

Abstract Reference #8788

# Improving Stability Operations Data Sharing: Leveraging a COI Pilot to prove Concepts and Develop Trust

Gerard Christman, SMIEEE, FWAS
Sr. Systems Engineer, Contractor Support
Office of the Assistant Secretary of Defense
Networks and Information Integration

gerard.christman@ieee.org

## Agenda

- Bottom Line Up Front
- Basis for this effort
- COCOM Demand Signals
- COI Charter
- COI Overview
- High level capability roadmap
- Problem Analysis: where to start, what to share
- Systems approach Major Building Blocks
- The Pilot Team and the work process
- Scenario
- Basic Tenets
- Civ-Mil portal
- UMPC
- XForms
- Mobile Phone Application
- Next steps
- Additional Research

#### **BLUF**

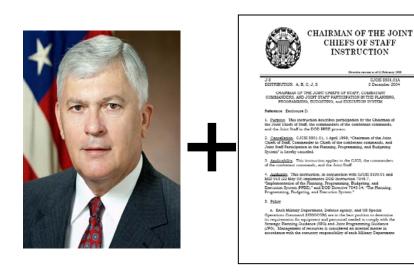

- Purpose of the pilot initiative:
  - Proof of concept: net-centric sharing unclassified information services with partners
  - Demonstrate improved civil-military information sharing concepts and capabilities
  - Show: progress building relationships & capability
- Represents a start down the "To-Be" road -Identifies key components
- Approve recommendations for further work

#### What was the basis for this effort?

Department of Defense
INSTRUCTION

SYMMET 2020

April 2020

103827: Inherence and Communication Technology 2021 Capitalizes for 1920

103827: Inherence and Communication Technology 2021 Capitalizes for 1920

103827: Inherence and Communication Technology 2021 Capitalizes for 1920

Inherence Communication Communication of Inherence and Communication and

=Get it started

ASD(NII) Grimes

**COCOM IPLs** 

**OSD Policy Mandates** 

#### **COCOM's Demand Signal for Solutions**

- (U) FY11-15 IPLs identify requirements for unclassified info sharing with coalition, interagency, international and non-governmental organizations as part of the Building Partnerships Portfolio:
  - USAFRICOM Building Partners Capability
  - USCENTCOM Building Partnership Capacity
  - USEUCOM- Building Partner Capacity Planning and Execution
  - USJFCOM- DoD and Interagency Training and Capabilities (BP)
  - USNORTHCOM- Building Partnerships
  - USPACOM- Build Partner Capacity
  - USSOUTHCOM- Humanitarian Assistance and Disaster Response (Building Partnership Capacity)

COCOM IPL's reflect the need

#### COI Charter

- Get operators, technologists, academicians, civil, military
- Determine nature of the information sharing problem
- Frame high level capability roadmap
- Scope a pilot
- Get it done in a year
- Open source, open standards, license free
- Comply with net-centric data sharing policy

## Stability Operations COI Overview

- More than DoD > USAID, DoS, UN, IOs, NGOs
- OCONUS Focus > Domestic response not examined
- Cyclone Nargis final catalyst summer 2008
- ASD (NII) recognized need to begin
- IIS solicited support from DoS HIU
- Concept approved by Information Mgmt Office of NII
- Kickoff 1 OCT 08
- 4 plenary sessions, 4 data working group, multiple pilot working group – now 250 members
- Consultation with SME's

### What is a COI?

Community of Interest: A collaborative group of users that must exchange information in pursuit of its shared **goals, interests, missions, or business processes** and therefore must have shared vocabulary for the information it exchanges. - DoD Directive 8320.2

## Key findings

#### High Level Capability Roadmap

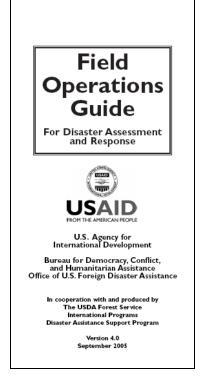

- 1. Do **HADR Pilot** illustrative of broader Stab Ops environment
- 2. Methodology should support tailorable content based on end-user role
- 3. Geospatially coordinated information
- 4. Assessment reports based upon an agreed vocabulary
- 5. Imagery + Assessment Report most useful>> Food, Water, Shelter
- 6. Role based access with a PKI solution future consideration- get the basics done first
- 7. Information sharing capabilities must include **small form factors** i.e., 3G cell phones, smart phones, UMPC
- 8. Open source / open standard when and where practical- no fees
- 9. Examine **existing portals** don't build anything new integrate existing efforts
- 10. Leverage U-Core and STANAG 5525 >> Accessible, Visible, Understandable to programs of record >> abide by DoD policy
- 11. Common data model for the Community

## Where to start and what to share? HADR Assessments

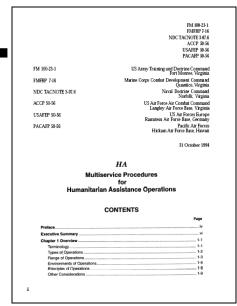

- Victims / Displaced persons
- Food
- Nutrition
- Health
- Water
- Shelter
- Sanitation
- Agriculture & Livestock
- Search & Rescue
- Logistics
- Infrastructure

#### Civil

#### FM 100-23-1

**Military** 

## Major Systemic Considerations

Collaborative Environment - Harmonieweb proponent - Chief, Collaboration Support/Portal Development & Implementation J6 Directorate, USJFCOM

- ✓ Social media, collaboration space
- ✓ List and Map views with RSS / GeoRSS content
- ✓ MMS jpg
- ✓ Bridge Civil-Military C2 Data Services Checkmate system, JIEDDO submission, sponsor TRADOC Program Integration Office Battle Command
  - ✓ STANAG 5525 NATO/MIP JC3IEDM semantics.
  - ✓ U-Core
  - ✓ ABCS MCS
  - ✓ SMS txt
- ✓ Internet Based Humanitarian Presence generated internally- Google Maps Mashup- GeoRSS
- ✓ XForms FWS Services (similar to USAID FOG & OFDA Form 82)

  Naval Undersea Warfare Center, Division Newport
  - ✓ W3C XML standard for web forms
  - ✓ Orbeon open source Xforms technology
  - ✓ Generates JC3IEDM messages for the C2 Data Service

## The Pilot Working Group Team

- C2 Data Services Leavenworth, Kansas
  - Dave Vincent , Computer Science Corporation
- Dataswarm UMPC Leavenworth, Kansas
  - Dr. Scott Bublin, Mobile Reasoning
- Cellphone-based reporting Fort Leavenworth, Kansas
  - Bruce Montgomery, Combined Arms Center
- Harmonieweb Norfolk, Virginia
  - DoD Unclassified HADR Portal David McWee, Microlink
- Food Water Shelter Assessment Services- Newport, Rhode Island
  - Erik Chaum, Naval Undersea Warfare Center
- NGO Site trusted HA partner Arlington, Virginia
  - Sean McCarthy, FCI

#### **HADR Pilot Scenario**

Caveat: The fictional Aegean region is overlaid on the US.

This is a by-product of exercise OMNI FUSION 2009.

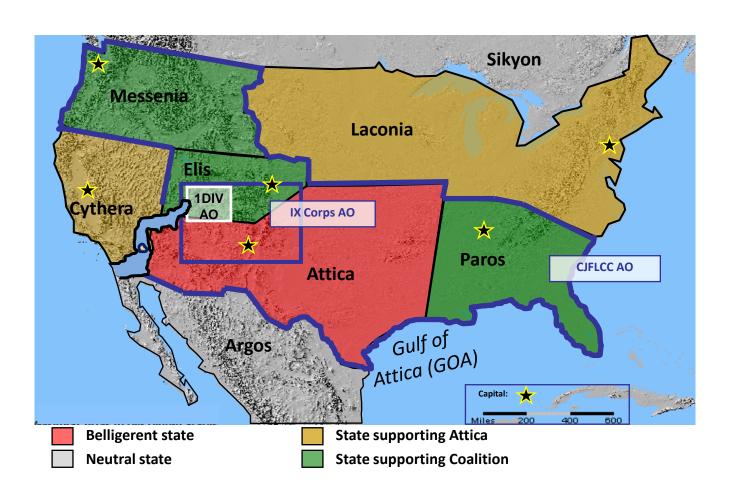

This is coincidental and does not intend to imply a domestic focus.

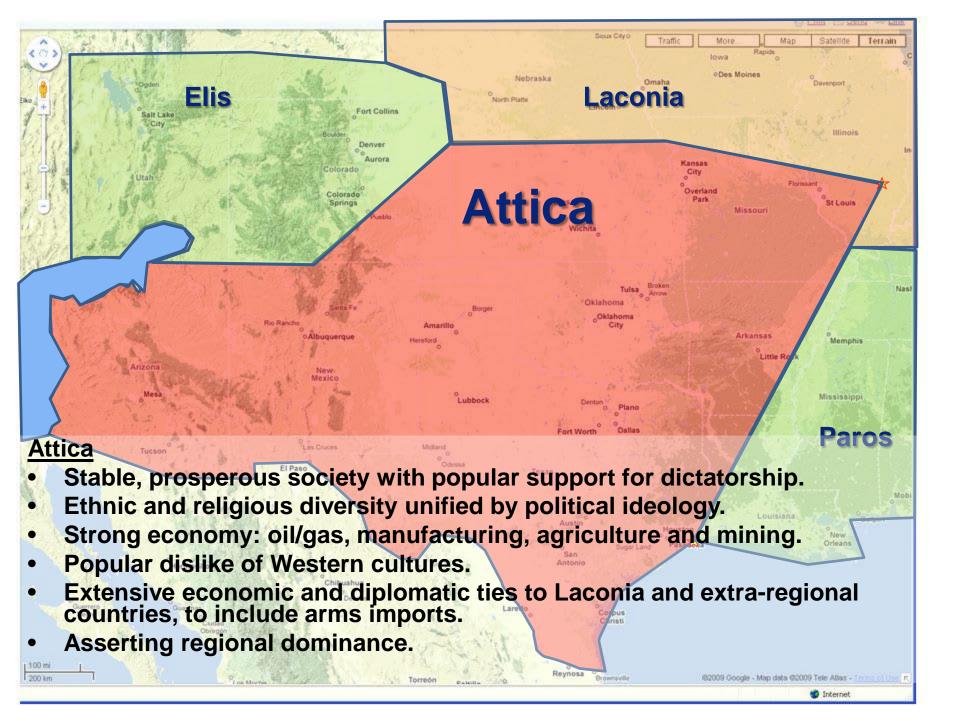

The Stab Ops COI is focused on OCONUS operations.

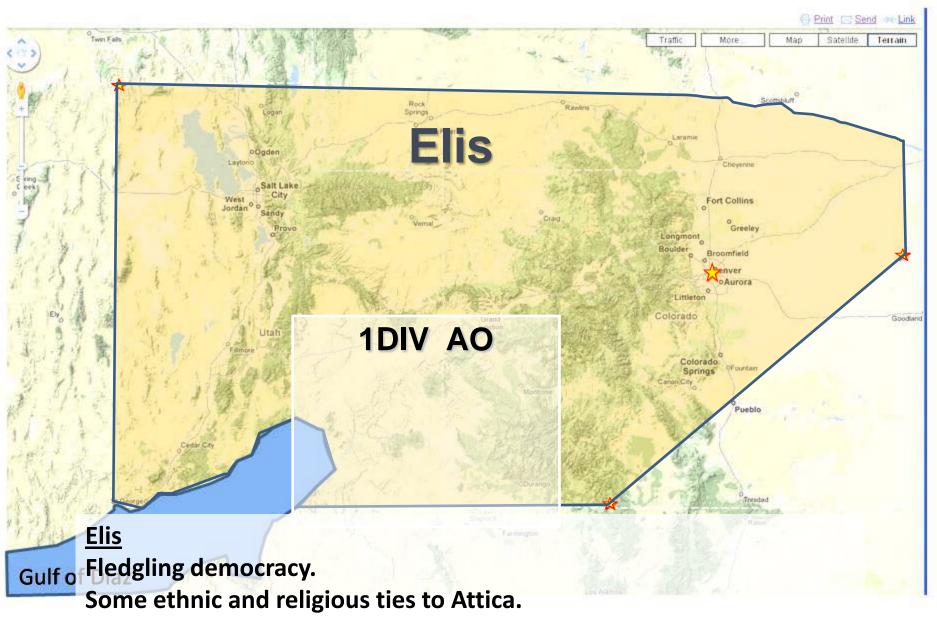

## Geography Fictional Aegean Region

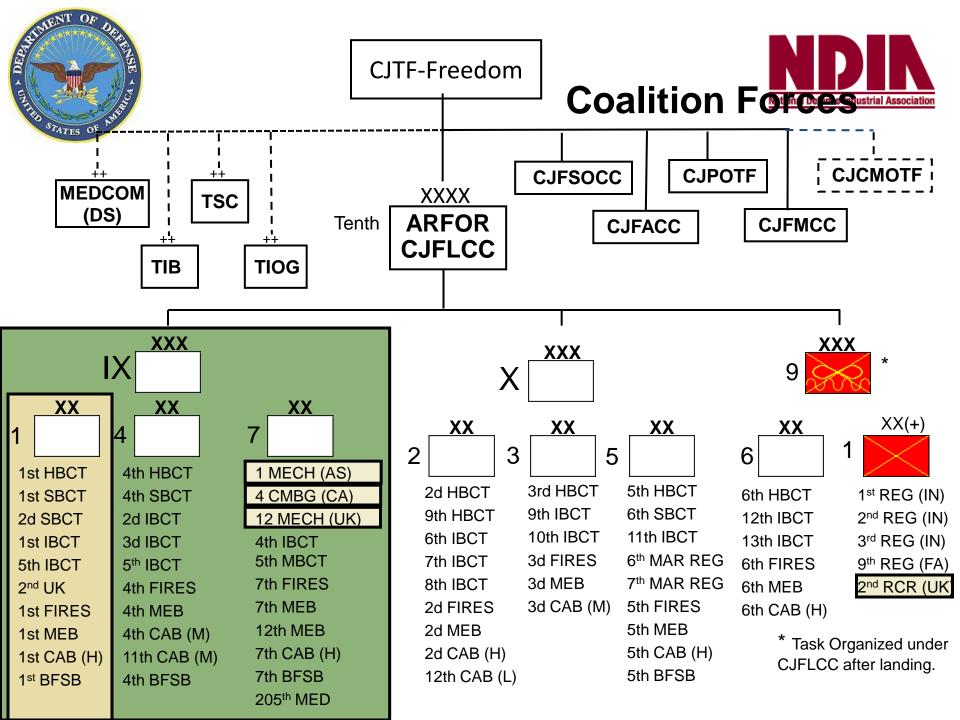

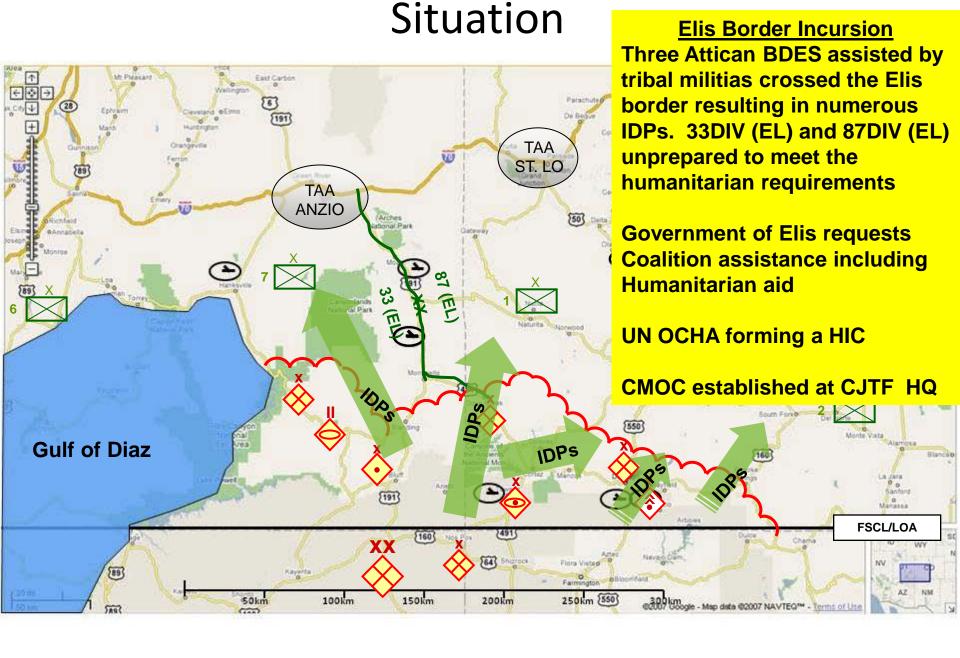

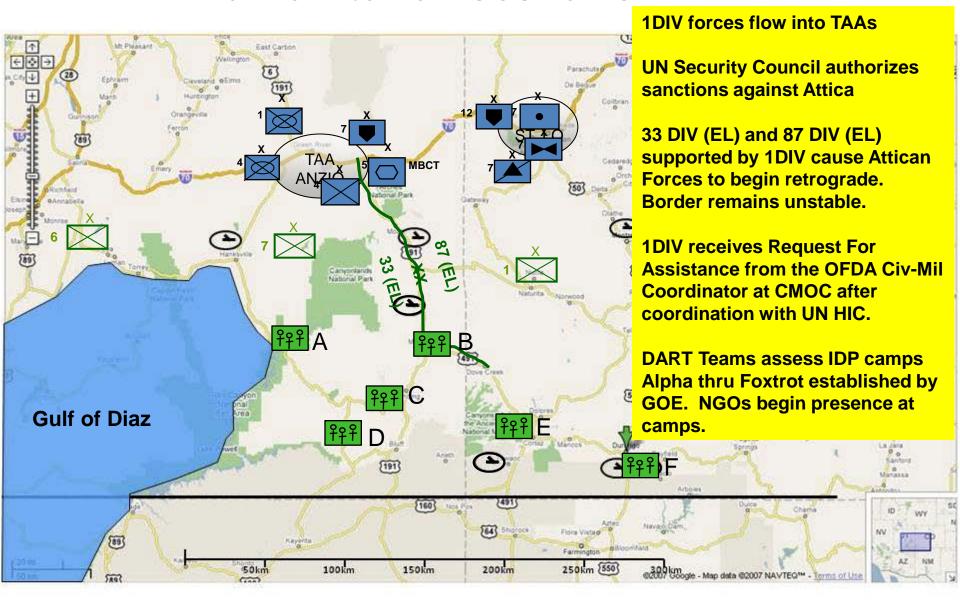

Elis' relations with U.S. and West have created tension with Attica.

#### **Humanitarian Scenario**

### **Key Basic Tenets**

- Military supports USAID in HA efforts
- Military interactions with the NGO community will be coordinated with US country team, particularly OFDA disaster assistance response team (DART) representatives.
- The characteristics, missions, and capabilities of individual NGOs are diverse. All are involved in direct humanitarian aid with host populations. Each organization operates individually.
- NGOs provide the bulk of HA at the grassroots level.
- The military structure can provide logistics and security assistance to remote and unsecured areas.
- NGOs may operate in areas of high risk, where other organizations are hesitant to go. NGO assessments are often an excellent source of information on the HA situation.

### **Scenario Assumptions**

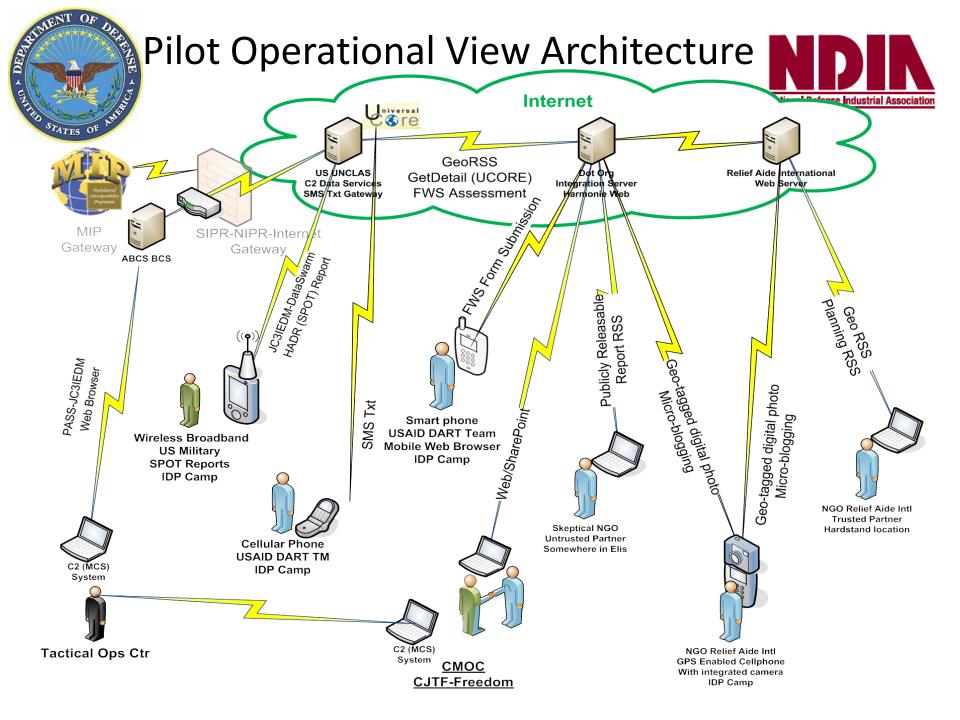

- Cellular Broadband Wireless Service covers AOR
- Some NGOs willing to collaborate in a federated approach
- Some NGOs unwilling to use portal but will exploit syndication
- US Country Team designee from OFDA in CMOC
- US-centric humanitarian response in 1 DIV AOR
- Permissive environment at IDP camps

### **Pilot Threads**

- USAID OFDA DART Team member Bruce Montgomery uses Short Message Service to provide "Clear, concise, timely, practical, operational findings" of IDP Camp Alpha
- USAID OFDA DART Team member Bruce Montgomery uses the Mobileweb browser to access, populate, submit FWS assessment template.
- US Service member Scott Bublin uses handheld computer and wireless broadband to render aide-focused SPOT report at Camp Bravo.
- USAID Civ-Mil Country Team Designee Erik Chaum in CMOC completes FWS template (xForms) and coordinates with the military.
- Cooperative notional NGO, ReliefAide International, Sean McCarthy shares findings and geospatial information via syndication from Camp Charlie.
- ReliefAide member David McWee provides digital geo-tagged photo from Camp Charlie.
- ReliefAide member David McWee employs Social Media "Twitter" to "Tweet" [microblog] observations.
- Skeptical NGO wanting operational situation reports that are vetted as publicly releasable and available via syndication from HarmonieWeb

#### Food, Water, Shelter Assessment Requests

#### Objective:

- Provide a simple web-form and supporting services that can be used to report and coordinate FWS assessments and requests.
- Ensure that FWS Assessment Requests can be understood by military
   C2 systems supporting HADR ops STANAG 5525

#### Implementation Approach:

- W3C XForms standard and XML processing
- Orbeon XForms technology

- Windows Mobile 6.0
- Food, Water, Shelter

## Leverage existing Committees for Governance

#### **Prescribed methodology**

Mission Area & Domain Portfolio Managers

Executive Board (FO/GO) Chair or Co-

Steering Committee Forum (Chair or Co-Chair)

- Promote & review COI activities
- Resolve cross-COI
   discrepancies
- Ensure appropriate participation
- Act as primary COI POC
- Track milestones & success
   criteria

Joint Implementation
Working Group
(Appropriate
Lead/Co-Lead)

- Define & implement high level COI capability roadmap and schedule milestones
- Stand up Pilot WG as needed
- Synchronize COI products with existing processes (e.g., JCIDS, Acquisition, PPBE)

Data
Management
Working Group
(Appropriate
Lead/Co-Lead)

 Develop shared vocabulary for a given problem area in accordance with the DoD Net-Centric Data Strategy Pilot Demonstration
Working Group
(Appropriate
Lead/Co-Lead)

- Develop repeatable process to demonstrate COI products (e.g, COI vocabulary)
- Leverage core enterprise services
- Execute as risk reduction for next

Pgm of Record (PoR) spiral

Additional Working Groups as needed

### Building further consensus

- Shared Process
  - Coordinated: Relief Aid, Transportation, Security, Health
- Shared Service
  - Situation & Assessment Reporting, Coordination, Request
- Shared Data needs
  - Victims/Displaced persons Sanitation
  - Food
  - **Nutrition**
  - Health
  - Water
  - Shelter

- **Agriculture & Livestock**
- Search & Rescue
- Logistics
- Infrastructure/facilities

## Synchronizing with other existing processes Tightly Couple with ISIP Focus Area 6

- Establish a set of web-service specifications to drive the net-centric development of functionality common to civil support and SSTR operations built on DoD Core Enterprise Service (CES) standards
- Establish various authentication and access standards/mechanisms to allow DoD and its external mission partners, both planned and unanticipated, to achieve an appropriate level of access to information concerning civil support and SSTR operations
- Develop standards for control measures to ensure the integrity and protection of information
- Establish data exchange standards to facilitate the sharing and integrating of information from across the various portal instantiations
- Develop a common look-and-feel among civil support/SSTR portals to facilitate ease of use and to reduce training requirements
- Leverage solutions developed by the combatant commands

#### Synchronizing with other existing processes

#### Leverage existing Civil Affairs Assessments

#### IKE w/GATER

#### **Graphic Visualization**

#### Synchronizing with other existing processes

## Integrate into JFCOM Joint Concept Development and Experimentation

- JFCOM is the DoD lead agency
  - Identifies major challenges facing the joint warfighter, to include combined and interagency operations; projects change year-to-year based on Warfighter Challenges prioritized by the COCOMs
  - Projects solve challenges in terms of doctrine, organization, training, materiel, leadership and education, personnel, facilities and/or policy changes
- Limited Objective Experiment (LOE)
  - Proposed solution is introduced into a simulated environment to observe its effect; prove/disprove an hypothesis by comparison to a baseline solution or to an observable standard.

#### FY10 Experiments:

• Comprehensive Approach Interagency Concept (CAIC). Problem statement: "The Joint Force Commander lacks a common concept to synchronize the diverse efforts of U.S. Government agencies, IOs, and NGOs into an integrated effort in response to crises and conflicts."

#### Synchronizing With Other Existing Processes

## Integrate into **Army Experimentation** at BCBL-L TALON STRIKE/OMNI FUSION 10

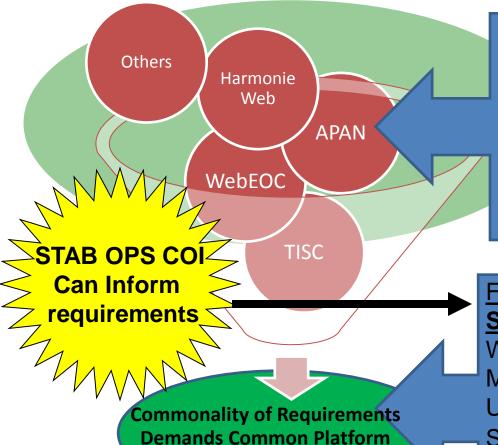

- Plan, Prepare and Execute the TALON STRIKE/Omni Fusion 10, Exercise/Experiment, as the lead US Battle Lab
- Serve as Experiment Director for event
- Host/Conduct Initial and Final Planning Conferences, Co-Host Mid-Planning Conference in the UK
- Provide lab facility for the US DIV (Pope Hall) and US BCT (potentially from the National Simulations Center) role players
- Staff EXCON/HICON and support personnel for event

21 Apr 09 4

## Synchronizing With Other Existing Processes Shape Global Theater Security Cooperation Management Information Services Concept

**G-TSCMIS?** 

Today: Disparate Regional Solutions:
Does Not Meet Existing Policy
No Data Discovery
Funding Inefficiencies
Difficult to Access by Ad Hoc User
Does not meet BP or TSC Reqmts
Stab Ops; HA/DR; HCA; IW

Future: Department Wide Unclas Info
Sharing Core Platform:
Whole of Government Approach
Managed Outside NIPR
Un-Anticipated Users

Satisfy Theater Security Cooperation **Stab**Ops; HA/DR; HCA; IW; Interagency
Dynamic Data Discovery
May Need to Update Data Policy

## Synchronizing With Other Existing Processes Leverage STANAG 5525 and MIP Semantics

**Engage** 

To implement

semantics (STANAG 5525)

**OMG SOPES** 

At the NATO

To promote information sharing amongst ISAF PRTs-

#### Members following the standard and their C2 POR

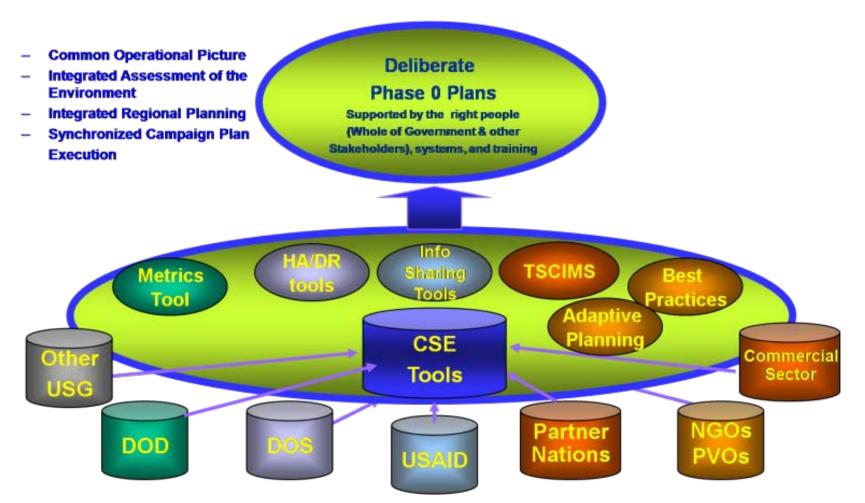

<sup>\*</sup>Country codes according NATO STANAG 1059 Ed 8.

#### Synchronizing With Other Existing Processes

## Integrate effort into Cooperative Security Joint Capability Technology Demonstration Program

## Further Efforts and Research

- 1. Leverage existing bodies involving IA partners for Governance
- 2. DASD (PS&SO) and OASD(NII) IIS couple COI with ISIP focus area 6
- 3. Authorize further systems integration, expand data modeling efforts, develop processes and CONOPS.
- 4. Leverage existing CA module for Assessments
- Authorize Joint Experimentation and Concept Development Comprehensive Approach Interagency Concept
- 6. Endorse experimentation w/Army at BCBL-L Exercise Talon Strike/Omni Fusion 10
- 7. Report outcomes to inform requirements of G-TSCMIS Concept
- 8. Authorize engagement of NATO ACT to leverage STANAG 5525 (MIP Semantics) and LC2IS
- 9. Integrate effort into Cooperative Security Joint Capability Technology Demonstration Program
