Advanced Armaments for  
Peace and War*

# THE ARMY'S INDUCTIVE FUZE SETTER FOR EXCALIBUR

PRESENTED TO THE NDIA FUZE SYMPOSIUM  
APRIL 9, 2003

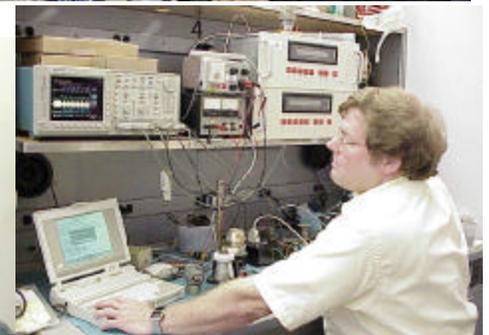

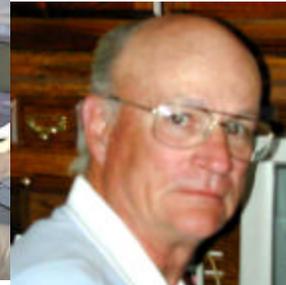

TOM WALKER  
CCAC FUZE DIVISION

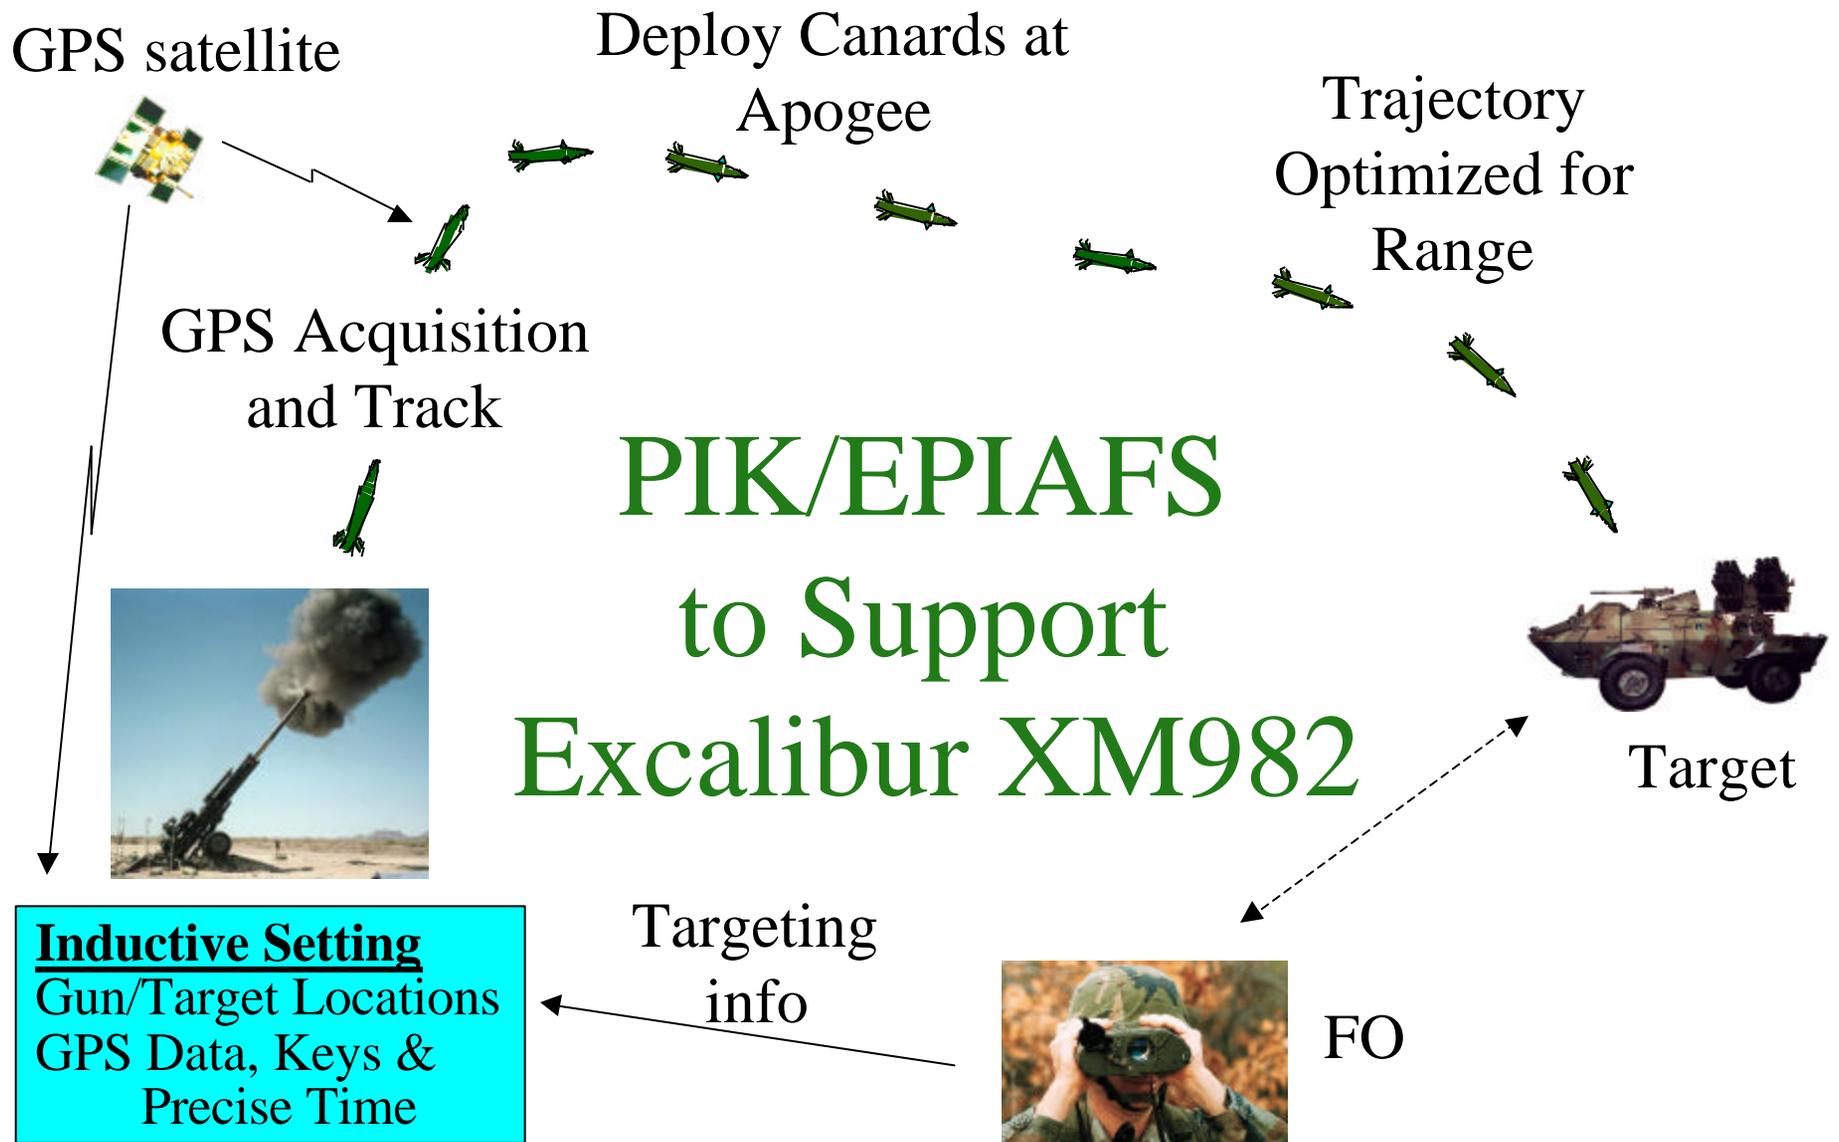

**T**ank-automotive & **A**rmaments **COM**mand

# SETTER TEAM

- Sponsor: Mike Burke
- System: Allison Marston
- User: Ft Sill
- Software
  - Andy Leshchyshyn
  - Craig Freed
  - Mike McCall
  - Dave Gerstman
- Mechanical
  - George Eckstein
  - Jim Hartranft
- Electrical
  - Hai Pham
  - Len Goodman
  - Fred Oliver
  - Mike Irwin
  - Jerry Frazier
  - Tom Walker

➤ Add GPS capability to M1155 PIAFS

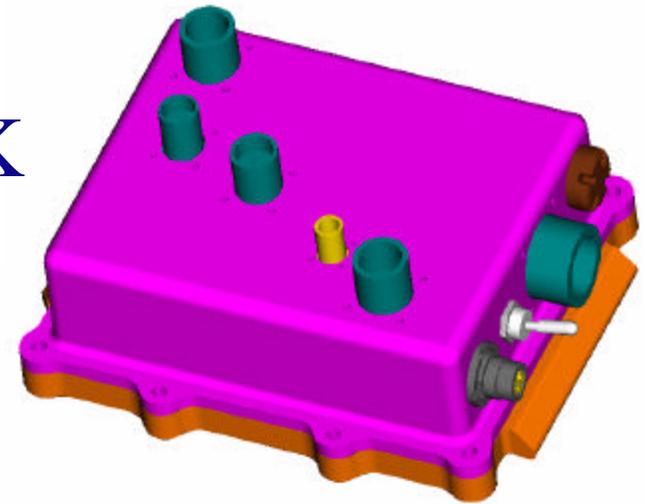

# FUZE SETTER SYSTEM

## L1/L2 ANTENNA

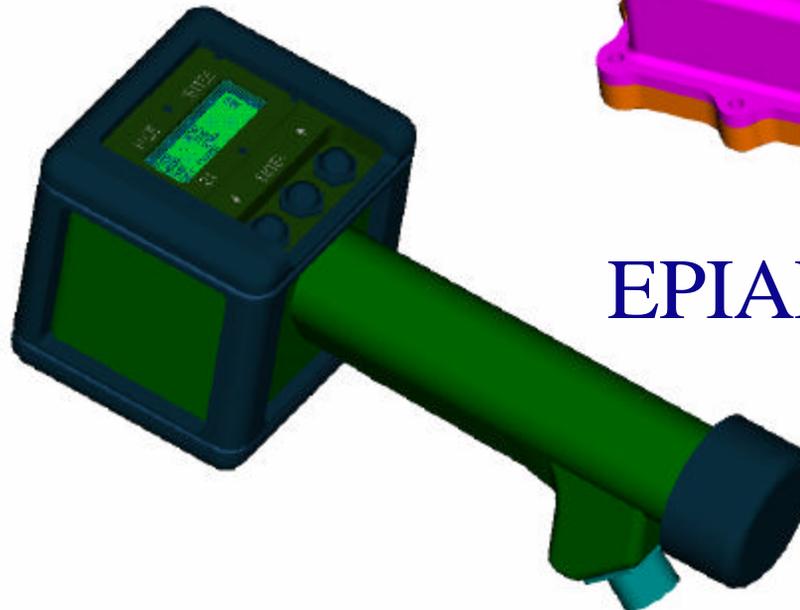

- Platform Integration Kit (PIK)
  - Single board computer
  - GPS receiver & antenna
  - Auxiliary circuit
  - Cables
- EPIAFS
- L1/L2 Antenna

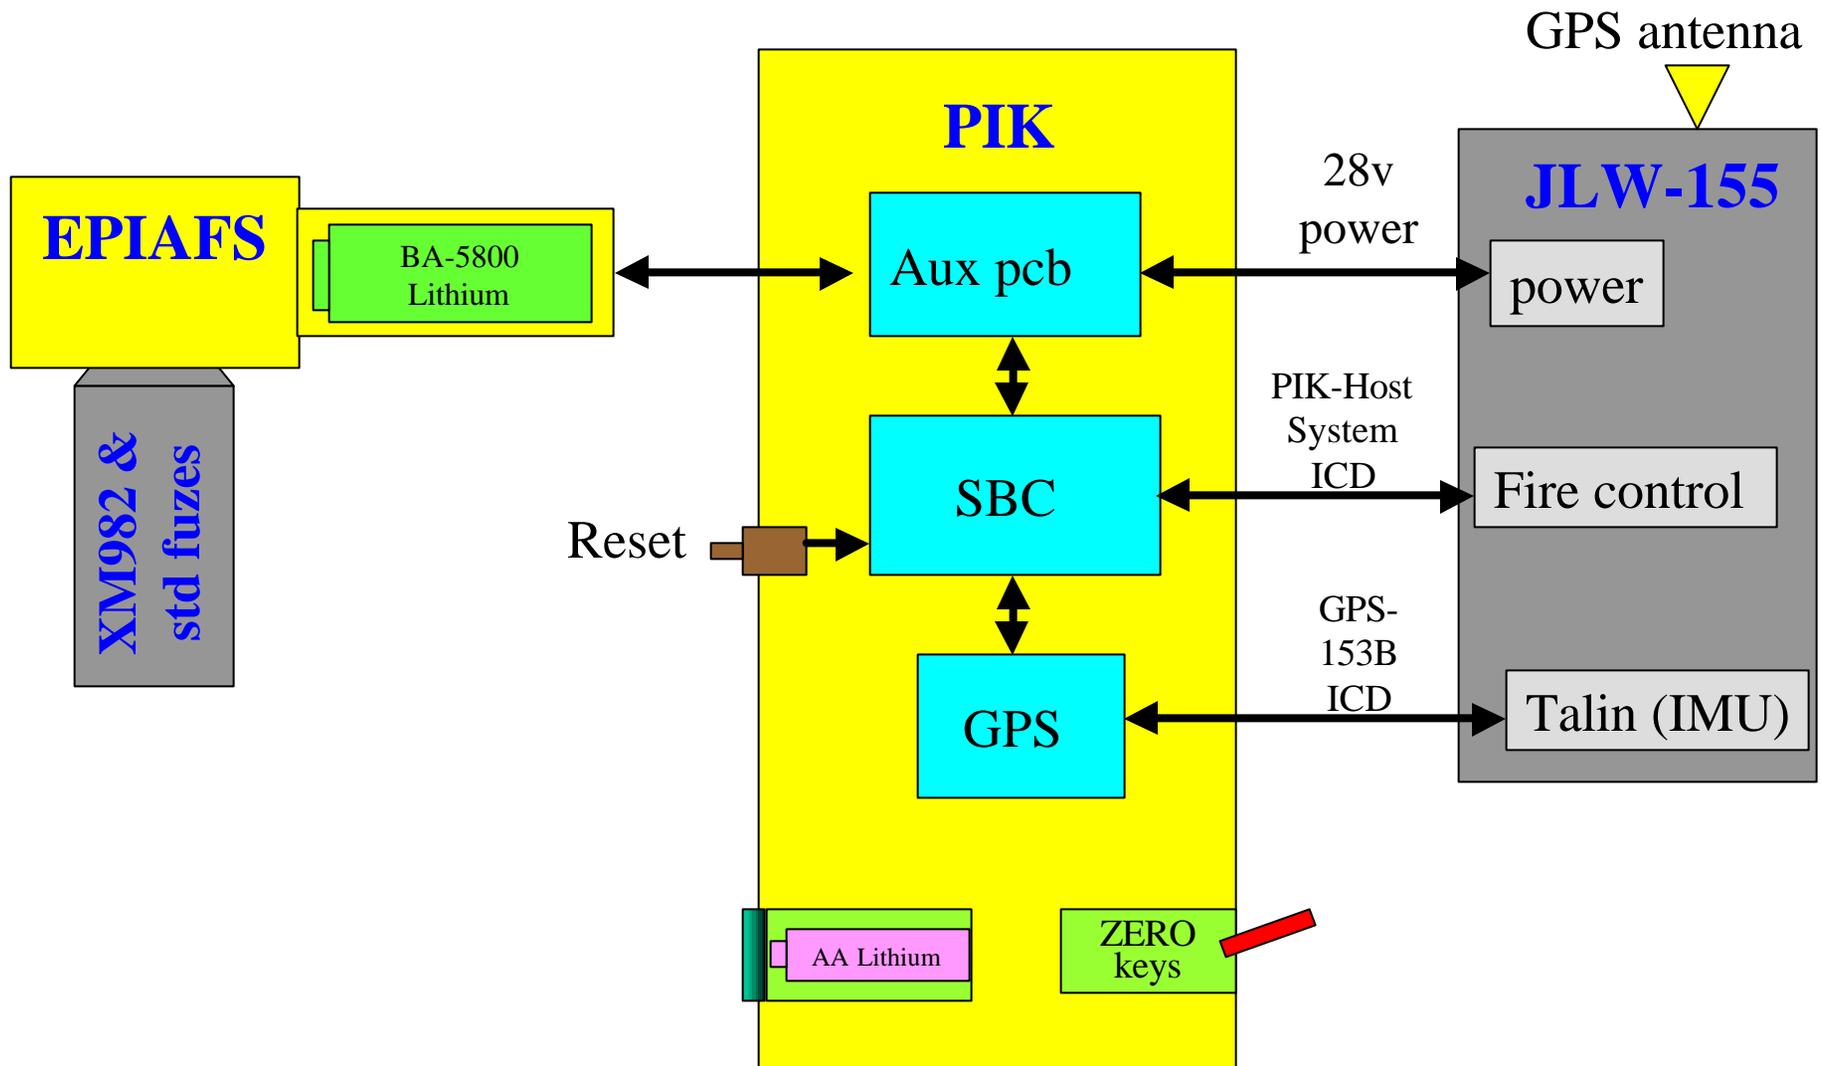

PIK

EPIAFS

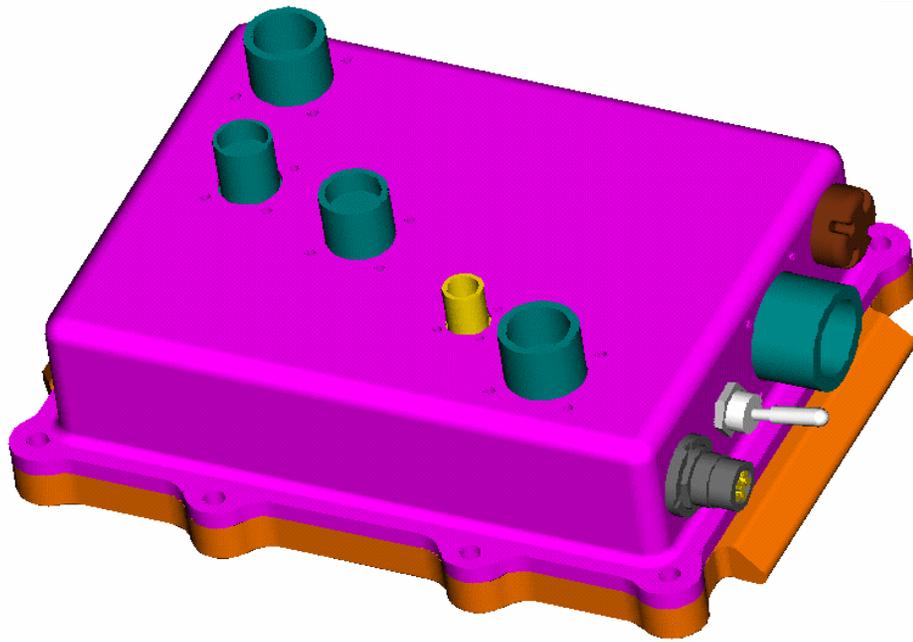

# FSS BLOCK DIAGRAM

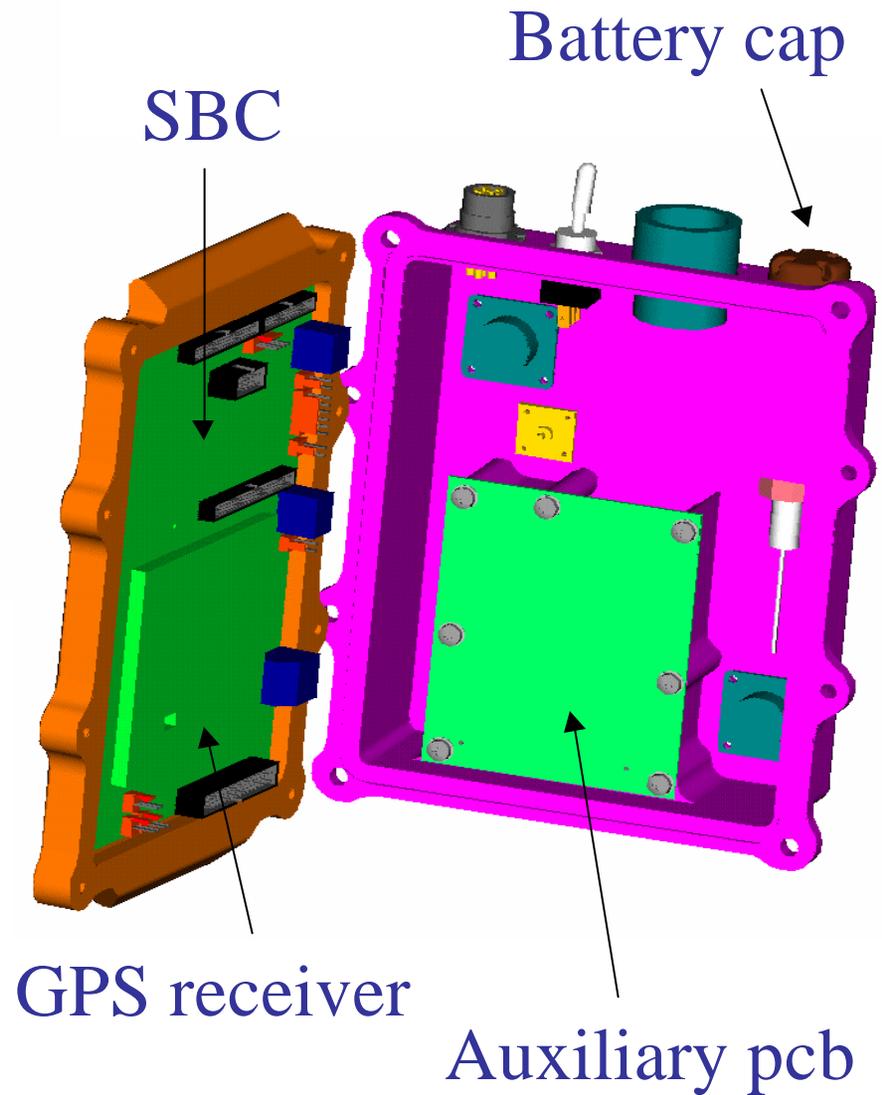

# JLW-155

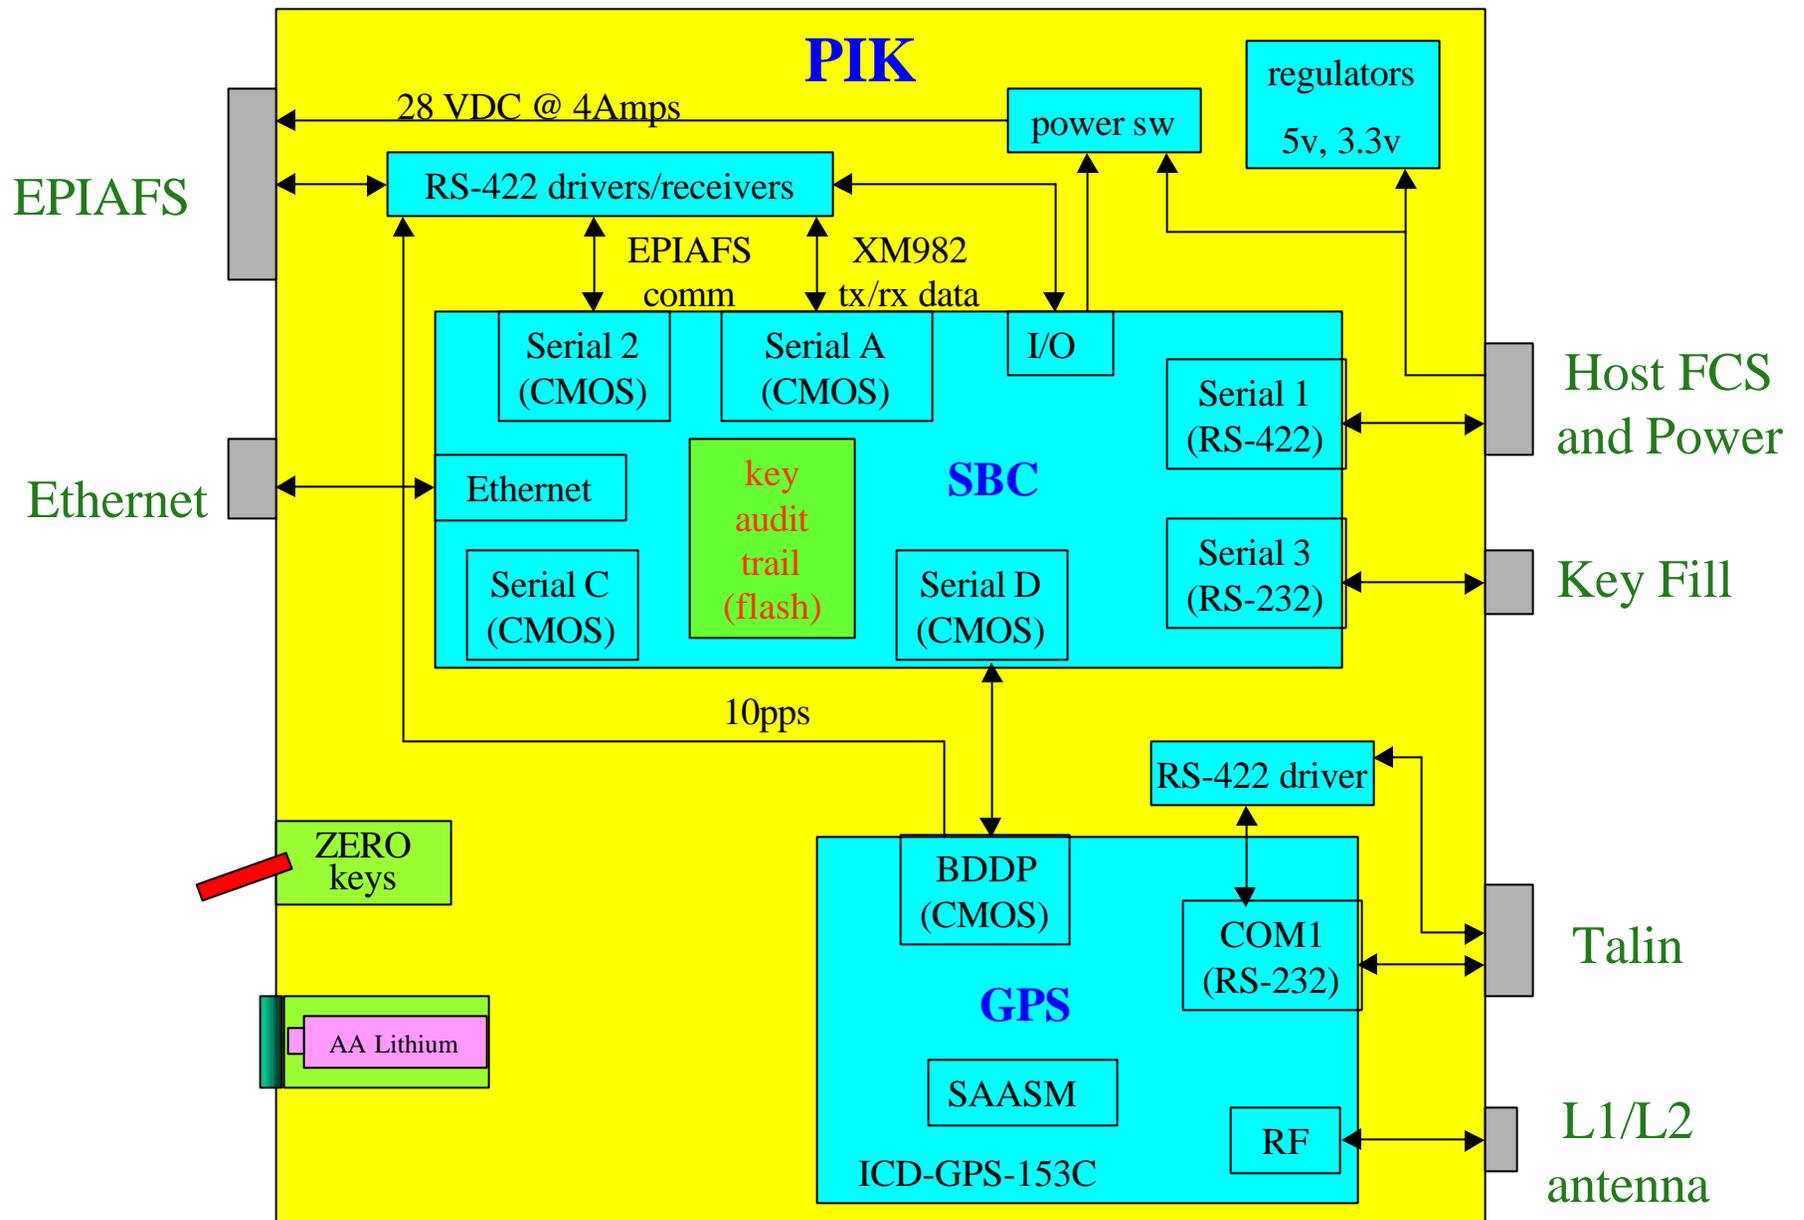

# PIK

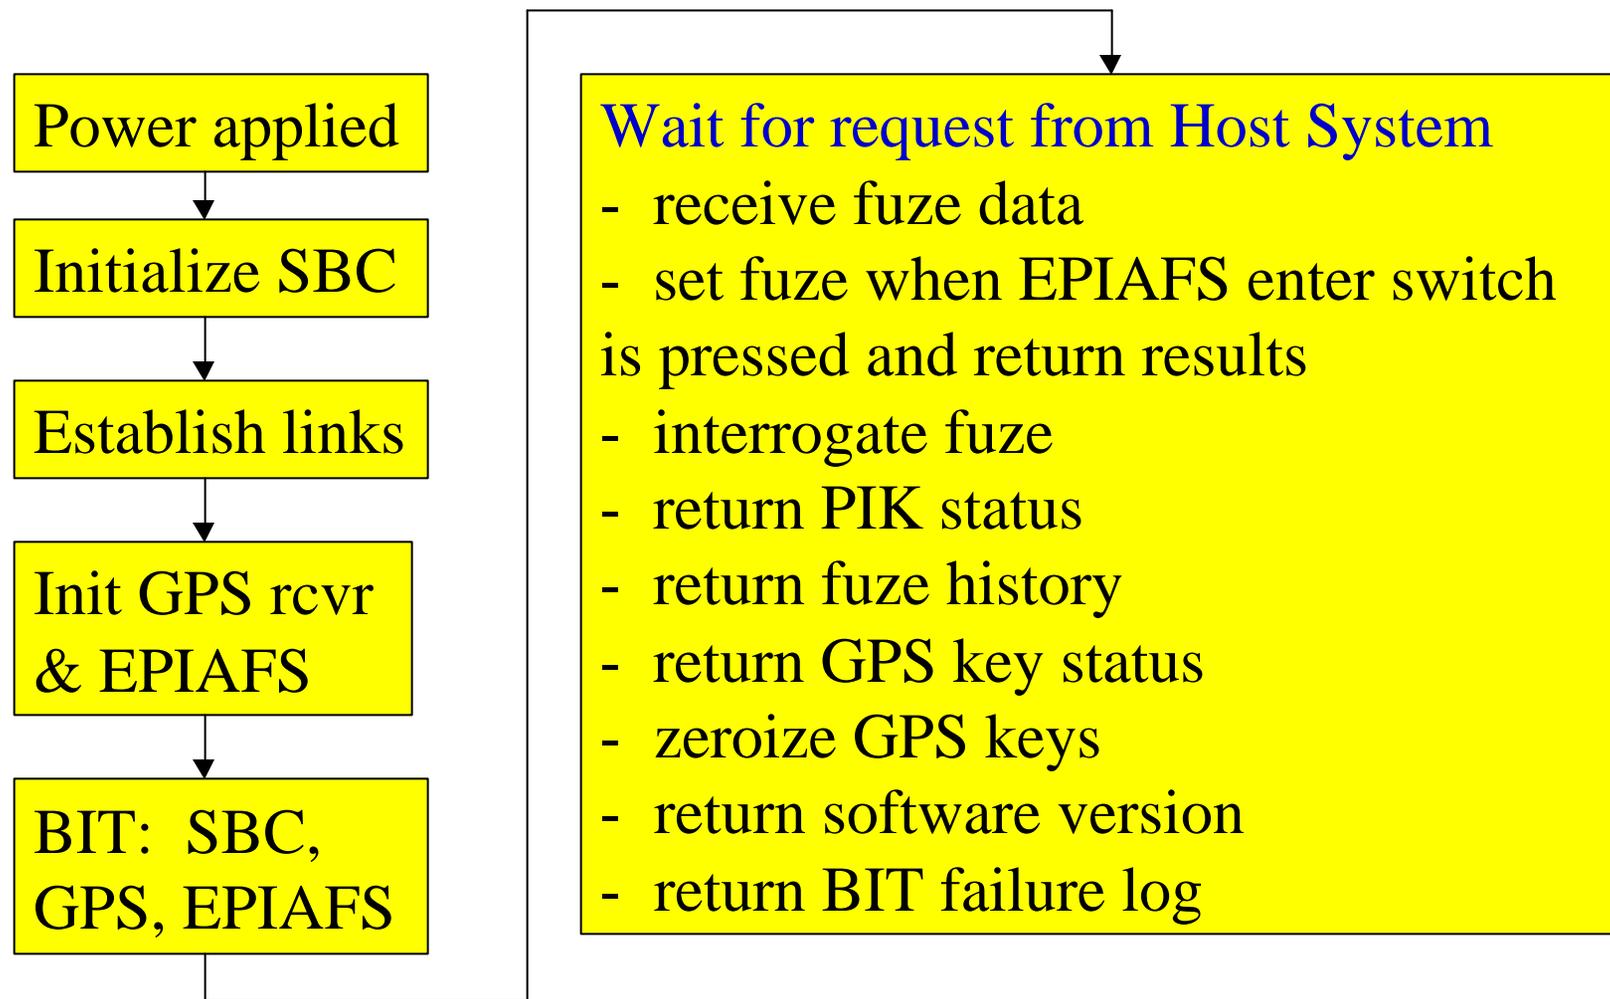

- 6 lbs
- 9"x7"x4" size
- 3 watts
- Lithium AA battery

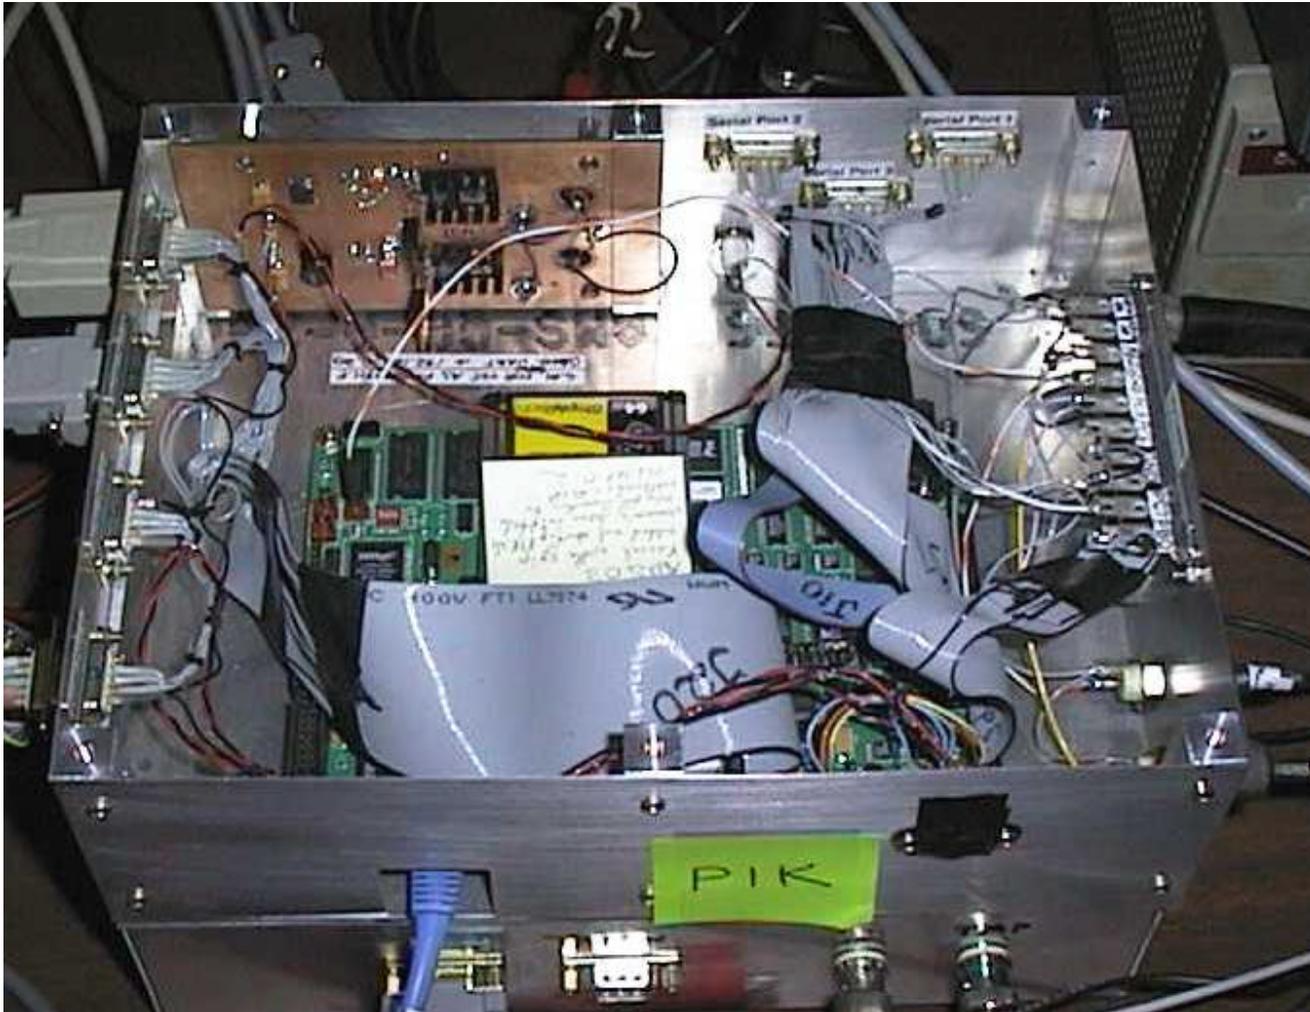

# PIK BLOCK DIAGRAM

# PIK ALGORITHM

# PIK SINGLE BOARD COMPUTER

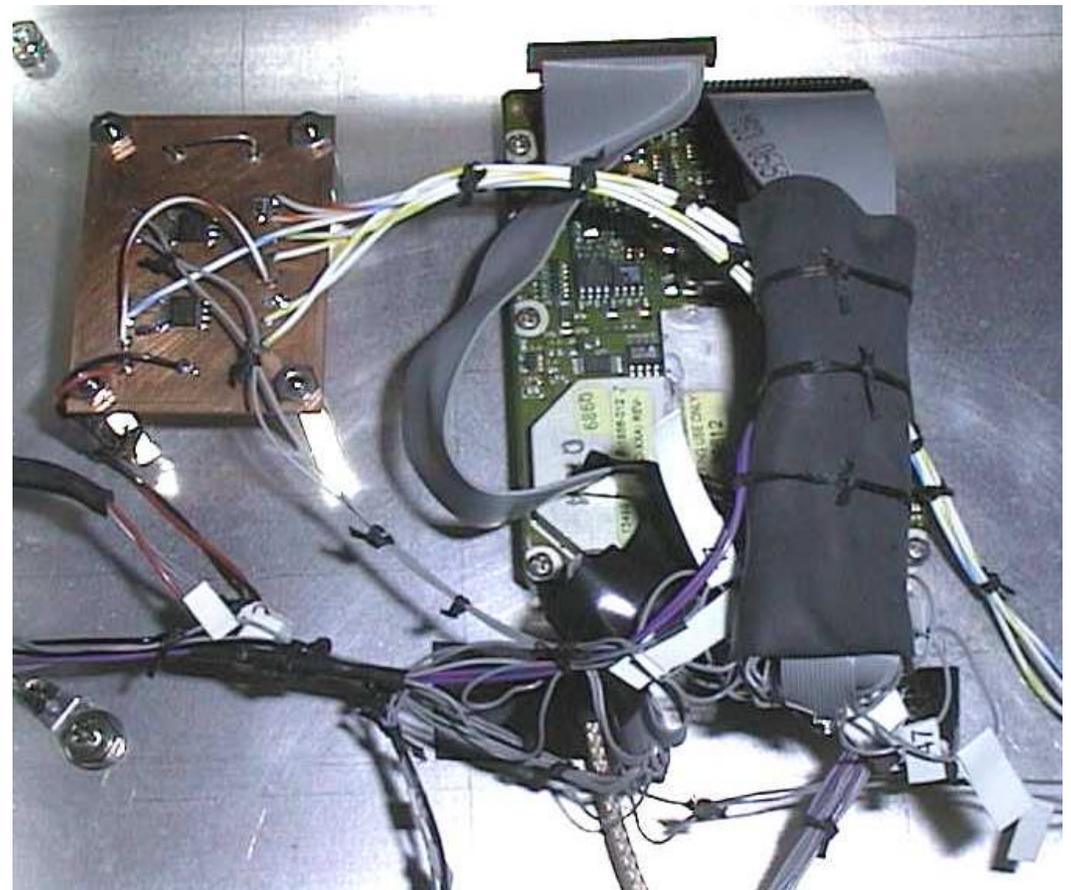

- COTS: ADS “Graphics Master”
- 3 watts
- 32M flash
- 32M DRAM
- 7 serial ports
- Ethernet
- 5”x7” size
- LINUX OS

# PIK GPS RECEIVER

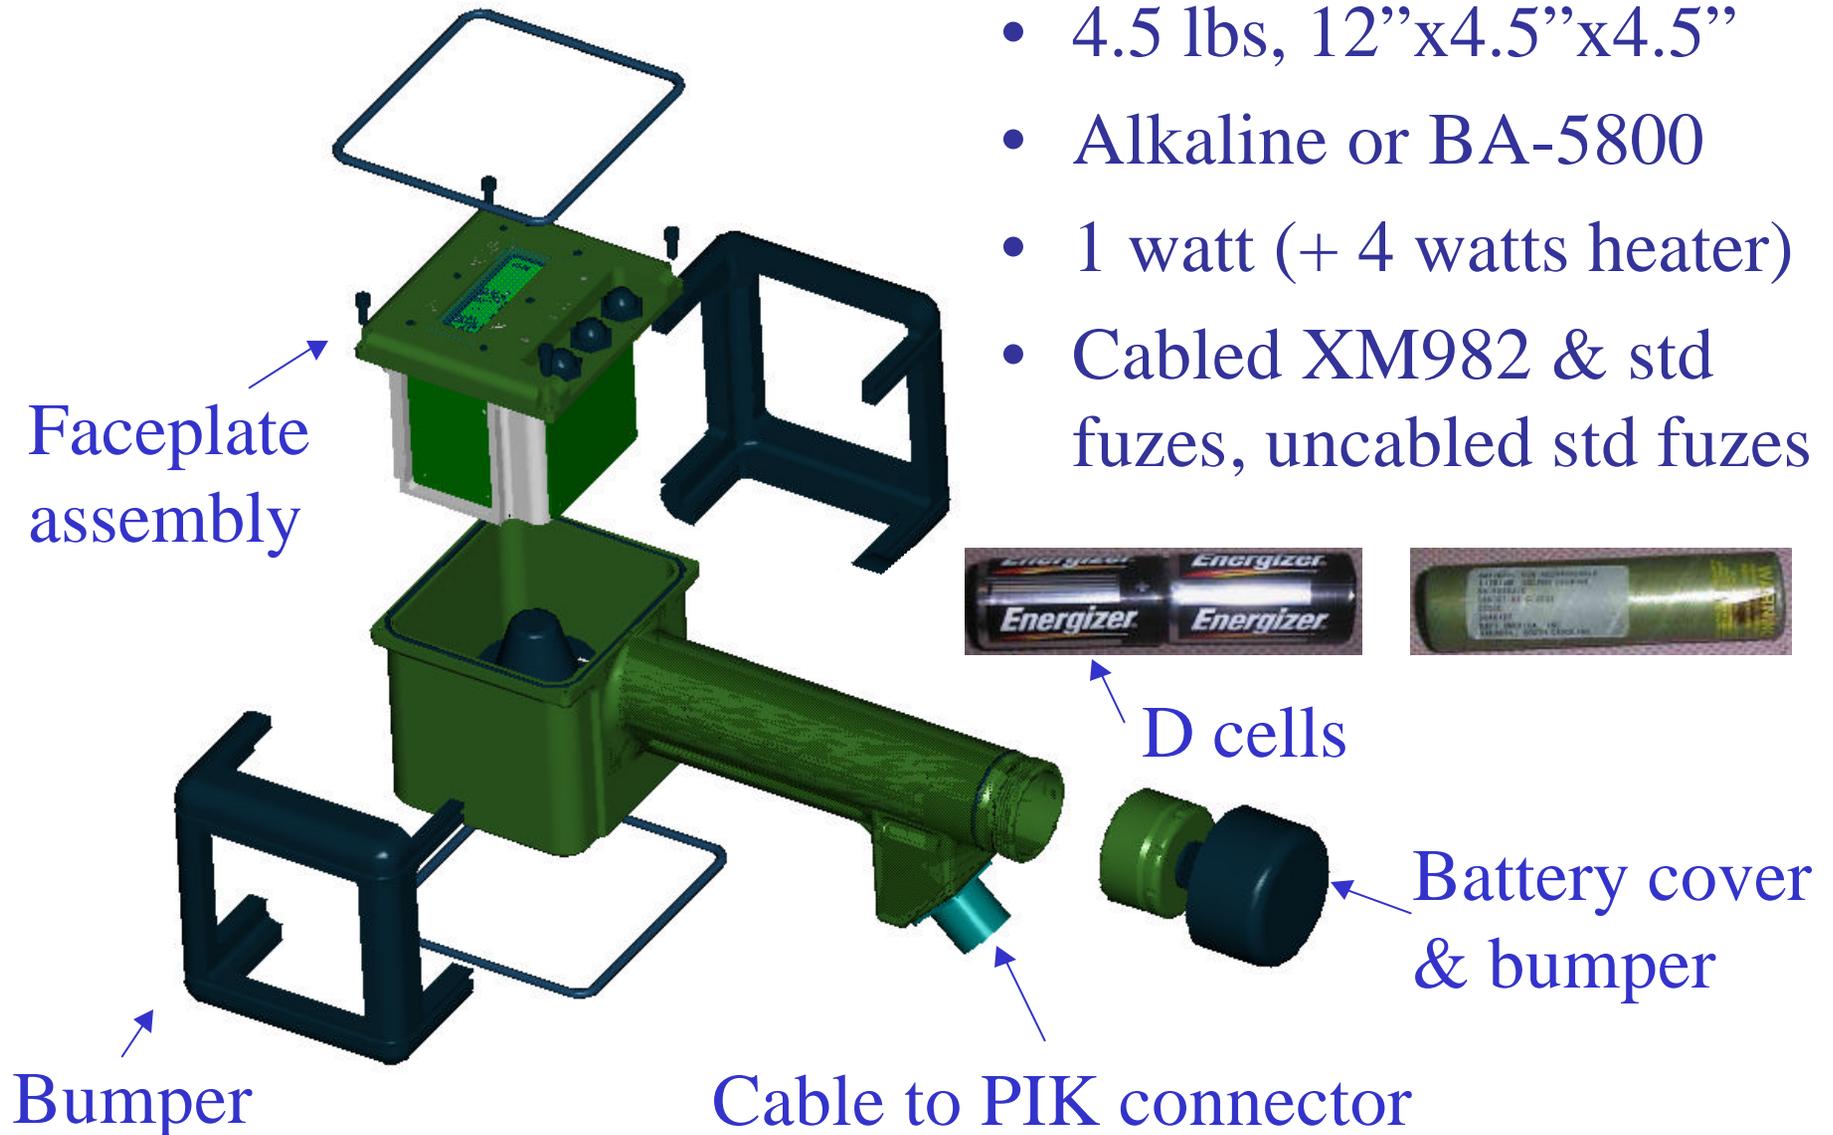

- Rockwell Collins “MPE-S”
- SSI GRAM with SAASM
- 12 channel, L1/L2
- ICD-GPS-153C
- 1 pps & 10 pps
- 3.3 volts, 3 watts
- 3.5”x2.5”x0.6” size

- Antenna
- 3.5”diam
  - 0.7 lbs

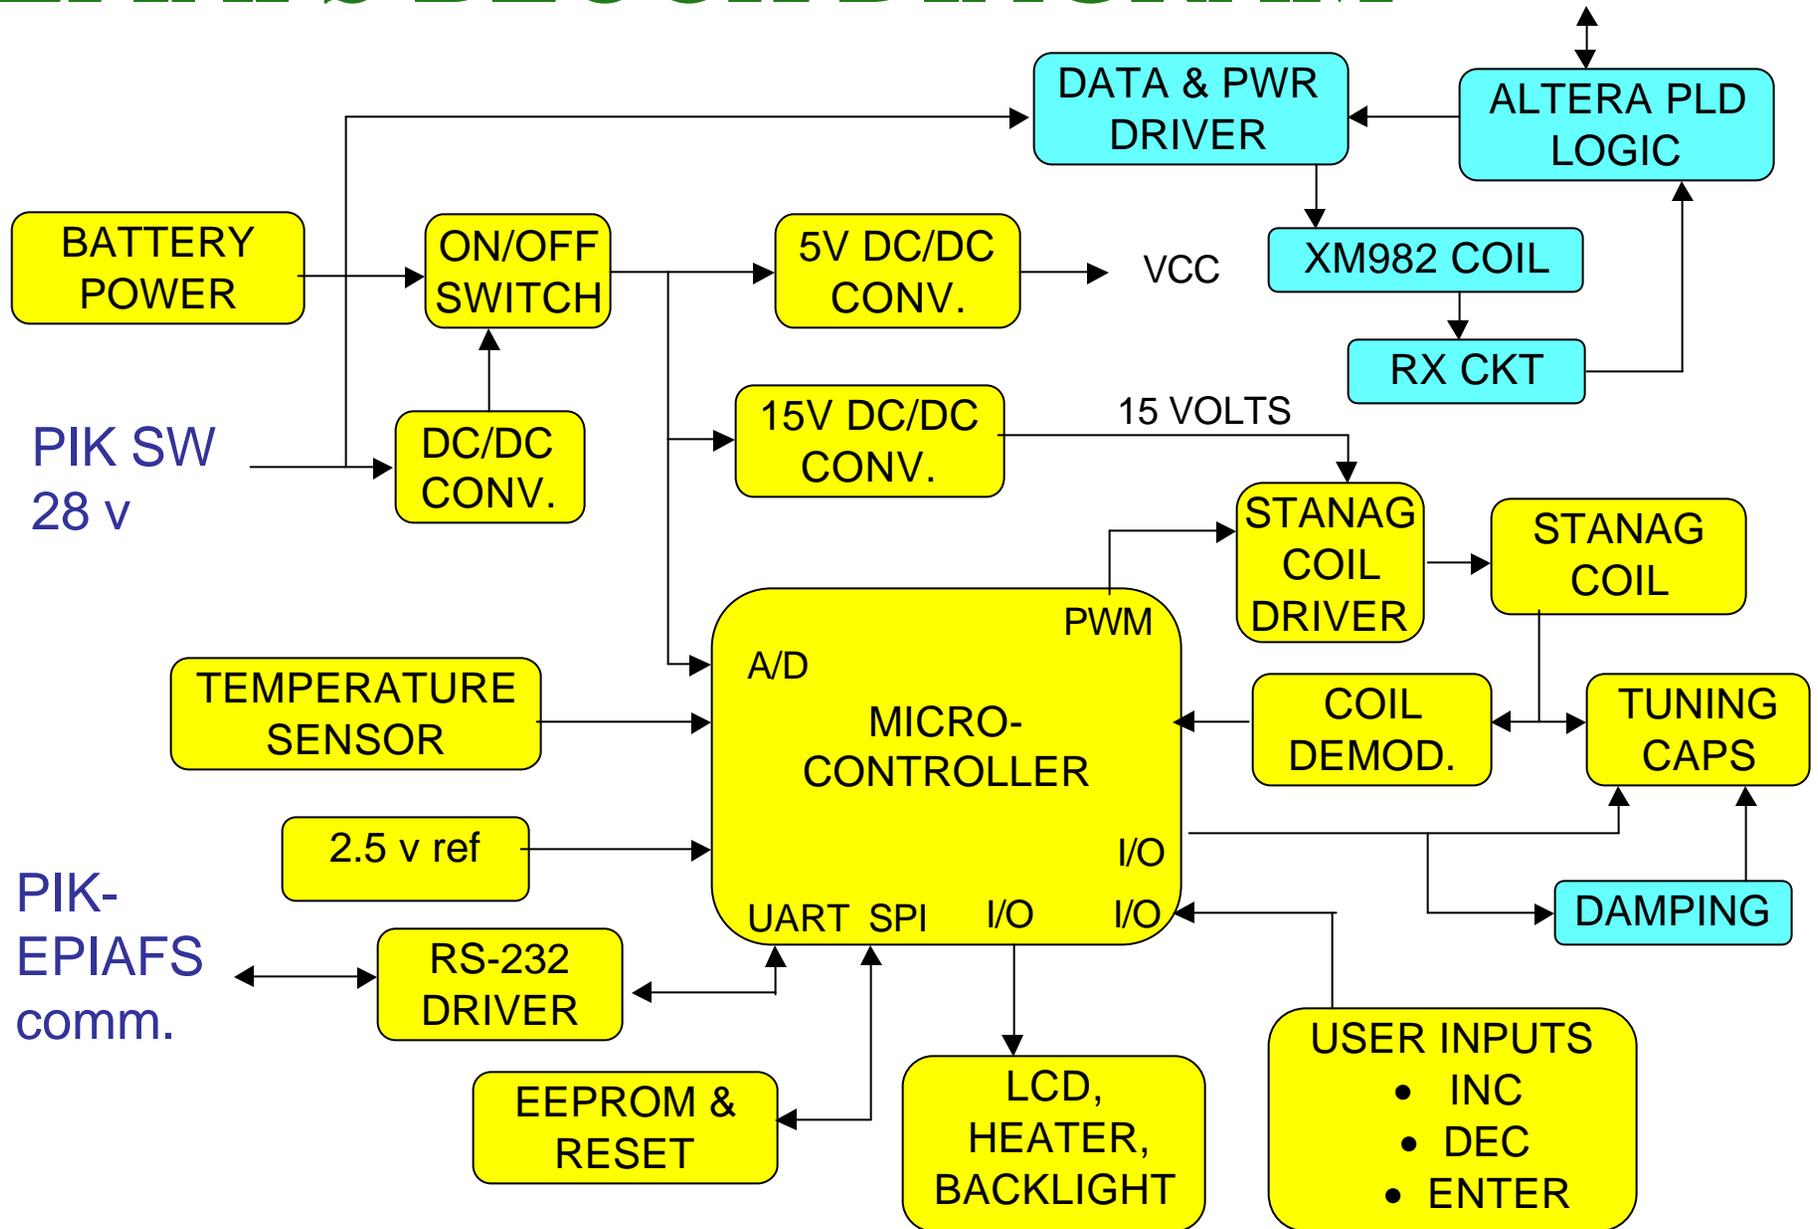

# EPIAFS Exploded View

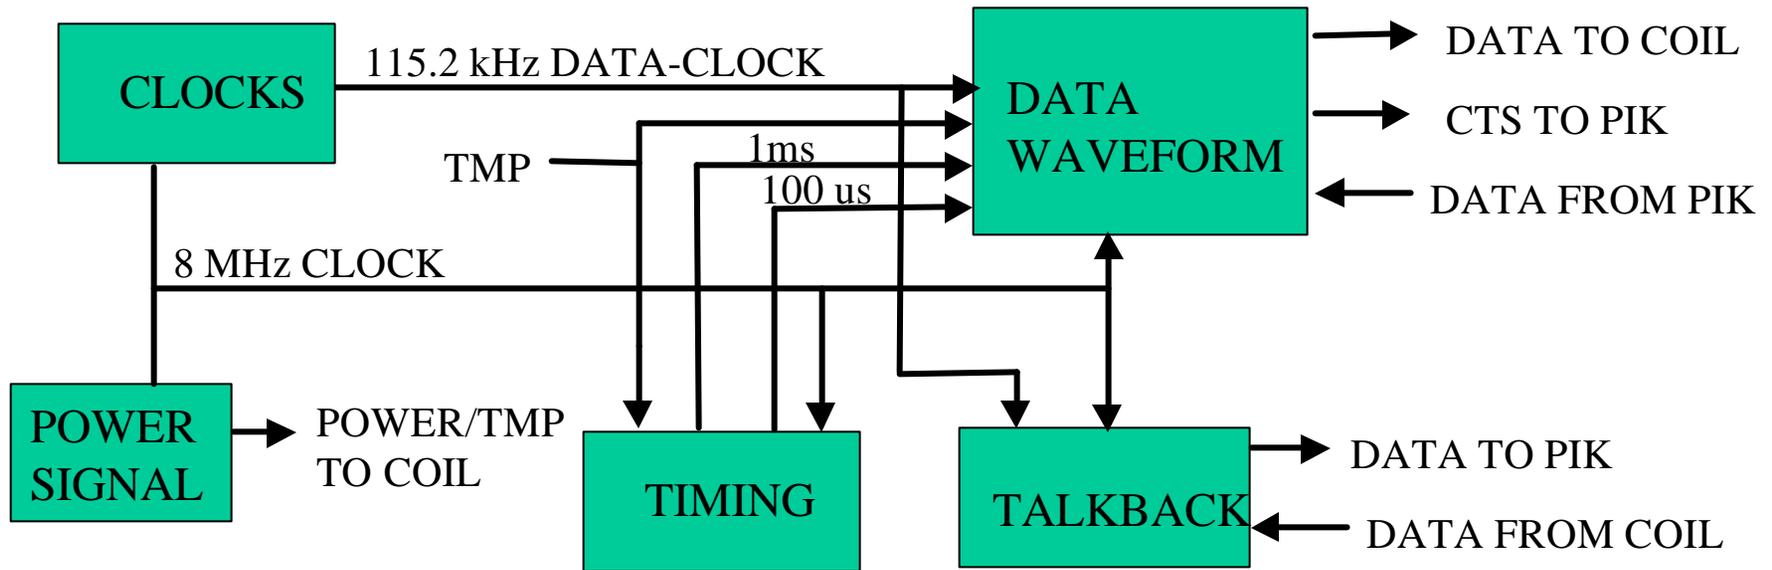

# EPIAFS BLOCK DIAGRAM

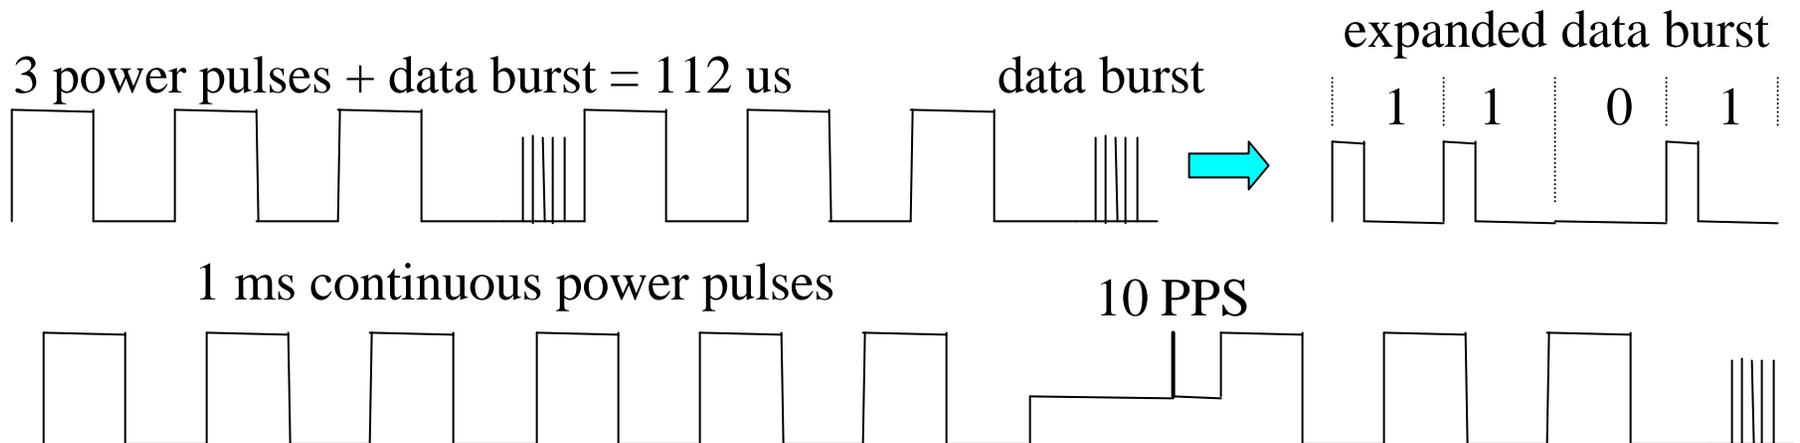

XM982 pwr/data

# EPIAFS XM982 DATA CIRCUIT

## XM982 TX/RX data format

# FSS POWER CONSUMPTION

- Fuze setting off (GPS functional for Talin): 3 watts
- Fuze setting enabled
  - standby: 8 watts (13 watts cold)
  - set std fuze 3 sec : 9 watts (14 watts cold)
  - set Excalibur 3 sec: 95 watts (100 watts cold)
- EPIAFS uncabled
  - standby: 0.4 watt (4.4 watts cold)
  - set std fuze 3 sec: 1 watt (5 watts cold)

# PIK DEMO

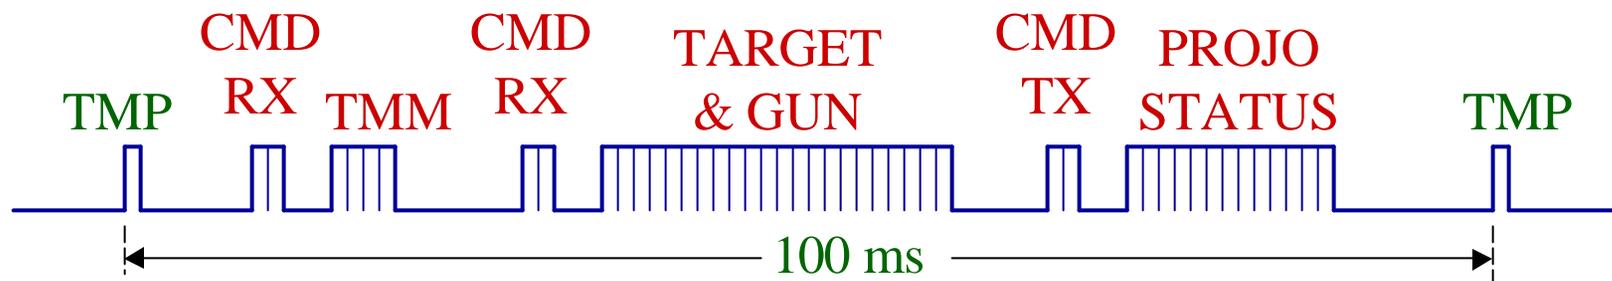

# PIK - PROJECTILE DATA MESSAGES

- Time Mark Message (TMM) and Projectile Control
- TMM and Crypto Keys
- TMM and Target & Gun Data
- TMM and Ephemeris (min. 4)
- TMM and Almanac
- TMM and Subframe Data
- TMM and Projectile Control
- TMM and Final Projectile Status Request

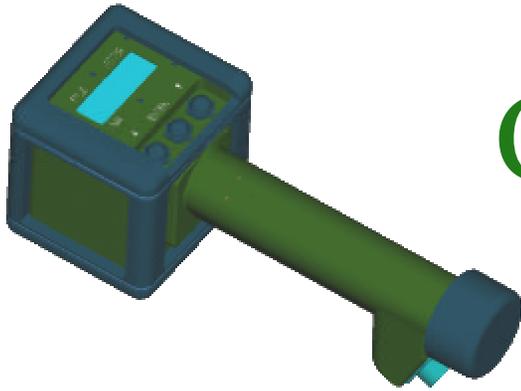

# EXAMPLE 100 ms PIK TO PROJECTILE MESSAGE FRAME

- Sense when Time Mark Pulse arrives
- Read Time Mark Message from GPS receiver
- Send Time Mark Message to Projectile
- Send Target and Gun data to Projectile
- Request a Status Message from Projectile
- Receive and Process the Projectile Status

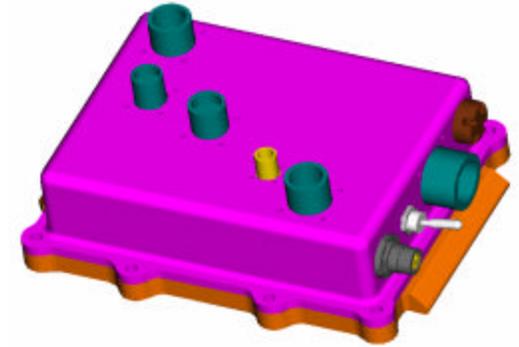

# PLANS

- Finish baseline EPIAFS software
- Complete testing PLD design
- Integrate PLD with coil driver circuit
- Design & build 12v reg and 24v switch
-  • Demonstrate PIK/EPIAFS brass-board
- Update PIK & EPIAFS design
- Convert EPIAFS software to new micro
-  • Deliver prototype setters
- User human factor evaluations
- Assist PIK integration in JLW-155
-  • Test PIK with prototype Raytheon GNC

# CONCLUSION

- PIK Demonstration
  - XM982 data and power inductive interface
  - Initialized projectile simulator
  - Validate PIK baseline software
  - First interface with Talin
- Host & XM982 interface testers
- Draft ICD's
- FSS Prototype packaging
