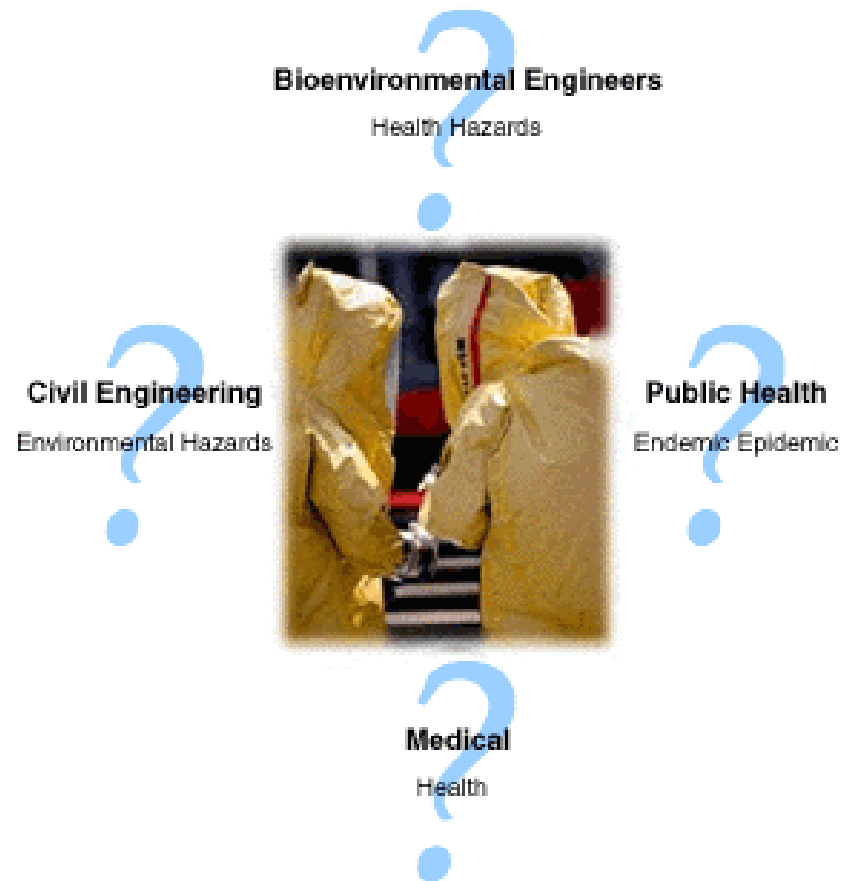

- Process Evaluation Perspective

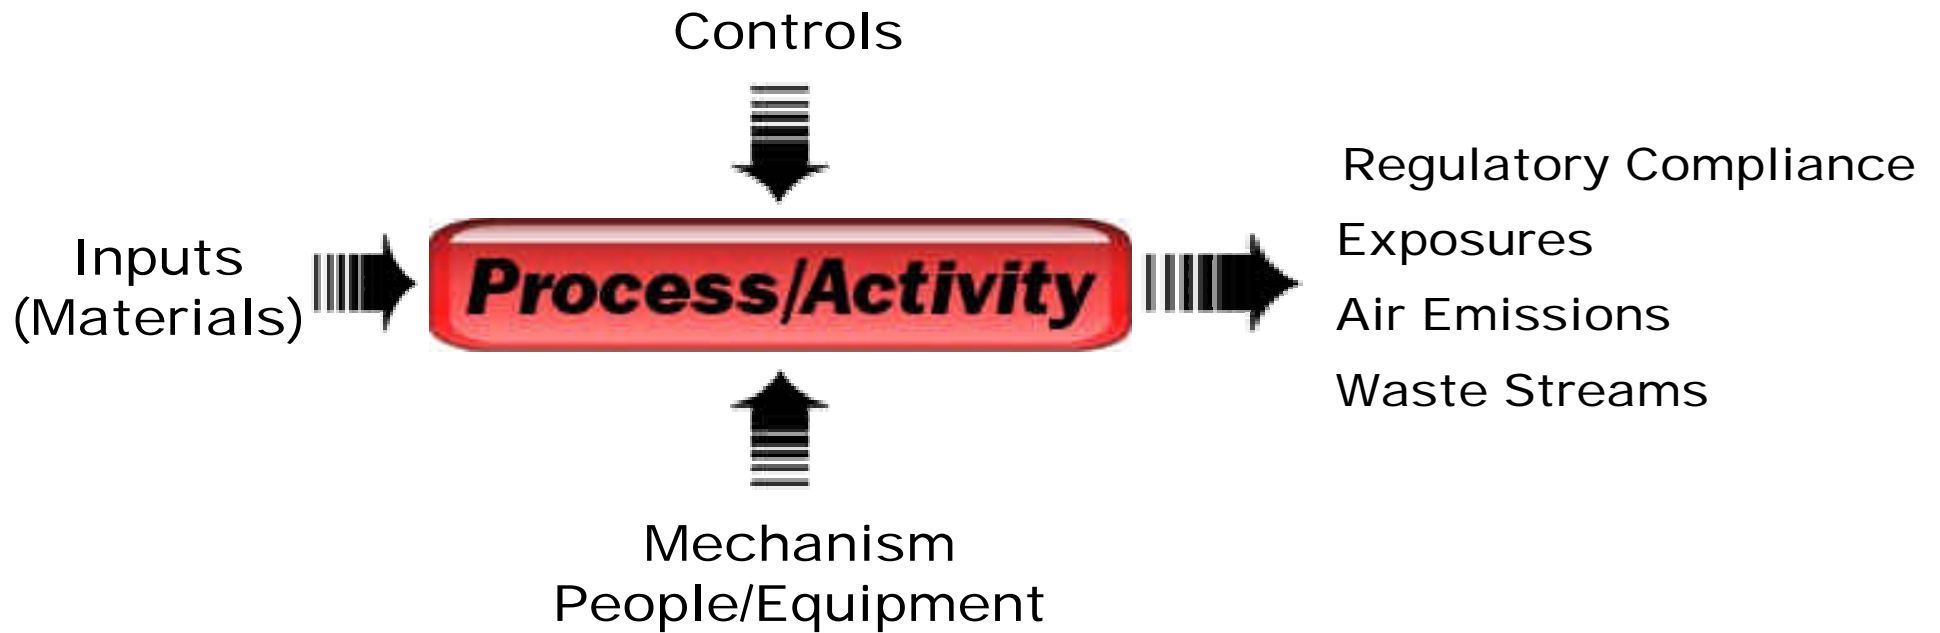

- Cradle to Grave Tracking

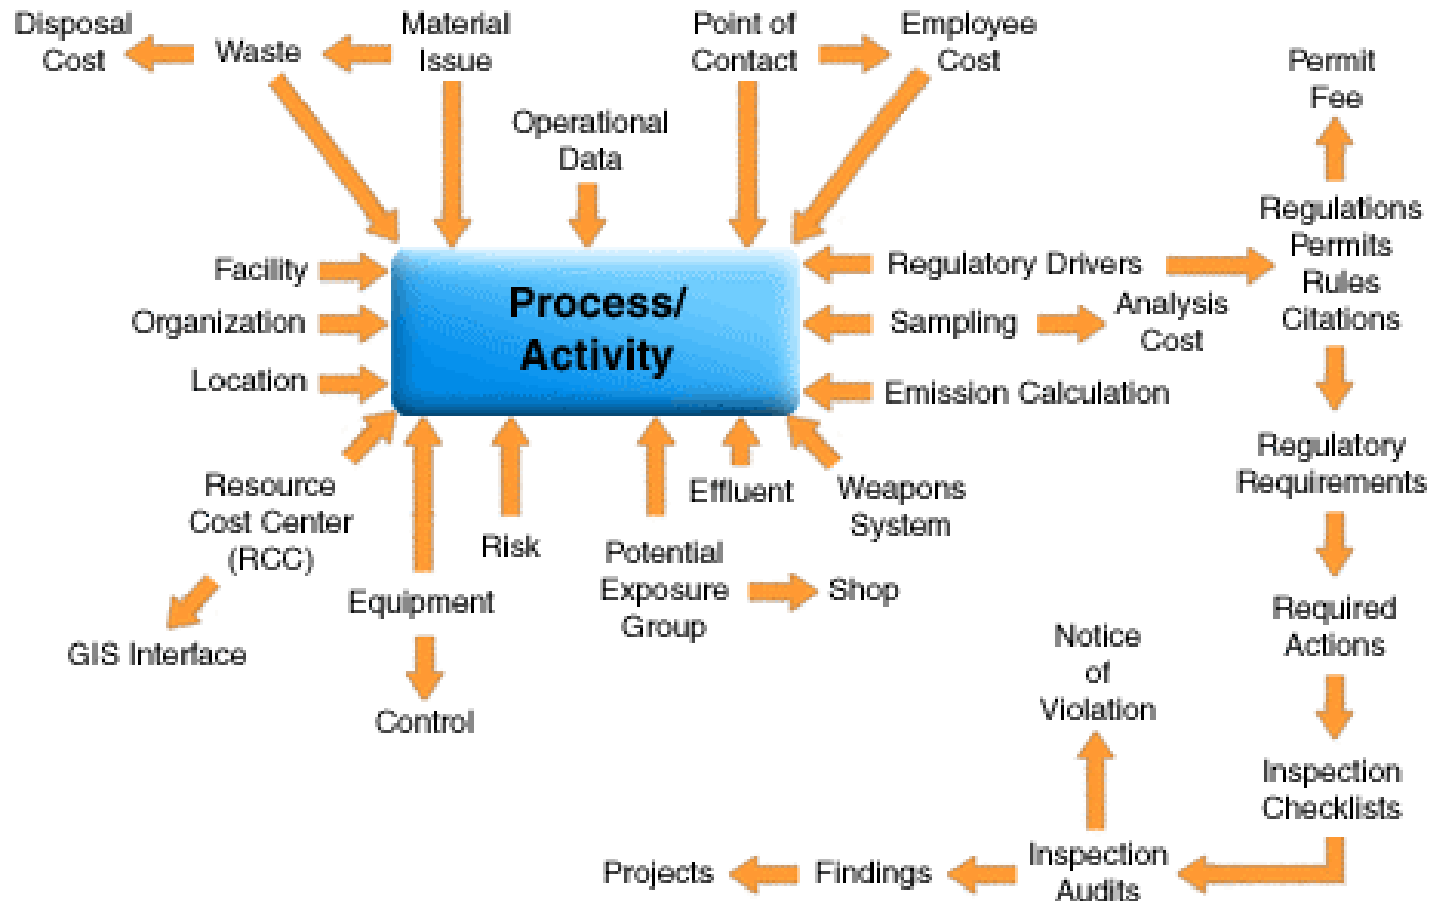

- Same Process - Different Perspective

- Process Definition

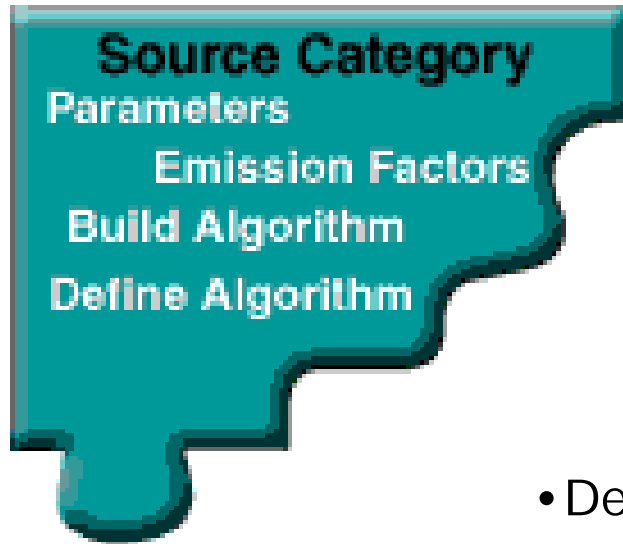

- Unique Process/Activity

- Building Blocks of APIMS Data

- Source Category

- Define Parameter to the Source Category
- Define Emission Factors to the Parameter
- Define Algorithms
- Build Algorithms

- Air Emission Sources

- Define Equipment
- Define Controls
- Define Control Efficiencies
- Define Stacks
- Define Tanks
- Define Generators/Boilers

- Regulatory Compliance

- Define Regulatory Data
- Define Applicable Requirements
- Define Required Actions
- Define Checklist Questions
- Inspections
- Compliance Evaluations
- Notice of Violations

- Unique Process/Activity

- Determine Process Code
- Assign Process Name

- Chemicals & Material Data

- Update Chemical Data as required
- Update Material Product Data as required
- HMMS Problems

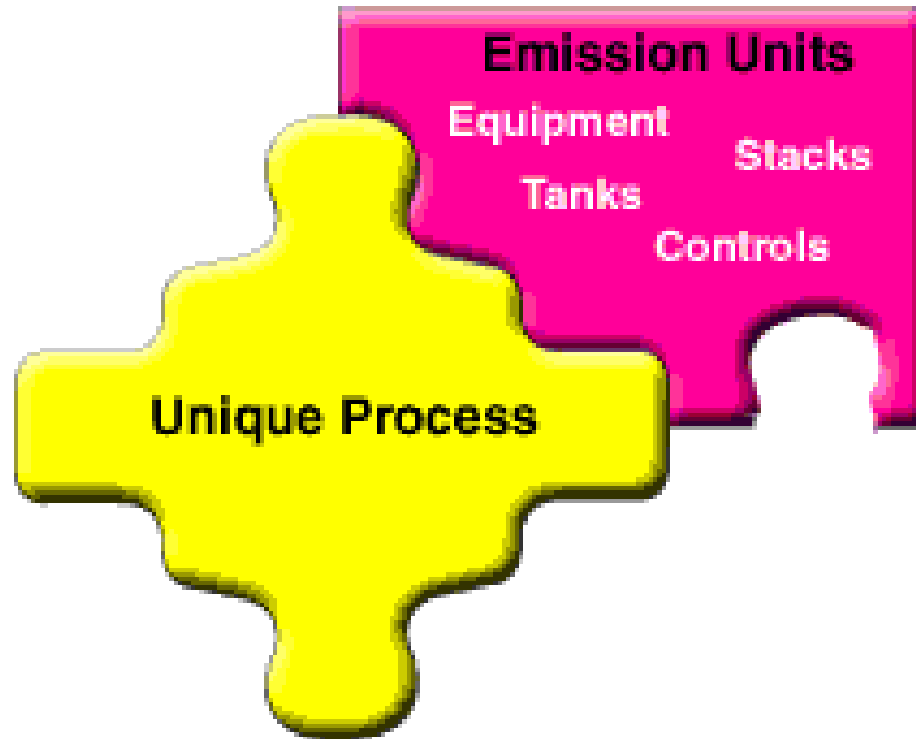

- Linking it all Together

- Remember the process owns everything

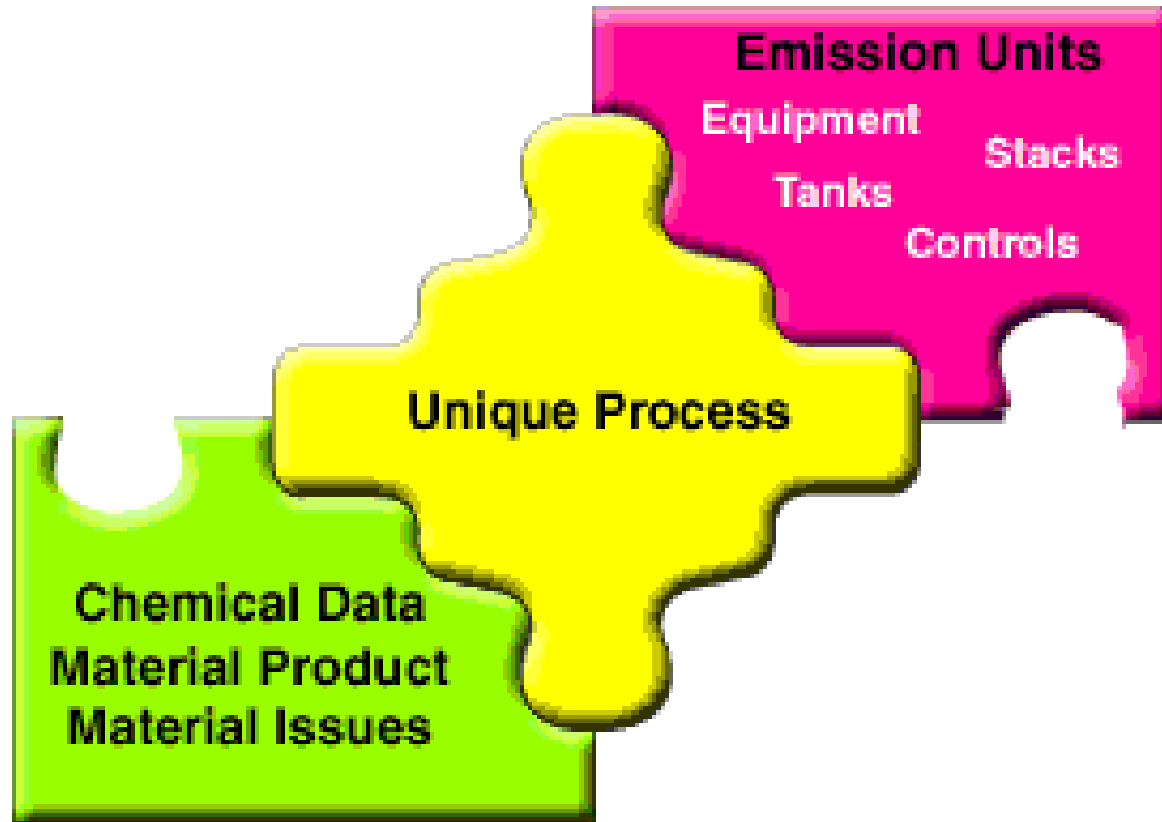

- Linking it all Together

- The equipment is linked to the process

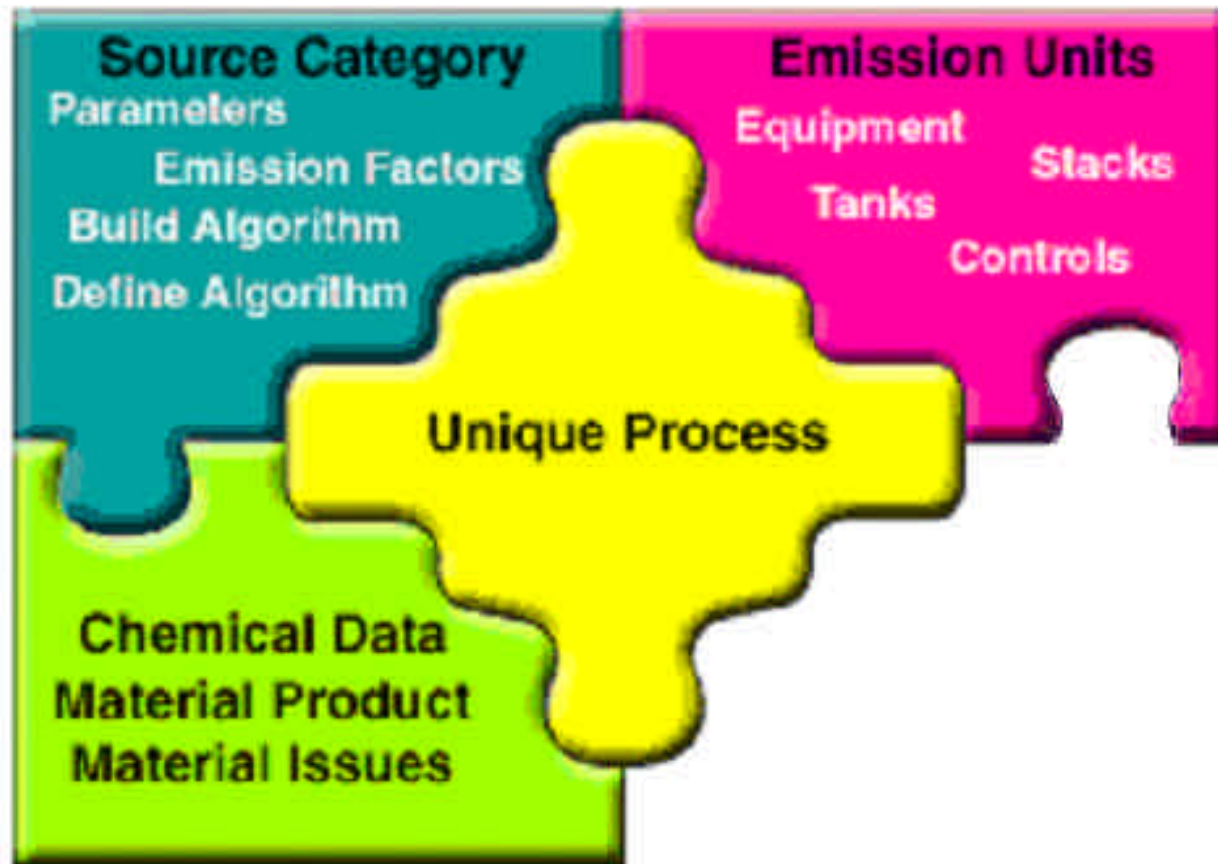

- Linking it all Together

- Issue materials to the process

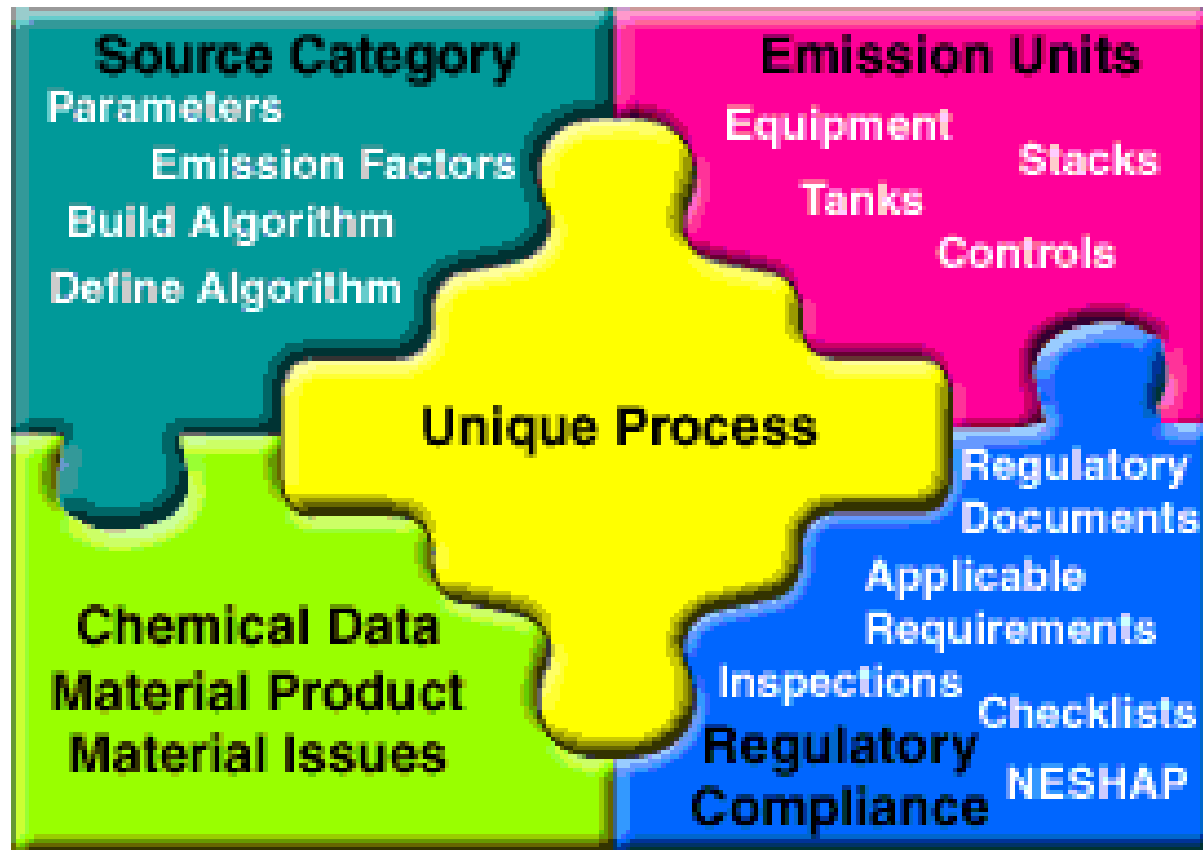

- Linking it all Together

- Link source category, emission factors, and algorithm to the pro

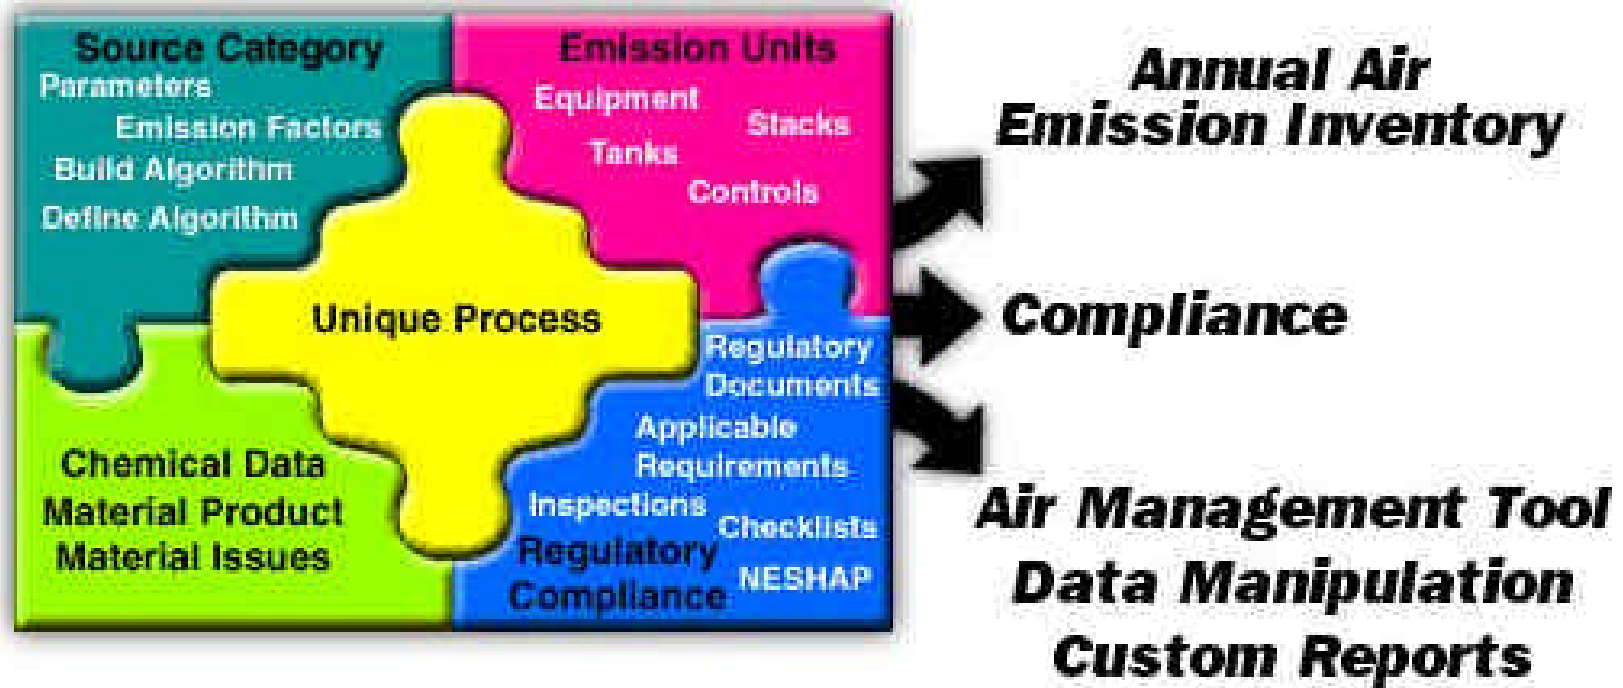

- Linking it all Together

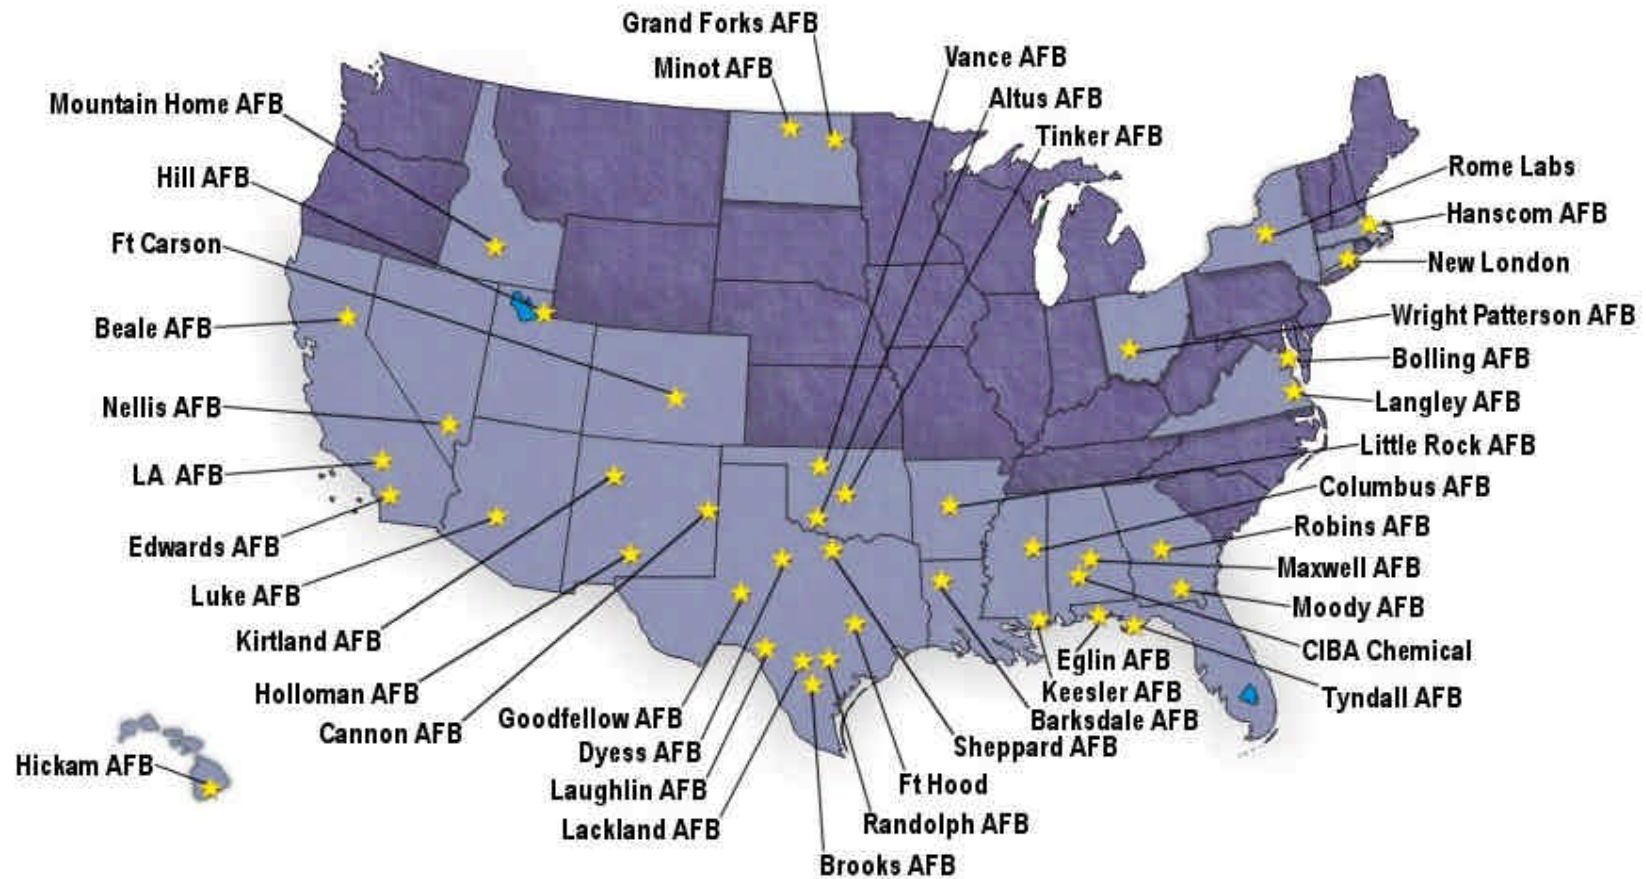

- Regulatory Compliance is linked to the process or equipment

- Building Blocks of Data

• APIMS Locations

• Getting Help

- APIMS has a help desk available Monday through Friday, 7:00am–5:00pm MST, to assist you with any APIMS questions or problems. The APIMS help desk can be contacted by phone at 1-800-274-4406 or by e-mail at apims@trw.com
- Command Core provides a help desk to assist with any system-related problems such as connectivity. The CCS help desk can be reached by phone at 1-210-536-9662, (DSN) 240-9661/9662, or by e-mail at ccs-help@tmssc.brooks.af.mil.
- The Command Core System also has a web site at www.eesoh.com. This site offers version release information, functional user group information, deployment information, and a message center from the program office.
