

# **Joint C2 Interoperability & Network Centric Operations**

March 23, 2005

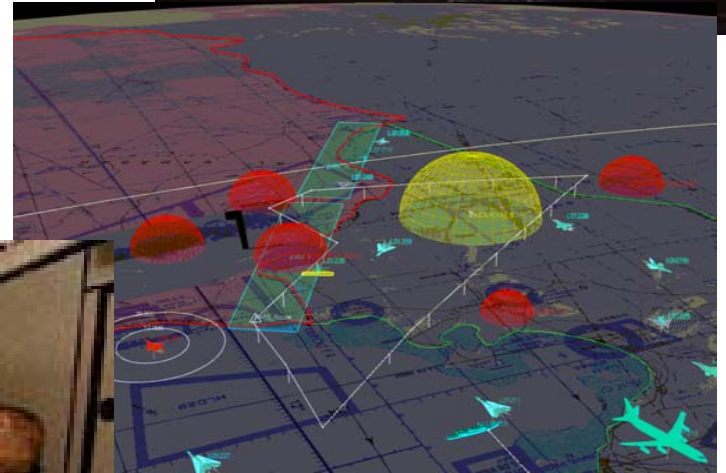

**Gary W. Claunch**

Deputy Director Strategic Planning  
C3IS

Northrop Grumman Corporation  
Defense Mission Systems Division

# Agenda

- Network Centric Warfare
- Command and Control Transition
- Northrop Grumman Initiatives
- Summary

**NORTHROP GRUMMAN**

# *Net-Centric Warfare*

**“An Information Superiority-Enabled Concept of Operations That Generates Increased Combat Power by Networking Sensors, Decision Makers, and Shooters to Achieve Shared Awareness. Increased Speed of Command, Higher Tempo of Operations, Greater Lethality, Increased Survivability and a Degree of Self-synchronization.”**

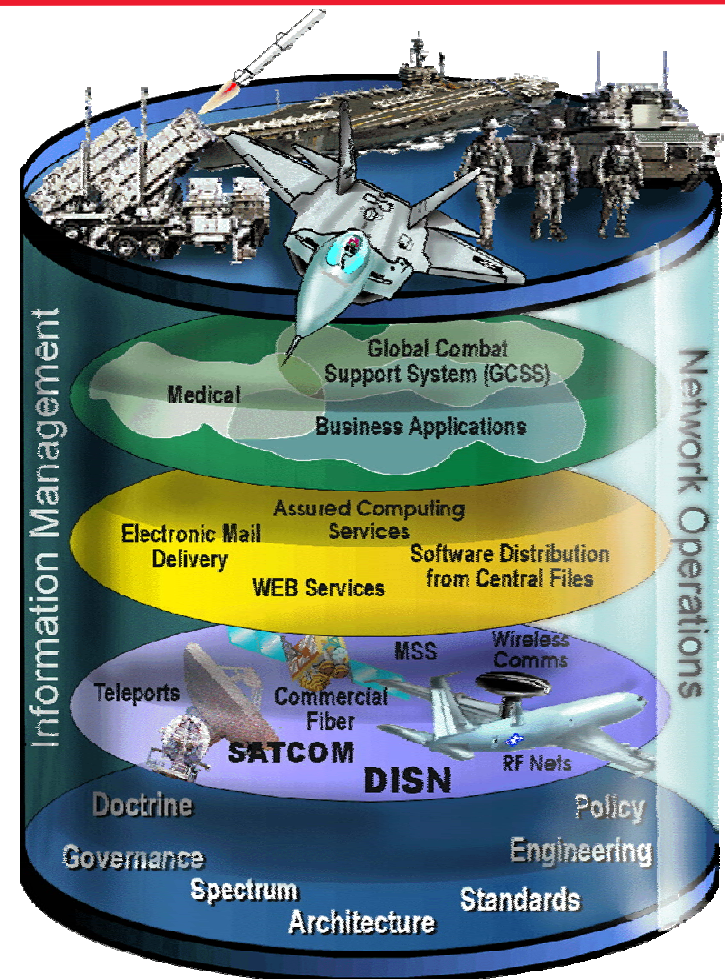

***Network Centric Warfare  
Developing and Leveraging  
Information Superiority  
2<sup>nd</sup> Edition***

***NORTHROP GRUMMAN***

# Fundamental Changes Are Required

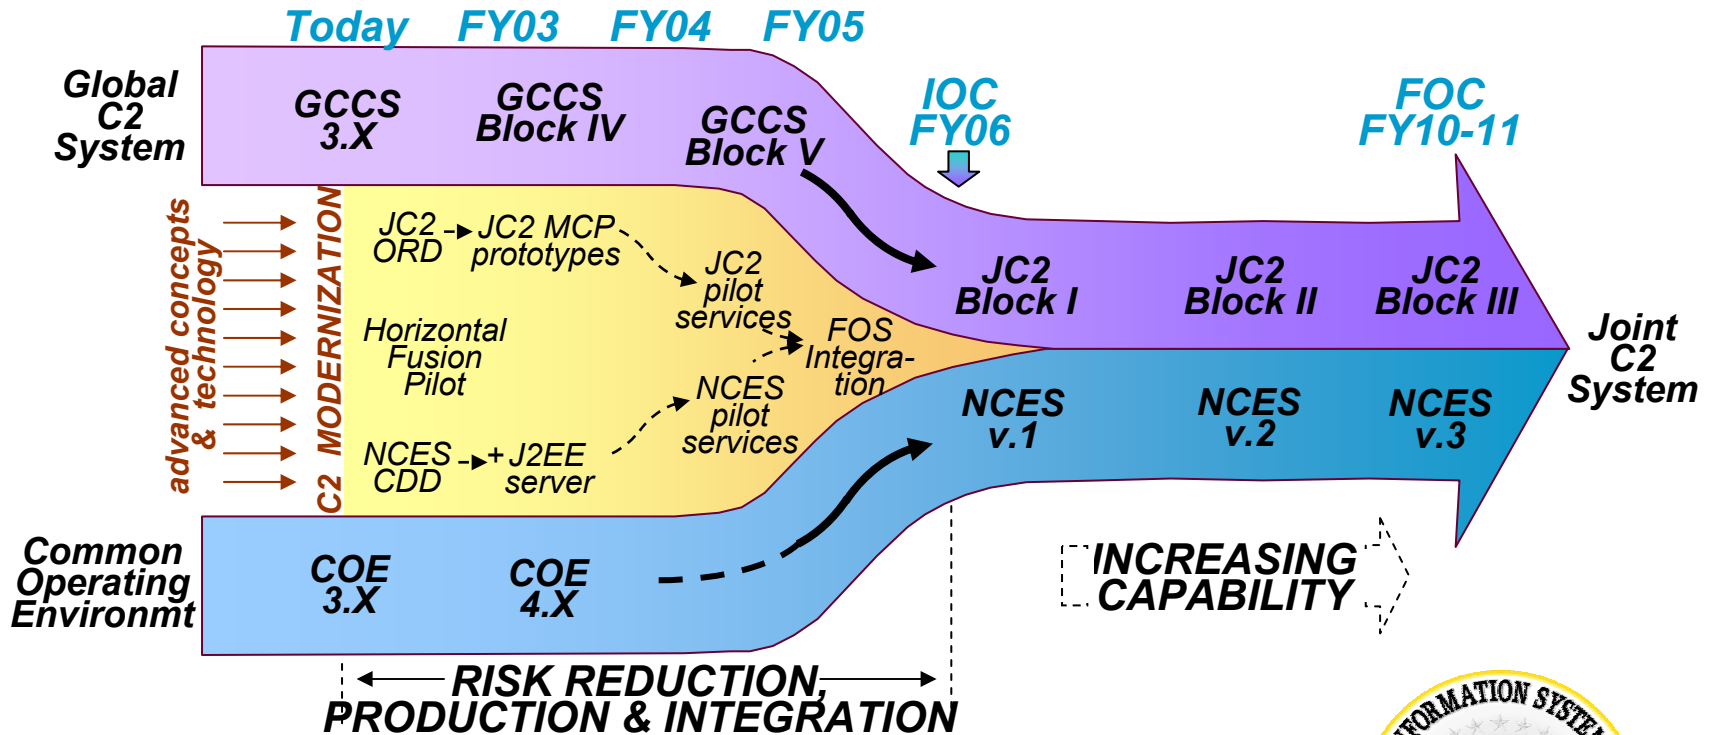

- **Acquisition**
  - Spiral Development
  - Rapid Fielding
  - Leveraged Investments
- **Operational**
  - Increased Automation
  - Comprehensive Mission Planning
  - Speed of Decision
- **Technologies**
  - Service Oriented Architectures
  - Improved Processing
  - Adaptive Communications
  - Unparalleled Connectivity
- **Cultural**
  - Adaptation to Changes

**C2's First Step To Net-Centricity is JC2 / NCES**

**NORTHROP GRUMMAN**

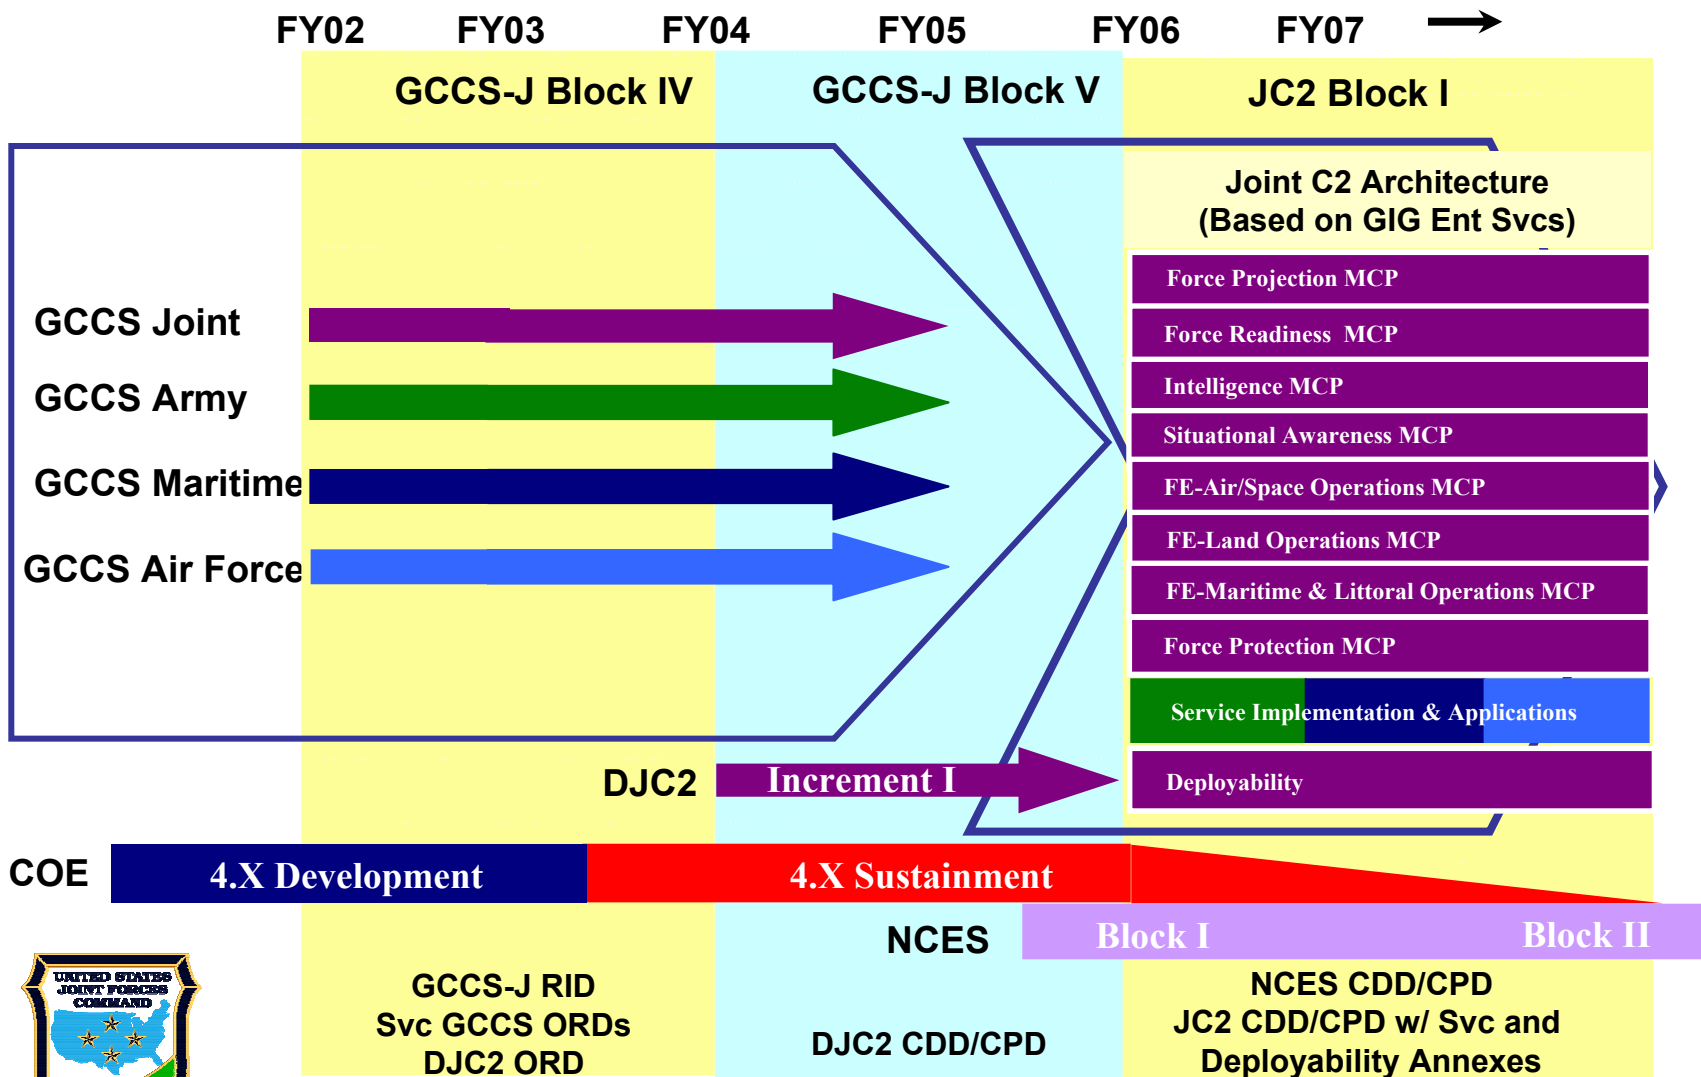

# DISA's Transformation to JC2

- Prototype the functionality of Mission Capability Packages
- Work out interfaces between MCPs
- Work out interfaces with NCES core services
- Develop C2&I-specific net-centric services
- Pilot MCPs with GCCS Block V in operational context
- Integrate final versions with production NCES v.1

# JFCOM's Transformation to JC2

# The JC2/NCES Net Centric

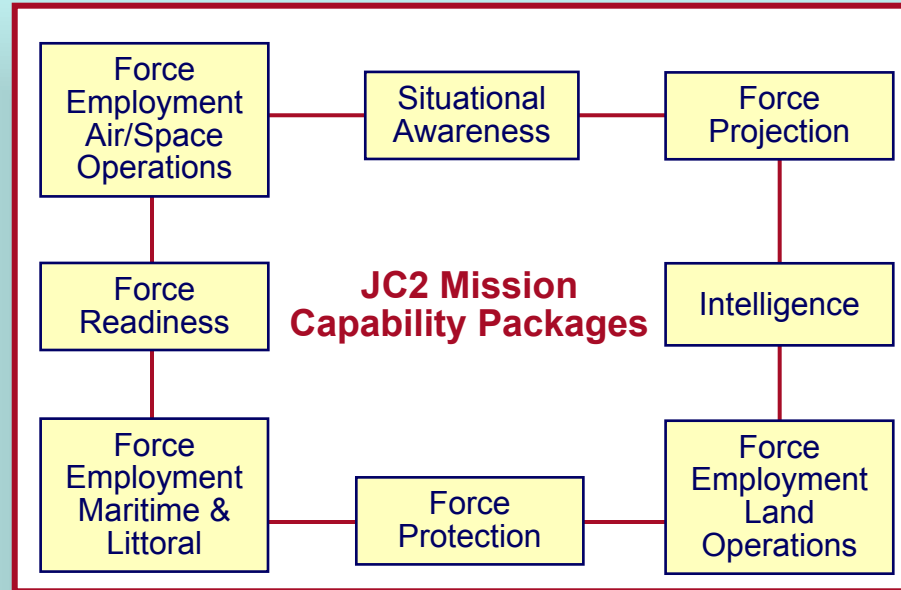

## Global Information Grid (GIG)

### Shared Data Sources

**C2 and I Specific Network Centric Enterprise Services**

*C2 message parsing  
Data Fusion  
COP distribution  
Decision Support  
Etc.*

API

API

- Force-level Planning
- Force Readiness
- SA Tracks
- Force Protection
- Joint IPB
- Targeting
- ISR Management
- Geo-Spatial

**Application Programming Interface (API)**

API

API

- ESM
- Discovery
- Messaging
- Collaboration
- Mediation
- Storage
- IA/Security
- Application
- User Assistant

### Network Centric Enterprise Services (NCES)

# *Adherence to Standards is Fundamental*

- Net-Ready Key Performance Parameter Requires Compliance With:
  - Net-Centric Operations and Warfare (NCOW) Reference Model
    - Net-Centric Data Strategy
    - Net-Centric Checklist
  - Applicable Global Information Grid (GIG) Key Interface Profiles (KIP)
  - DoD Information Assurance Requirements
  - Supporting Integrated Architecture Products
  - Joint Technical Architecture

# Government Standards Are Being Identified

## Net-Centric Operations and Warfare (NCO) Reference Model Operational Concept Graphic (OV-1a)

Describes the **Activities Required to Establish, Use, Operate, and Manage the Net-centric Enterprise Information Environment** to include: the Generic User-Interface, the Intelligent-assistant Capabilities, the Net-centric Service Capabilities (Core Services, Community of Interest (COI) Services, and Environment Control Services), and the Enterprise Management Components. It Also Describes a Selected Set of Key Standards That Will Be Needed As the NCO Capabilities of the GIG Are Realized.

**NORTHROP GRUMMAN**

# *Spiral Development is the Approach*

“A Desired Capability Is Identified, but the End-state Requirements Are Not Known at Program Initiation. Requirements Are Refined Through Demonstration, Risk-management, and Continuous User Feedback. Each Increment Provides the Best Possible Capability, but Requirements for Future Increments Depend on User Feedback and Technology Maturation.” (DoD 5000.1)

**Rapid Delivery of an N% Solution Provides Adaptability to changes in Requirements and Technologies on an Affordable Basis**

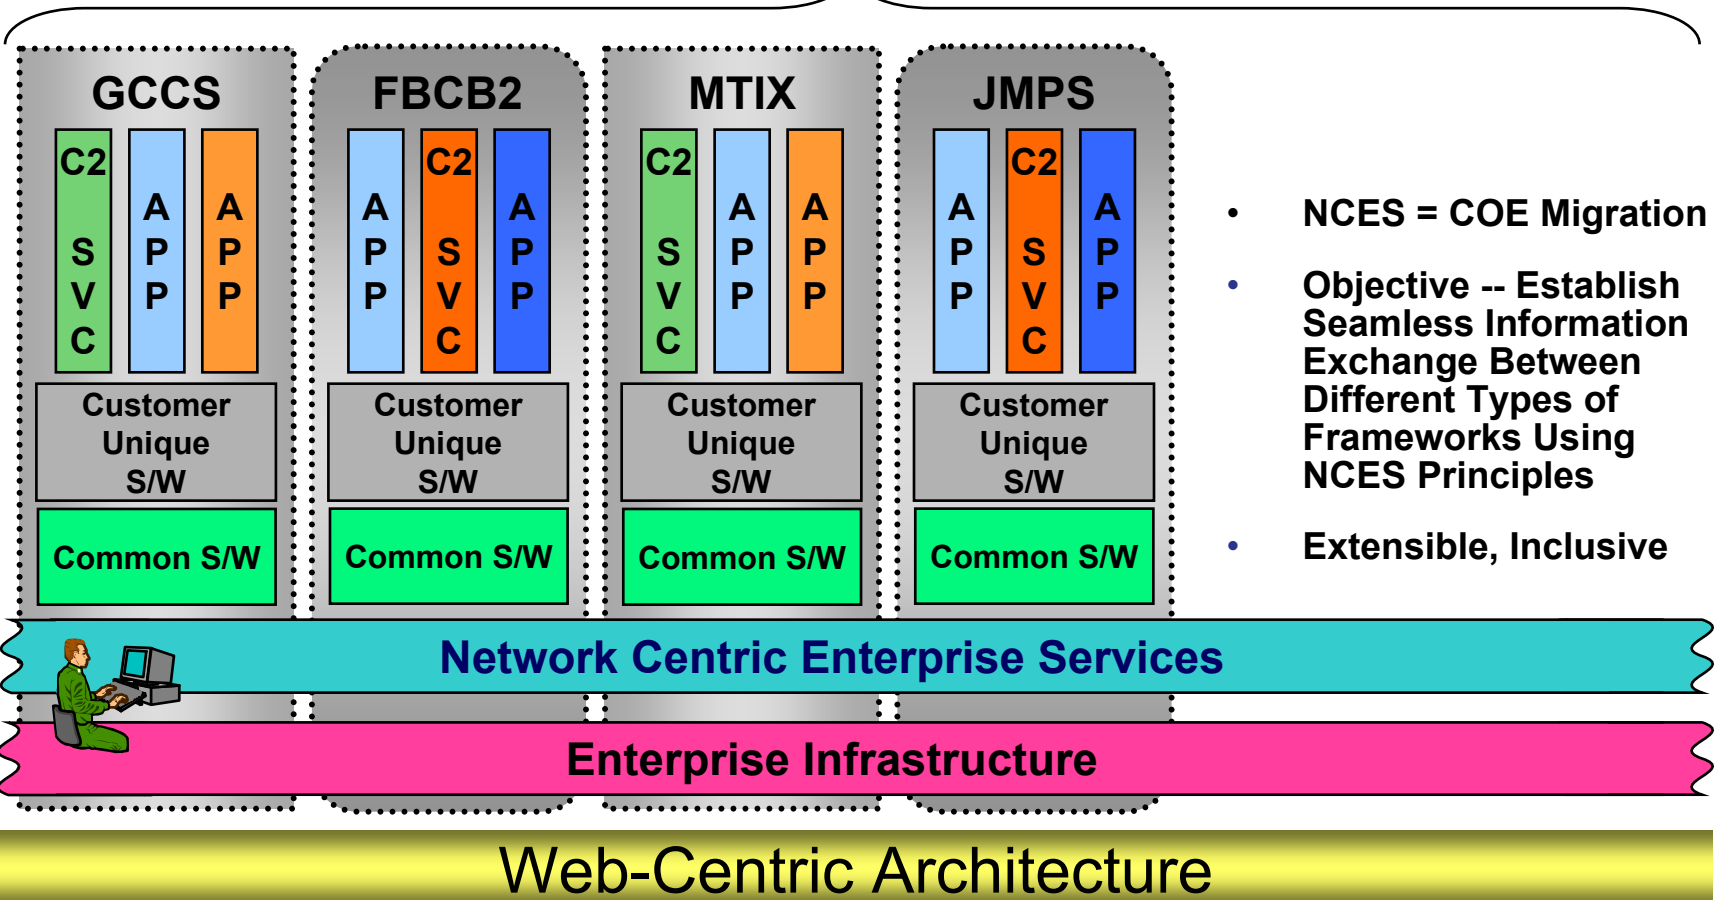

***NCC Pilot is the Spiral Development Engine for C2***

**NORTHROP GRUMMAN**

# NGC Frameworks Initiative – Closing the Seams

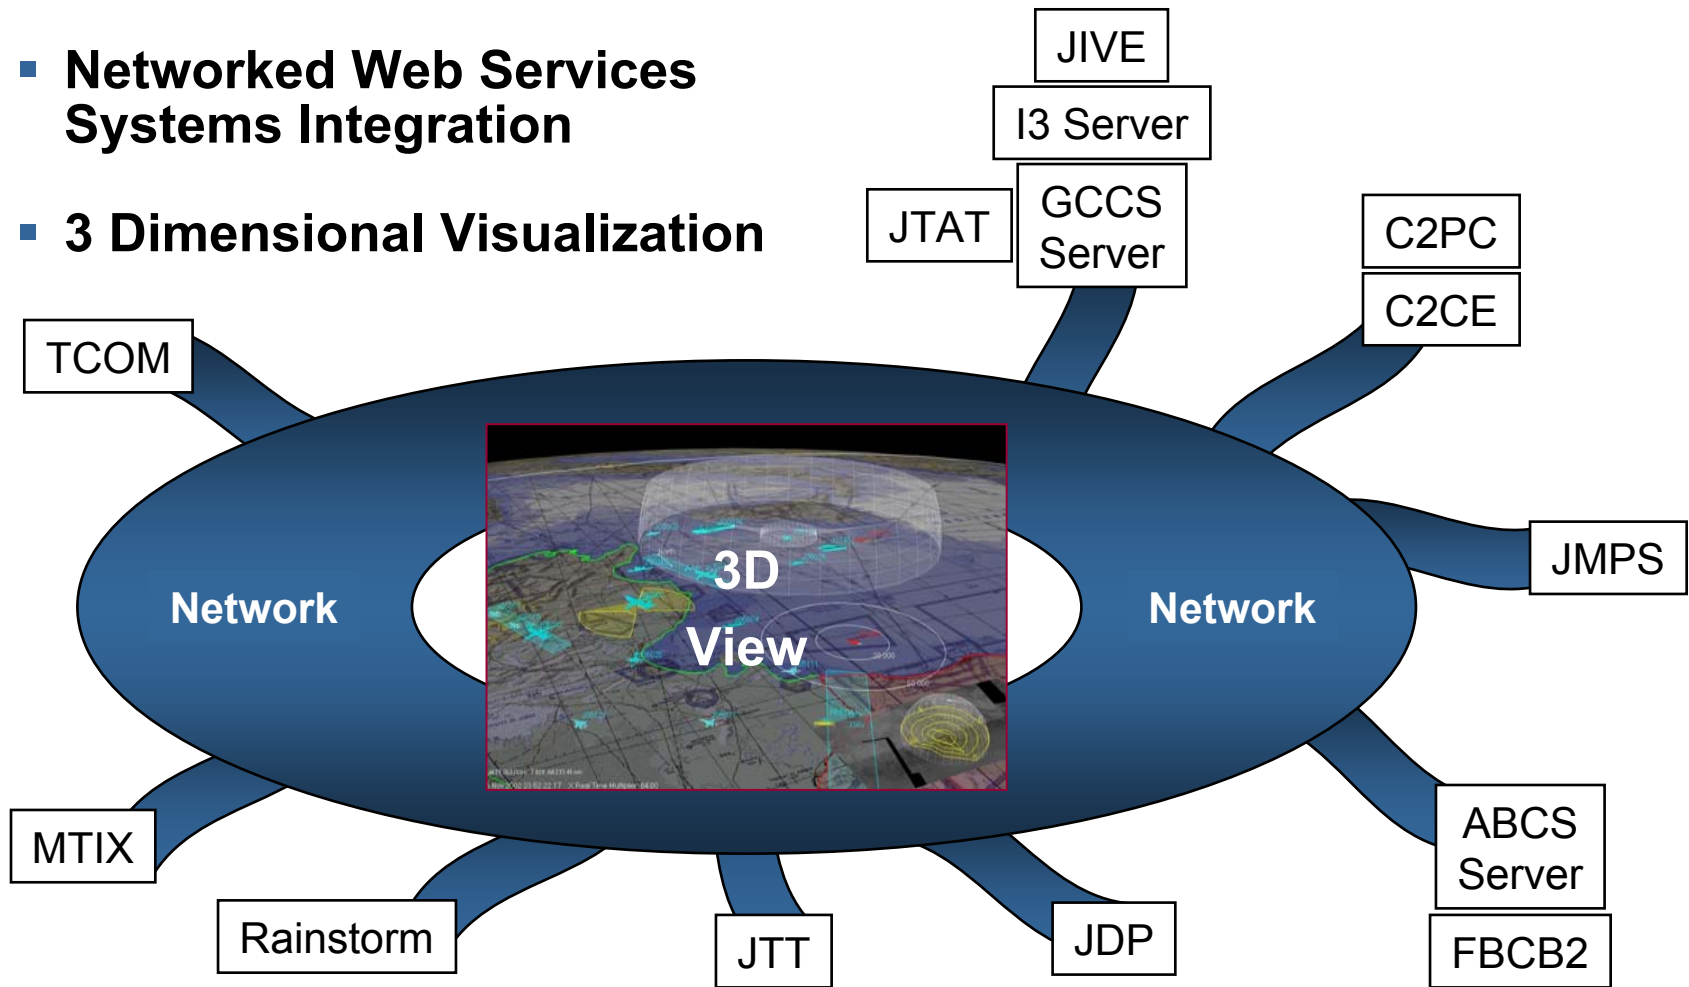

## Addressing the Issues of a Service Oriented Architecture

### Network Nodes

# Current C2 Frameworks Configuration

- **Networked Web Services Systems Integration**
- **3 Dimensional Visualization**

*Seamless Data Exchange Independent of Platform or Operating System*

**NORTHROP GRUMMAN**

# *Service Oriented Architectures*

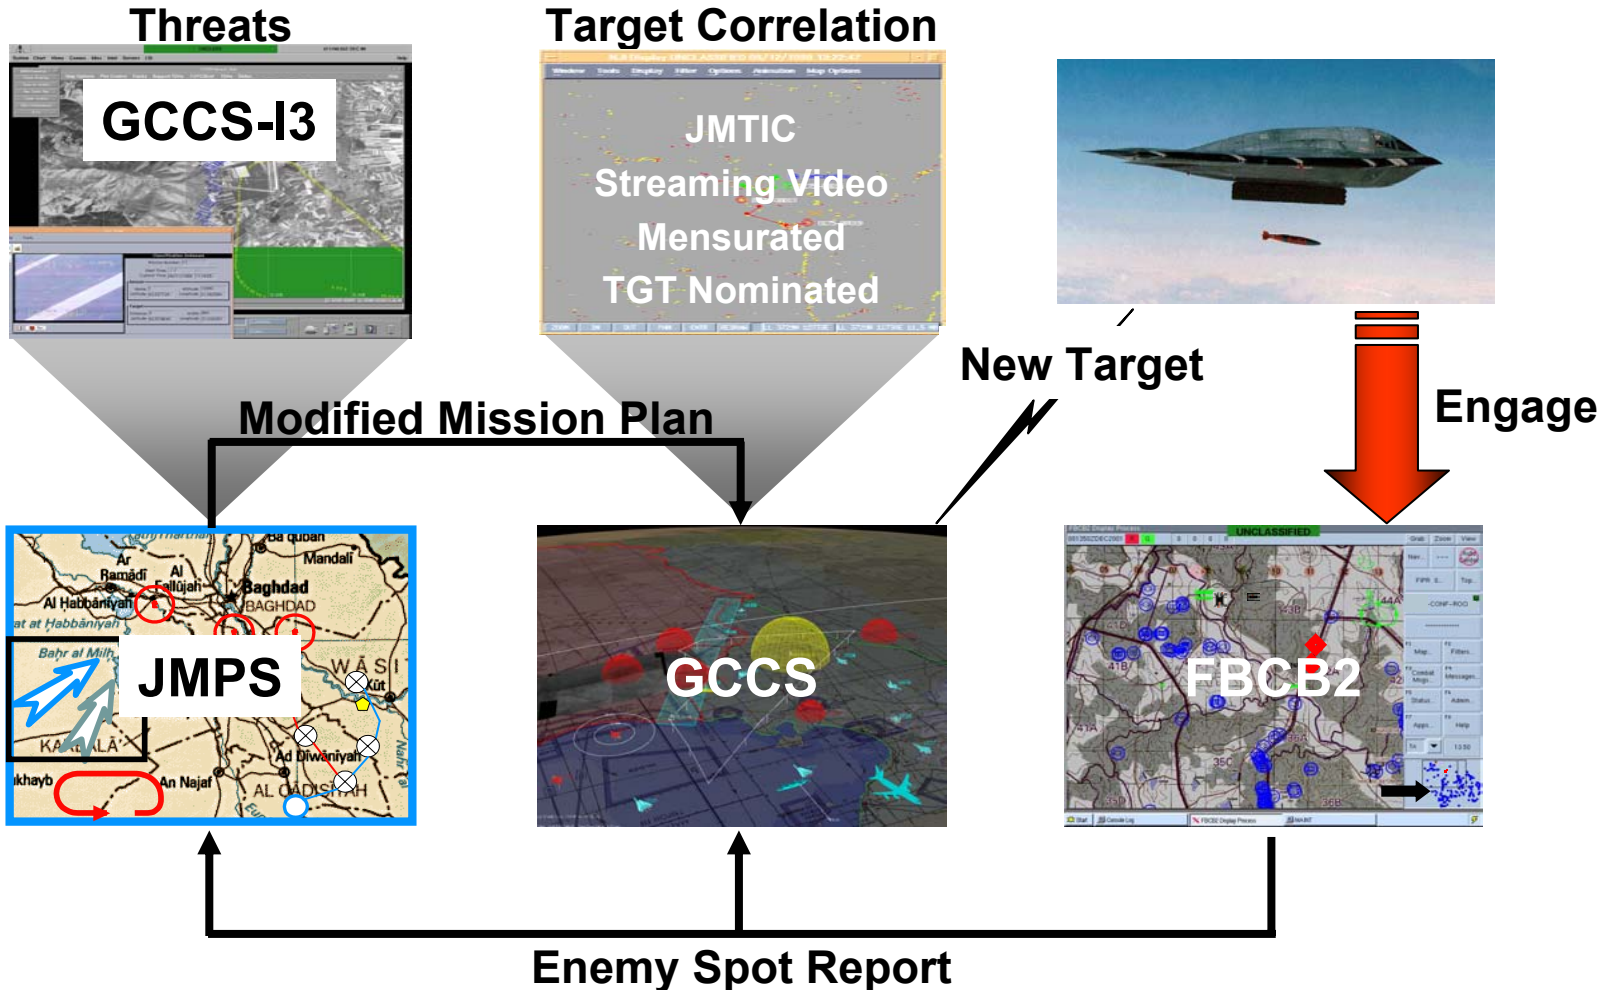

- **Enables Machine to Machine Interfaces**
- **Provides Rapid Addition of Capabilities**
  - **GCCS-M to AIS Interface Delivered in 30 Days**
    - **Very affordable**
  - **Exercised in Trident Warrior 04**
  - **Participating in Trident Warrior 05**
- **Leverages Current Investments**
  - **Provides Fielded Systems Another Level of Interoperability**

*Rapid, Affordable Addition of Capability for Fielded Systems*

**NORTHROP GRUMMAN**

# Product is "Integration at the Next Higher Level"

## Dynamic Re-Planning

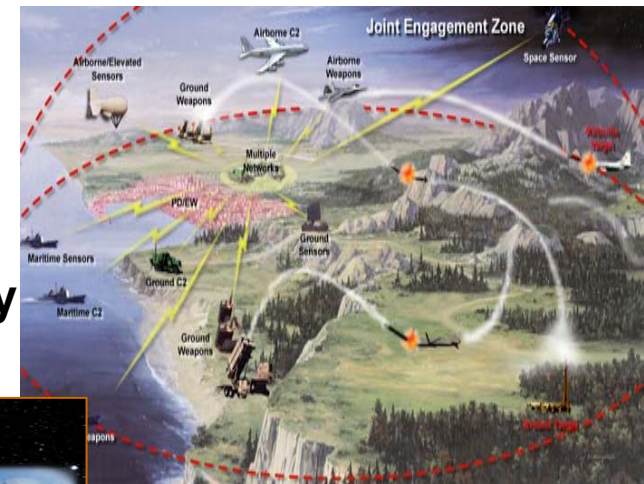

**New Capability That Individual Systems do not Have**

**NORTHROP GRUMMAN**

# Summary

- **Movement is in the Right Direction**
  - Continue Definition of Standards
  - Spiral Development is the Correct Path
    - Incremental improvements
  - Continue to Improve Acquisition approach
- **Technology is Ready**
  - Service Oriented Architectures Can Leverage Current Investments
  - Machine to Machine Interfaces to Rapidly Add Capabilities are Attainable

**NORTHROP GRUMMAN**
