NDIA CMMI Technology Conference – Nov 16-19, 2009

- ▼ Intro to SPAWAR
- ▼ SPAWAR Systems Center Atlantic
CMMI® History
- ▼ Post ML3 – Now What ?
- ▼ Sustainment & Institutionalization
- ▼ Multiple Methods
- ▼ 2010 and Beyond
- ▼ Lessons Learned

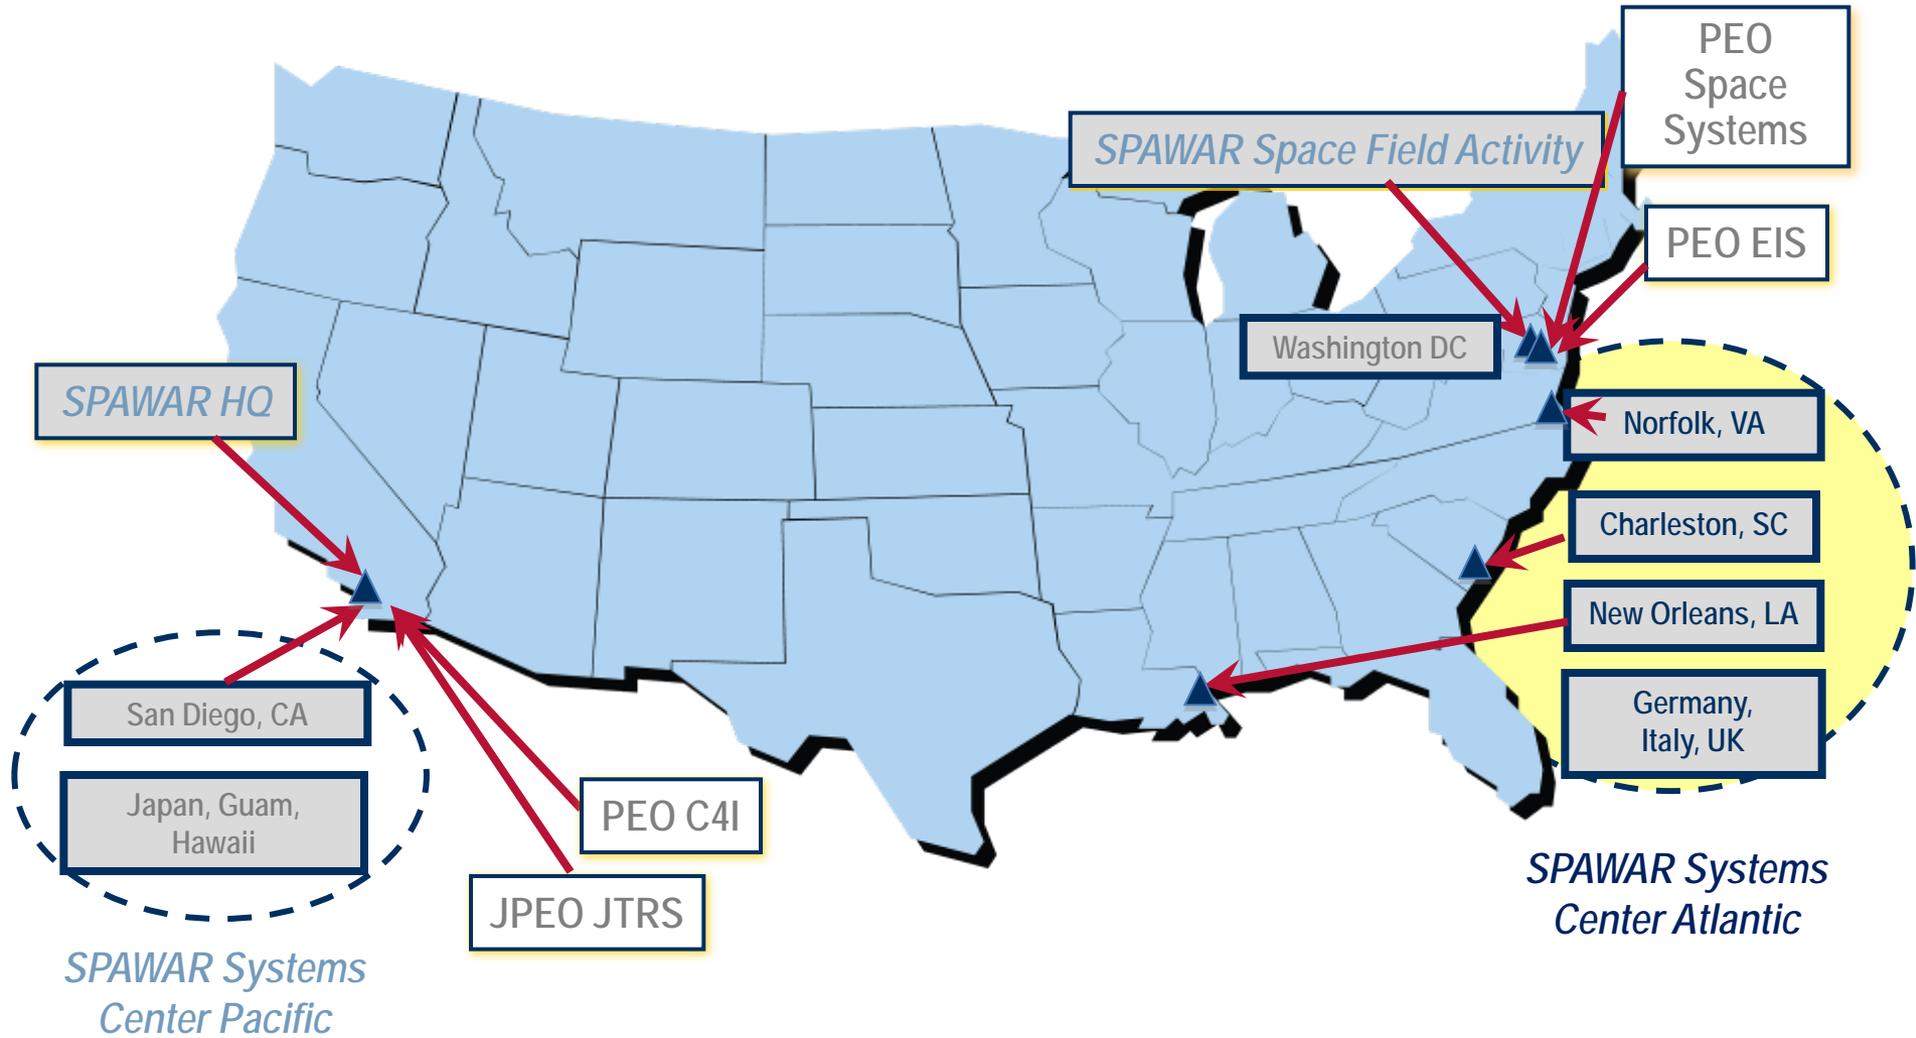

Space and Naval Warfare Systems Command Intro to SPAWAR – Who We Are

- ▼ Navy's Technical Authority and acquisition command for C4ISR*, business IT, and space systems
- ▼ Provide quality full-service systems engineering and acquisition to rapidly deploy capabilities to the Warfighter
- ▼ More than 12,000 employees and contractors deployed globally and near the fleet
- ▼ \$9.869B Organization

*Command, Control, Communications, Computers, Intelligence, Surveillance & Reconnaissance

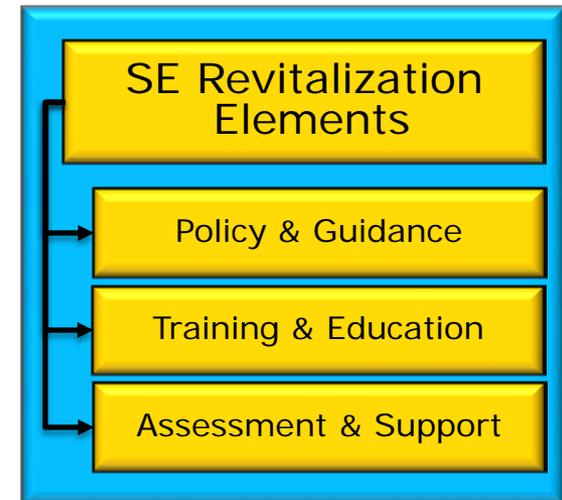

Intro to SPAWAR – Where We Are

SPAWARSYSCEN Atlantic CMMI History: Process Improvement Approach

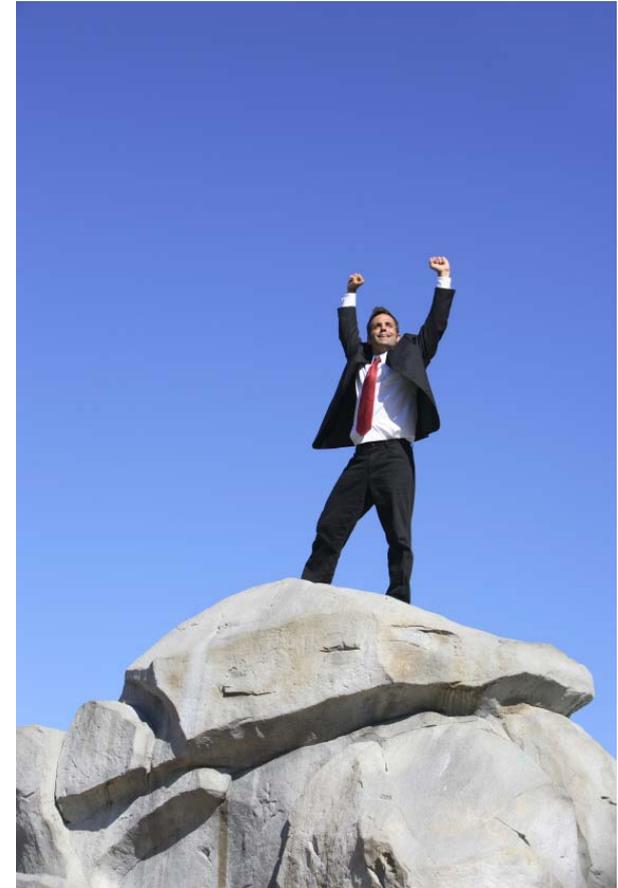

- ▼ Aligned with common issues/themes from DoD SE Issues Lists
 - Need for SE Revitalization, Engr & Proj Mgmt Guidance, & Training
- ▼ Selected CMMI as assessment model
- ▼ Selected broad variety of pilot projects
- ▼ Developed Organizational infrastructure, templates, and tools
 - Processes assigned/owned by Integrated Process Teams
- ▼ Conducted extensive Training – SE, Proj. Mgmt., CMMI, Risk Mgmt.
- ▼ Coaching & Mentoring
 - Organization and project level
- ▼ Frequent benchmarks – Class C, B, A appraisals
 - Publicized successes

SPAWARSYSCEN Atlantic CMMI® History: Timeline of Success

▼ Process Improvement Timeline

- 2001-2003 – Figuring it all out
 - Pilot projects; Initial CMMI® training
 - 20-30 projects working on Level 2 processes
 - Trained over 800 employees
- 2004/2005 – Shift to SE focus (not CMMI®)
 - Project level benchmark SCAMPI A appraisals
 - Heavy Training continued – SE, PM, CMMI®
 - Integrated Process Team (IPT) infrastructure established for process ownership and sharing
 - Successful ML2 SCAMPI A (Charleston)
- 2006/2007 – Similar 2-year approach for ML3
 - “Focus” and “non-focus” projects
 - Successful ML3 SCAMPI A (Charleston, Tidewater)
- 2008 – Command Consolidation (Charleston, Tidewater, New Orleans)
- 2009 – Successful ML3 SCAMPI A (New Orleans)

Post ML3 – Now What ? Continuous Process Improvement !

▼ What did that mean?

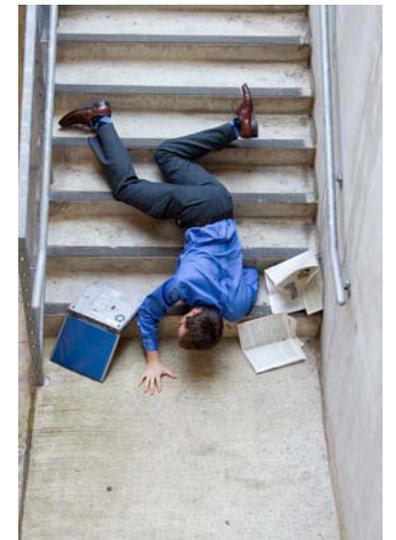

- High Maturity (ML4/5)? - Logical next step
OR
- Institutionalization and broader exposure?

▼ Pushed both agendas

- Educated on high maturity processes & measures
 - Existing data not complete, clean or detailed
 - Lack of agreement on common measure
- Developed internal assessment for new “CMMI[®] projects”

▼ End Result

- Splintered message; overtaxed resources;
loss of focus
- Realization - Not Ready for High Maturity
- Danger of slipping back!

©iStockphoto.com/PhotoEuphoria

Post ML3 – Now What?

Continuous Process Improvement at ML3

Sustainment (Project Level)

- ▼ Like Diet Maintenance
 - Keep the Discipline
- ▼ Fix/Improve weaknesses
 - Peer Reviews
 - Measurement
- ▼ Regular Monitoring and Control
 - Active Quality Assurance
 - Contribute to Organization PAL
- ▼ Seamless shifts/changes
 - Project phases
 - Team members
- ▼ Internal improvements

Institutionalization (Org Level)

- ▼ Grow and spread usage
 - Convert the non-believers
 - Apply to more/all projects
- ▼ Refine and Improve processes
 - Address “global” issues
 - Add detail where necessary
 - Institute control points
 - Consolidate the common
 - Simplify
- ▼ Integration
 - Lean Six Sigma
- ▼ Update infrastructure

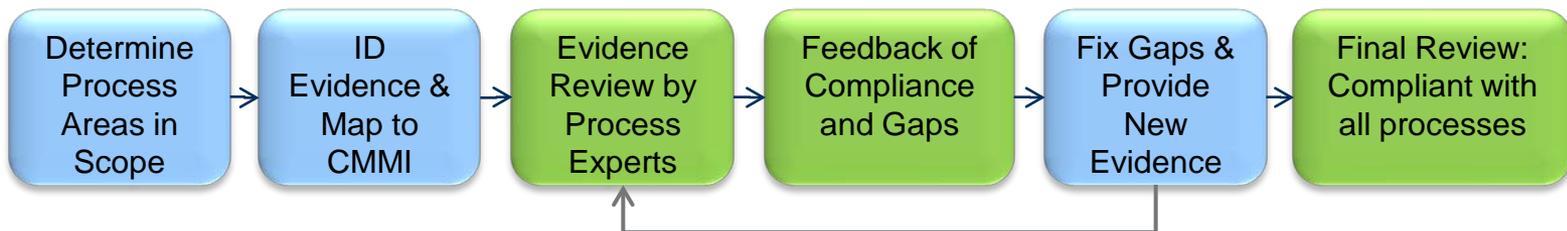

Methods for Sustainment & Institutionalization

- ▼ CMMI® Internal Assessments
 - Less costly than SCAMPI A
 - Project, Program, Area scope
- ▼ New Project Initiation and Startup process
 - Improve initial scoping/planning
- ▼ Enhanced Reviews Process
 - SOPs and Checklists
 - Management Oversight Reviews
- ▼ Integrate with other initiatives
 - Lean Six Sigma
 - Technical Authority
 - Navy ERP (SAP)
- ▼ Maintain infrastructure
 - Process Maintenance by IPTs
 - Adapt to changing organization
- ▼ Continue Training
 - CMMI
 - SE, Integrated Risk Mgmt
 - Project Initiation
 - Reviews
- ▼ Measure
 - Internally Assessed Projects
 - Reviews
 - Other Maturity Models
- ▼ Spread News of Success

Methods for Sustainment & Institutionalization- CMMI® Internal Assessment

- ▼ Typically, at Project or Program level
 - Full body of evidence and artifacts required
 - Not a single event, but an assessment over time with gap analysis and multiple feedback loops
 - By objective CMMI® -trained resources (1 or 2)
- ▼ May not assess all CMMI® ML3 process areas
 - Allows for focusing / scaling to most beneficial areas
 - Minimum core areas – Project Mgmt, Requirements, Risk, CM

Methods for Sustainment & Institutionalization- CMMI® Internal Assessment

▼ Outcome

- Validates that project/program is following CMMI® best practices
- Recognition – Process Excellence certificate
 - NOT a Maturity Level (or CL) rating, but high probability that project would achieve the corresponding rating if SCAMPI A assessed

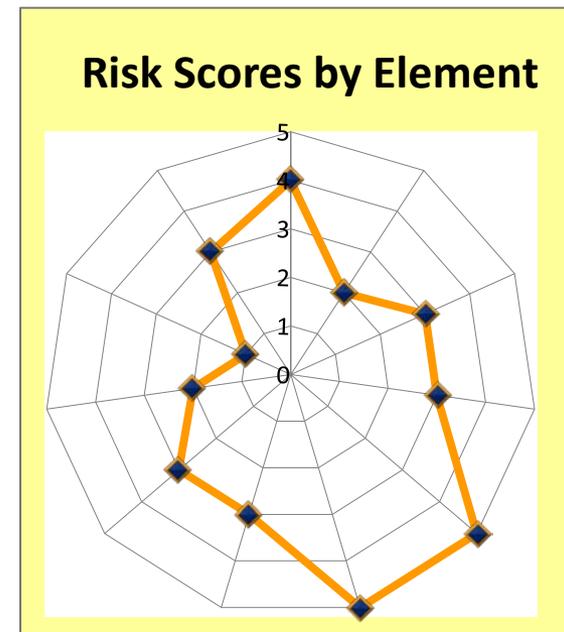

▼ Benefits

- Expansion of best practices
- Broadens participation
 - Suitable for all sizes
 - Tailorable for non-Development
- Projects experience improvement first hand
- Incremental approach

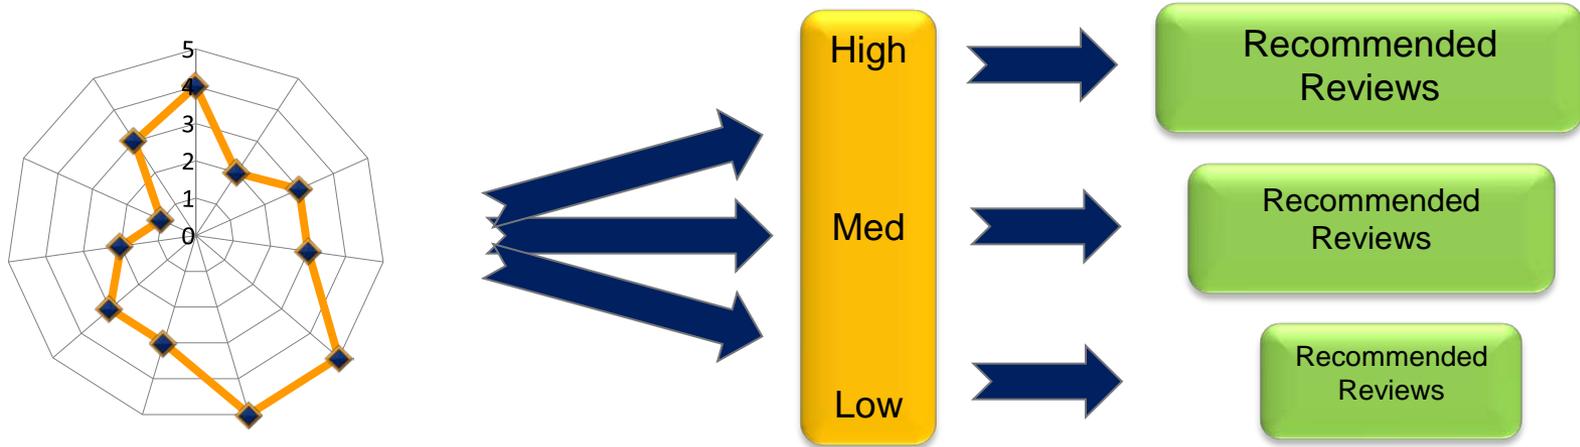

Methods for Sustainment & Institutionalization- Project Initiation Request

- ▼ How to get new projects to determine right amount of SE and Project Planning needed?
 - SPAWAR is too diverse for canned “tailoring scenarios”
- ▼ Objective method to assess potential risk was needed
 - Often, small projects with high visibility had big execution issues
- ▼ Project Initiation Request (PIR) process:
 - Profiling questions: Visibility, Teaming complexity, Impact of failure, Quality of requirements, Technology dependency, Project leader experience, Similarity to other projects, Funding issues, Schedule drivers, etc.

Methods for Sustainment & Institutionalization- Enhanced Reviews Process

Risk Profile Score ... Drives Level of Rigor ... and Recommended Reviews

▼ What we are doing:

- Built a flexible reviews process scalable to managerial needs and/or project size
- Emphasizing ACAT SETR type reviews for non-ACAT programs
 - Tailored Review Checklists
- Improved Review tracking

▼ What we are gaining:

- Well-defined triggers to spawn higher level reviews
- Continuity in management and SE across the command
- Identifying opportunities to increase net readiness of product

Methods for Sustainment & Institutionalization- Integrate with Other Initiatives

▼ Lean Six Sigma

- Enabler for Continuous Process Improvement
 - Tools and Structure (DMAIC)

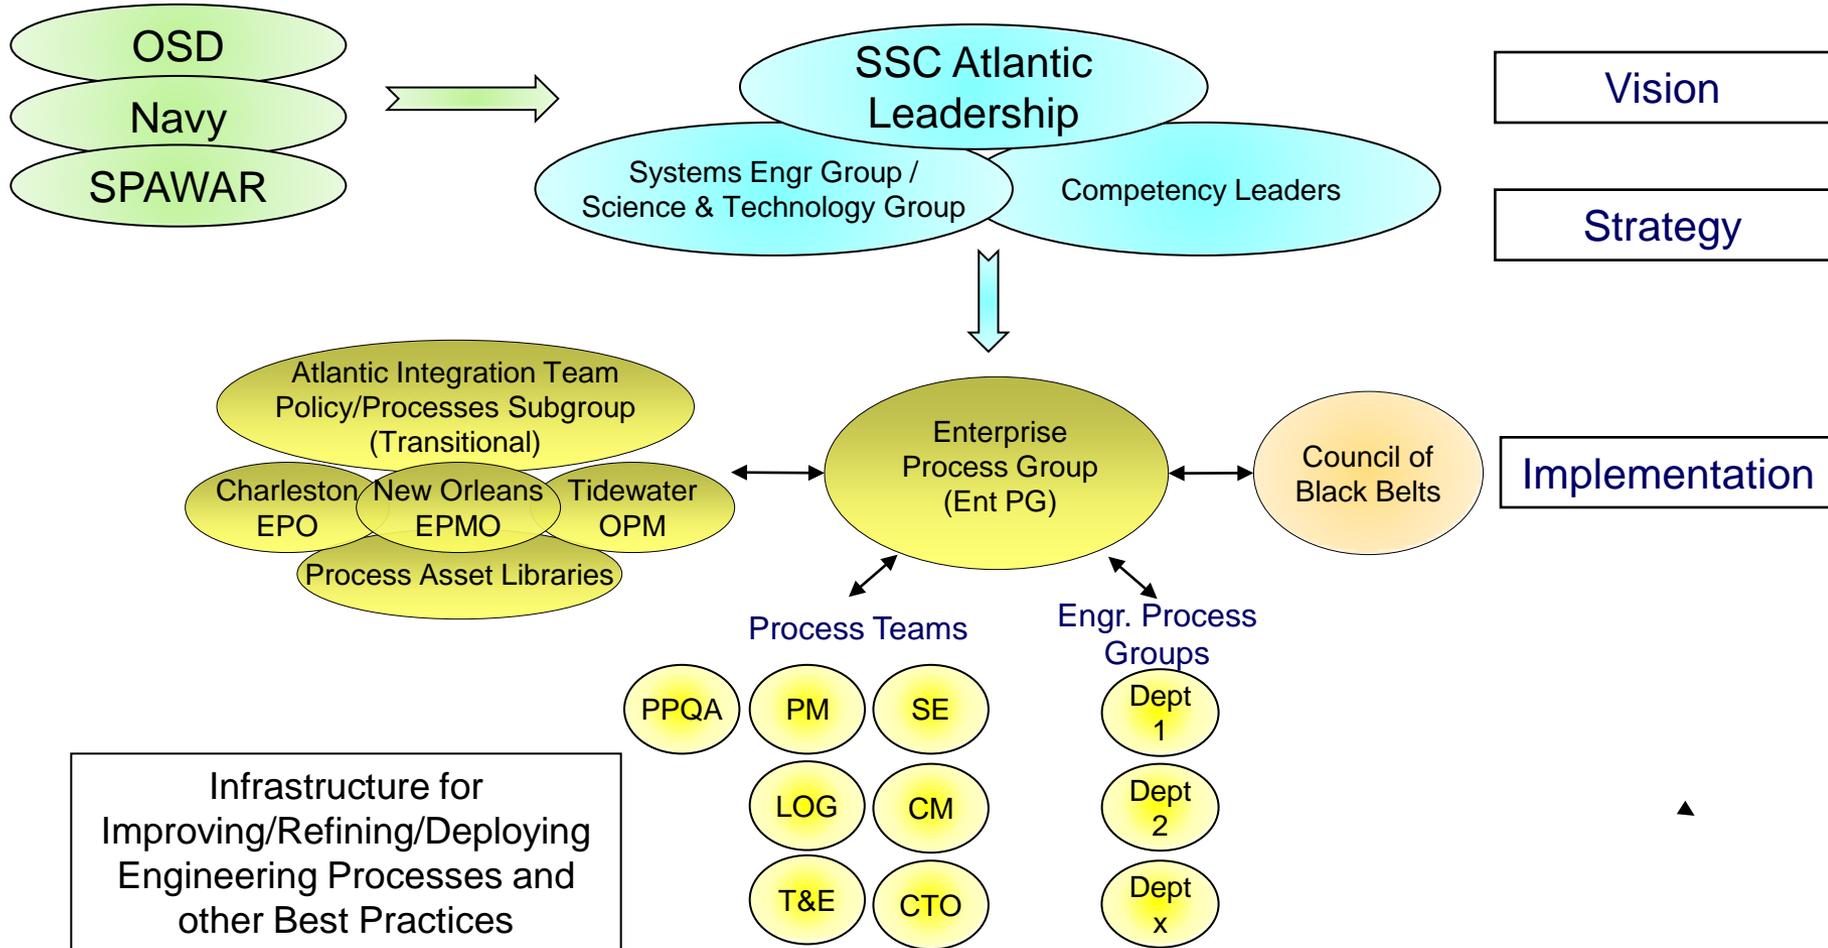

▼ Technology Authority

- Utilize “warranted” experts on technical reviews (SETRs)
- Scaling down ACAT/POR SETR checklists for non-Program of Record projects

▼ Navy ERP

- Linking completion of Project Initiation to release of funds in ERP
- ERP to improve cost and schedule measurement/monitoring

Methods for Sustainment & Institutionalization- Maintain Infrastructure

Methods for Sustainment & Institutionalization- Command Funded Training

- ▼ Introduction to CMMI®
 - 3-day Introduction to CMMI® course with SPAWAR flavor
 - Students learn how the best practices build and relate across process areas
- ▼ Systems Engineering Fundamentals, Integrated Risk Management
 - Multi-day, on-site, classroom courses
 - Based on SMU SE Masters courses
 - Customized to incorporate SSC Atlantic SE process
- ▼ Project Initiation, Self Assessment
 - 2-day Project Initiation, Review Process & CMMI Internal Assessment workshop
- ▼ Lean Six Sigma - # of Active Belts
 - 40 Black Belts, 217 Green Belts, 260 Yellow Belts
- ▼ Web-Based Engineering Modules

“Thought provoking, motivating, and challenging. Learning basic SE caused me to brainstorm many different applications of organized system processes. It motivated me to want to begin organizing its application. It also challenged me to apply GOOD SE practices in order to successfully be more efficient in the process..”

“It was extremely beneficial to have a professor with extensive knowledge of the subject matter and one who could apply it to the SPAWAR methods.”

Student Feedback

Methods for Sustainment & Institutionalization- Measure

▼ Balanced Scorecard – Quarterly/Annual targets

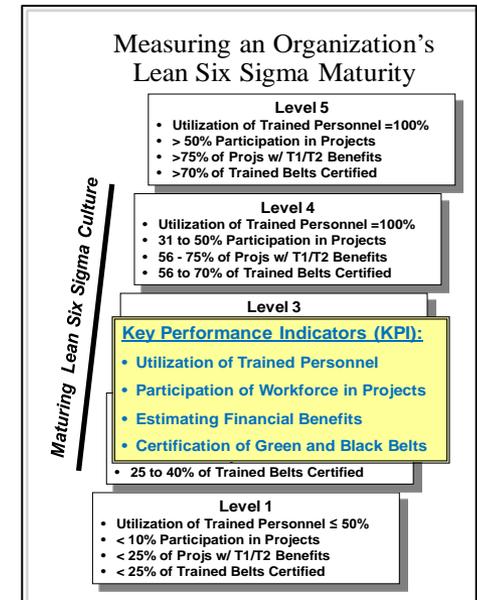

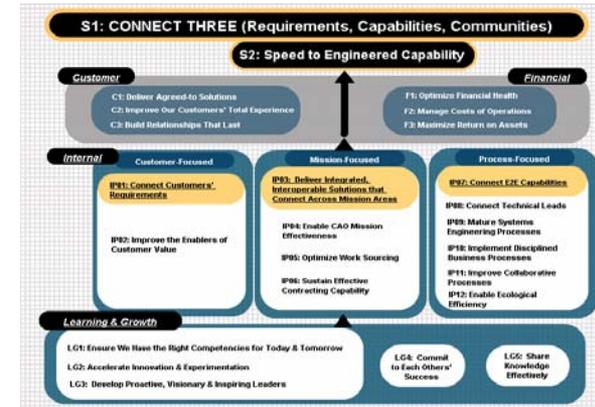

- Number of CMMI® Assessed Projects
- Project Initiation Usage
- Reviews Tracking
- ForceNet – Fully Netted Force (FnF) and Fully Netted Resource (FnR) assessments

▼ Lean Six Sigma Maturity Model

- Maturity Model framework is easy to understand
- Assesses levels of training, certification, participation, and utilization

▼ Documented Processes

- # of processes and procedures documented using Oracle Tutor tool

Methods for Sustainment & Institutionalization- Spread the Word

- ▼ Systems and Software Engineering Newsletter (S²E News)
 - Informs folks of latest improvements/initiatives
 - Spreads the word on upcoming training or events
 - Recognizes projects for their achievements

The Benefits of CMMI®

SSC Charleston's Project Managers have pushed their teams to practice CMMI® and are reaping great benefits as a result. The Engineering Process Office sat down with them to discuss what they learned during their pursuit of Maturity Level 2. Article on Page 2.

KUTCH'S KORNER: CMMI® Makes SSC-C Work Smarter

In the past year, we've taken great steps toward making SPAWAR Systems Center Charleston a world-class engineering organization. We had our teams go to CMMI Maturity Level 2, and their experience is the focus of this issue of the S²E NEWS. Granted, this effort required significant work, but SSC-C is seeing numerous benefits as a result of implementing CMMI. By jumping ahead, these teams have provided a roadmap we all can follow, allowing us to work smarter to achieve the same success. The tangible, quantifiable benefits we've reaped by implementing CMMI have boosted SSC Charleston's reputation - both in the Command and the civilian world - as a quality engineering institution, and that's something we can all be proud of. In their interviews for the article you're about to read, SSC-C's projects were very candid about the difficulties they encountered, the new processes and techniques they've implemented, and the resultant benefits. Some said they only made minor changes, while others experienced a dramatic

Stumped by CMMI®-Related Reviews? EPO Website Features Review-Related Docs

A crucial part of the CMMI® model, reviews are an oft-neglected subject for new and established projects alike. In response to SSC-C projects' requests for more specific guidance, the Engineering Process Office (EPO) has developed new resources and an online repository of review-related documentation.

"The focus is now on treating the review process as its own organized process," said Bruce Carter, Director of Engineering Operations (Code S2EO). "Any existing project can take advantage of these new resources."

In July, two new pages were launched on the EPO website: a SSC-C Review Process page and an SOPs, Checklists & Forms page.

The SSC-C Review Process page is a clearinghouse of review-oriented documents, including over three dozen SOPs and nearly 70 checklists and forms. The new SOPs, Checklists & Forms page puts every SOP, checklist, and form used at SSC-C in one convenient location.

"Reviews have always been a part of the SE process, but this new approach consolidates all review information into one location," Carter said. "This makes planning easier."

In addition, the SSC-C Review Process Manual has undergone a major revision to make it more complete and to bring it in line with Systems Engineering Technical Review Process Instruction SPAWARINST 5400.3.

The Review Process Manual now covers product, project, and process reviews more thoroughly. Review types and definitions have been added, and there is more description of the standard steps and process flow.

FOR FAST ACCESS:

- New Review Process Page: <http://engproc.ssc.army.mil/news/standaloneprocessreviewprocess.asp>
- New SOPs, Checklists & Forms Page: <http://engproc.ssc.army.mil/news/standaloneprocessreviewforms.asp>

NEW PIR IS YOUR GUIDE

The new SSC-C Project Initiation Request (PIR) process is designed to help projects with upfront planning and analysis of project scope, size, and complexity through the use of a risk profiling worksheet. The process begins when a customer submits a request to initiate work. To lead projects and supervisors through the process of developing and reviewing PIR data, SSC-C has developed several new PIR-related documents.

The newly-developed PIR Data Development (PIR) SOP guides a project step-by-step through the early stages of developing their PIR data. To assist them, SSC-C has developed the PIR Profiling, Required Reviewer S2 Template, a fill-in-the-blank worksheet.

The completed project PIR data includes the PIR Form (or equivalent documentation), Project Profiling Worksheet, Required Reviewer Worksheet, and Project Tailoring Form.

KUTCH'S KORNER: CHANGES IN LATITUDES, CHANGES IN ATTITUDES

It's these changes in latitudes, changes in attitudes
Nothing remains quite the same
With all of our training and all of our learning
If we couldn't learn, we would all go insane
Jimmy Buffet - Changes in Latitudes, Changes in Attitudes

Our Command has undergone significant change lately and FY2009 promises more change. We have new leadership in place, we are growing due to SSC Atlantic, and we

SSC Atlantic Sets Sights on CMMI® Maturity Level 3

Formal Appraisal of Charleston, Tidewater, and New Orleans Projects in 2010

The merging of SPAWAR Systems Centers Charleston, Tidewater, and New Orleans into SSC Atlantic has spurred a push for the entire organization to reach Capability Maturity Model Integration (CMMI®) Maturity Level 3 in less than two years.

The target date for a formal "Class A" Standard CMMI® Appraisal Method for Process Improvement (SCAMPI®) appraisal for SSC Atlantic has been set for March 2010.

"Our vision is still world-class systems engineering, but our main focus is getting the entire organization to Maturity Level 3 (ML3)," said Bruce Carter, Director of Engineering Operations (Code S2EO). "However, we are still encouraging individual projects to go further to CMMI® Maturity Levels 4 and 5. Those projects will continue to receive support from the organization and the EPO."

In April 2007, the former SSC Charleston became the first SPAWAR Systems Center to reach CMMI® ML3.

Five months later, in September 2007, the former SSC Norfolk achieved the same milestone. SSC Atlantic projects in New Orleans are slated to undergo a formal SCAMPI Class A appraisal in April 2009 to reach ML3.

An organization that achieves a Maturity Level rating must re-evaluate the rating every three years. That means the former SSC Charleston's ML3 rating will expire in April 2010 unless SSC Atlantic successfully re-evaluates ML3 in March 2010.

"It's important to understand that a Maturity Level rating is not a one-time-only thing - it's a continuous process. You can't just sit back and say 'OK, we made it to ML3 and now we can relax,'" Carter said. "All projects that have individually achieved ML3 should still be operating at ML3. We can't lose that momentum."

A cross-section of projects from Charleston, Tidewater, and New Orleans will be selected to participate in the SSC Atlantic SCAMPI, Carter said.

To prepare, the projects will undergo a series of internal self-assessments and Class C appraisals during 2009 to gauge their readiness and whether they have sustained their current Maturity Level processes.

In addition, the Engineering Process Office will continue its regular one-on-one coaching sessions with projects.

KUTCH'S KORNER: COMMIT TO CHANGE, FIND NEW OPPORTUNITIES

John F. Kennedy once said "change is the law of life," and that has been especially applicable in recent months as SPAWAR undergoes rapid changes on many fronts.

We are in the midst of a Competency Aligned Organization (CAO) with Competencies, new Business Units and Integrated Product Team 6, the rollout of Navy ERP, and the consolidation of SPAWAR systems centers in Charleston, Norfolk, and New Orleans to create SPAWAR Atlantic.

The way we do business is changing, requiring us to leverage our knowledge in new ways, expand geographically, and integrate new people and projects.

IN THIS ISSUE

- 1 SSC Atlantic Sets Sights on CMMI® Maturity Level 3
- 1 Kutch's Korner
- 2 2009 Innovation Program Wins! Announced
- 2 2008 Encourages

- ▼ CMMI[®] Maturity Level 3 Appraisal/Re-appraisal
 - 1st for new SSC Atlantic organization
 - All sites comprising Atlantic achieved ML3 previously
 - Challenge to show integration and alignment to Atlantic standard organizational processes
- ▼ CMMI[®] for Services
 - Begin implementation of new Services constellation
 - Appropriate for many projects/programs in SPAWAR
 - Software Help Desks, Data Centers, Network Management
- ▼ Leverage Navy ERP
- ▼ Consolidation and Integration of process assets to single process asset library

▼ No room for complacency

- Must keep focus on continuous process improvement
- Maintain high standards; don't dilute the effort

▼ Sharing isn't "natural"

- Successful projects are often focused on remaining successful and may ignore the "outside"
- Need intermediaries to help push/pull, make sharing easier

▼ Continue to refine the "how do I ..."

- Models and high level processes say "what to do"
- Workers want to know how to do it
 - Templates, Checklists, Examples, Options

▼ Even the Resistors can be converted

▼ Process Improvement is a marathon - Be the Tortoise

Thank You !
