

Transforming National Security

...The Logic

...The Dynamic

...The Opportunity

Information Age

Globalization II

Globalization III

Industrial Age

Vision: Broad and Sustained Competitive Advantage

- *Strategic Imperative*
- *Capabilities*
- *New Logic and Metrics*
- *Opportunities*

*Terry J. Pudas
Acting Director, Force Transformation
15 March, 2006*

Transforming Defense

...The Concept

Elements of Transformation

- ✓ Continuing process
- ✓ Creating/anticipating the future
- ✓ Co-evolution of concepts, processes, organizations, and technology
- ✓ New competitive areas/competencies; revalued attributes
- ✓ Fundamental shifts in underlying principles
- ✓ New sources of power
- ✓ Culture - attitudes, values, beliefs

- *New Strategic Context*
- *Broadened Threat Context*
- *Technological Threats*
Facilitated by Falling Barriers to Competition

"The ultimate competitive advantage lies in an organization's ability to learn and rapidly transform that learning into action."

Jack Welsh

Transforming Defense

...Compelling Need

- **New strategic context**

New Theory of War based on information age principles and phenomena

New relationship between operations abroad and homeland security

New concept/sense of security in the American citizen

- **Broadened threat context**

State/Non-State

Symmetric/Asymmetric

Traditional/Unrestricted

- **New technological threats facilitated by the falling barriers to competitive entry**

Immediate accessibility to highly capable low cost IT

Opens key operational domains to competition: space, sea, cyberspace

To the extent we do not transform, we are at risk

Transforming Defense

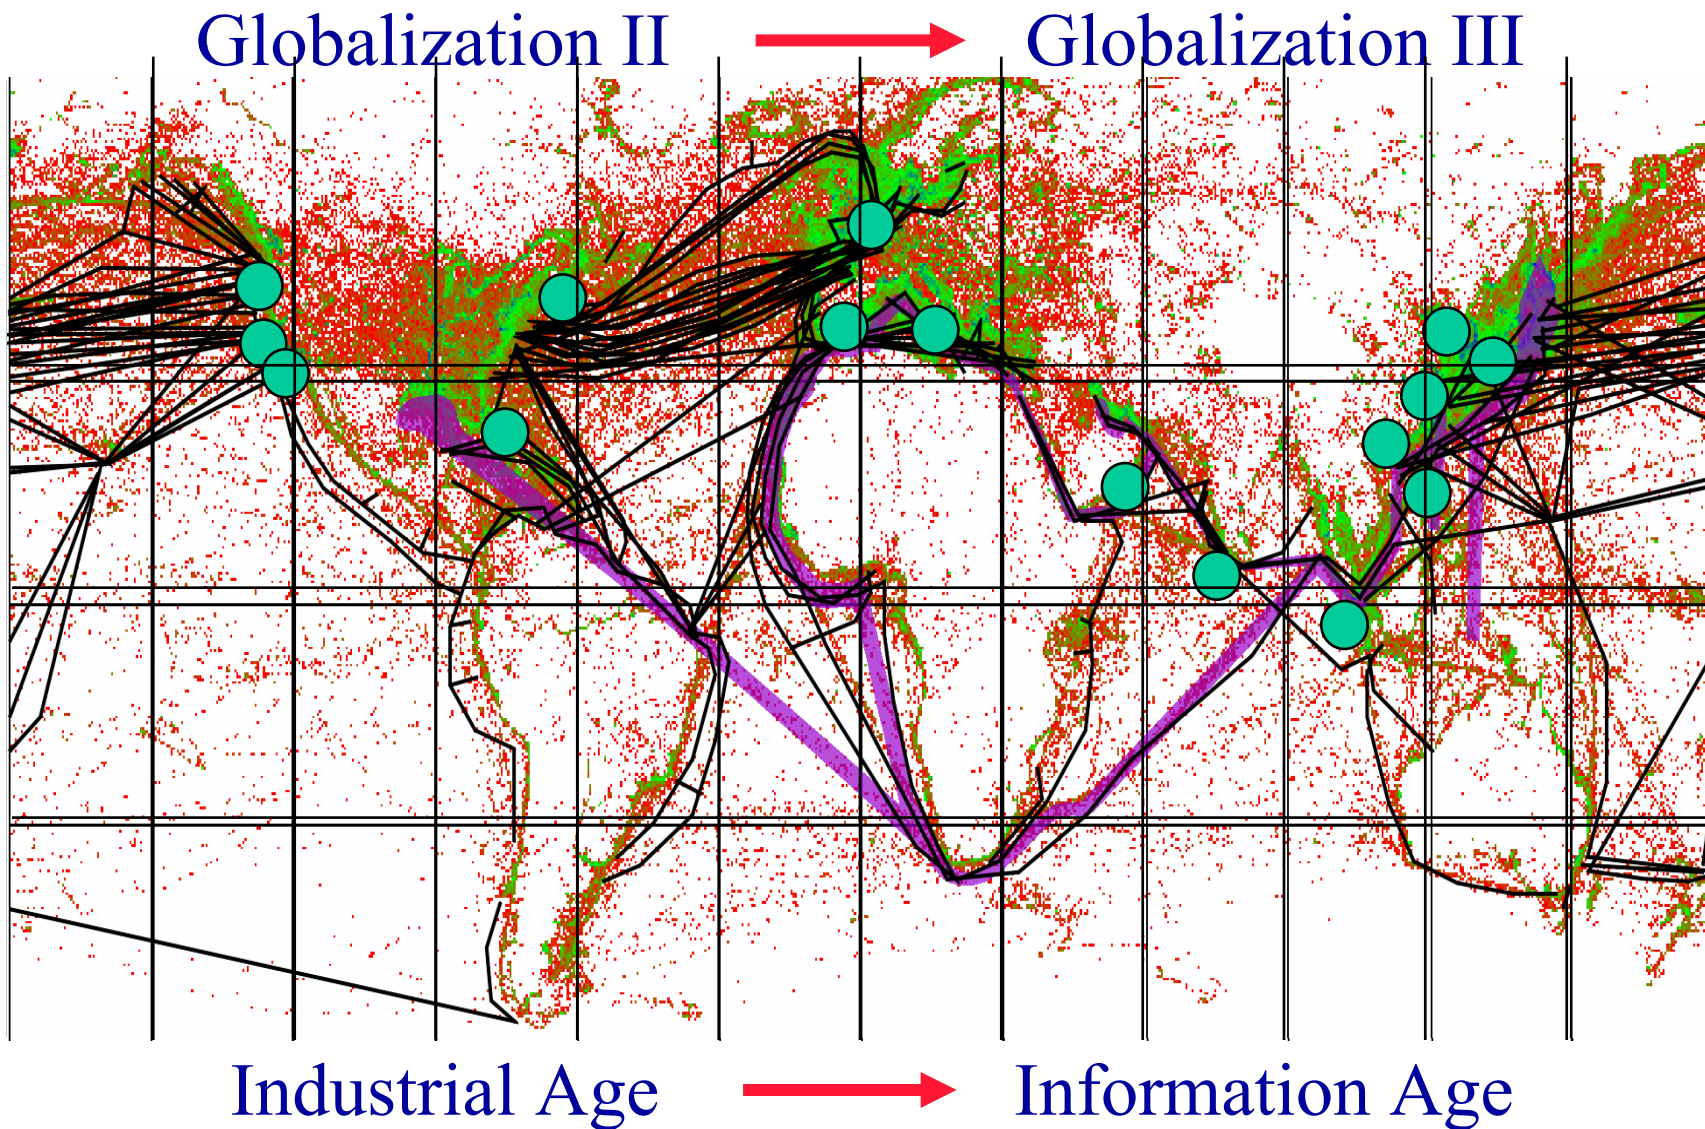

...Elements of Strategy

- Transform from Industrial Age to the Information Age
Implement Network Centric Operations
- Ensure sustained competitive advantage
Assure Allies
Dissuade competitive entry
Underwrite deterrence
Implement countervailing strategies
- Broaden the capabilities base
Operational, Technical, Industrial
Create new competitive areas
Revalue competitive attributes for the information age
Decrease capabilities cycle time
- Leverage advantages and opportunities
Manage the devolution of “sunset” capabilities and processes

Achieve Speed and Agility vice Optimization

Global Trends

Trends in Security Competition

Information Age

- Short Cycle Time
- Mass Customization
- Adaptive Planning
- Interdependence

Globalization II (1947 – 199X)

- Developed Rules
- Mature Markets
- Narrowing Customer Base
- Security = Defense

Globalization III (199X – 20XX)

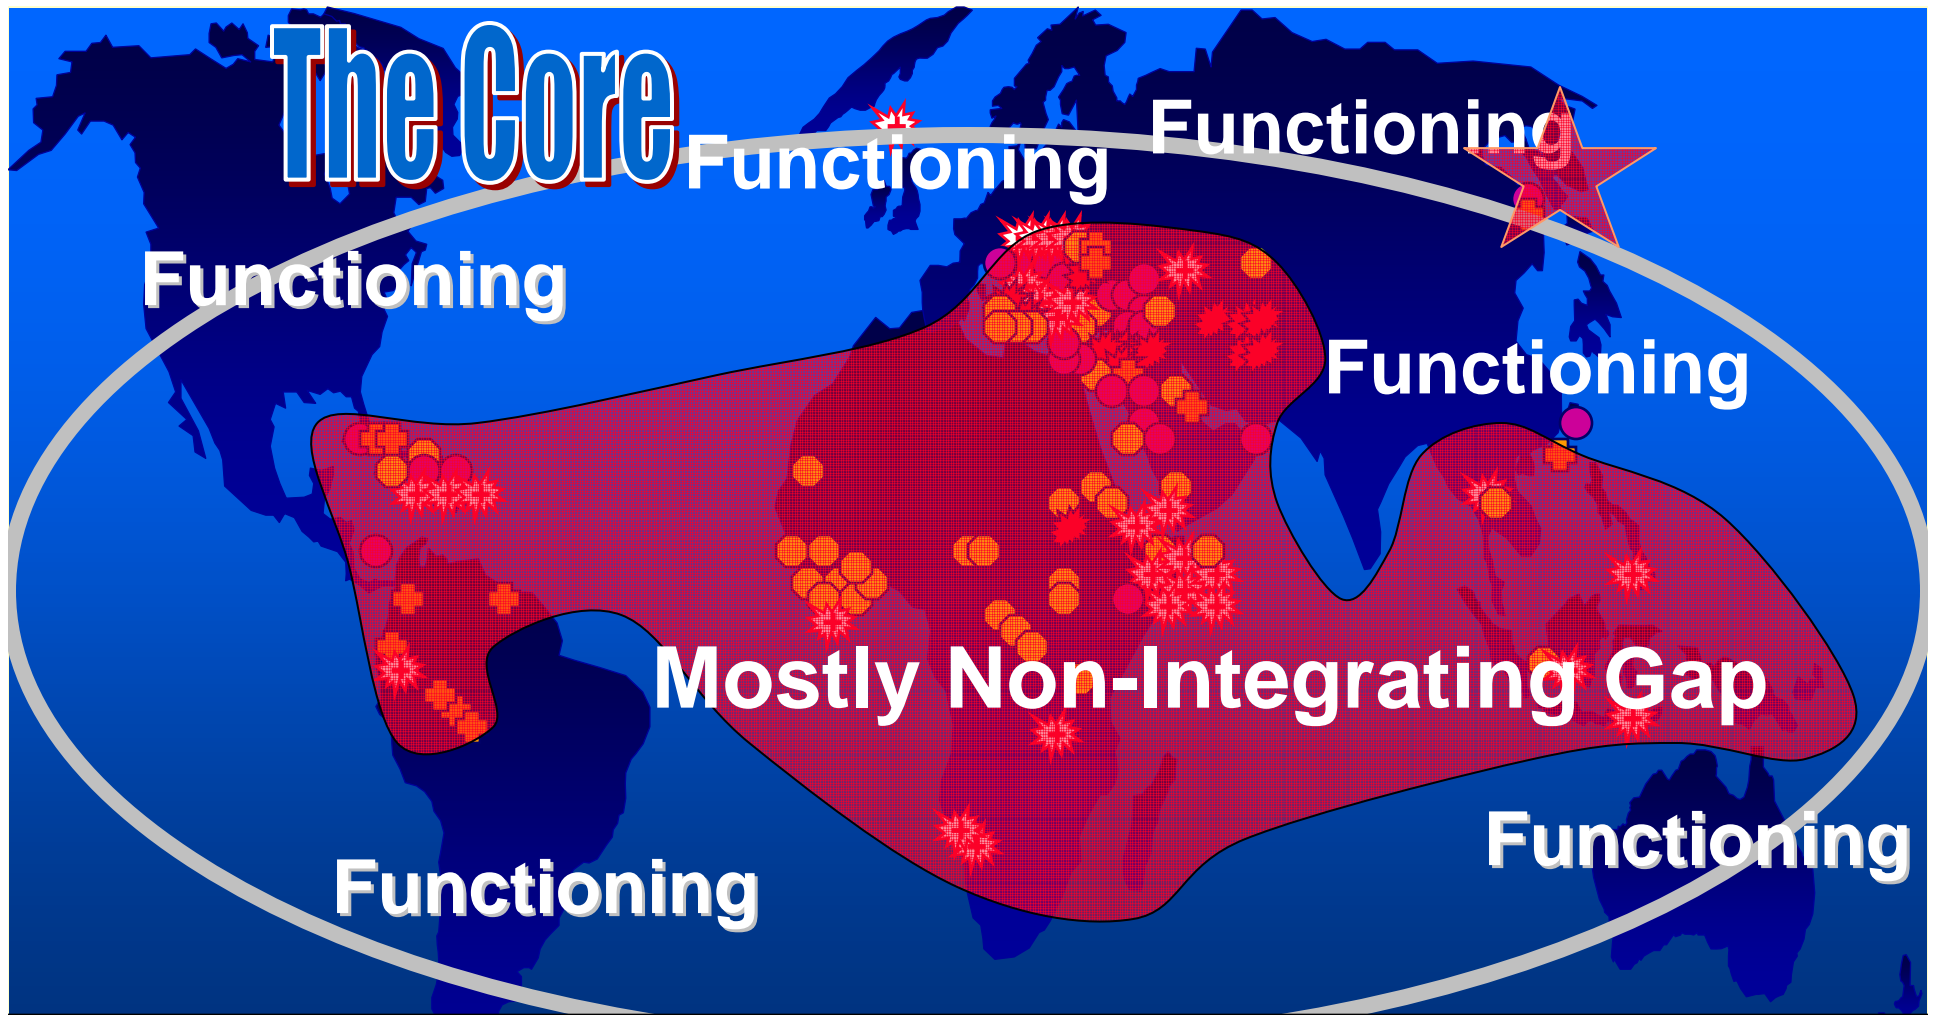

- Emerging Rules
- Market Opportunities
- New Customer Base Emerging
- Security = All Else + Defense

Industrial Age

- Long Cycle Time
- Mass Production
- Deliberate Planning
- Tortured Interoperability

Globalization III

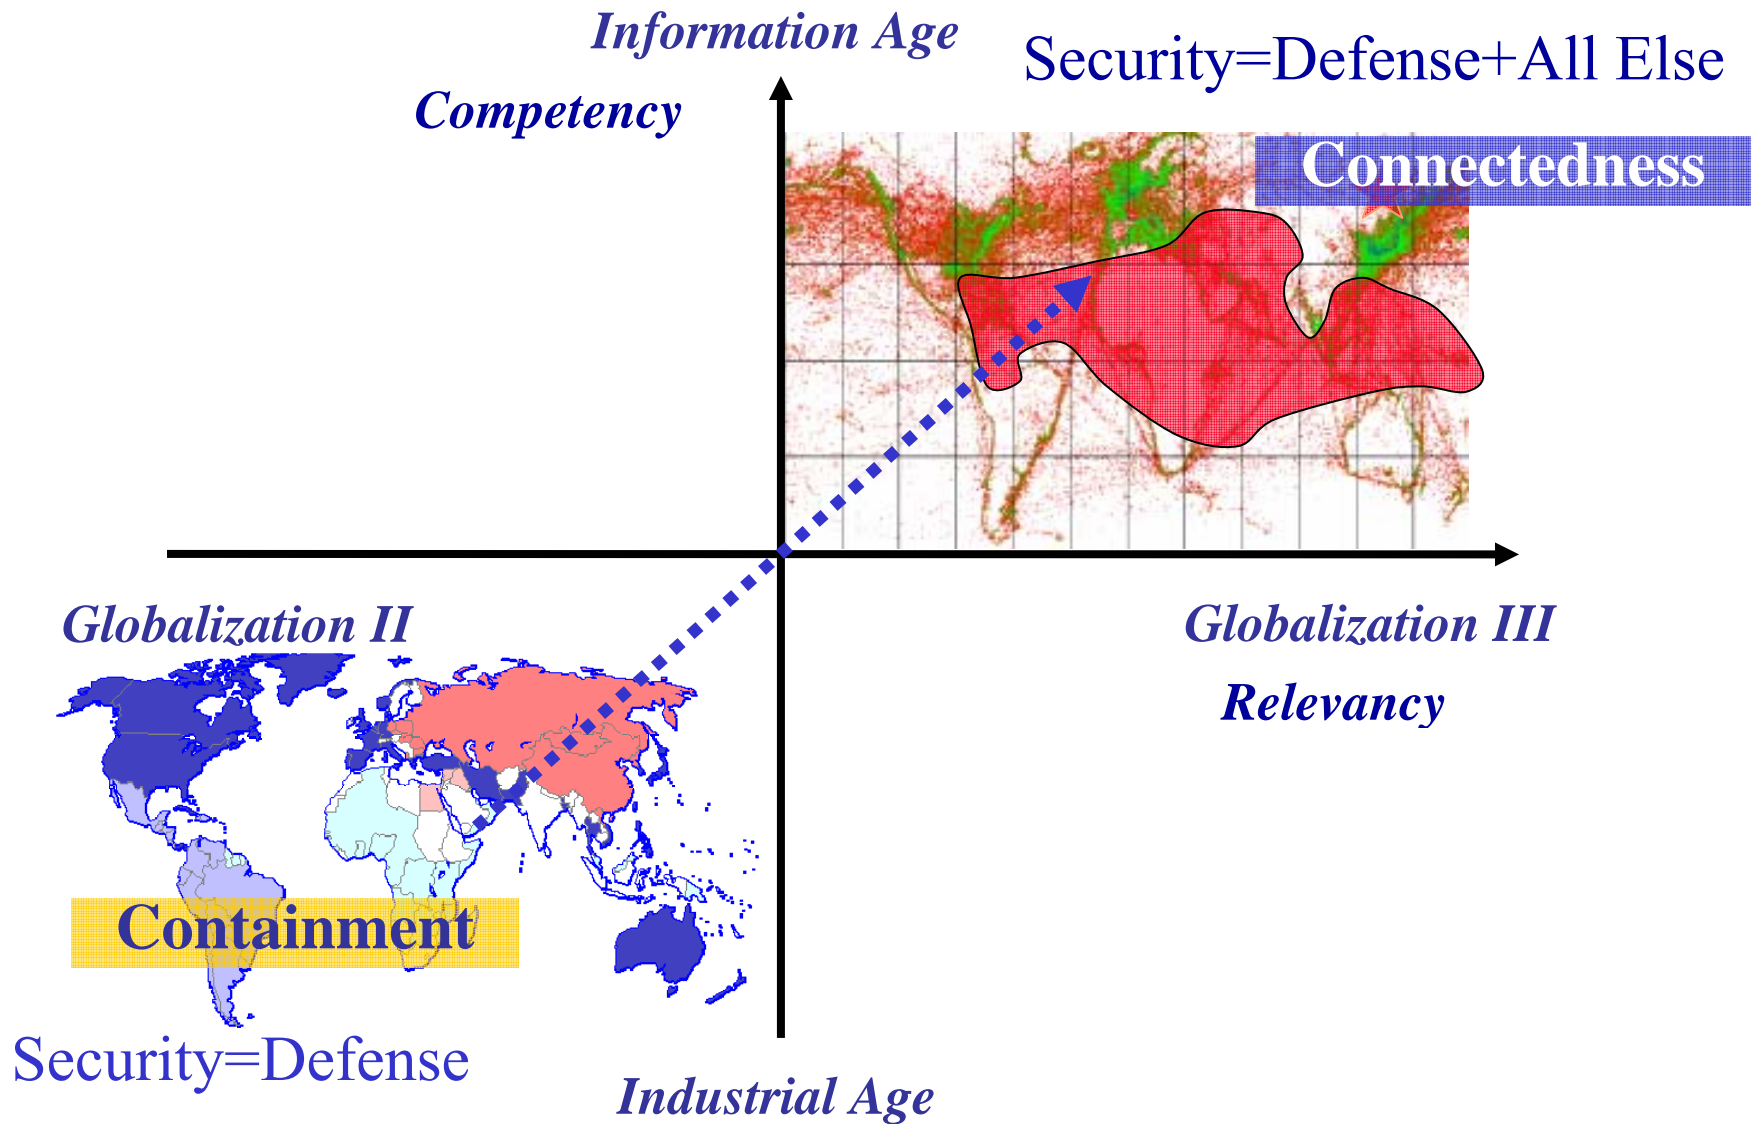

U.S. Military Responses to Situations, 1990-2002

- Yellow hexagon: Evac's
- Red star with cross: Peace/Relief
- Orange cross: Contingency Positioning
- Purple circle: Show of Force
- Red star with radiating lines: Combat

Shifting Strategic Imperatives

Security Environment

... *Four Challenges*

No hard boundaries distinguishing one category from another

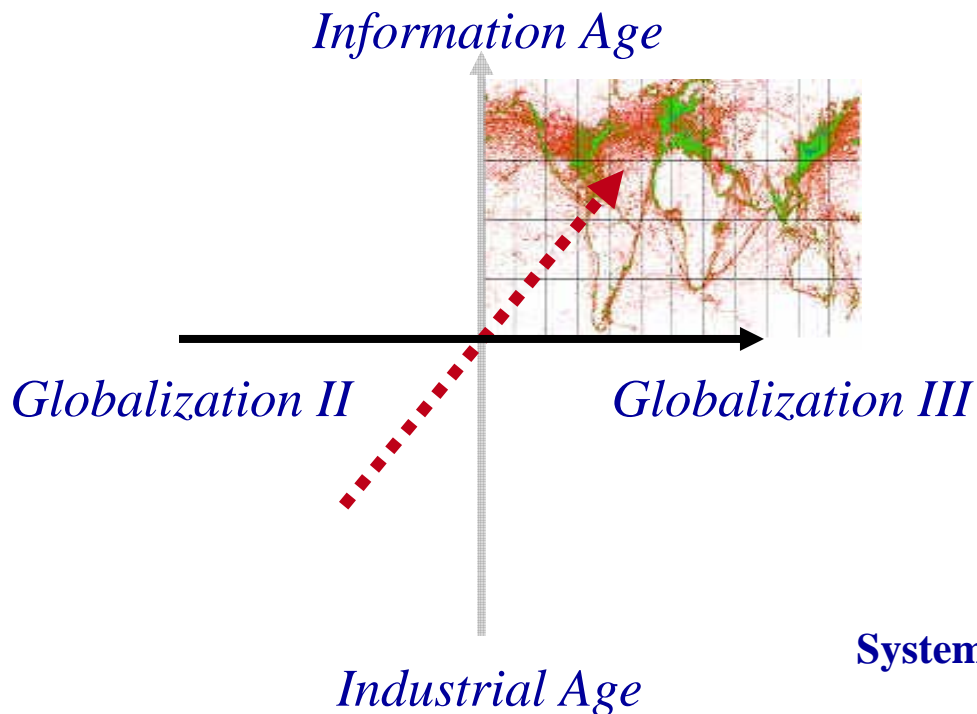

Global Trends... Threats

...Strategic Response

Strategic Capabilities:

- *More preventative - less punitive*
- *Achieve unambiguous warning earlier*
- *More Special Operations like characteristics*
- *Operate with speed*
- *An intel / surveillance-based force*
- *Interoperability/interdependence*
- *Coping with Systems Perturbations*

System	----- [Great Power War?] -----			
State	Political Ideology	Hated Dictator	Hated Dictator w/Nukes	Nuclear Nationalists
Individual	Narco-terrorists	Regional Terrorists	International Terrorists	SEI*

*** Super-Empowered Individual**

Transforming Defense

... Characteristics of the Future Joint Force

This is the age of the small, the fast, and the many.

Small: Power and size are uncoupled

Fast: A shorter response with a faster rise time more precisely placed in time and space

Many: The power of the collective at lower cost over a larger area

Rebalance for the information age

“Demassification” through increased information fraction

Networked components vice integrated systems

Operations based on assured access, information superiority,
control of initial conditions and rates of change

A priori access to the domains of conflict

Secure a superior information position and convert it to a competitive advantage

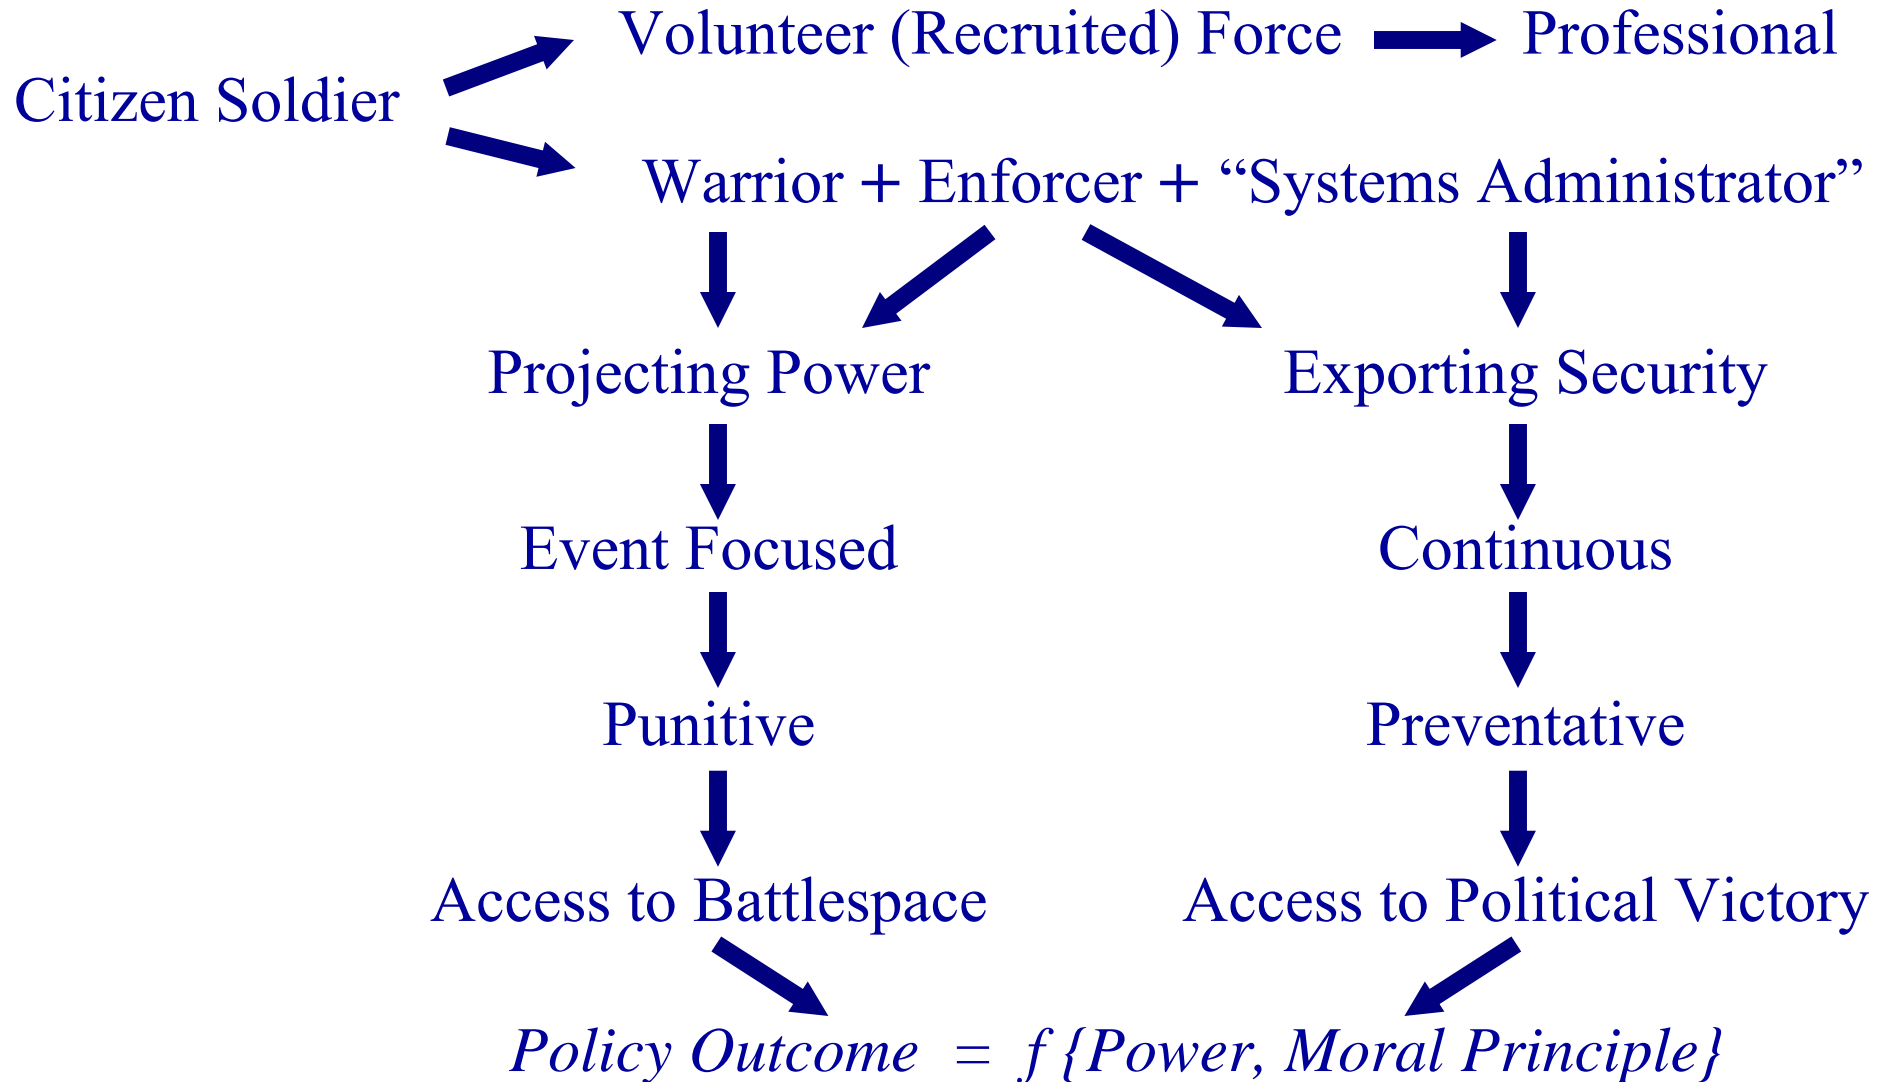

Leverage the path dependency of conflict

Corporate change based on co-evolution and continuous
adaptive acquisition

Top Level Issues

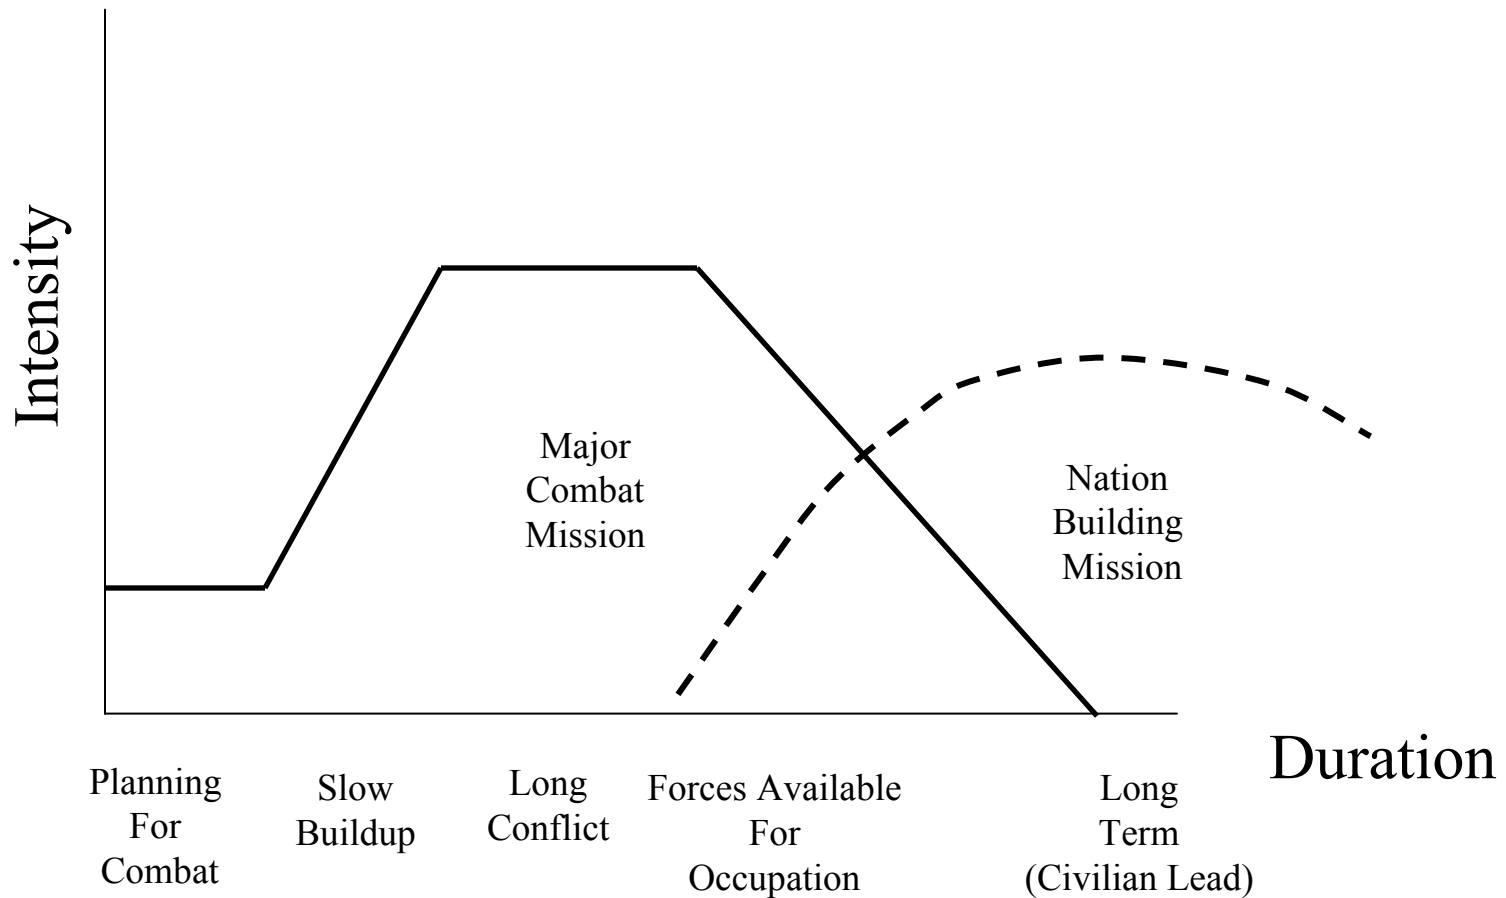

...Culture: Attitudes, Values, Beliefs

The Stabilization Mission Gap

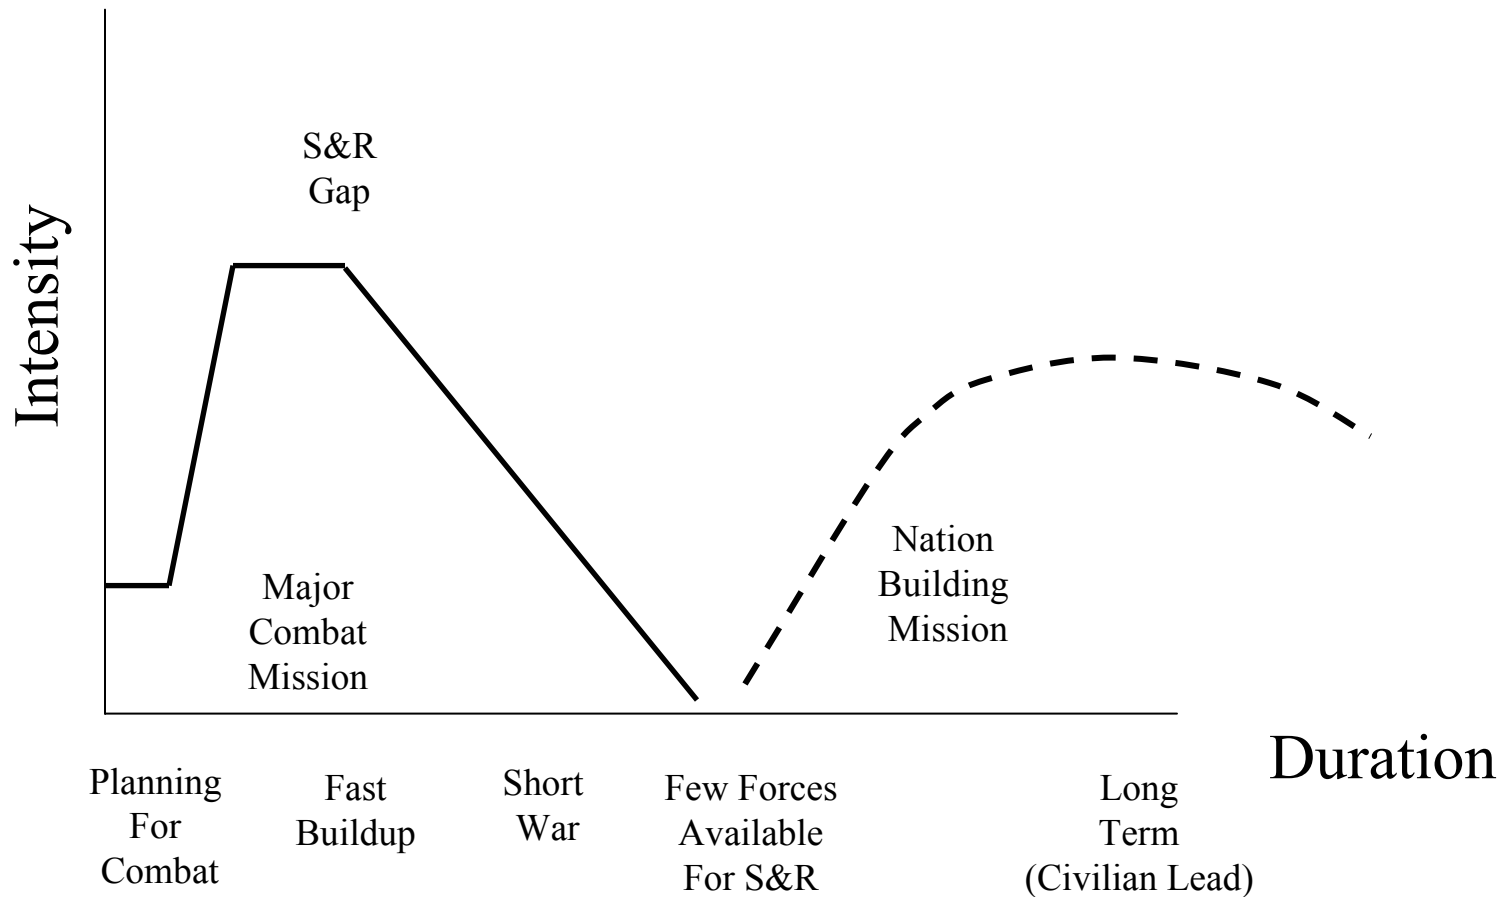

... *Traditional Model*

The Stabilization Mission Gap

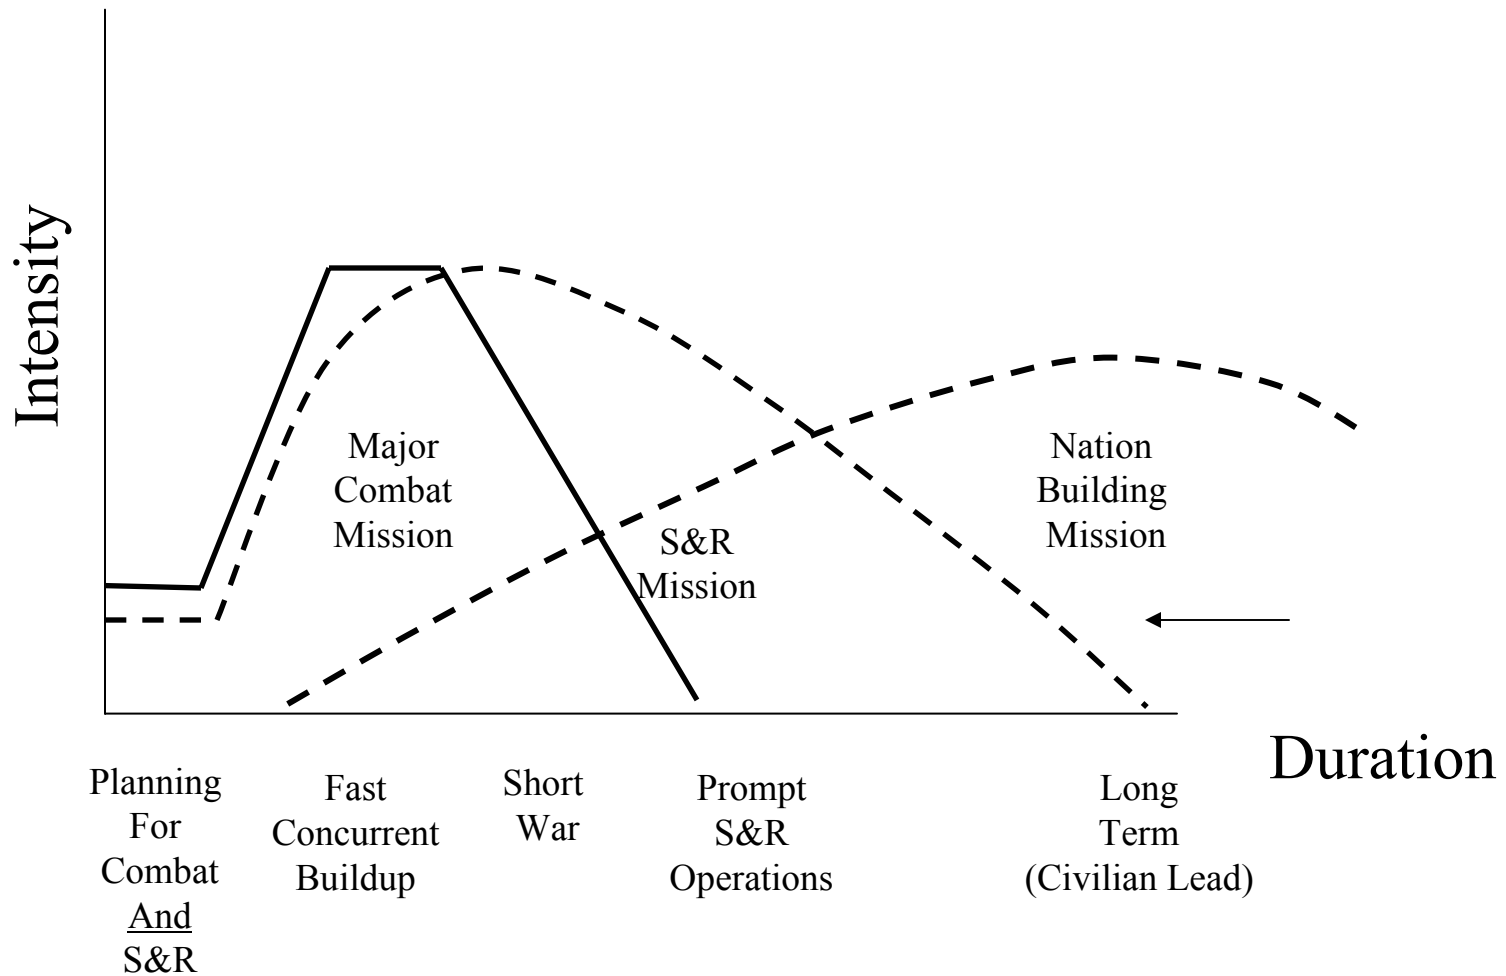

... New Challenges

The Stabilization Mission Gap

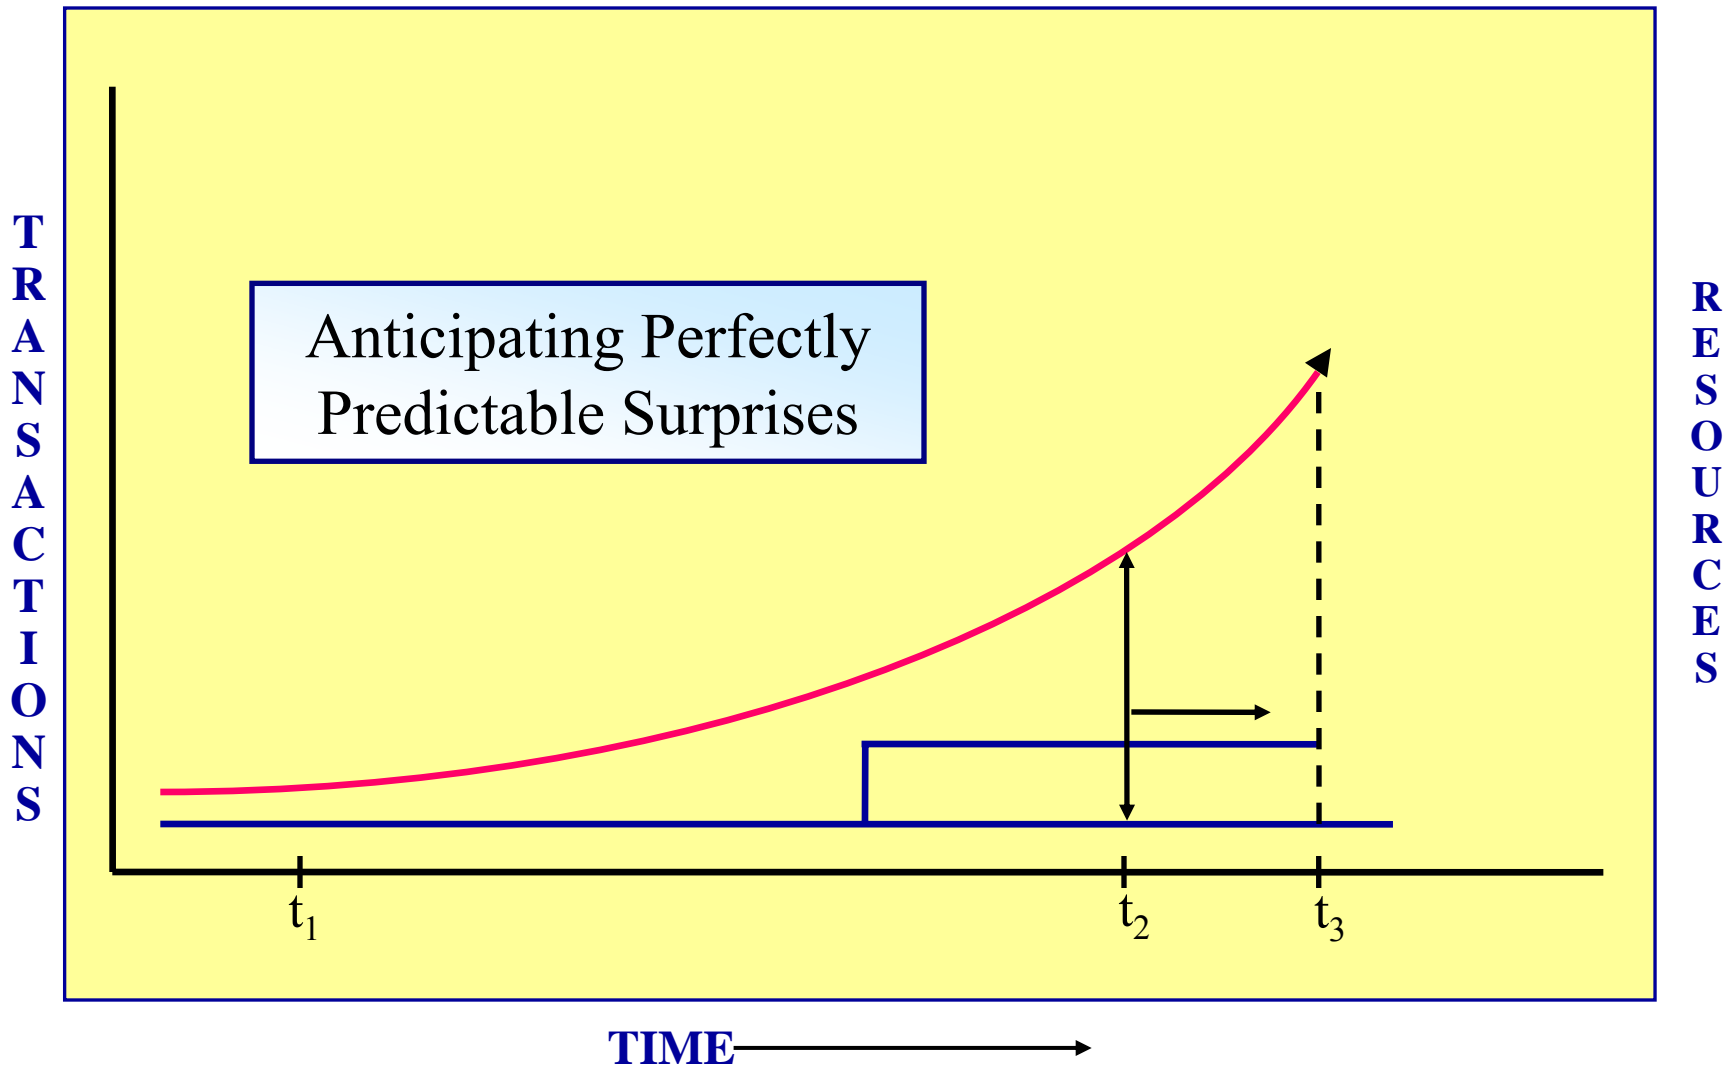

... Transformed S&R Capability

Informing Transformation

...Transactions vs. Resources

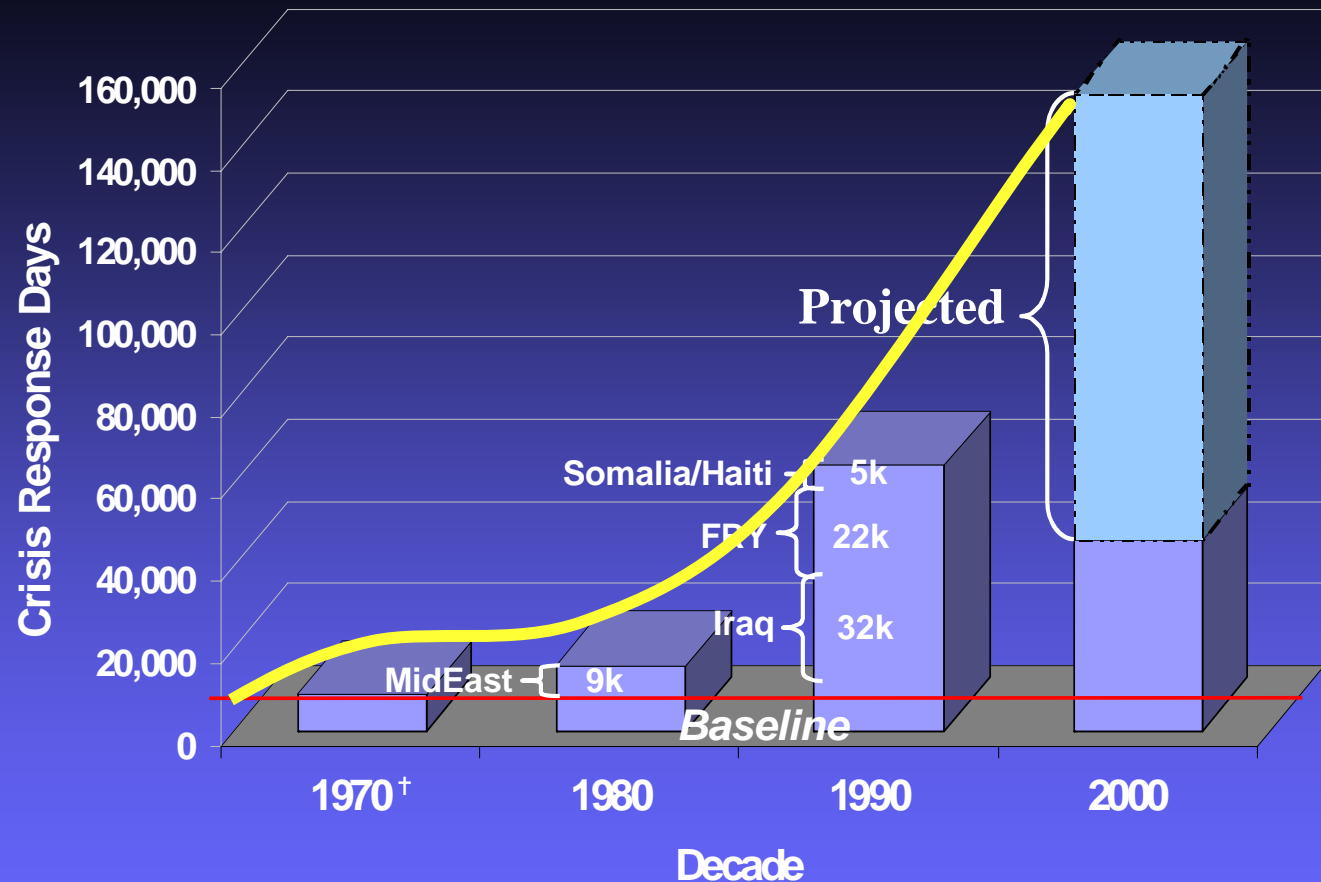

Global Trends and Implications

Policy Choices:

- *Engagement Policy*
- *Substitution of Capital for Labor*
- *Civil Component of National Security*
- *Allied / International Component*

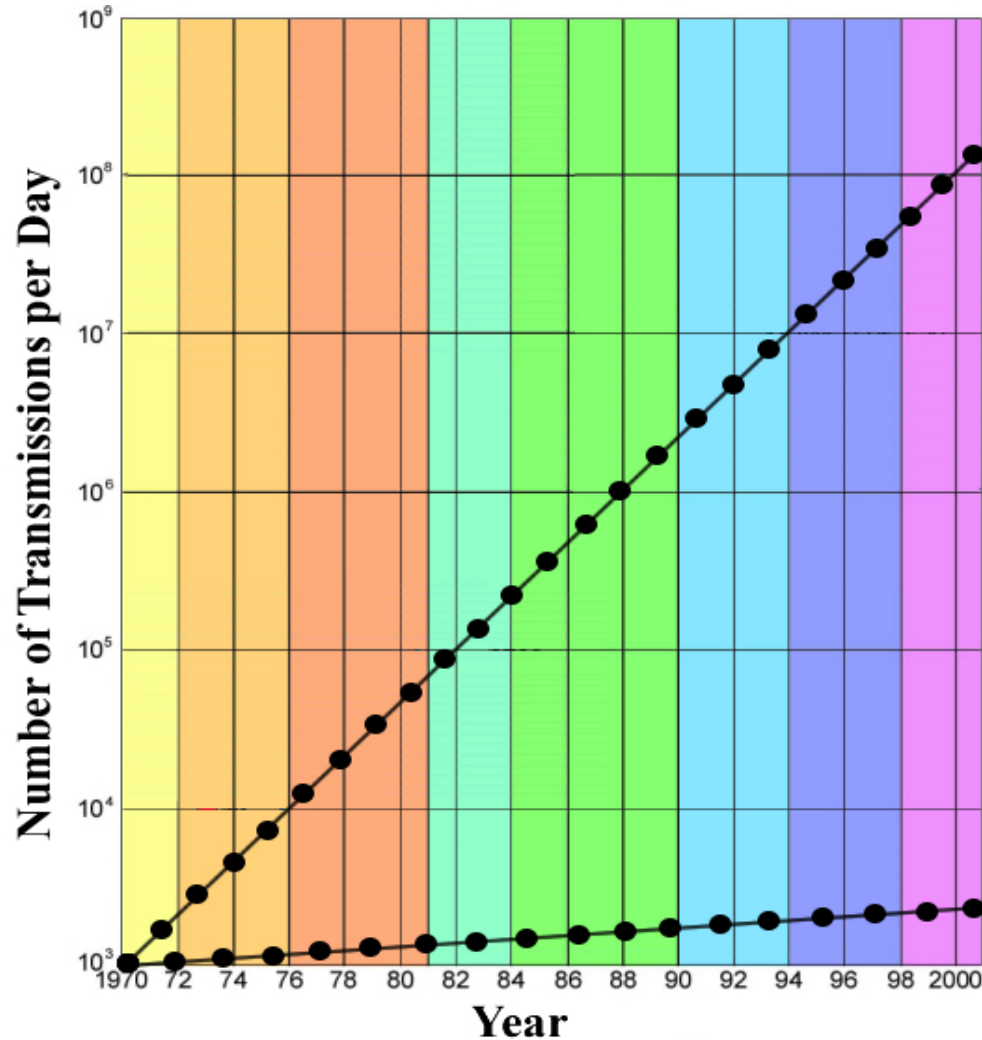

[†] Excludes Vietnam War

* Total number of response days for all operations by Army, Navy, Air Force and Marines

The Collection – Analysis Gap

...Managing the Inevitable

Policy Choices:

- *Automate Triage*
- *Automate Analysis*
- *We all become analysts*

Network Centric Warfare?

Transforming Defense

*“Networked Forces
Outfight
Non-Networked Forces”*

“...it allowed us to make decisions and execute those decisions faster than any opponent.”

*Lt. Gen. David D. McKiernan
Coalition Forces Land Component
Commander, OIF
23 April 03*

Network Centric Operations

*The National Defense Strategy
of
The United States of America*

2005

We will conduct network-centric operations with compatible information and communications systems, usable data, and flexible operational constructs.

*Capstone Concept
for
Joint Operations*

August 2005

A knowledge empowered force, capable of effective information sharing across all agencies and partners, will be able to make better decisions quicker, increasing joint force effectiveness.

Military Response to Information Age

...Network Centric Warfare

Translates an Information Advantage
into a decisive Warfighting Advantage

Information Advantage - enabled by the
robust networking of well informed
geographically dispersed forces

Characterized by:

- Information sharing
- Shared situational awareness
- Knowledge of commander's intent

Warfighting Advantage - exploits behavioral change and new doctrine to enable:

- Self-synchronization
- Speed of command
- Increased combat power

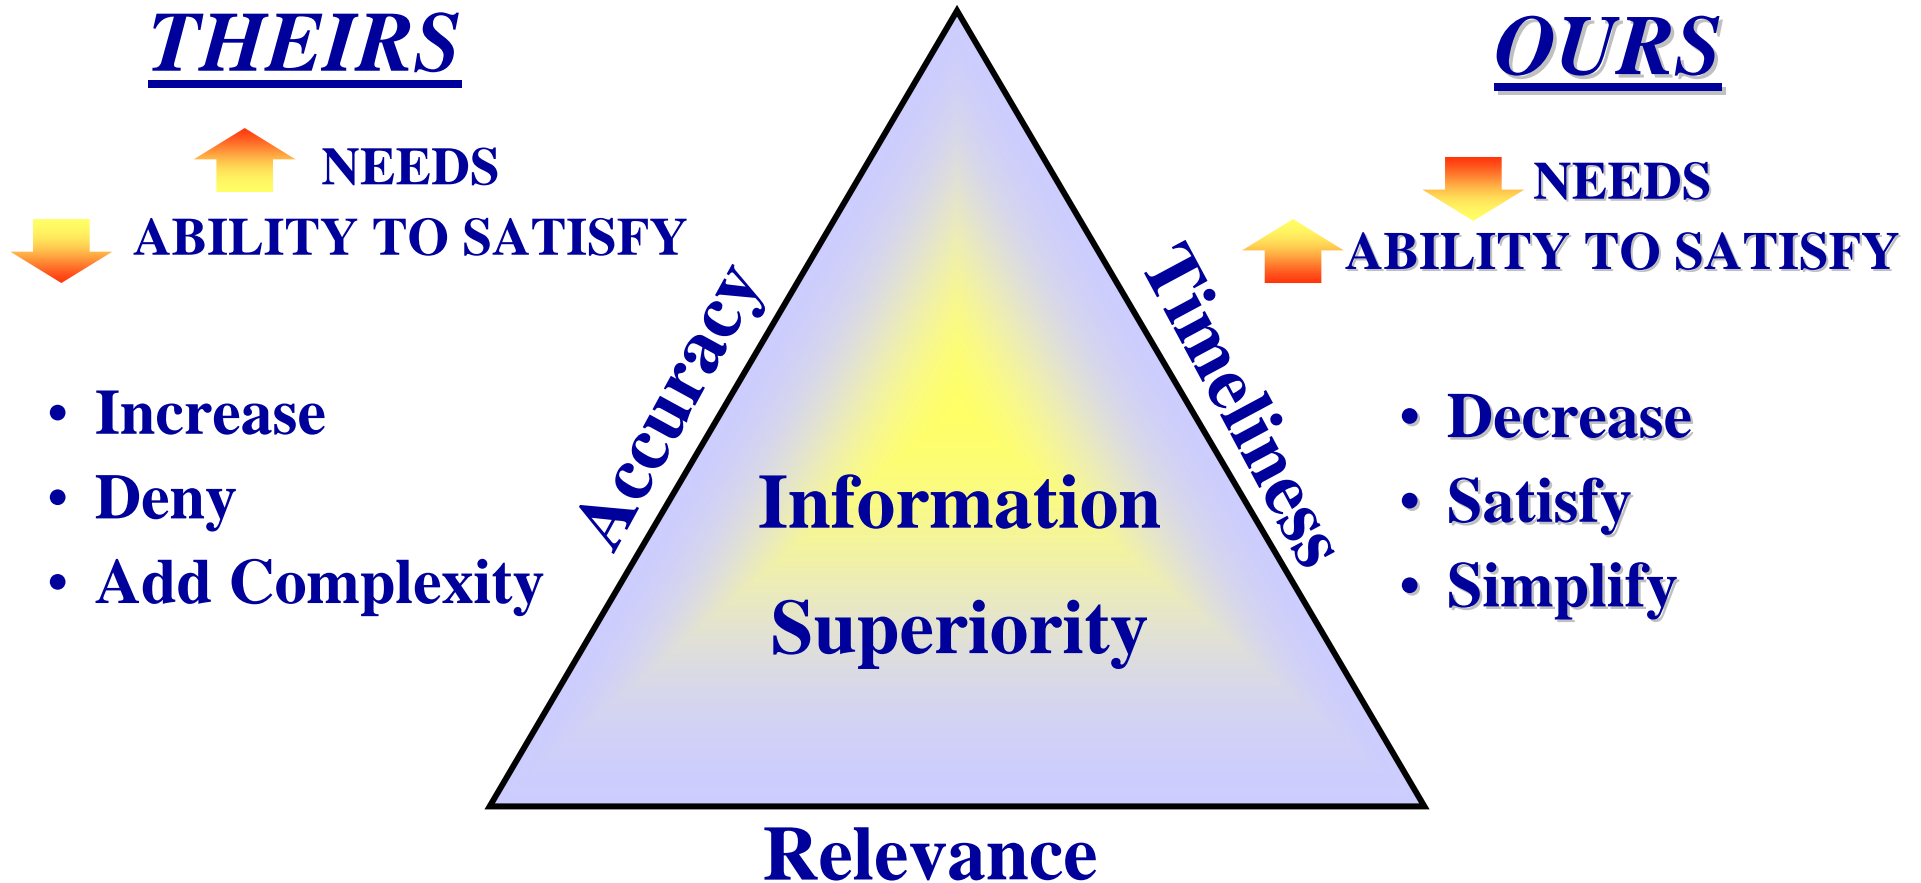

Information Sharing is a New Source of Power

Competitive Advantage

...New Sources of Power

“We need a force which is designed and capable of fighting first for information superiority.”

Learning Rate

Competitive Advantage

Information “Richness”

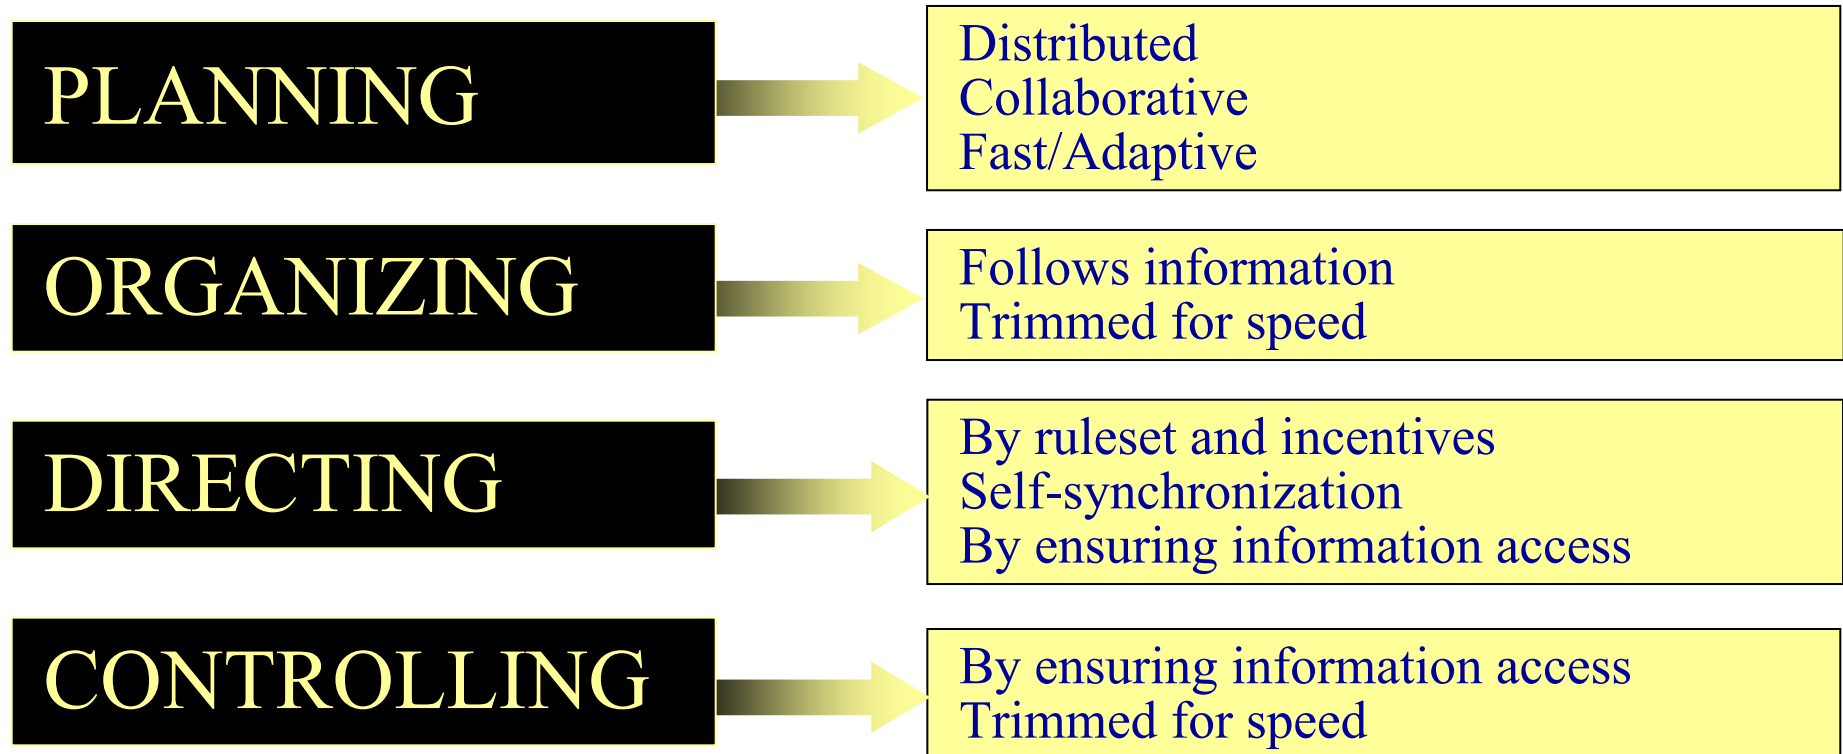

- Content
- Accuracy
- Timeliness
- Relevance

Information “Reach”

Network-Centric Warfare

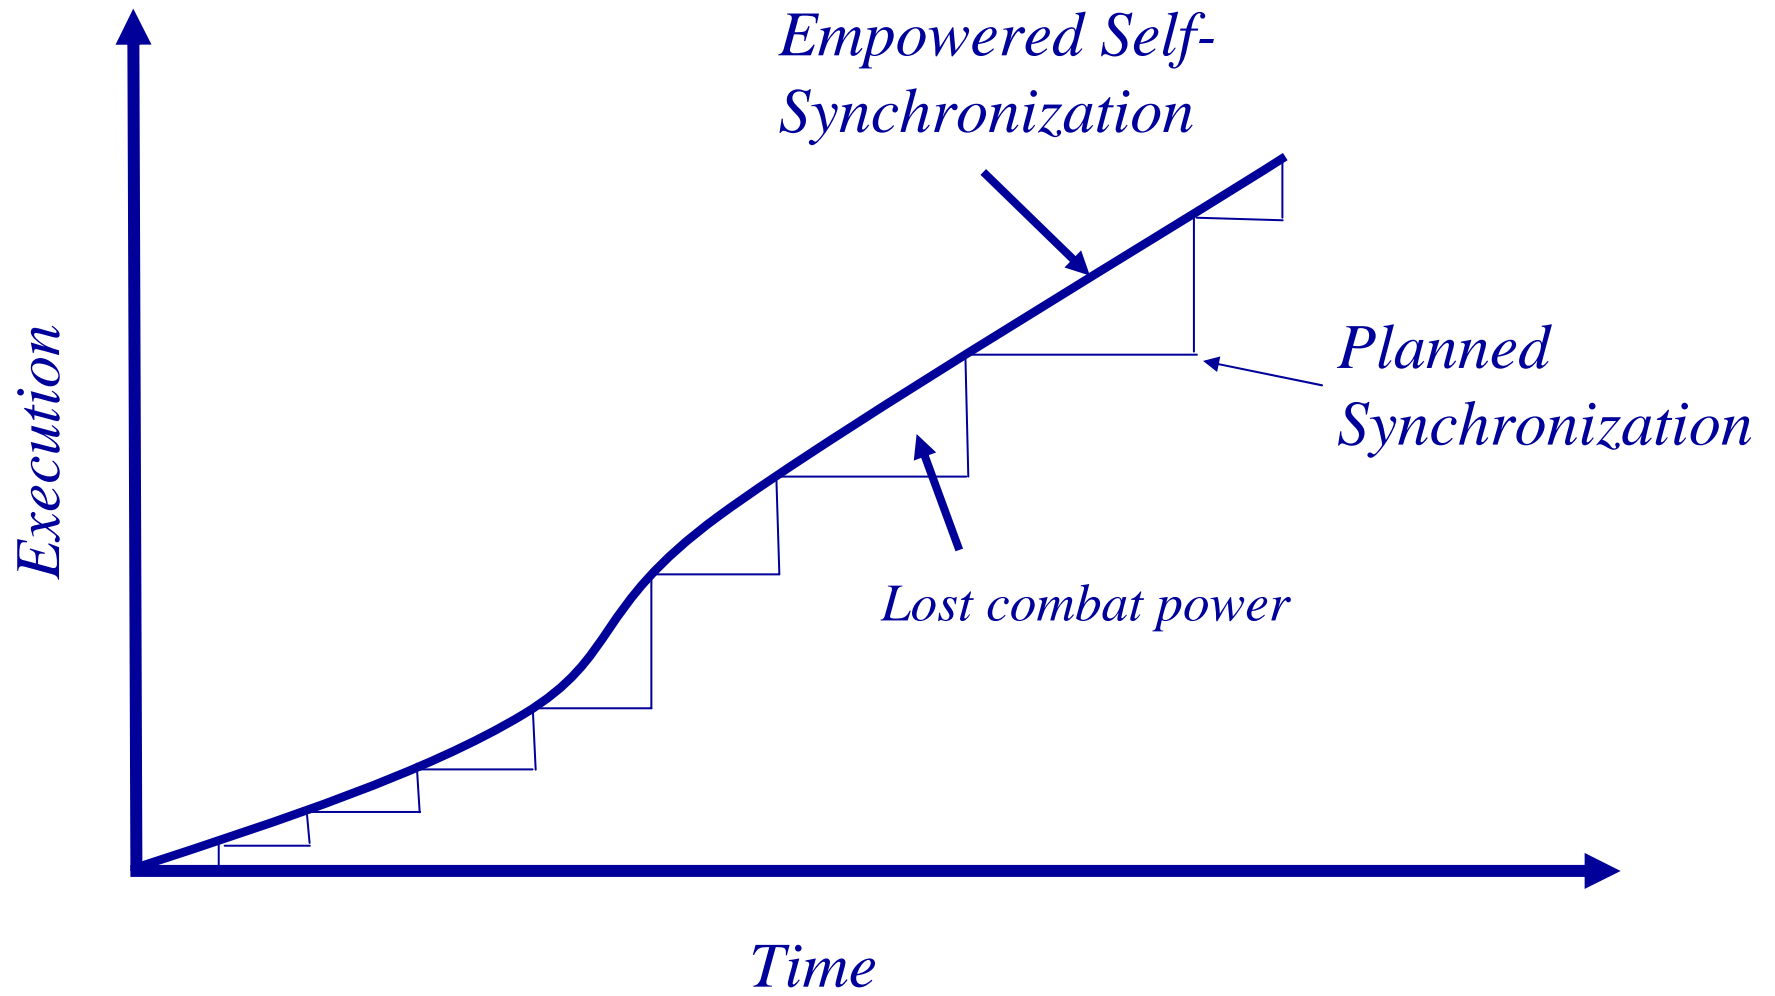

It's all about information access and speed. . .

Ability to Adapt

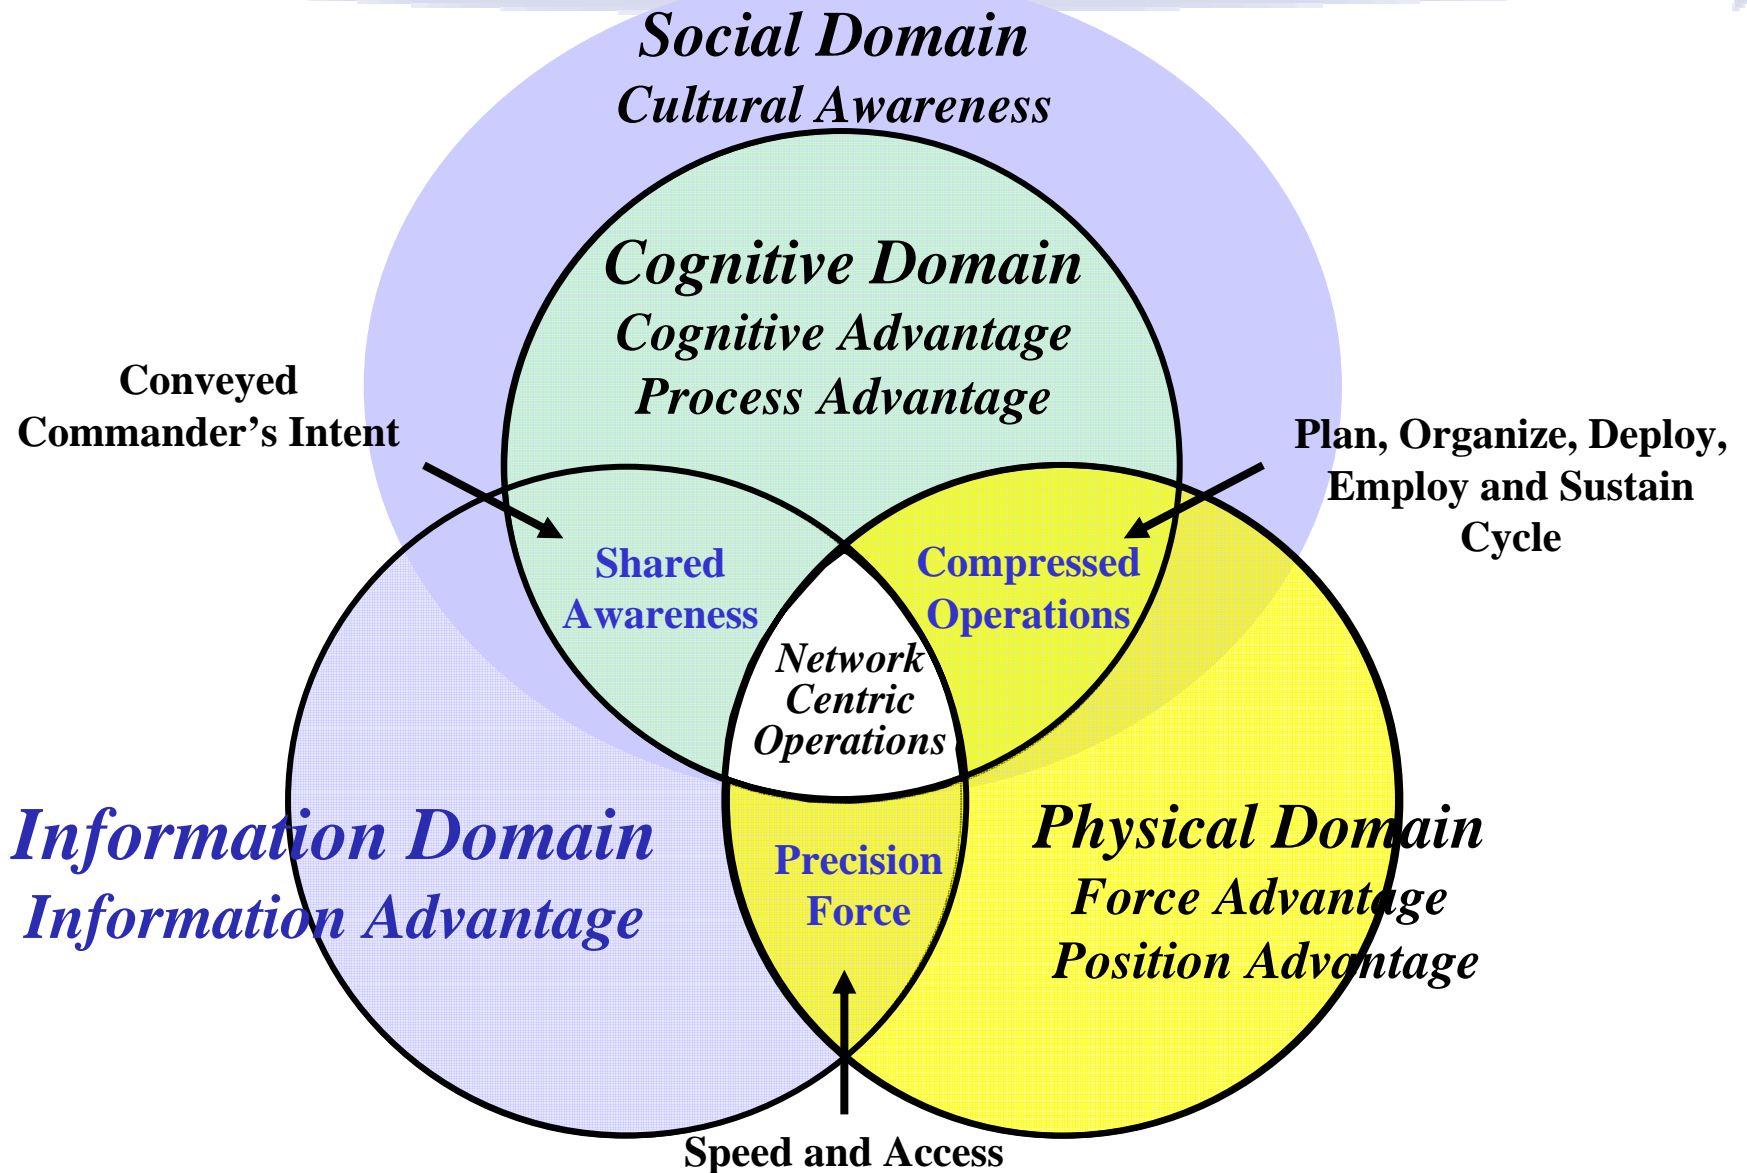

...Learning rate

Competing in the Information-Age

...The Power of Network-Centric Operations

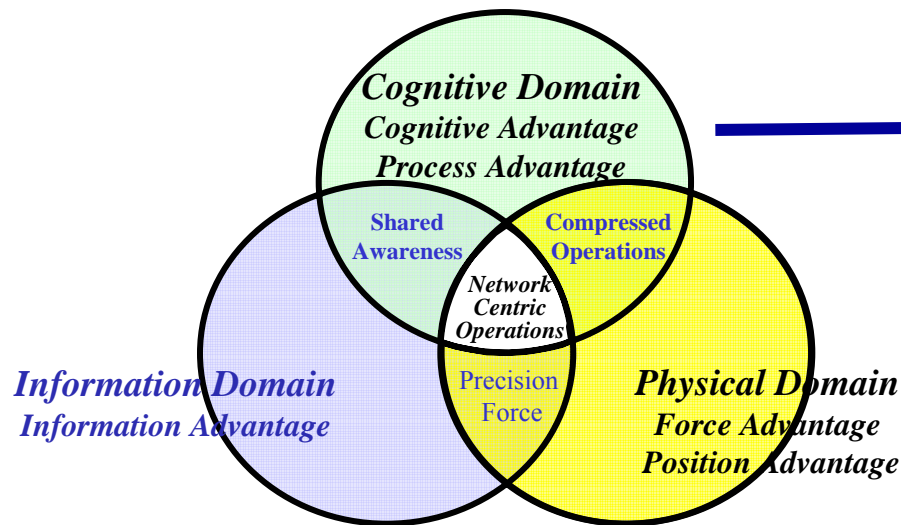

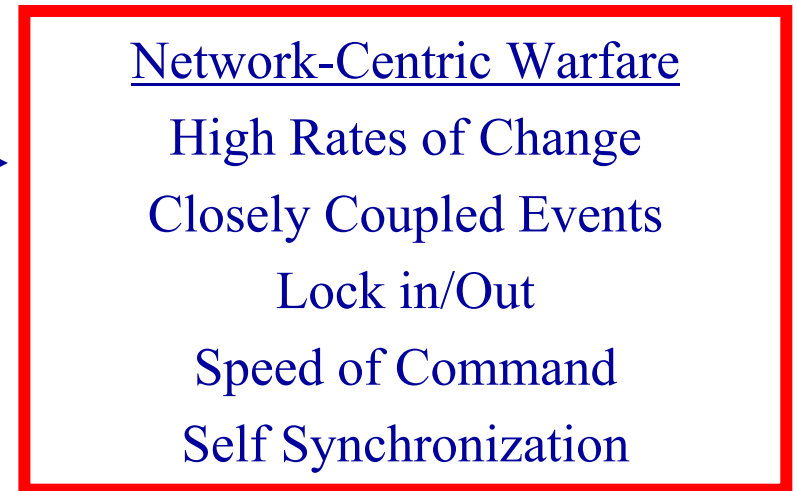

Effects-Based Operations

Findings From Combat

Land	Maneuver	≈ 60%
	Attrition	≈ 10%
Air	Lack of Knowledge/SA	≈ 80%
	Surprise	≈ 80%
Sea	Lack of Scouting	≈ 80%
	Surveillance	≈ 80%

Shared Awareness

...The new competitive advantage

Source: New York Times Television – The Perfect War, 2004

Stryker Brigade

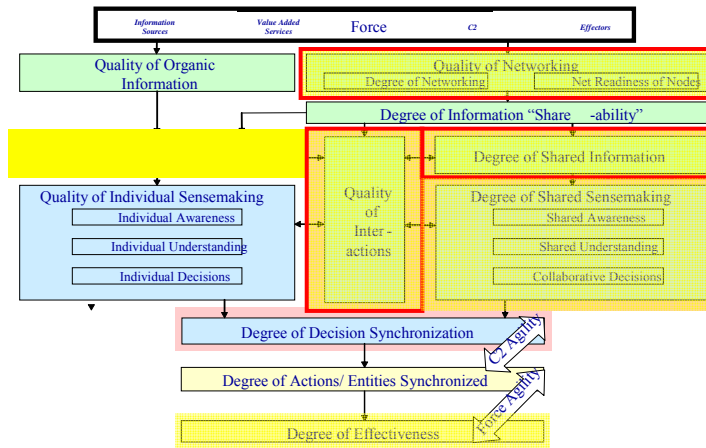

Scenario

- SBCT attack on Shughart-Gordon
- Certification Exercise (CERTEx) at Joint Readiness Training Center, May 2004

Hypotheses

- Stryker Bde NCO capabilities provide significant information and decision superiority and increase force effectiveness and are a source of combat power

Area of Focus

Findings

- Friendly Enemy casualty ration decreased from 10:1 to 1:1
- Increase in Individual/ shared information Quality from about 10% to ~80%
- Acceleration of speed of command from 24 to 3 hours in key engagement
- bottom line result: allowed CMD ability to control the speed of command

Western Iraq Case Study

...Key Findings to Date

- Western Iraq was the most “networked” theater of operations, operationally and tactically, in the history of warfare.
- Largest conventional & coalition SOF operation in the history of warfare.
- Largest scale use of tactical data-links in history of warfare.
- Only area of operation in Iraq where Blue Force Tracking information on SOF + conventional ground forces was provided via data link to fixed wing combat aircraft.
- Zero Fratricide: Only area of operations in Iraq where air-to-ground fratricide was eliminated

Identify Issues of Regret

... *Candidates for Action Now*

Warfare Elements

- *Fire* – non-lethals, directed energy, redirected energy
- *Maneuver* – seabasing, vertical battlefield, lift for operational maneuver
- *Protection* – urban operations, “biomedical countermeasures” cycle time
- *C2&C* – joint interdependency vs. interoperability
- *ISR* – demand-centered intelligence, tactically responsive space
- *Logistics* – joint demand-centered logistics

Risk Management (*creating on-ramps*)

- *Joint concept development & experimentation* – short cycle time / rapid iteration, concept-based / technology-enabled
- *Joint training* – live / virtual / constructive / distributed
- *People* – culture and organizations

Project “*Stiletto*”

Distributed Adaptive Operations

- Mass effects without massing forces
- Influence actions broadly
- Exploit the network
- Create high transaction rates
- Self-organize decision-making
- Generate organic intelligence
- Adapt rapidly
- Execute either distributed or concentrated operations
- Create overmatching complexity

LOA	80'-0"
Beam	40'-0"
Tunnel Width (4)	5'-0"
Draft (static)	2'-4"
Displacement	67 MT
Payload	15 MT
Fuel Load	10 MT
Classification	ABS
Main Engines	4 x 1650HP C-30 Caterpillars
Surface Piercing Propellers	4
Speed	Max @ full load 50-55 knots
Range @ full load & max speed	500 NM
HP Required (total)	6200hp
Clear Height	15'-0"

Payloads 43% of Displacement

Project “Sheriff”

...Controlling the Engagement Timelines

The Capabilities

- “Speed-of-light Sensing
- Networked
- Lethal/Non-Lethal Options
- Active/Passive Options
- Kinetic/Non-Kinetic Options
- Survivability

The Technology

- Compact Active-Denial Technology
- Phaselator High-Power Direction Hailer
- Vector-Beam High-Power
White/IR Spot Light
- Counter Improvised
Explosive Device (IED)
- Active Protection
- Counter Sniper
- Rapid-Fire Kinetic Weapon
- Multi-Spectral Sensor Suite
- Armor Protection
- Integrated Electronic Warfare Suite
- Net-Centric Technology

Operationally Responsive Space

...TACSAT 1

A capability on orbit within the planning time constraints of a major contingency

- Responsive
 - < 2 Yr concept to on-orbit capability
- Low Cost
 - Total cost of experiment less than \$15M including launch
- Experiment
 - UAV Components in Space
 - Space/Air Horizontal Integration
 - Designer Payloads
 - TCP/IP Based: SIPR Net Accessed
 - New commercial launch vehicle
- Operationally relevant capability
 - Integrated into Combatant Commanders
 - Exercises/Experiments
 - Time / Capability Trade Off

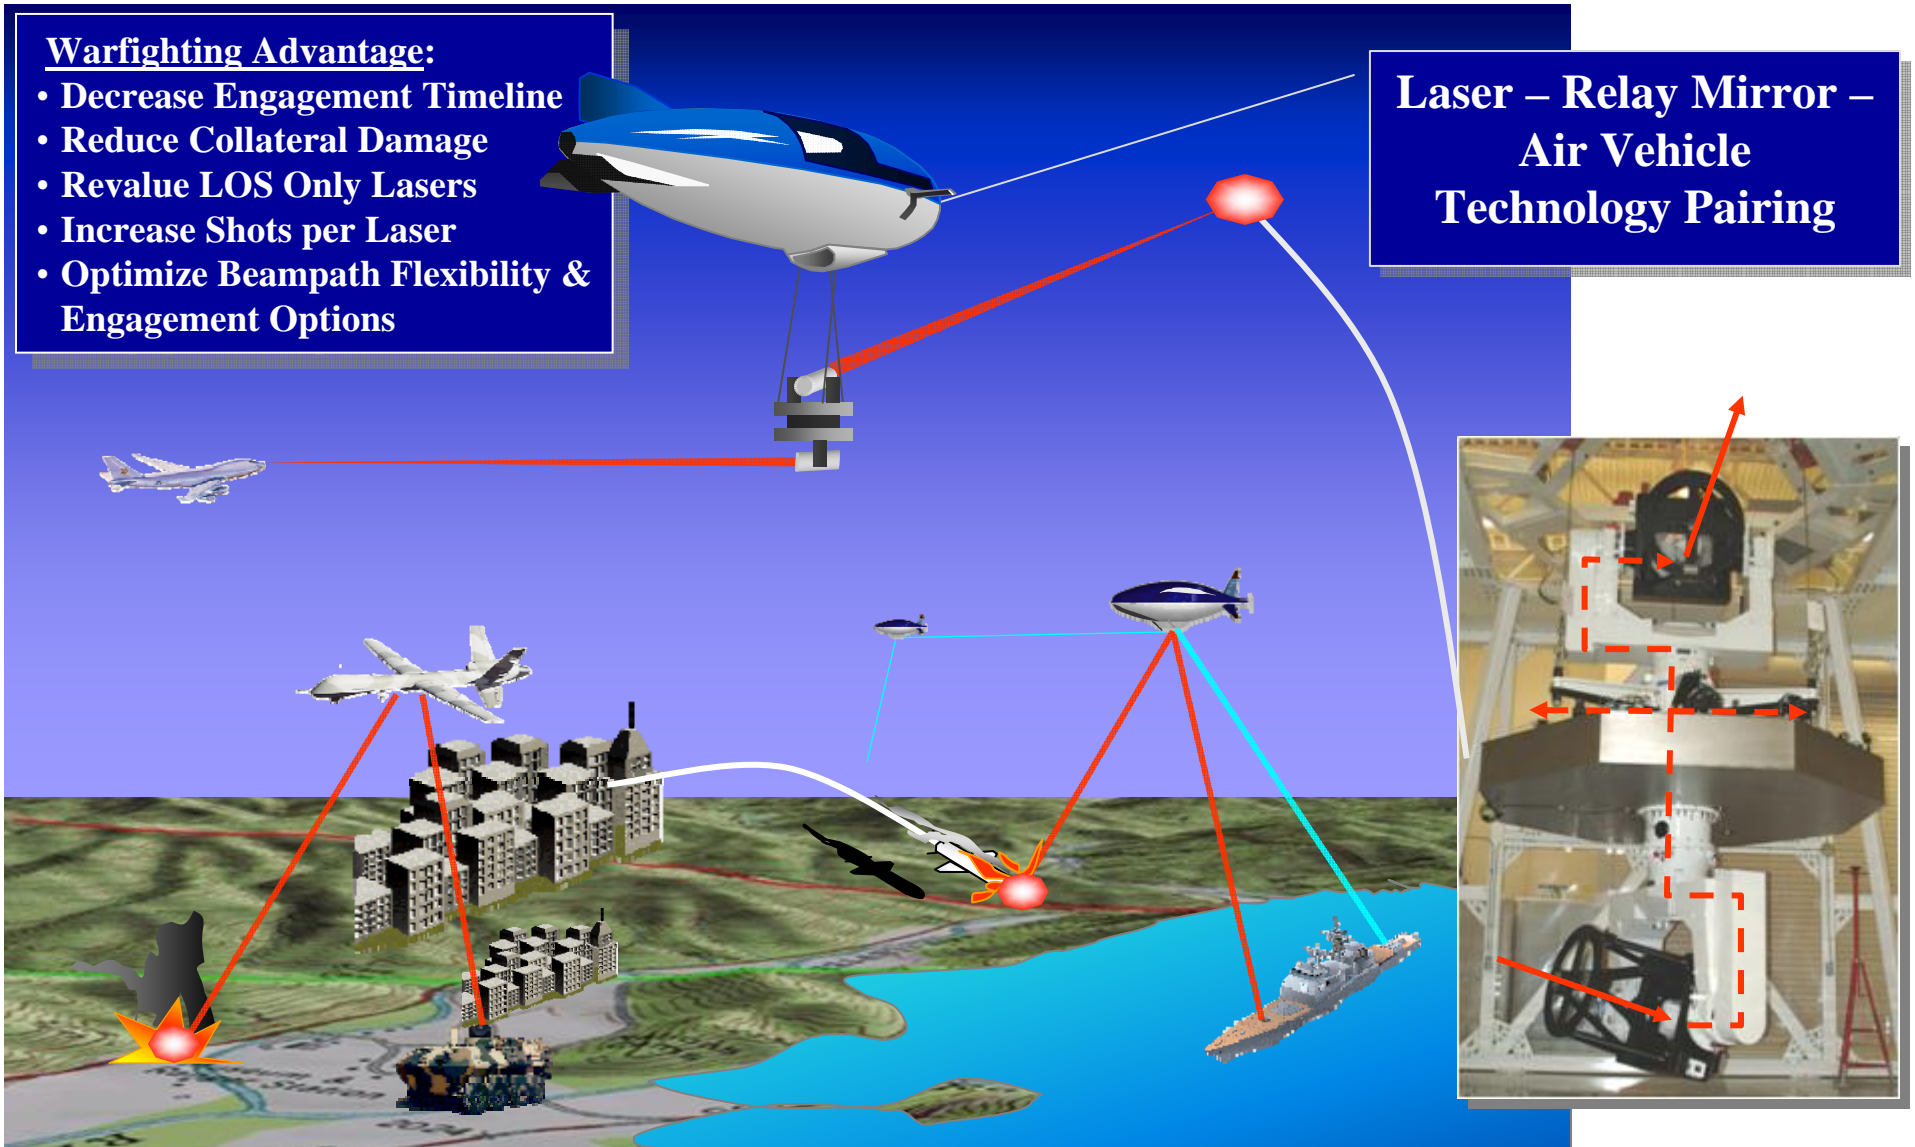

Re-Directed Energy

... Concept Description

Warfighting Advantage:

- Decrease Engagement Timeline
- Reduce Collateral Damage
- Revalue LOS Only Lasers
- Increase Shots per Laser
- Optimize Beampath Flexibility & Engagement Options

**Laser – Relay Mirror –
Air Vehicle
Technology Pairing**

Strategic Approach to Cost

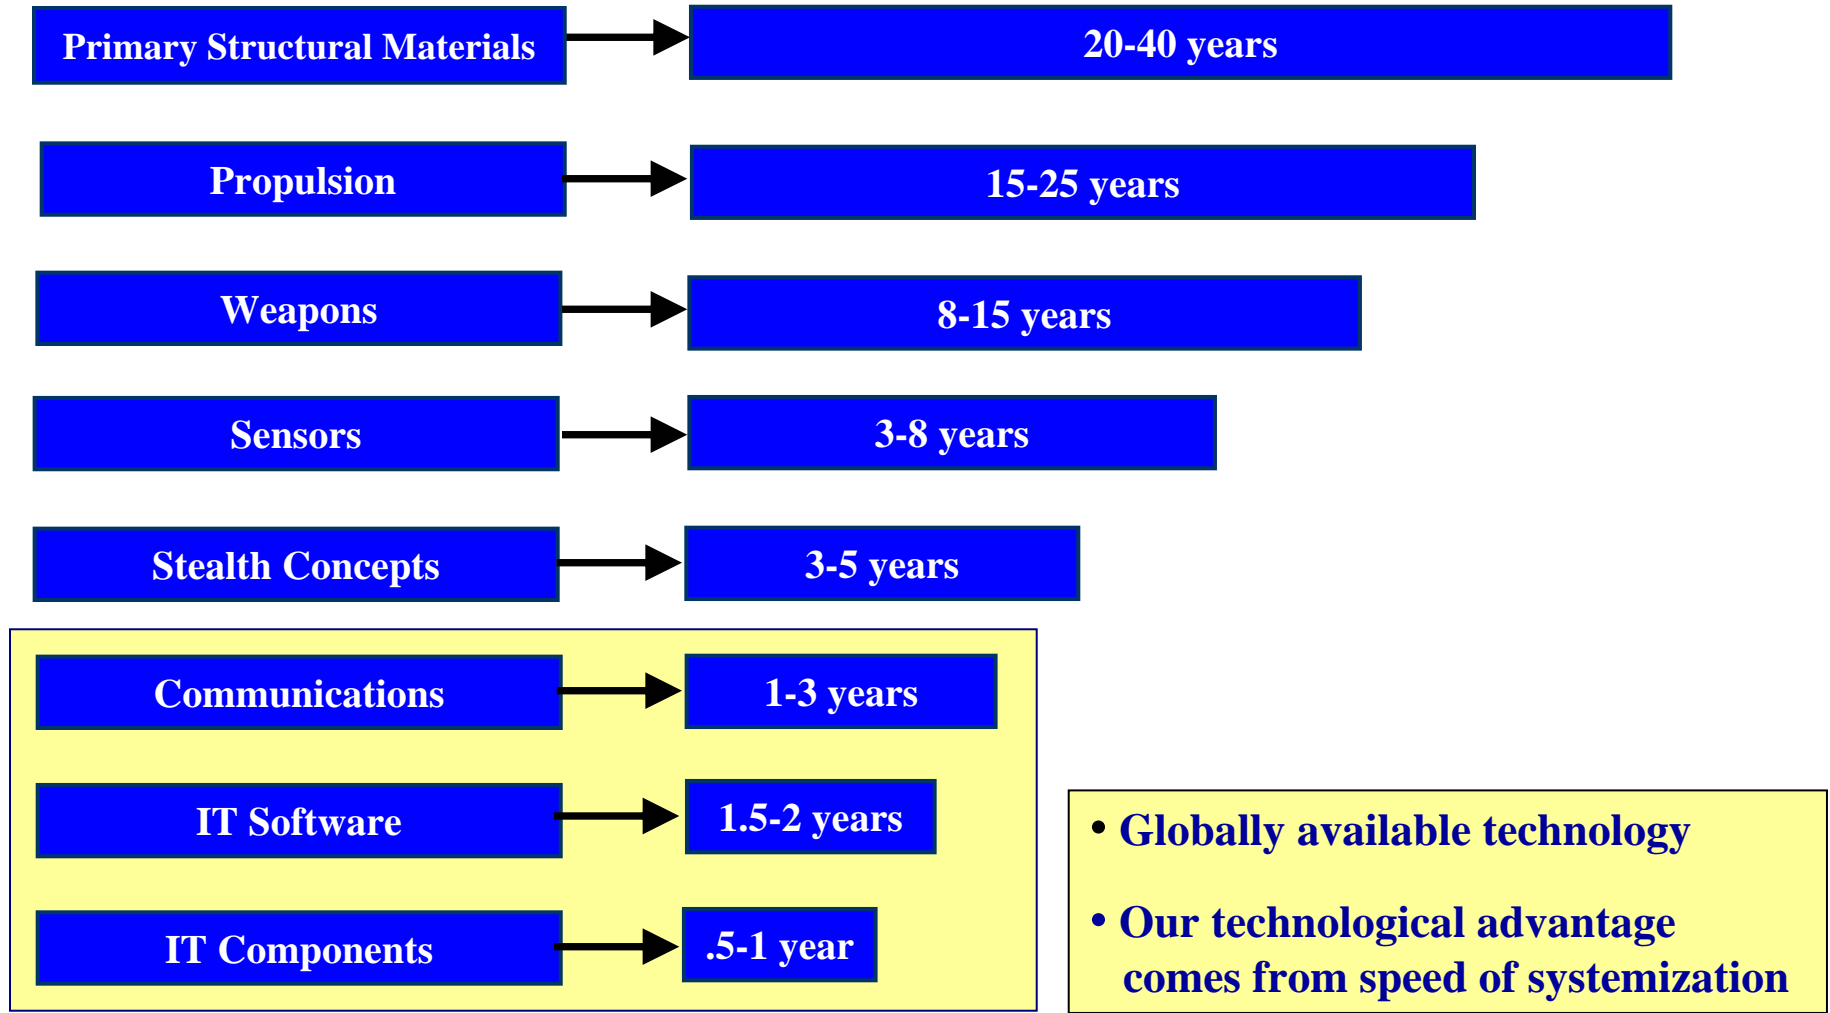

Key Elements

- *Decrease operational costs*
- *Achieve better ROI for less*
- *Broaden the capabilities base*
- *Create and preserve future options*
- *Manage divestiture*
- *Transform non-discretionary areas*
- *Impose cost to adversary*
- *Develop counter-cost imposing strategies*

New metrics create opportunities for new cost dynamics

Technology Trends and Cycles

Alternative Architectures

... Characteristics

Focus in designing alternative architectures:

- Low unit cost
- Modularity
- Numbers
- Speed
- Networking
- Sensing
- Innovative designs
- Mass Customization

Preserve Strategic Advantage: innovation & the breadth, depth and diversity of the industrial base

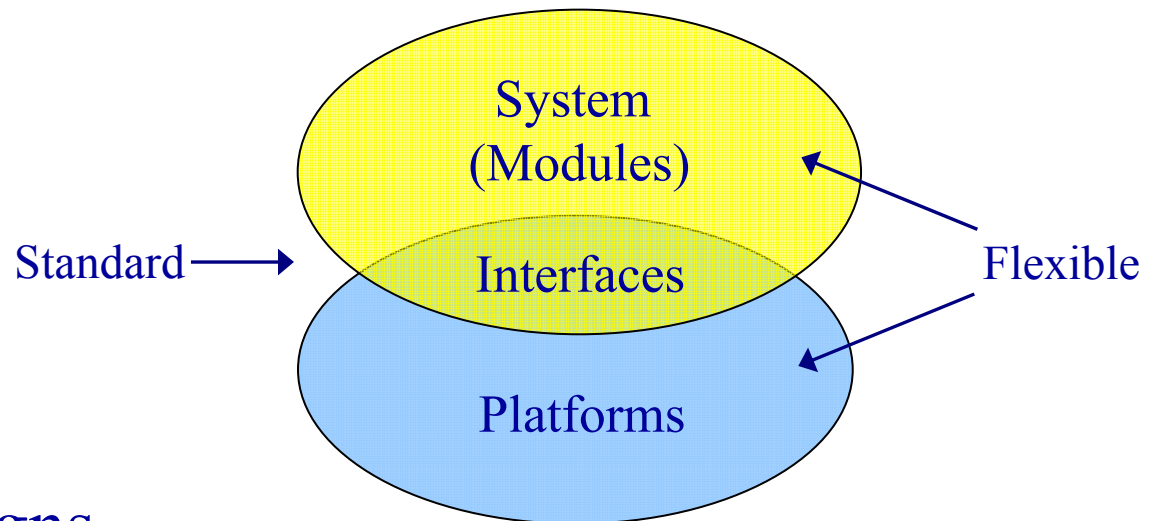

Alternative Architectures

... Characteristics

Focus in designing alternative architectures:

- Low unit cost
- Modularity
- Numbers
- Speed
- Networking
- Sensing
- Innovative designs
- Mass Customization

Preserve Strategic Advantage: innovation & the breadth, depth and diversity of the industrial base

New Logic and Metrics

- Achieve higher learning rates

Co-evolve concepts, capabilities and processes

Continuous adaptive acquisition and experimentation

- Employ higher transaction rates

Faster cycle times

Speed of information and operational mobility

- Create and preserve options

Technology on-ramps

Broaden capabilities base

Mass customization

- Create overmatching complexity

Scalable

The small the fast and the many
