

Can anyone really model DoD Space Acquisitions?

***NDIA Systems Engineering Conference
26 October 2011***

Chad Searle, Maj, USAF

David Leach, Maj, USAF

Dr. J. Robert Wirthlin, Lt Col, USAF

Mr. Dan Houston, Ph.D., The Aerospace Corporation

Ms. Paulette Acheson, The Aerospace Corporation

Do we have a problem?

The AFIT of Today is the Air Force of Tomorrow

“Tops Nunn-McCurdy List”, Air Force Magazine, Mar 11

“Departments and agencies shall: Improve timely acquisition and deployment of space systems through enhancements in estimating costs, technological risk and maturity, and industrial base capabilities.” -President Barack Obama

“Chart Path To Steeper Defense Cuts”, NY Times, May 11

“... Second, we must ensure that requirements are reasonable and technology is adequately mature to allow the department to successfully execute the programs...Third, realistically estimate program costs, provide budget stability for the programs we initiate, adequately staff the government acquisition team, and provide disciplined and constant oversight.” -former Secretary of Defense Robert Gates

Aim High...Fly - Fight - Win

Challenges with Space

The AFIT of Today is the Air Force of Tomorrow

Current tools are insufficient and/or unavailable to quickly and comprehensively develop the requirements and acquisition program details for large and complex space systems.

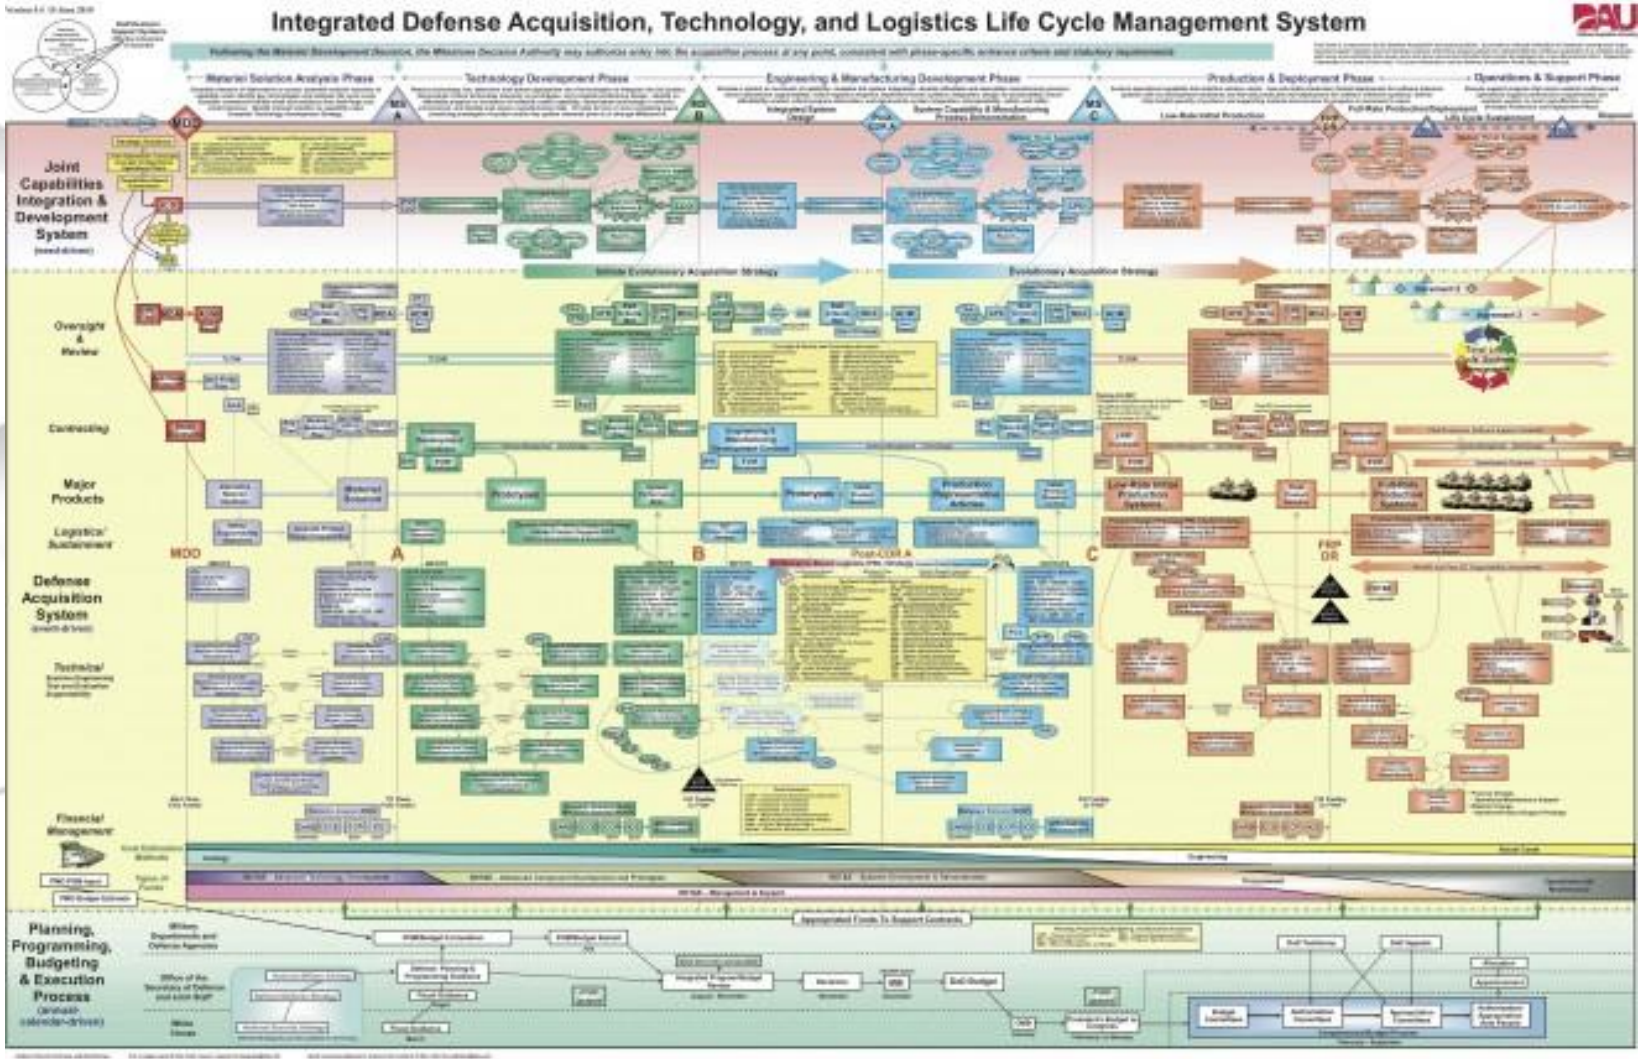

M&S of the “system” can help!

Defense Acquisition Process

The AFIT of Today is the Air Force of Tomorrow

What is ERAM?

The AFIT of Today is the Air Force of Tomorrow

Group Research Project

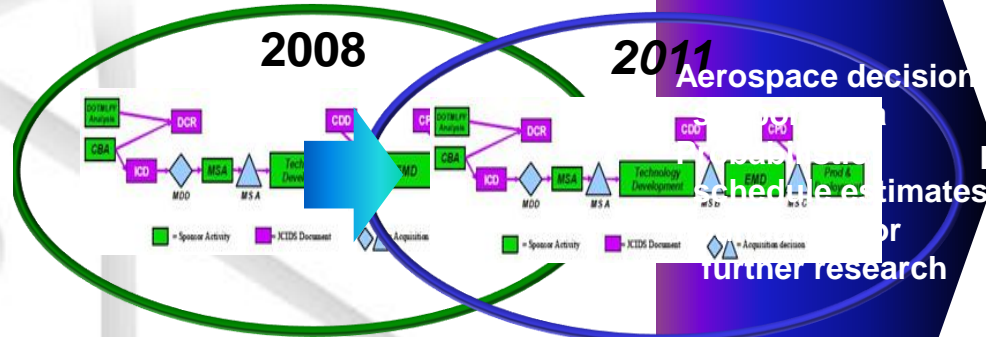

Enterprise Requirements & Acquisition Model

Inputs:

DoDI 5000.2
JCIDS
PPBE
Heritage
Real-World
Experience

Results:

Aerospace decision
Schedule estimates
for
further research

Enterprise Acquisition Model 2.1 (Leach/Searle):

Process Model (WPMIin)

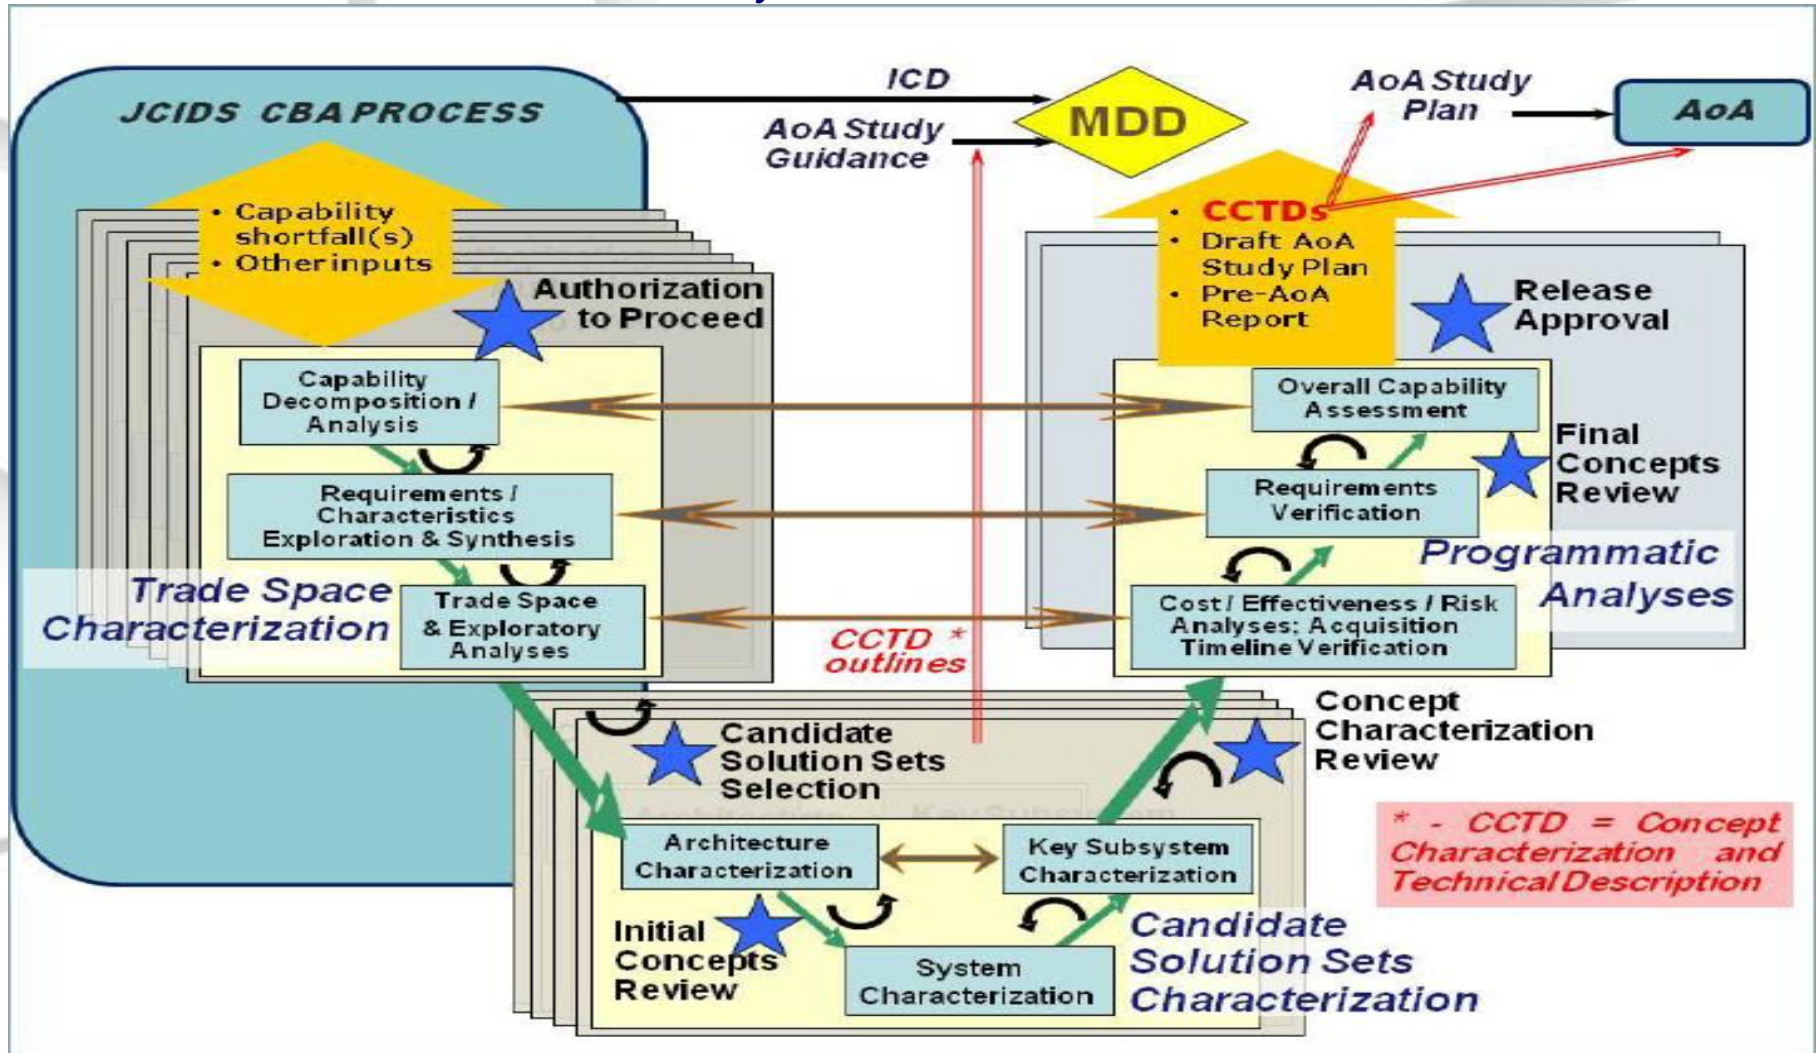

- Doctoral dissertation
- Aerospace acquisition focus
- Pre 2006 policy guidance
- Histogram of # of days for concept
- Space acquisition focus
- Post 2006 policy guidance
- Histogram for # of days for space concept

ERAM is a discrete event model simulating the DoD Space Acquisition process providing early SE

ERAM and Early SE Process

Baseline Model

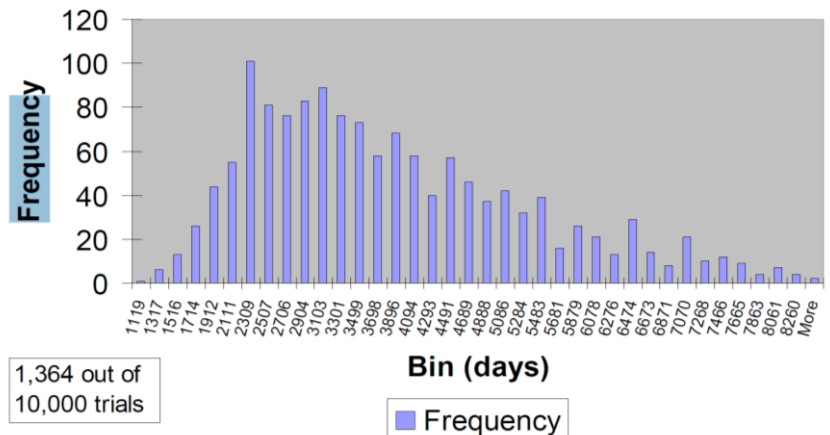

The AFIT of Today is the Air Force of Tomorrow

ERAM 1.0: Wirthlin's Dissertation

- How does acquisition system work?
- Why does the system behave the way that it does?
- Are there things that can be done to improve the system?

Histogram of MS C arrivals

Wirthlin (Sep 2009)

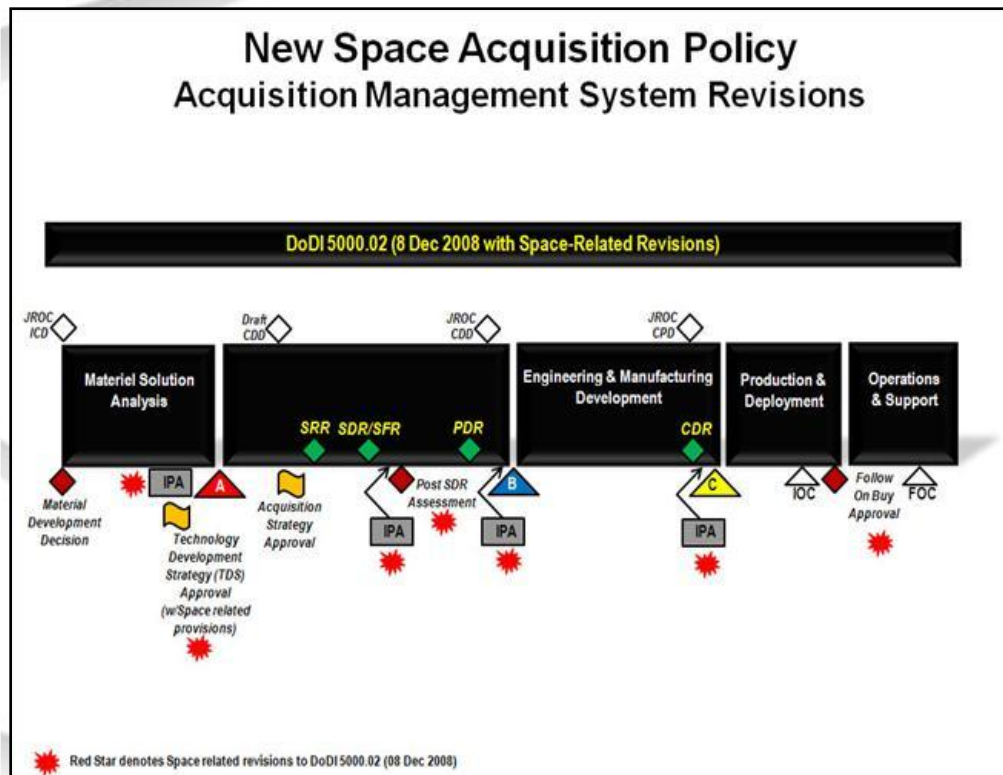

Policy & Practice Updates

The AFIT of Today is the Air Force of Tomorrow

ERAM 1.2

	Model Change	Guidance
1	Move PDR to Pre MS-B,	DoD 5000.02, WSARA
2	SDR Submodel	DTM 09-025
3	Post SDR Assessment - Submodel	DTM 09-025
4	Post PDR/CDR Assessment - Submodel	DTM 09-025
5	Cost Growth Check	DoD 5000.02, WSARA

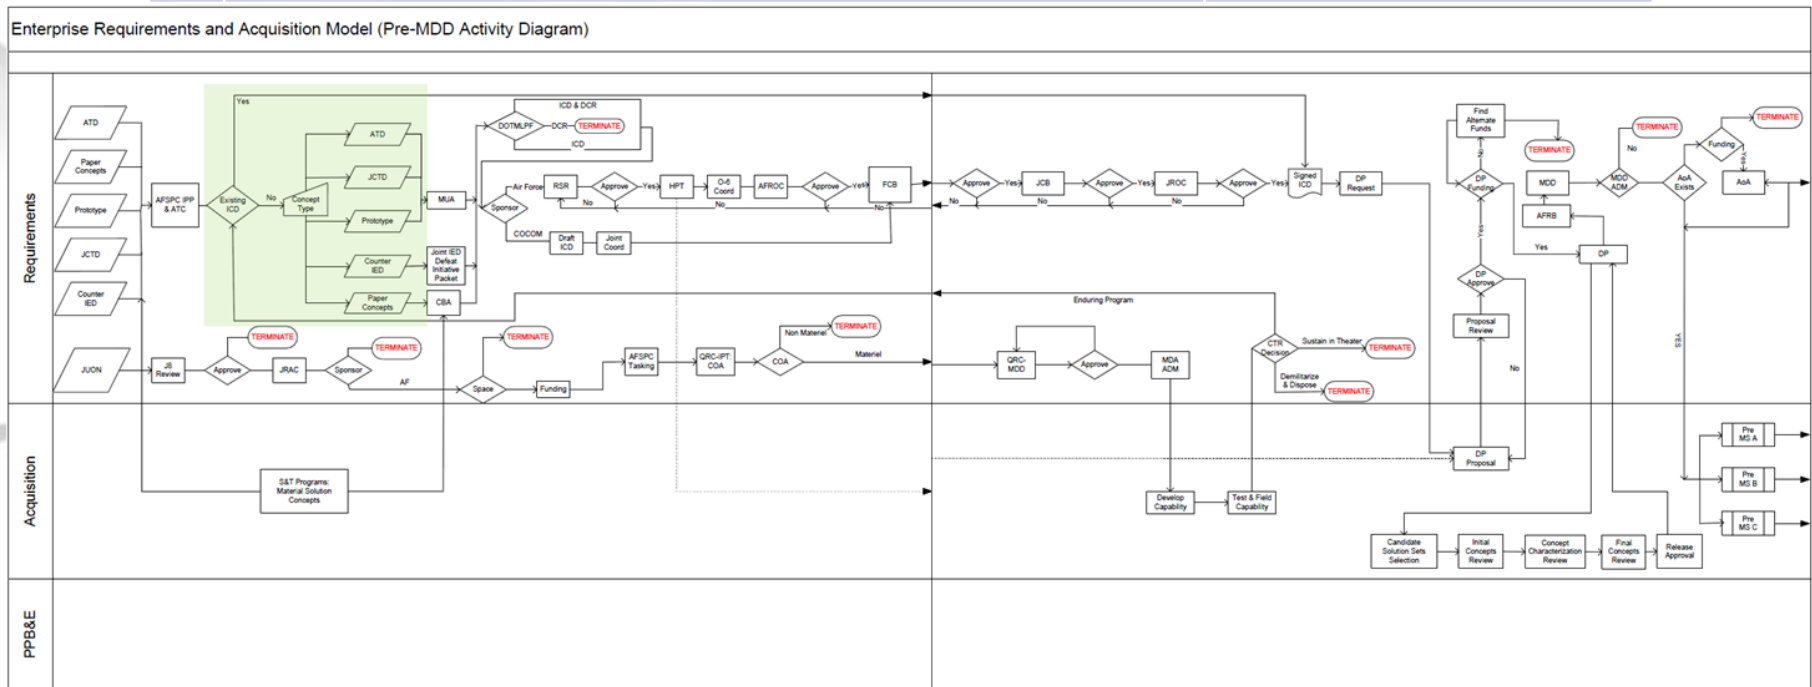

Early JCIDS Activities

The AFIT of Today is the Air Force of Tomorrow

	Model Change	Policy
1	Add JCIDS Initiation	JCIDS
2	Add/Update JCIDS Concept Review Process	JCIDS
3	Add Development Planning Initiation	JCIDS
4	Add CCTD Development Process	JCIDS
5	Add/Update MDD Process	JCIDS, Pre-MDD Handbook
6	Update AoA Process	AoA Handbook
7	Add JUON Process	AFI 63-114

Air University: The Intellectual and Leadership Center of the Air Force

Aim High...Fly - Fight - Win

Capability Matrix

The AFIT of Today is the Air Force of Tomorrow

• ERAM 2.0 – SPO Capability Matrix

- Determined impacted activities
- Worked with Aerospace to design distribution impacts

Personnel Experience Global Variable Inputs

Acquisition Maturity Potential Matrix

	Senior Leadership Experience in position	Staff Experience in position	Senior Leadership Cohesiveness	Staff Certifications, Training and Motivations	External Program Support	Program Office Size
Level 0	Has less than 1 year experience	Has less than 1 year experience	Has not worked together	Staff has minimal Acquisition training; few if any certifications	No interest beyond MAJCOM	No formal program office yet
Level 1	Has 1 to 3 years experience	Has 1 to 3 years experience	Has worked together for less than 6 months	Staff has some Acquisition training & Certifications	Some interest	Less than 50% of authorized staffing Level
Level 2 Baseline	Has 3 to 5 years experience with Acq processes	Has 3 to 5 years experience with Acq processes	Has worked together for 1 year	All Staff has some Acquisition training & Level I Certifications	Senior leadership helping with Acq process	Between 50% and 70% of authorized staffing Level
Level 3	Has years of Acquisition Experience	Has years of Acquisition Experience	Has worked together for 1 to 3 years	Motivated, certified (some Level II) and trained staff	Senior leadership wants program to go	Greater than 70% of authorized staffing Level
Level 4	Has been steering program through Acq Process	Has been steering program through Acq Process	Has worked together for 3 to 5 years but not more	Highly motivated and trained staff (Certifications Levels I, II, and III as appropriate)	Senior leadership and congressional interest	Fully staffed to authorized staffing Level

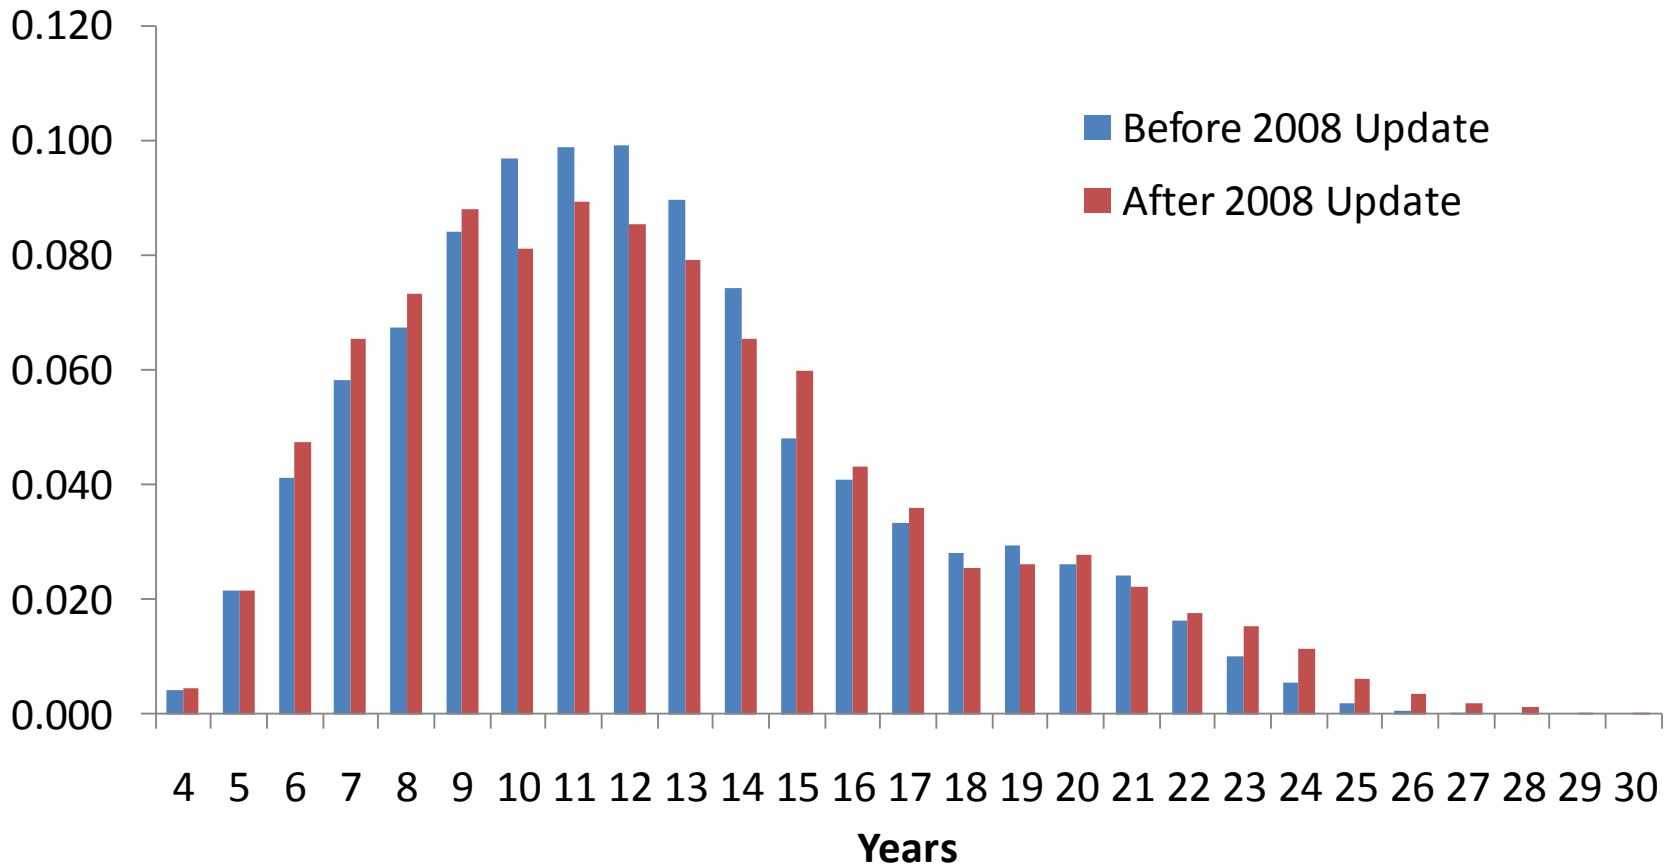

Results after ERAM update

The AFIT of Today is the Air Force of Tomorrow

**Histogram of Duration from Program Inception to MS C
Before and After 2008 Update to DoDI 5000.02**

Modeling Benefits

The AFIT of Today is the Air Force of Tomorrow

- ***Early comprehensive schedule estimates for Concept Characterization and Technical Descriptions (CCTDs) – Early AF Systems Engineering Process***
- ***Provides comprehensible picture of inter-organizational RRAs***
- ***“Flight Simulator” for acquisition & requirements personnel; cornerstone for improved, rigorous training & evaluation program***
- ***Tool that facilitates sensitivity analysis of the acquisition system***
- ***The model accounts for much process variation in the acquisition process***

ERAM Limitations

The AFIT of Today is the Air Force of Tomorrow

- Human Factors
- Model data (distributions & decision points)
- OSD process deviation authority
- “Fire Fighting”—reactionary management
- Every program is unique

Research Opportunities

The AFIT of Today is the Air Force of Tomorrow

- 1) Utility of early systems engineering (cost/benefit)
- 2) PPB&E process analysis and integration
- 3) T&E activities
- 4) Coordination between SAF/AQR, MAJCOM & Center XR
- 5) Rapid acquisition process
- 6) Generalize ERAM across DoD

Conclusions

The AFIT of Today is the Air Force of Tomorrow

Problem Statement:

Current tools are insufficient or unavailable to quickly and comprehensively develop the requirements and acquisition program details for large and complex space systems.

ERAM:

- Provides improved early space concept schedule estimates for early systems engineering activities
- Provides context to a complex inter-organizational system
- Supplements standard DoD acquisition flow chart with real world processes & data
