Gates Says U.S. Army's Size Will Grow by 22,000

By ELISABETH BURRILL
Published: July 20, 2009

WASHINGTON — Defense Secretary Robert M. Gates on Monday announced a temporary increase in the size of the Army of up to 22,000 troops to meet what he called the "persistent pace" of operations in Iraq and Afghanistan.

Pentagon

The increase, to occur over the next three years, will raise the size of the Army to 569,000 active-duty soldiers. An expansion to 547,000 soldiers, announced by Mr. Gates in 2007, was completed in May.

Currently there are about 130,000 American troops in Iraq and about 60,000 expected in Afghanistan by the end of the year. Although there is a scheduled reduction of close to 80,000 troops in Iraq, most will not start to come home until after March 2010.

"The Army faces a period where its ability to continue to deploy combat units at acceptable fill rates is at risk," Mr. Gates said, meaning that he was concerned that Army units sent to Iraq and Afghanistan in the future might not have enough soldiers. He spoke at a Pentagon news conference with Adm. Mike Mullen, the chairman of the Joint Chiefs of Staff.

Mr. Gates did not say what the increase would cost over all, but indicated he would ask Congress for money to pay for it in 2011 and 2012. He estimated the cost in the fiscal year that ends in October at "less than a hundred million dollars" and in fiscal 2010 at \$1 billion. He said he would absorb the costs in 2009 and 2010 into the existing Pentagon budget.
