

# **Critical Joint Issues for Precision Engagement**

*Mr. Doug "Butch" Cassidy  
Joint Fires Division J85  
U.S. Joint Forces Command*

“We are extremely effective at hitting what we’re aiming at. . .”

**Target Destroyed: June 7, 2006**

**Abu Musab al-Zaqawi**

# “Are we aiming at the right thing?”

## News

### Joy at direct hit turns to horror

Horror ... Matty, left, died in an armoured vehicle hit by US tankbuster like the ones pictured, right. Centre pictures show killer pilot's view as he attacked Brit convoy twice, despite markings showing they were friendly troops

Right picture: REUTERS

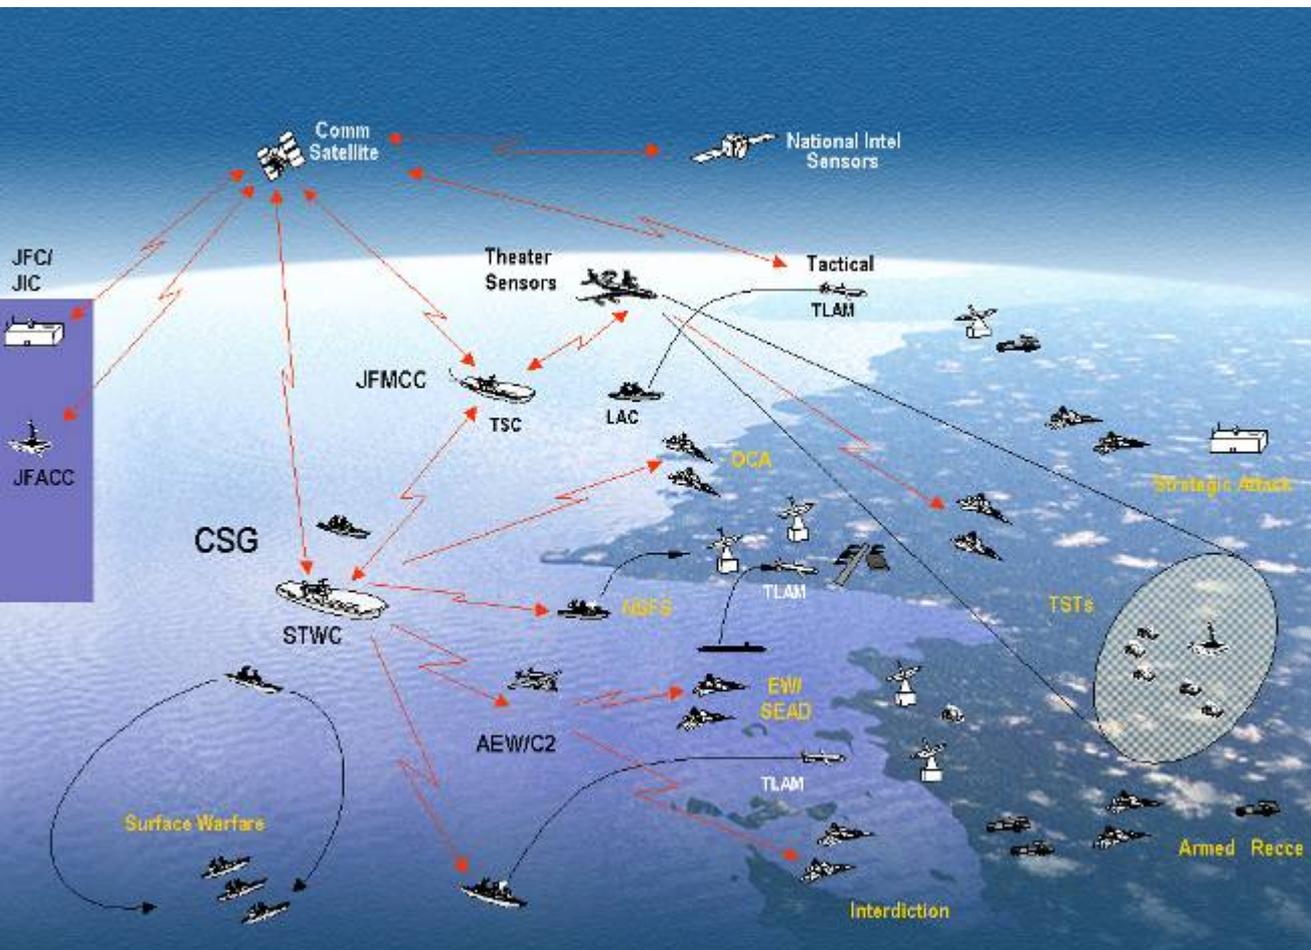

“Minimizing ambiguity (CID) & building situational awareness is the heart of Precision Engagement”

# Overview

- Net-Enabled C2, Precision Engagement Environment
- Combat Identification
- Joint Capability Developer

# 21st Century Warfighting

## *Full Spectrum Dominance*

- Fully Integrated Joint Decisive Operations
- Effects-Based Approach
- Network-Centric Operations
- Decision Superiority
- Global Battlespace Perspective
- Adaptive Force Application

Enabled By Network Centric Environment

# Warfighter Requirements

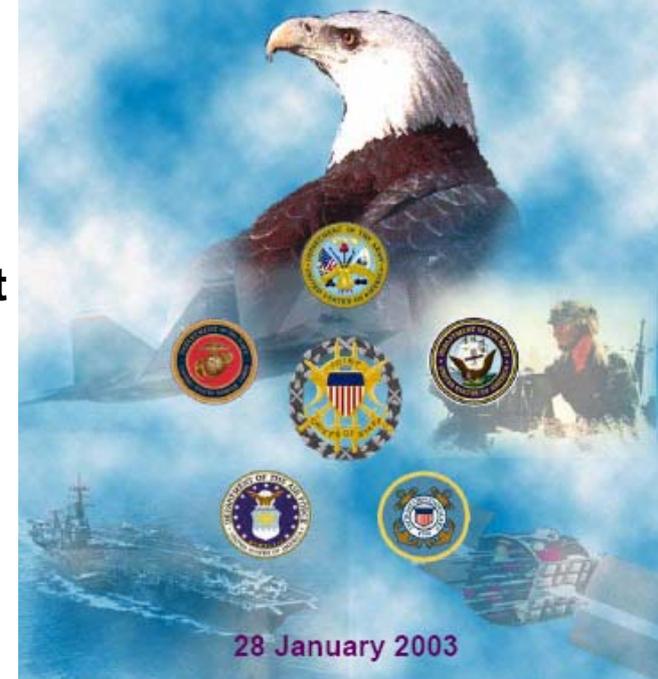

## Global Strike Joint Integrating Concept

“Must be able to engage the full range of fixed, mobile, time sensitive, and specialized targets (including C2 nodes, leadership, WMD/WME), in all weather conditions.”

- **OEF/OIF Lessons Learned**
- **Quadrennial Defense Review**
- **Strategic Planning Guidance**
- **Joint Staff**
  - **C2 Joint Integrating Concept**
  - **Net-Centric Joint Functional Concept**
  - **Force Application Joint Functional Concept**
- **MTTP**
  - **Joint FIRES**
  - **Time-Sensitive Targeting**
  - **Theater Air-Ground System**
- **USN/USA/USAF Transformation Roadmaps**

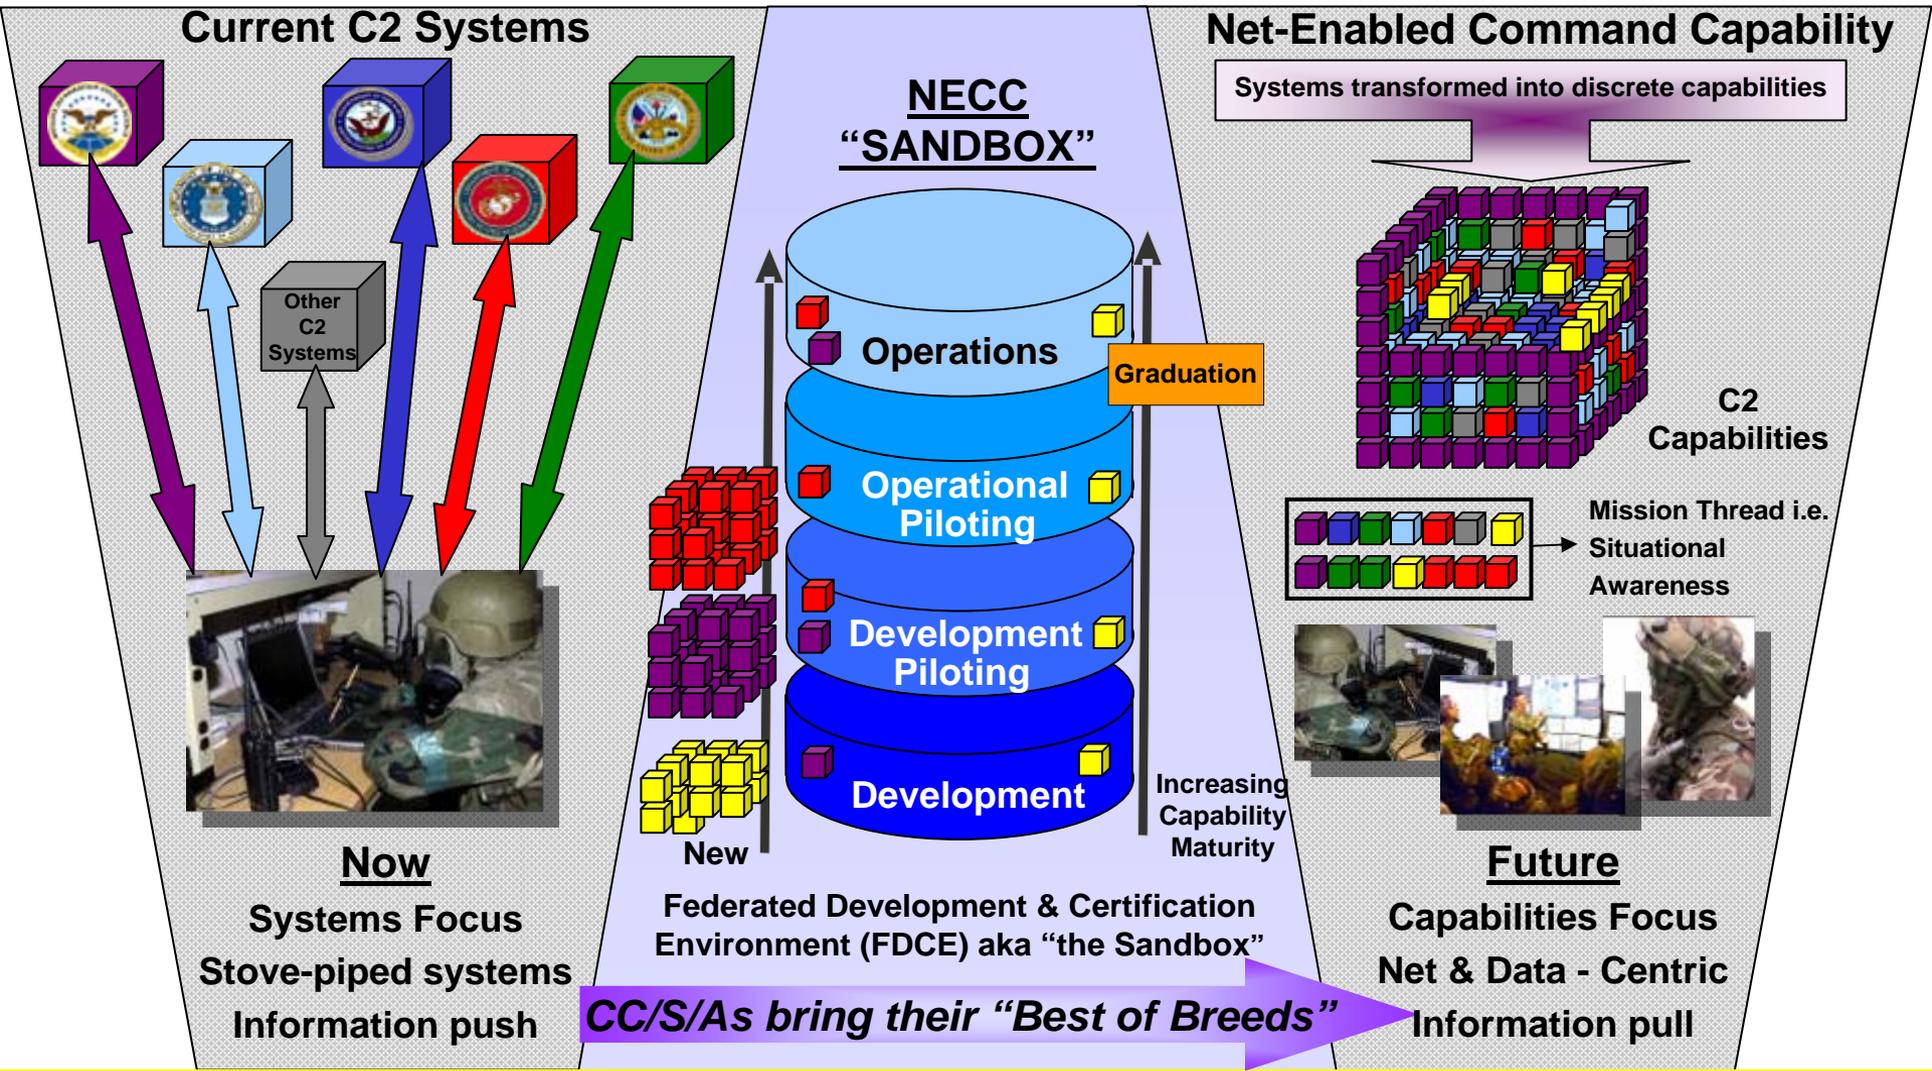

### An Evolving Joint Perspective:

US Joint Warfare and Crisis Resolution  
In the 21st Century

# Net-Enabled Command Capability (NECC)

# NECC – Transforming C2 for the Warfighter

# Joint Fires Integration Challenge

**75% of the target set is mobile or relocatable**

5%			20%				10%			65%				
Fixed Ultra-Hard	Fixed Hard Point	Fixed Hard Area	Fixed Med Point	Fixed Med Area	Fixed Soft Point	Fixed Area Soft	Relocatable Soft Area	Relocatable Med Area	Relocatable Hard Area	Mobile Soft Point	Mobile Soft Area	Mobile Med Area	Mobile Hard Point	Mobile Med Point
Command Bunker	Bridges, Aircraft Bunkers	RIC Manu. Buildings, Runways	Masonry & Steel Buildings	Manuf Fac, Port Fac, RR yards	Refinery, Intel Buildings	POL Tanks, Fixed SAMs	AC in the Open, SAMs	MLRS Site	Arty & AAA Batteries	Mobile SSM, Patrol Boats	Personnel	Truck Convoy	Tank/APC Platoon	Ships

- Missions and tasking span targets across the full spectrum of conflict
- *Precision engagement is increasingly focused on mobile, "danger-close", Hi-Value, and TST in urban environments*
- Warfare places high demands on rapid decision-making and responses.
  - Shared situational awareness and latency are significant factors in current centralized C2 processes.

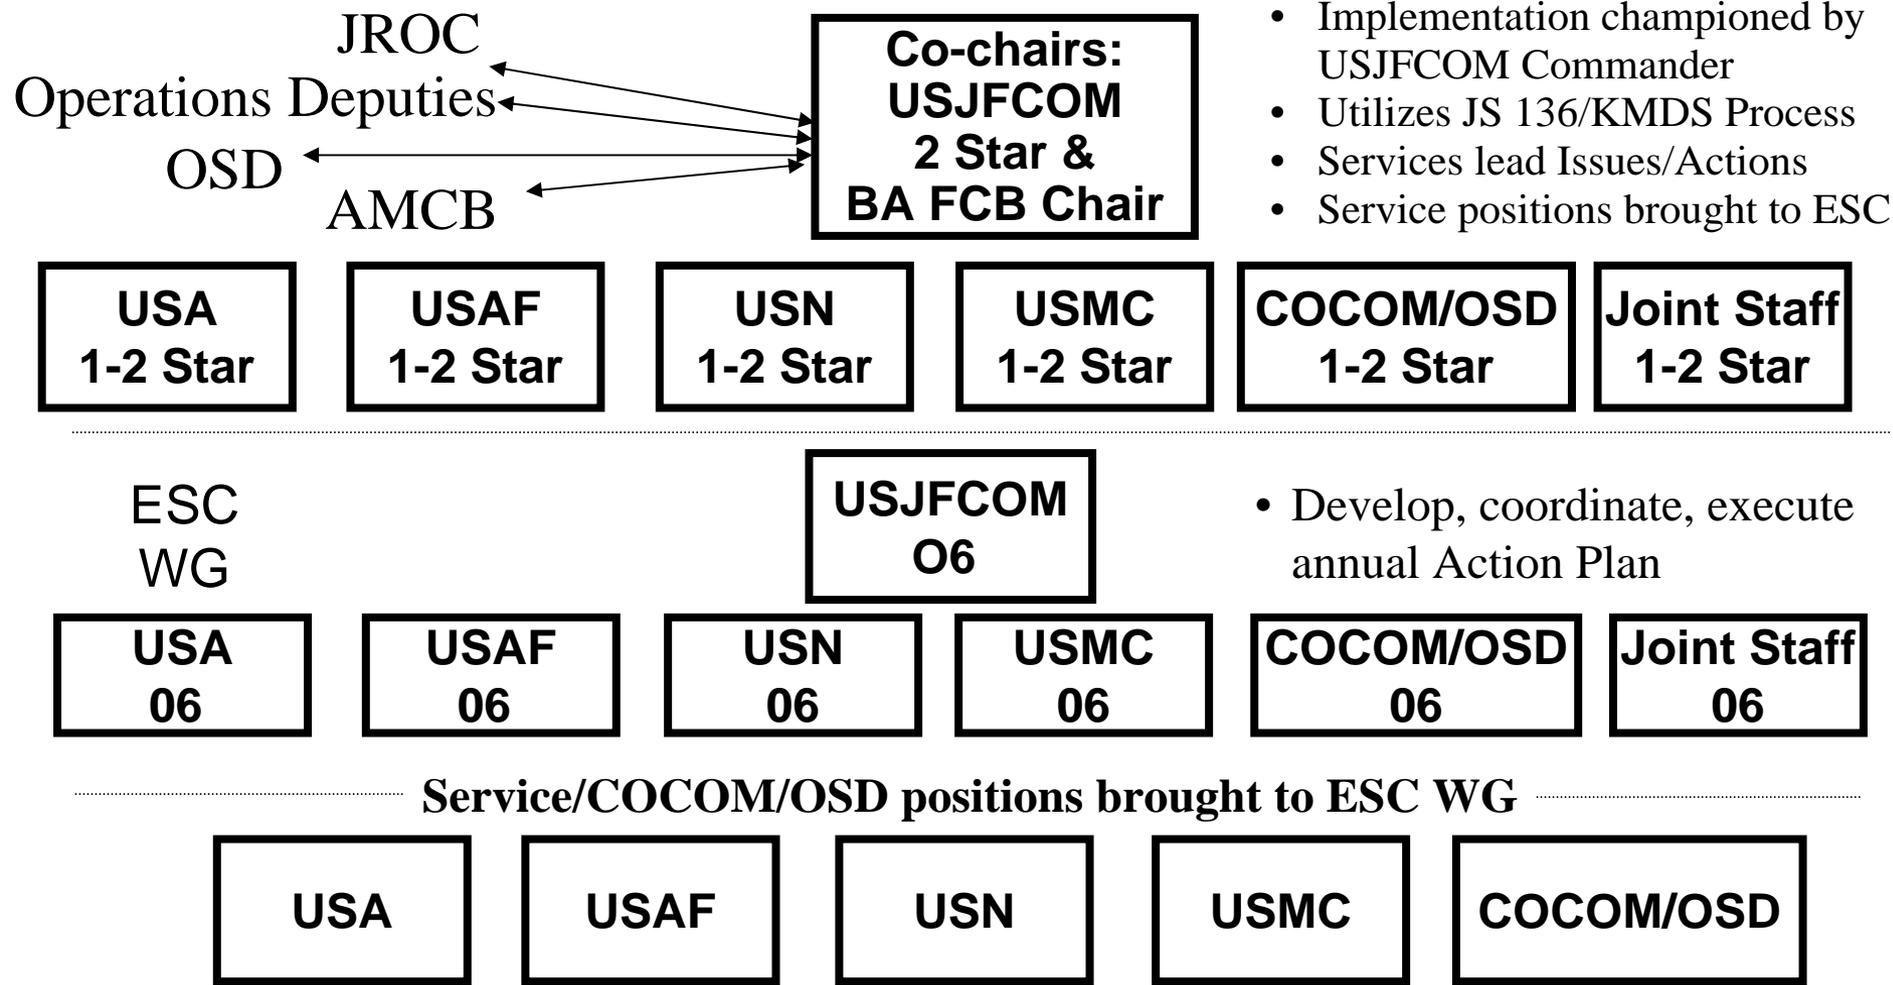

# Urban Environment: Engage the Enemy / Resolve Neutral / Protect Friendly

- Mosque Fighting Pos.
- Slaughter Houses
- Weapons Caches
- Sniper Locations
- IED Factories
- 

Warfighters lack means to accurately characterize and consistently sort enemy, friend, or neutral ground entities in sufficient time to effectively and safely employ weapons and execute military options.

# CID-BFT / JBFSFA Executive Steering Committee (ESC)

- Implementation championed by USJFCOM Commander
- Utilizes JS 136/KMDS Process
- Services lead Issues/Actions
- Service positions brought to ESC

- Develop, coordinate, execute annual Action Plan

# Combat Identification

- **“Combat Identification ... includes cooperative and non-cooperative ... an “all-entity” perspective.**
  - The process of attaining an **accurate characterization of detected objects** in the joint battlespace
  - To the extent that **high confidence, timely** application of military options and weapons resources can occur.
- **Select Combat ID Focus Areas**
  - Cooperative (identification (ID) of **Friend**) technologies for use in Ground-Ground and Air-Ground
  - Non-cooperative (ID of **Enemy**, **Neutral** and **Friend**) machine-to-machine, **net-enabled technologies on C2, ISR** and fixed wing ground attack aircraft

# Blue Force Tracking / Joint Blue Force Situational Awareness

- **Blue Force Tracking (BFT)**: capability provided by a family of systems.
  - Techniques to actively/passively identify & track US, Allied, or Coalition Forces Position Location Information.
  - Provides enhanced battlespace situational awareness; reduces fratricide.
  - **Blue Force Trackers**: generate, **report and / or display blue tracks** and related data.
    - Force XXI Battle Command Brigade and Below (FBCB2); Movement Tracking System (MTS)
    - Grenadier BRAT; Movement Tracker (MTX)
    - NATO Friendly Force Tracker (NFFT); Coalition Force Tracker (CFT); Afghanistan Force Tracking System (AFTS)
- **Joint Blue Force Situational Awareness (JBFSA)**: BFT enhanced by two-way decision quality data sharing.
  - Tracking devices and transmission media employed to obtain, report, and share Blue force identification, location, **status and intent** information.

# CID-BFT/JBFSA ESC POM 08-13

## Investment Recommendations to JROC

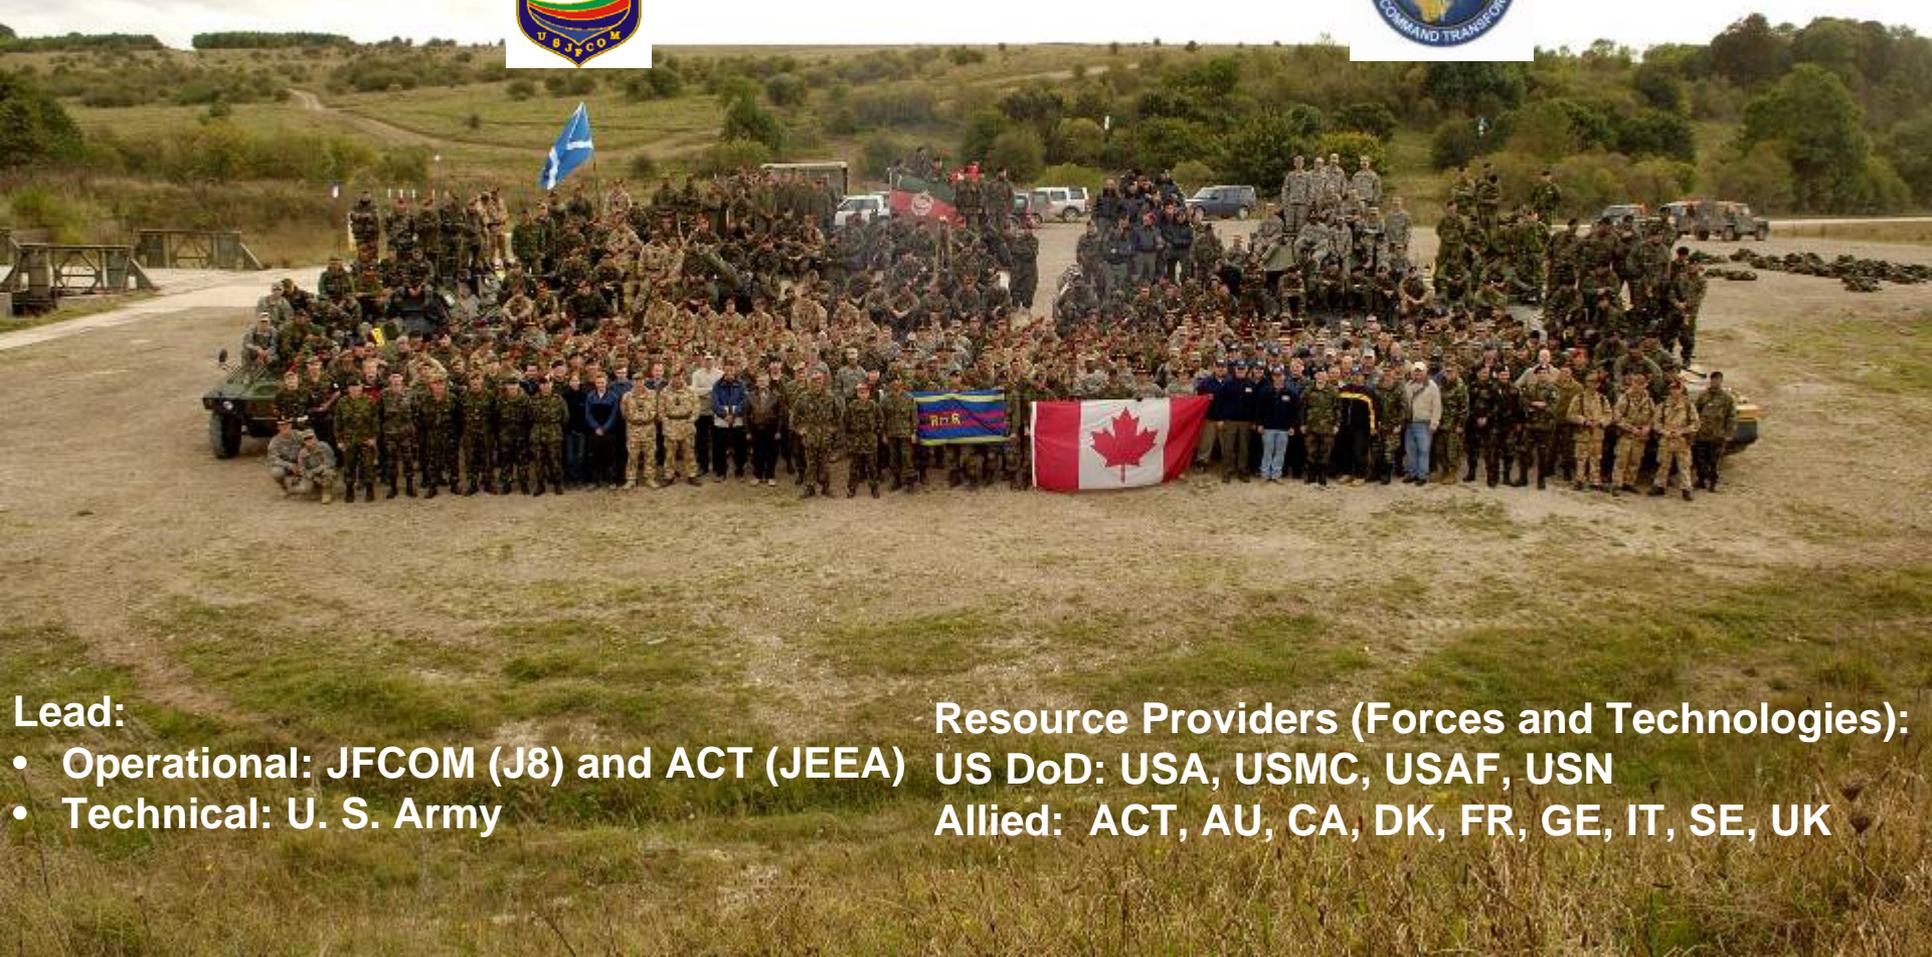

- **Mode V IFF Synchronization**
- **Battlefield Target Identification (BTID)**
- **Radio Based Combat Identification (RBCI)**
- **2<sup>nd</sup> Generation FLIR**
- **Advanced Targeting Pod**
- **Visual ID Training capability**
- **Joint Sensor Signatures Database**
- **Mission Management Center**
- **Joint Tactical COP Workstation**
- **Patriot PID capability**

# CCID ACTD "Urgent Quest"

*"If we're ever going to operate together, you have to figure out how to build your systems so that they're interoperable, preferably from the outset ... I can't tell you how much money we've spent in Iraq and Afghanistan trying to make systems talk to one another that should have been able to talk to one another in the very beginning"*

**General Lance Smith USAF**  
**CDRJFCOM and SACT**  
15 Feb 2006

**Lead:**

- Operational: JFCOM (J8) and ACT (JEEA)
- Technical: U. S. Army

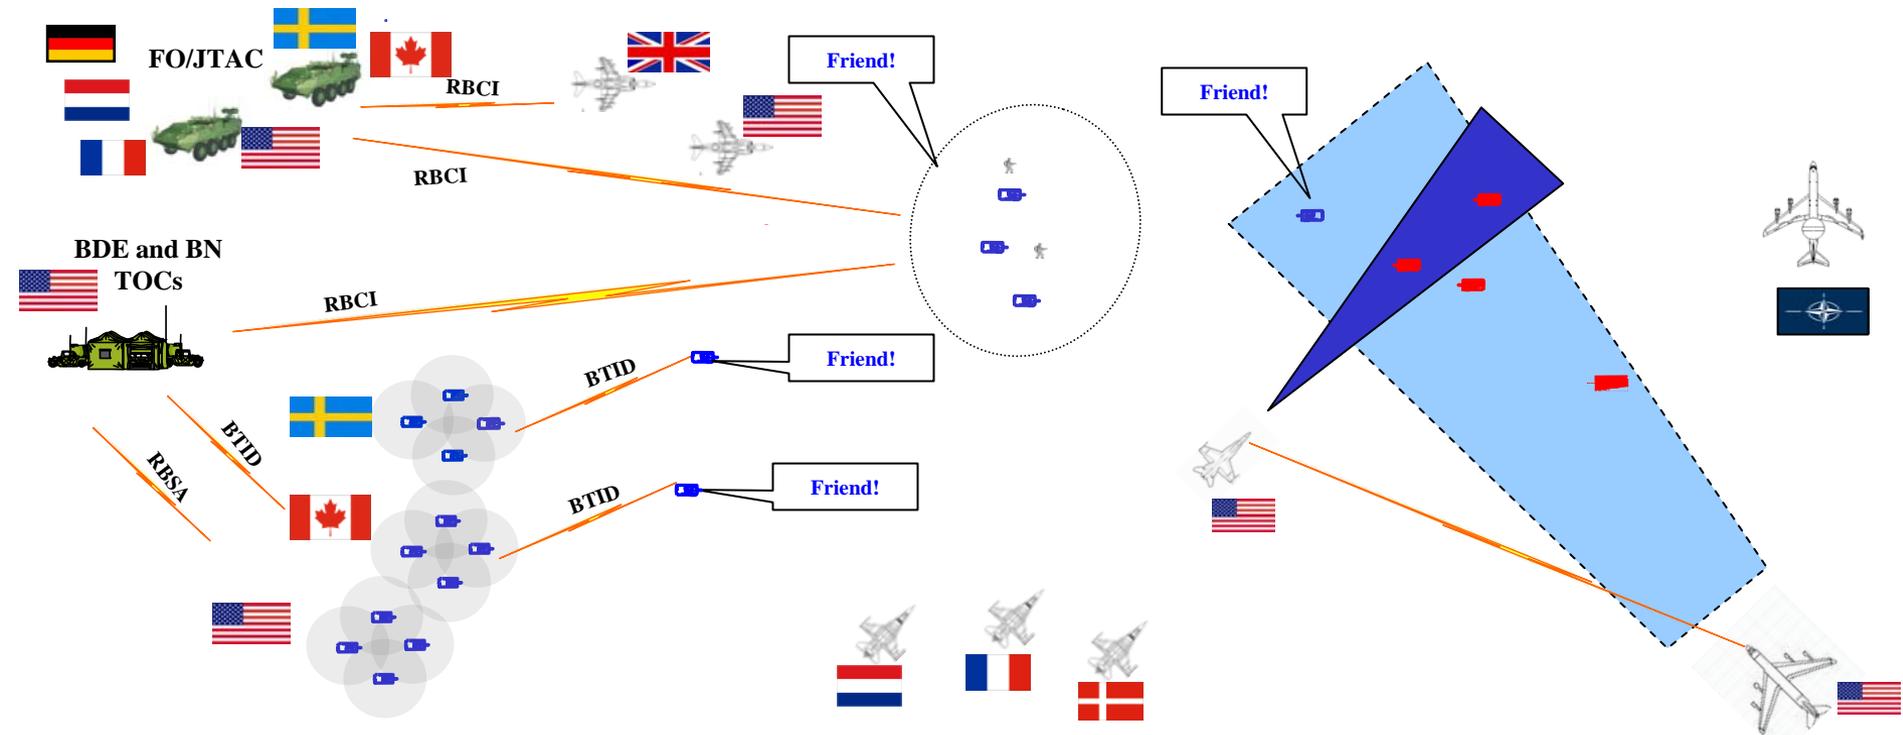

**Resource Providers (Forces and Technologies):**

- US DoD: USA, USMC, USAF, USN
- Allied: ACT, AU, CA, DK, FR, GE, IT, SE, UK

# BOLD QUEST Coalition Combat Identification (CCID) ACTD

**GOALS**

- Assess the military utility of Non-cooperative Target Identification (NCTI) technologies for Air-Ground Combat ID in coalition operations. Feed USAF POM10-15 Build.
- Inform coalition investment in the mix (family of systems) of Target Identification and Blue Force Situational Awareness.

## Joint/Coalition Capabilities

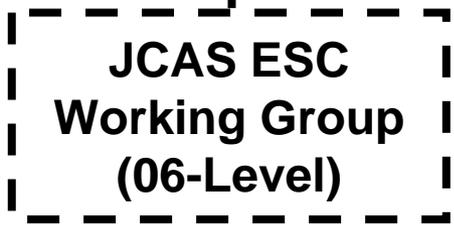

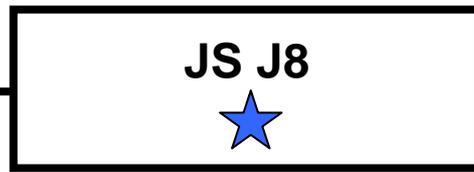

- Non-cooperative target identification from airborne C2ISR and strike platforms
- Cooperative target identification (query/response) from ground combat vehicles and fixed/rotary wing aircraft
- Blue force tracking and situational awareness

## ACTD Systems/Hardware (Target ID)

- Non-cooperative: Laser Target Imaging (LTI); Synthetic Aperture Radar/Aided Target Recognition (SAR/ATR)
- Cooperative: Query-Response (RBCI, BTID)

# JCAS ESC

Chairman

**Proposed Additions  
for JROC Consideration  
(via 22 Mar 07 JCAS ESC)**

**Additional  
Voting Members:**

- OSD(NII)
- USD(AT&L)
- COCOMs
- JT FCB
- FA FCB

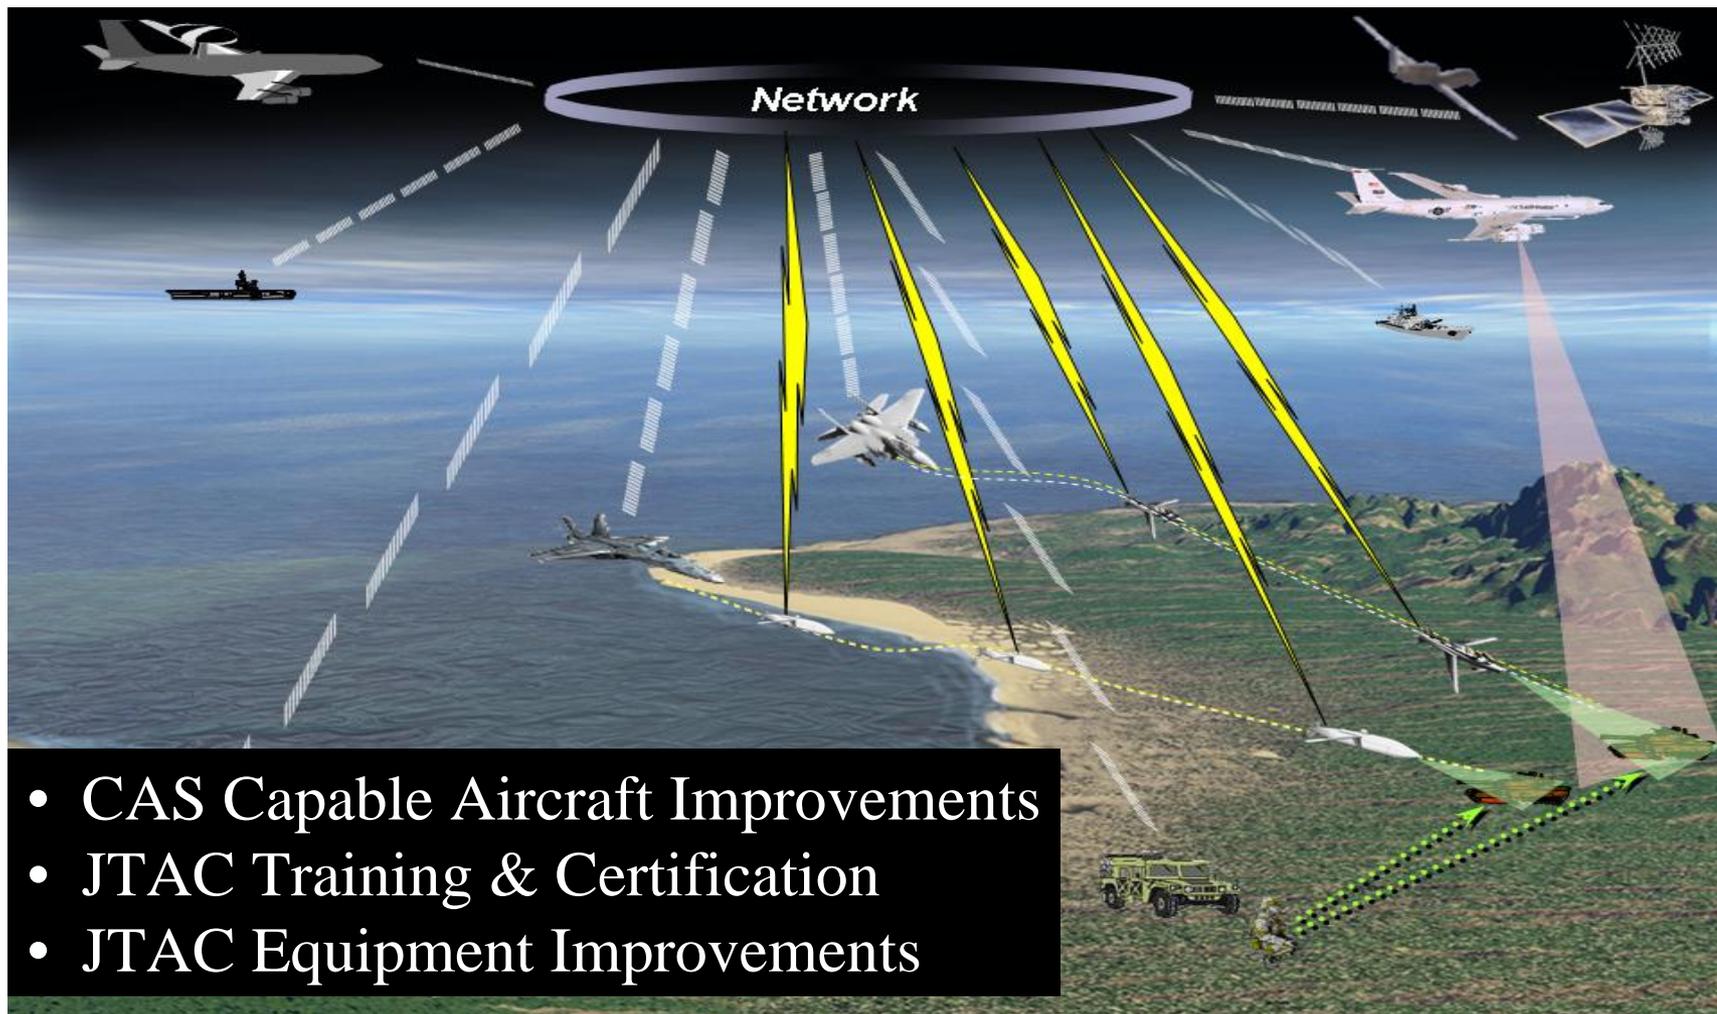

**Additional  
Non-Voting Members:**

Participating Coalition countries  
(UK, Australia, Canada...)

# Digital Information to the Cockpit

# Air-to-Ground Tactical Network

# CAS Capable Aircraft Improvements

- Add VMF capability to the AV-8B with form/fit replacement of ATHS-II with StrikeLink (A) enabled hardware consisting of a processor, a modem and a 1553 interface
  - Potential low cost solution
  - Interoperability
  - Leverage StrikeLink software
  - Initial fielding of capability without OFP update requirement
- Working with PMA-209 for development of StrikeLink (A) as a common avionics WRA
- Ongoing:
  - H-1 joining effort to implement for capability demonstration and potential MEU deployment
  - Feb 07 briefing in Rota , Spain to JPO Harrier partners (Spain, Italy, UK)
  - V22 discussion in work
  - MAWTS-1 digital CAS discussion on-going
  - JFCOM engaged with USAF for possible application

# JTAC Standards Improvements

- Training and certification standards
  - JTAC MOA created JTACs and established standards recognized across DoD
  - Coalition JTAC training / standardization next
    - **Australian JTAC Course accredited Mar 06**
    - **UK, Canada, Denmark and Netherlands in coordination**

# **JTAC Equipment Improvements**

- **Equipment interoperability**
  - **Service/SOCOM Tactical Air Control Party (TACP) equipment suite program managers and technicians exchanging ideas for improving digital interoperability near-term**
  - **Joint Effects Targeting System (JETS) is common solution for long-term**
    - **Light-weight, handheld Target Location Designation System (TLDS)**
    - **Light-weight, handheld Targeting Effects Coordination System (TECS) = computer + software**

# Reliable Target Characterization = Enhanced Engagement

***“It is not the object of war to annihilate those who have given provocation for it, but to cause them to mend their ways.”***

**-Polybius, Greek  
Historian (2<sup>nd</sup> Century  
B.C.)**

# *Questions?*

A silhouette of a fighter jet, likely an F-35, is shown on a runway. The jet is positioned in the center of the frame, facing left. The background is a dramatic sunset or sunrise over the ocean, with the sun low on the horizon, creating a bright glow and casting long shadows. The sky is filled with soft, golden light and some clouds. The overall mood is serene yet powerful.
