Conclusion

Tools

Conclusion

- The Whale Chart maps the Life Cycle to the Readiness Levels and R&D Stages

- A technology's usefulness changes over time

 - Utility increases as a technology matures

 - Utility decreases as a technology becomes obsolete

Knowledge Growth

	Key Question	<u>Basic Research</u>	<u>Applied Research</u>	<u>Advanced Research</u>	<u>ATD</u>	<u>Man Tech</u>
Technology Life Cycle	1. Who is your customer ?	Partial	Nearly Complete	Complete	Complete	Complete
AFRL SE Initiative	2. What are customer's requirements ?	Partial	Partial	Nearly Complete	Complete	Complete
Risk Management	3. How will you demonstrate you have met the requirements?	Partial	Partial	Nearly Complete	Complete	Complete
Interim Conclusion	4. What are the technology options ?	Extremely Limited	Nearly Complete	Complete	Complete	Complete
Tools	5. Which is the best approach ?	Extremely Limited	Nearly Complete	Complete	Complete	Complete
Conclusion	6. What are the risks to developing the selected technology?	Partial	Partial	Nearly Complete	Complete	Complete
	7. How will you structure your program to meet requirements and manage risk?	Partial	Nearly Complete	Complete	Complete	Complete
	8. What is your business-based transition plan that meets customer approval?	Extremely Limited	Partial	Nearly Complete	Complete	Complete

Two of the Key Questions Focus on Risk in R&D

What are the **risks** to developing
the selected technology?

How will you **structure** your **program**
to meet requirements and manage risk?

RM Tailored to R&D Goals

Risk
Management

Interim
Conclusion

Tools

Conclusion

- **Three Distinct Levels of Research and Development**
 - **Basic Research** – develop a fundamental understanding of selected physical properties
 - **Applied Research** – investigate application of physical properties to selected technical needs
 - **Advanced Technology Development** – explore application of technology to assess military relevance

Philosophy of RM in Basic Research

Life Cycle

AFRL SE
Initiative

Risk
Management

Interim
Conclusion

Tools

Conclusion

What

- **Develop cost estimates for advancement of technology to useful level**
- **Identify development options and relative difficulty of options**
- **Maintain budget within pre-defined boundaries**

How

- **Establish knowledge incremental goals**
- **Estimate cost/time needed to achieve**
- **Determine risks associated with maintaining cost/schedule**
- **Track variances for periodic cost/schedule replan**

Primary purpose of RM in Basic Research is to refine development roadmap

Philosophy of RM in Applied Research

Risk
Management

Interim
Conclusion

Tools

Conclusion

What

- **Develop technology into a repeatable engineering capability**
- **Identify extent of applicability of technology to military needs**
- **Determine the cost/benefit parameters of this new capability**

How

- **Explore range of application of technology**
- **Refine development roadmap for specific applications**
- **Determine risks associated with achieving required performance at known cost/schedule**
- **Identify issues of repeatability and define mitigation approaches**

Primary purpose of RM in Applied Research is to balance cost & performance

Philosophy of RM in Advanced Technology Development

Technology

AFRL SE
Initiative

Risk
Management

Interim
Conclusion

Tools

Conclusion

What

- Apply engineering capability to specific military need
- Identify issues causing uncertainty in application
- Refine cost/performance relationship.

How

- Manage to cost/schedule
- Provide mitigation options and go/nogo gates
- Determine risks early, maintain constant awareness
- Identify potential of cost/schedule failure early (precursors), manage proactively

Primary purpose of RM in ATD is to balance cost, performance, schedule

Risk Management Summary

Conclusion

Key Questions 6 and 7 provide the basis of the AFRL Risk Management process

Questions apply to R&D programs at all stages of maturity

Knowledge available to the program manager changes with program maturity

Risk Management philosophy changes with program maturity
