JMC - Ready - Reliable - Lethal

Current Status of the CAD Program

✓ For Fiscal Year 2007

- Demil stockpile is at 469,917 tons, end of April
 - 69,959 tons have generated, end of April
 - 26,225 tons of demil have been accomplished, end of April
- ✓ Stockpile breakdown has not changed significantly – 75% of the stockpile is concentrated at CAAA, HWAD and MCAAP

Top Five DODICs Numbers 4 & 5

CBU-71/B, E828 – 10,702 tons, 2.28%

CBU-58/B, E803 – 9,143 tons, 1.95%

Top Five DODICs Number 3

CTG, 105MM M1, C445 – 13,292 tons, 2.83%

Top Five DODICs Number 2

**BOMB, GP 750# M117, F114 –
28,312 tons, 6.02%**

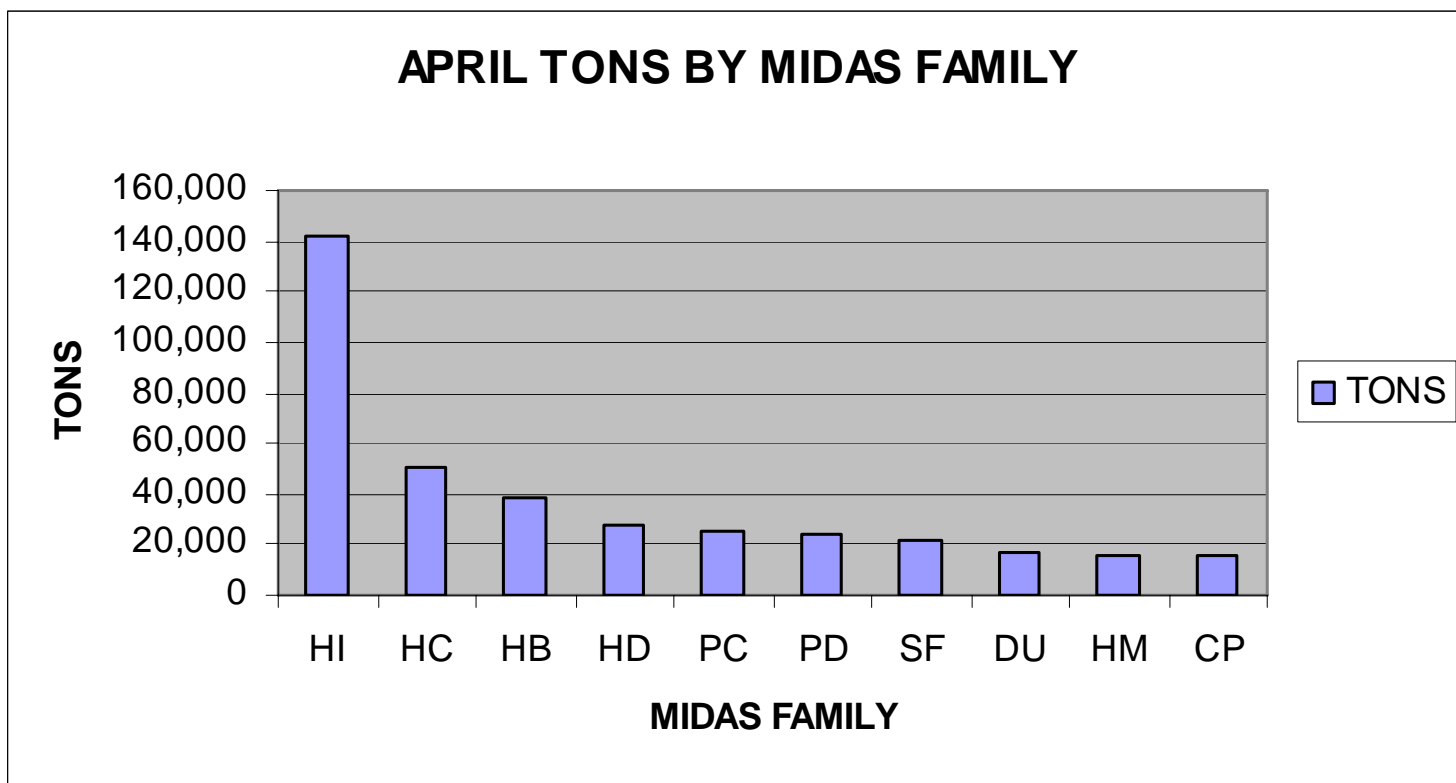

Top Five DODICs Number 1

**PROJ, 155MM M483, D563 –
79,129 tons, 16.84%**

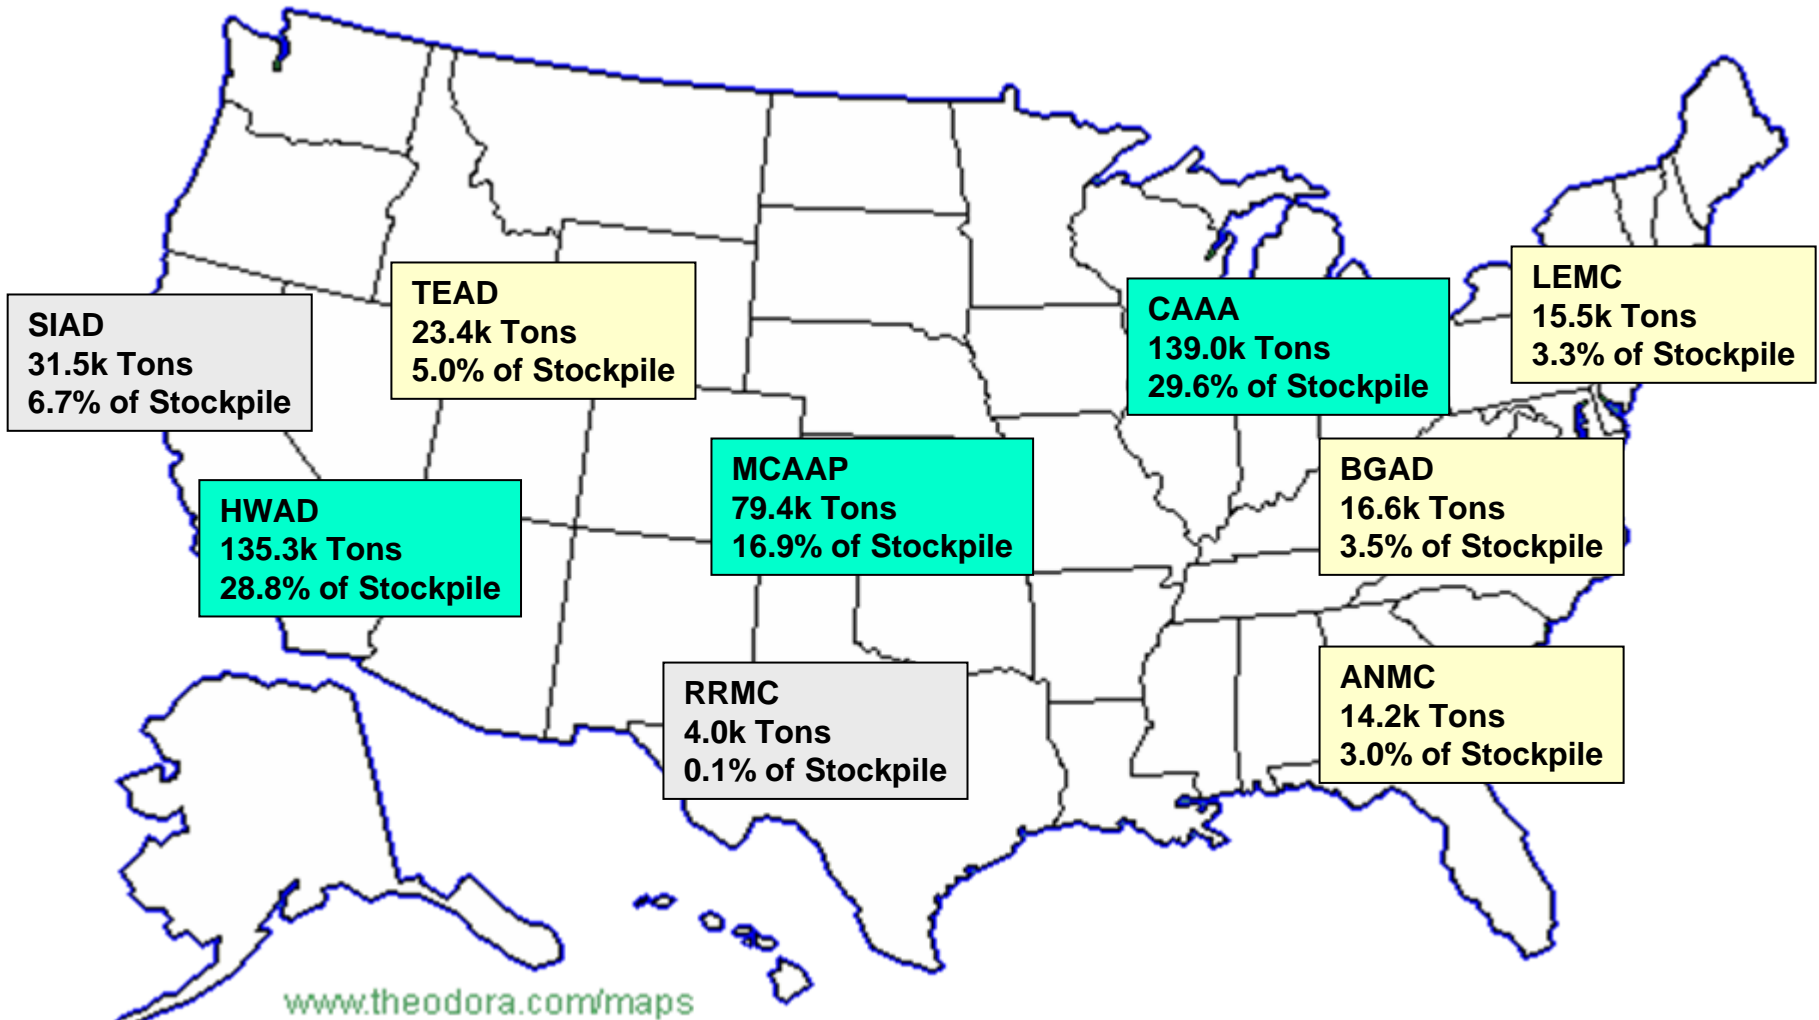

Demil Stockpile Breakdown by MIDAS Family

Organic Demil Sites

Scrap Proceeds Recent Developments

- ✓ **Recent changes in legislation allow the Demil Program to claim and reuse proceeds from scrap sales of materials recovered from demil projects**
 - **§ 4690. Recyclable munitions materials: sale; use of proceeds**
 - **Installations sell material competitively**
 - **Funding is returned to PM Demil**
 - **Installations receive a portion of the proceeds**
 - **Remaining proceeds are allocated by PM Demil toward other R3 efforts**
- ✓ **PM Demil will maintain a record of all transactions for audit purposes**

Looking Forward “The Execution Challenge”

- ✓ **Our challenge is to reduce the Demil Stockpile given our constraints/objectives:**
 - **Trying to eliminate high tonnage items**
 - **BRAC**
 - **Funding that is less than the level needed to eliminate new generations and stockpile reduction.**
 - **Controlling costs**
 - **Achieving R3/Closed Disposal percentages**
 - **Maintaining a viable commercial and organic bases.**

Looking Forward “Opportunities for Efficiency”

- ✓ **Sharing of best practices**
- ✓ **Collaboration between missile and conventional ammunition demilitarization programs**
- ✓ **Demil as a source of supply**
- ✓ **Demil technologies**
- ✓ **Scrap proceeds**

**Thank you and
Enjoy the Symposium**
