

NDIA 14th Annual Systems Engineering Conference

Matthew Graviss

Customs and Border Protection

Director, Test & Evaluation Division

Commercial T&E Approach

October 2011

Overview

- **Customs and Border Protection mission**
- **Office of Technology Innovation and Acquisition (OTIA) mission**
- **Systems analysis**
- **Commercial test and evaluation approach**

CBP's Dual Missions

Security

- **Stop terrorism**
- **Prevent illegal entry**
- **Block drug & human smuggling**
- **Prevent agricultural disease**
- **Secure national events**
- **Assist with disaster relief**

Facilitation

- **Collect customs revenue**
- **Process incoming travelers**
- **Inspect imports**
- **Stop counterfeits**

Protecting the Border Is An Immense Job

Every day, CBP deploys more than 42,000 frontline personnel to protect nearly 7,000 miles of land border and 327 ports of entry.

...So Is Managing Our Massive Imports

In FY 2009, CBP processed \$1.7 trillion in commercial imports.

Recent Border Protection Successes

- **361.2 million travelers inspected at ports of entry**
- **556,000 illegitimate entrants stopped along border**
- **224,000 inadmissible aliens turned away at ports of entry**
- **1.5 million prohibited animal or plant products kept out**
- **166,727 agricultural pests blocked**
- **39,000 suspected criminals arrested**
- **9,500 wanted criminals arrested**

Office of Technology Innovation and Acquisition (OTIA) Mission

- **Ensure all technology efforts are properly focused on mission and are well integrated across CBP**
- **Strengthening expertise and effectiveness in acquisition and program management of contractor-delivered products and services**
- **OTIA Assistant Commissioner will also serve as CBP's Component Acquisition Executive**

OTIA Acquisition Roles

- **Serves as CBP's Component Acquisition Executive**
 - CBP Level 3 and DHS-delegated Level 1 and 2 programs
- **Authority to review and approve key acquisition decisions**
- **Represent CBP on Acquisition Review Boards (ARBs) for Level 1 and 2 programs**
- **Provide oversight that all programs progress through the Acquisition Review Process**
 - Level 1, 2 & 3
 - Other CBP acquisitions
 - IT and non IT programs

OTIA Acquisition Focus

- **Rapid fielding of capability to CBP officers and agents**
- **Complex developmental systems not current focus for OTIA procurement – longer term option**
- **Immediate focus on commercial procurement items**
 - COTS, GOTS, NDI systems greatly preferred
 - Fielding systems that work quickly and affordably
 - Capabilities based
 - Vendor integration

CBP Technology Interest Areas*

- **Common operating pictures**
- **Ultra-light detection**
- **Tunnel detection**
- **Wide-area surveillance**
- **Open Architecture**
- **Broadband/wireless**
- **Radiation Portal Monitors**
- **Chemical identification**
- **Improved UGS**
- **High resolution cameras**
- **Predictive intelligence**
- **Automated target recognition**
- **Insider threat detection**
- **Foliage penetration**
- **IP-addressable sensors**
- **Synthetic aperture radars**

System Analysis Application

Systems Analysis

Commercial/NDI Elements

- SELC Activities
- T&E Approach
- Support
- Risk Management
- CM
- PMP
- LCCE, etc.

Adapted Commercial/NDI Elements

- SELC Activities
- T&E Approach
- Support
- Risk Management
- CM
- PMP
- LCCE, etc.

Development Elements

- SELC Activities
- T&E Approach
- Support
- Risk Management
- CM
- PMP
- LCCE, etc.

System Acquisition Proposed Approach

System Acquisition Decision

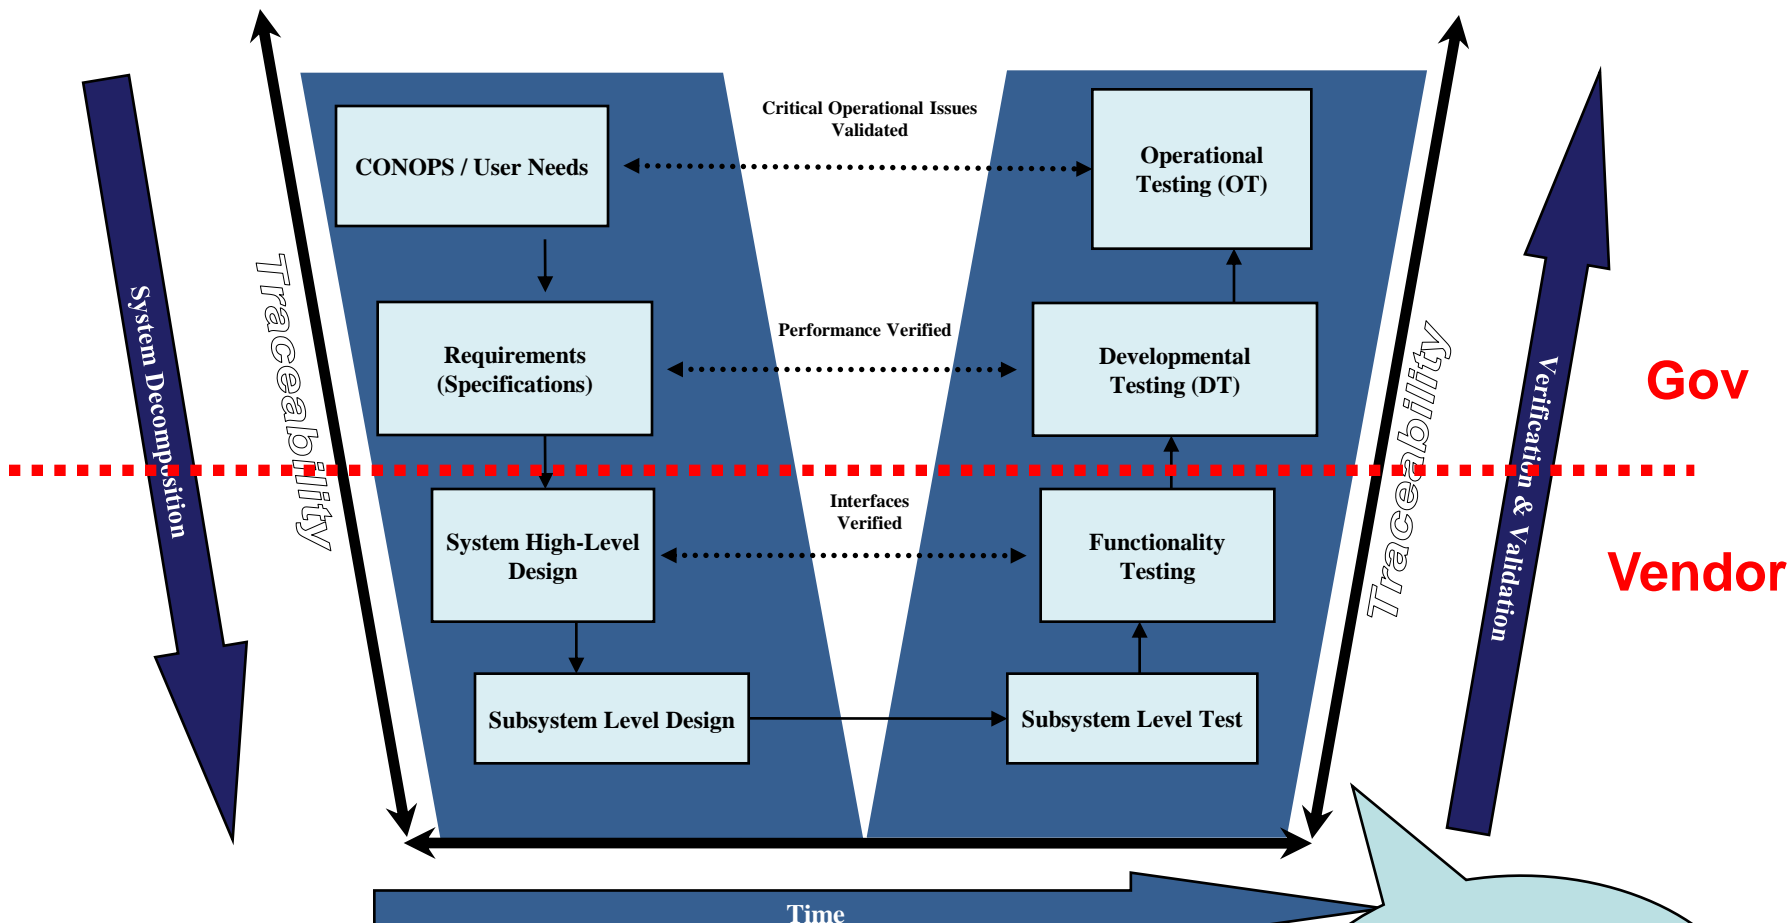

System Acquisition

Least Complex / Most Programs

Most Complex / Few Programs

Systems Engineering 'V'

MNS – Mission Needs Statement
 CONOPS – Concept of Operations
 ORD – Operational Requirements Document
 FRD - Functional Requirements Document
 SRD – System Requirements Document

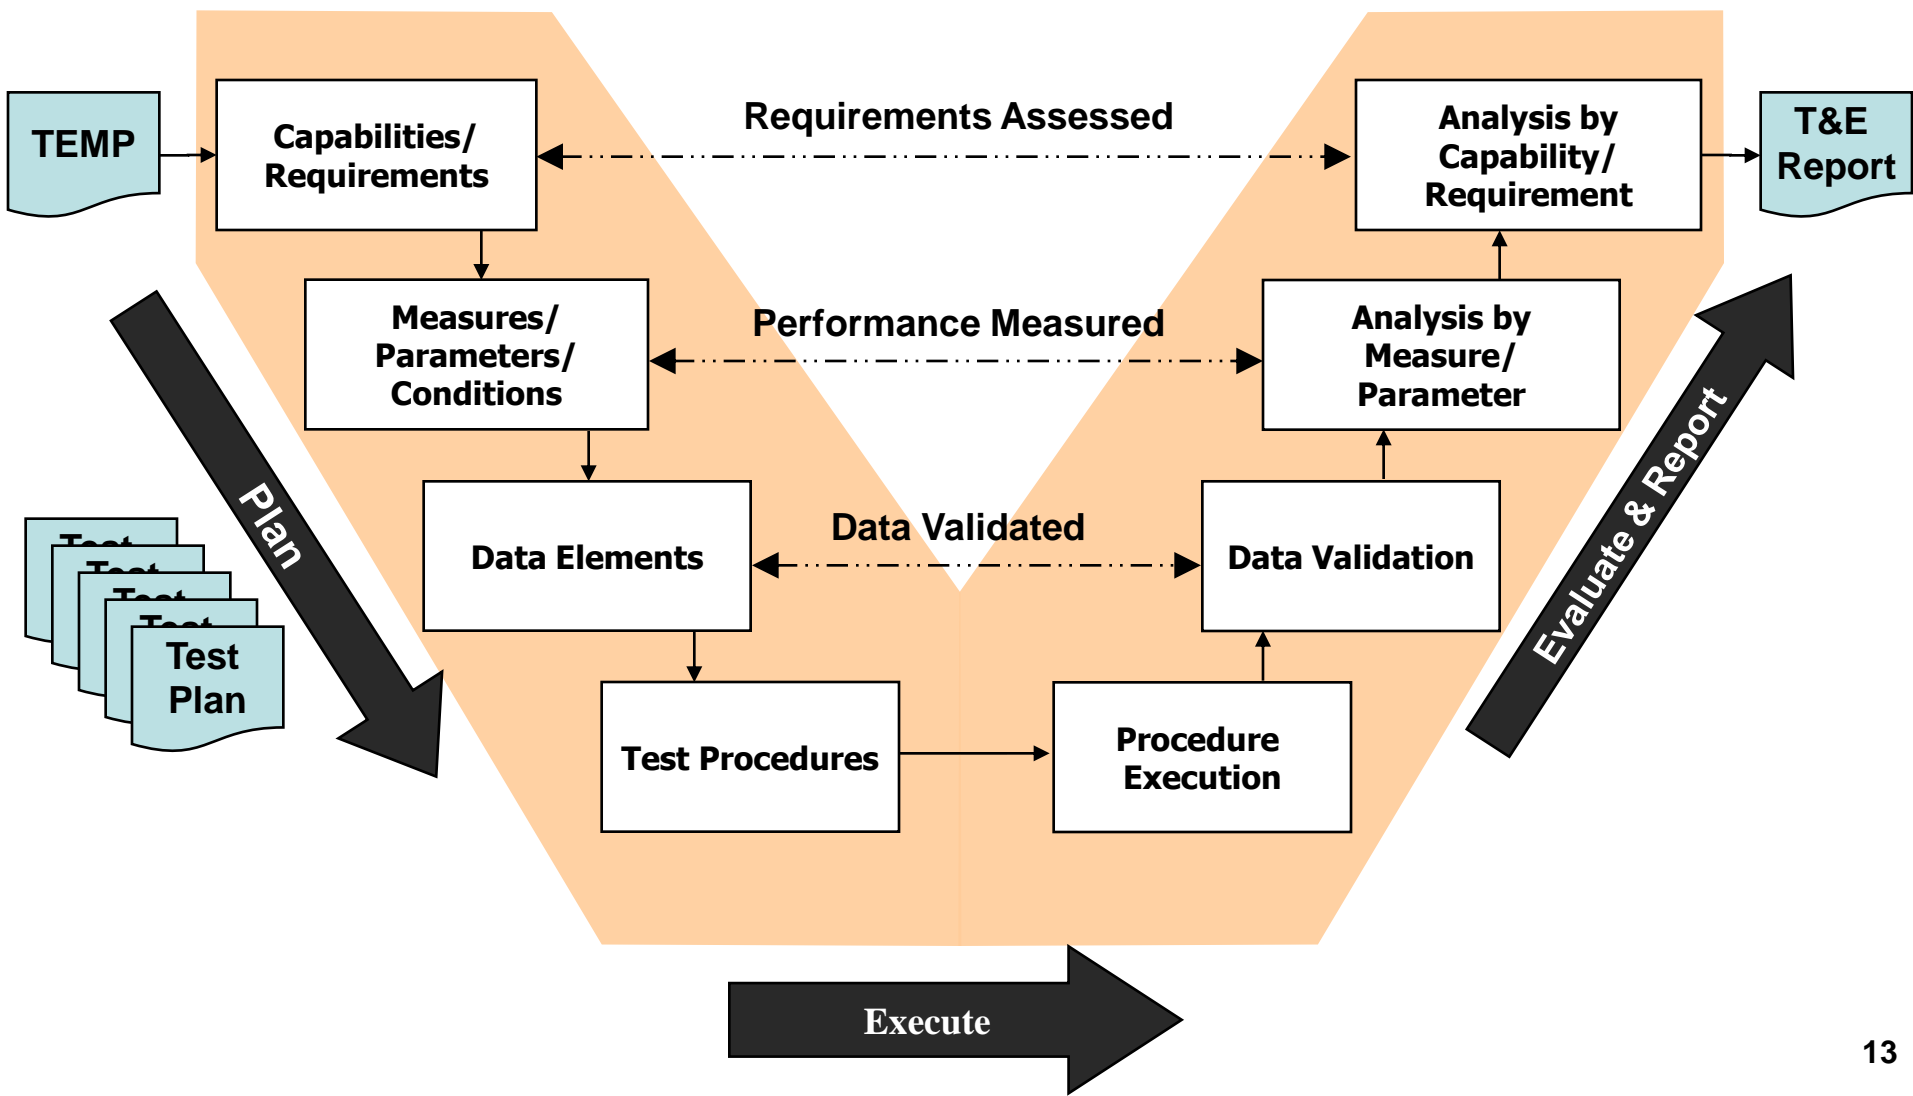

RTM – Requirements Traceability Matrix
 SRTM – Security Requirements Traceability Matrix
 IRS – Interface Requirements Specification
 ICD – Interface Control Document
 SSS – System/Sub-System Specification
 SRS – Software Requirements Specification

Ve is still applied for commercial products

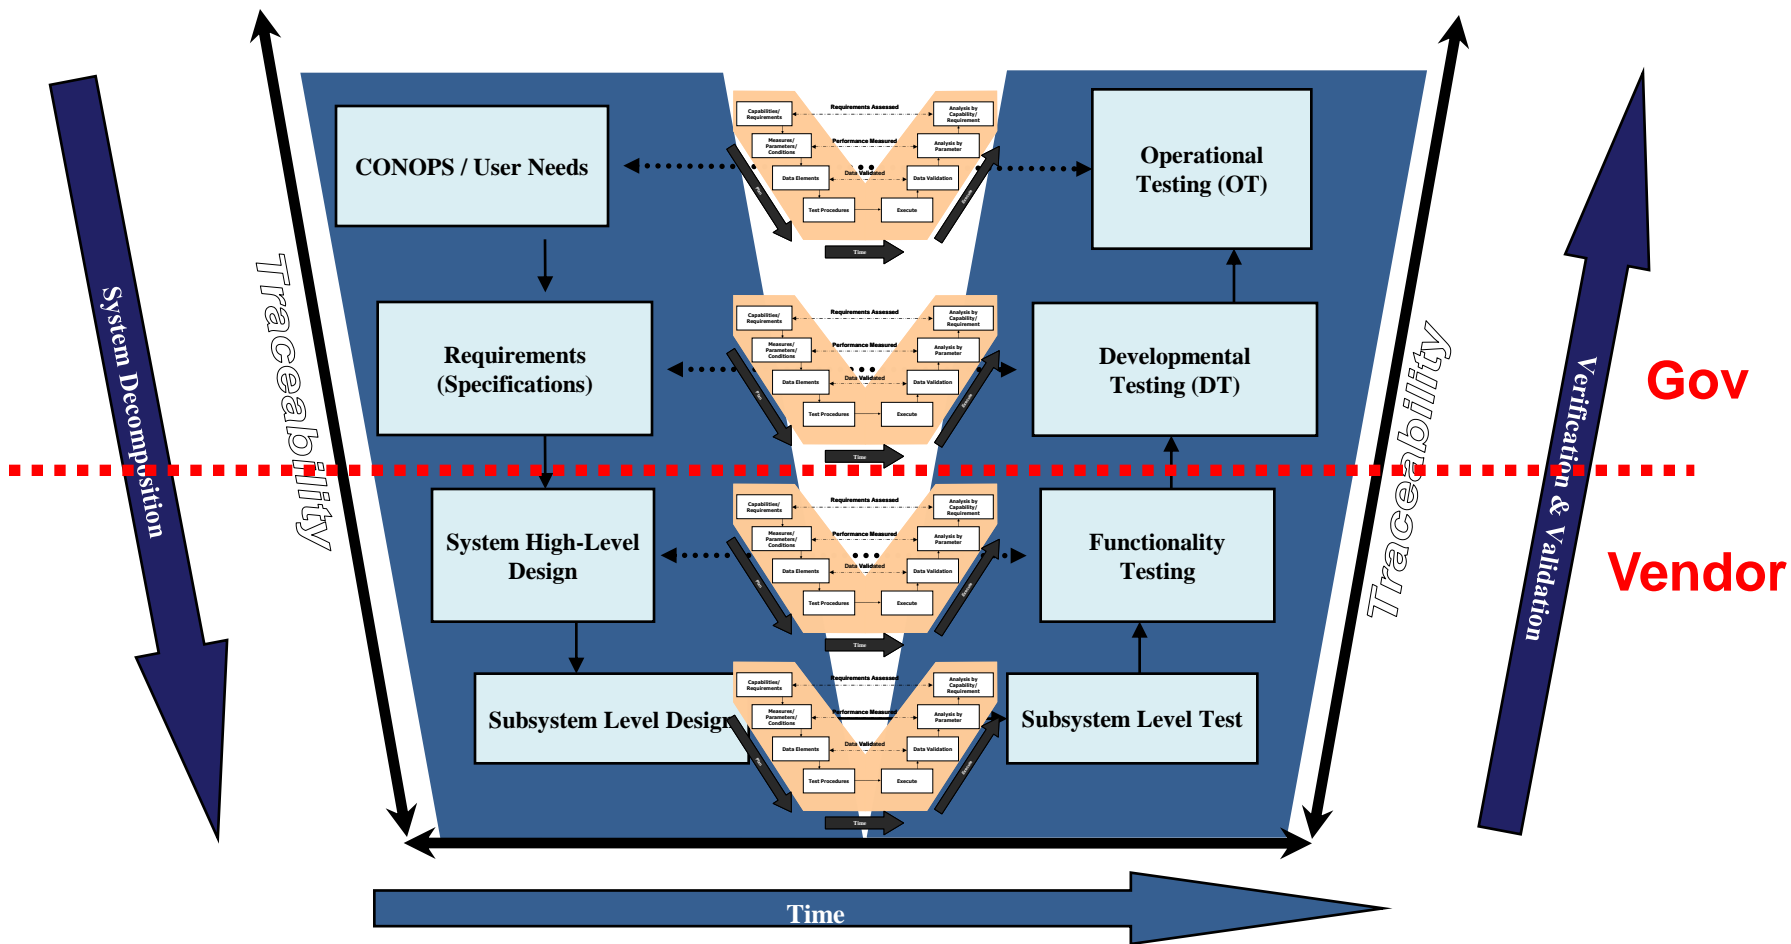

Test Event Planning/Executing/Reporting

The T&E 'V' Process

Relationship Between SE 'V' and T&E 'V'

T&E 'V' – Implemented at Every Level of SE 'V'

DHS Commercial Development Test & Evaluation

- **Vendor Interface**

- Explicit T&E scope, expectations and roles outlines in RFPs
- Close interface with vendors and vendor testing
- Synergy in government witnessed contractor testing
- System Qualification Tests typically based on vendor stated capability vice firm government requirements
- Tightly coupled following contractor testing

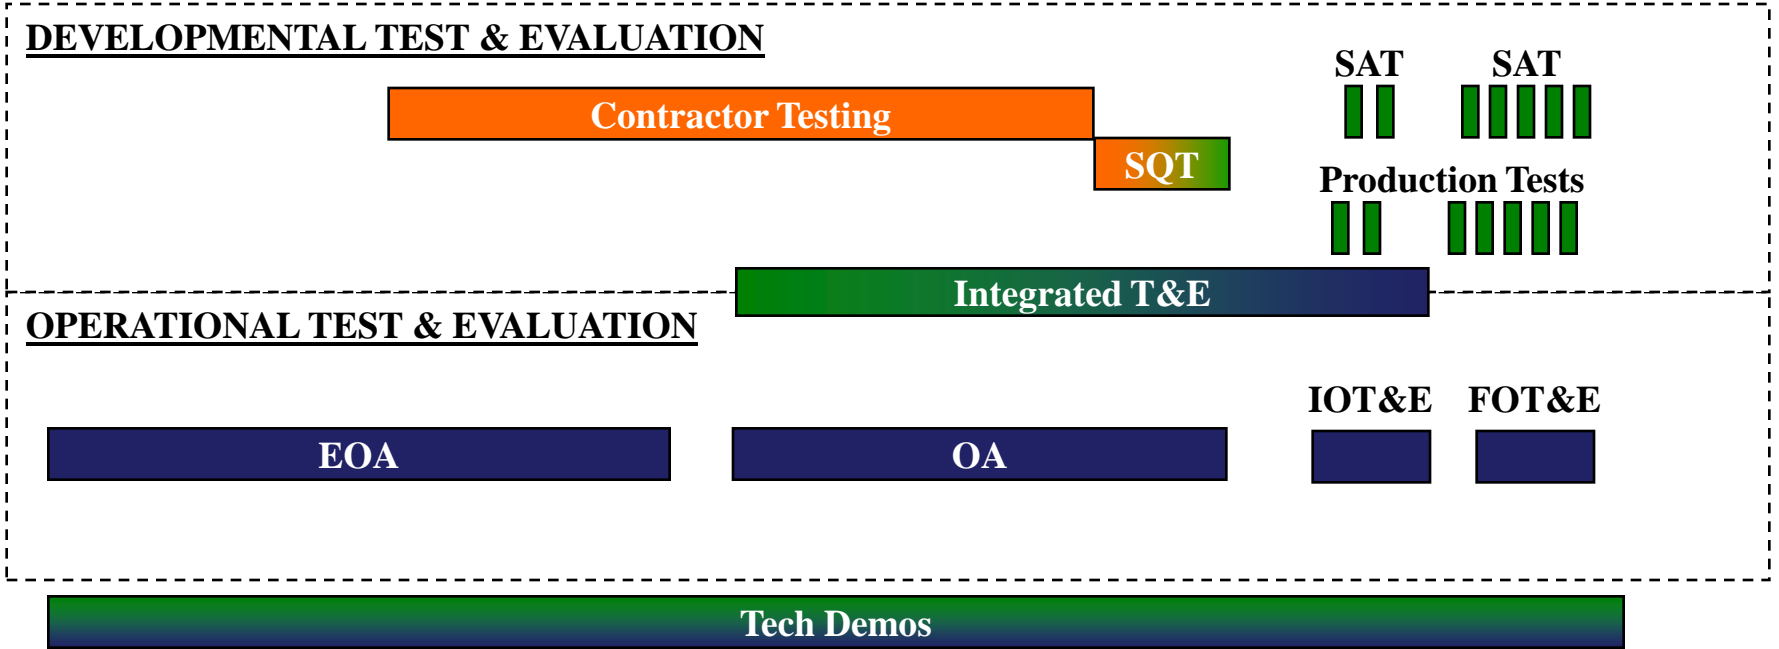

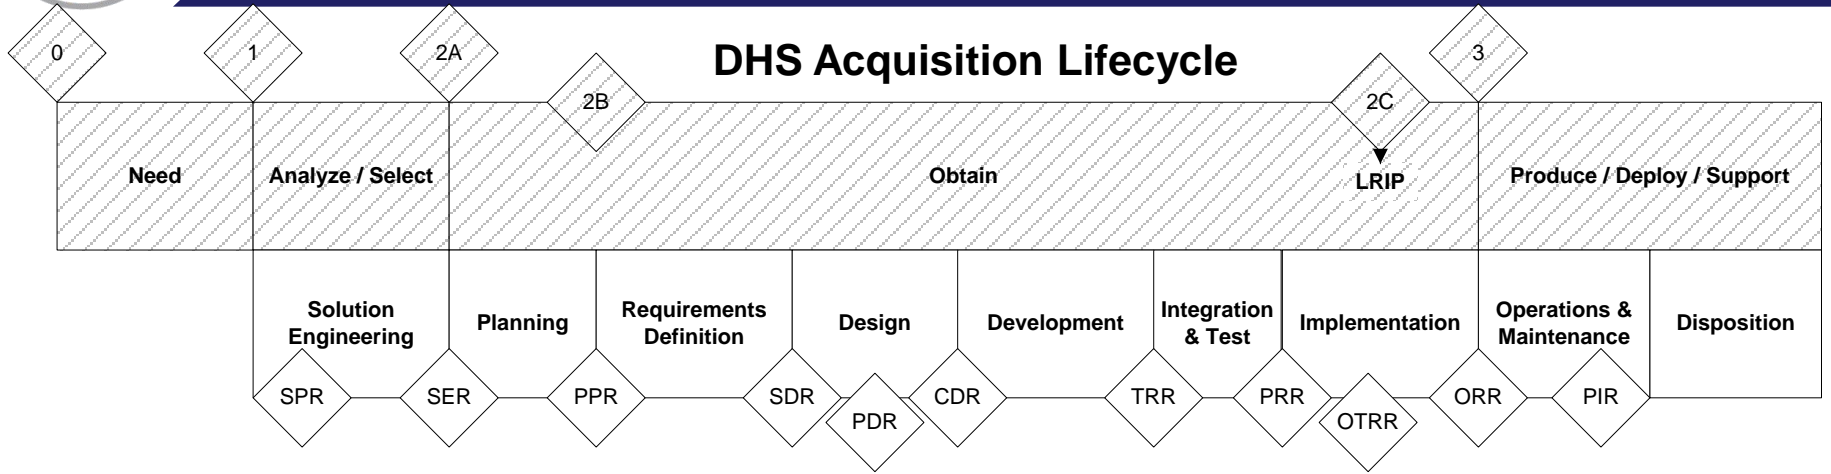

- **User Interface**

- SAT integrated with OT for cost, schedule and performance gains

Agile T&E process

Testing Synergy

Technical Focus (vendor)

Technical Focus (gov)

Operational Focus (gov)

Commercial T&E Challenges

- **Potential for multiple vendor selections**
 - Different down-selected vendor approaches
 - Same requested capability
- **Conditions, planning, procedures, analysis vary vendor to vendor**
- **Understanding the system under test**
- **Lack of understanding of test capabilities of vendors**
- **Lack of insight into vendor capabilities early in the acquisition process**

Fidelity of T&E scope and definition in the RFP is critical with commercial procurement focus

Commercial T&E Optimization

- **Developed T&E RFI Questions Guide**
 - Focused Market Research on vendor commercial testing history, capabilities, and environments
- **Developed T&E RFP Questions Guide**
 - Vendor to define their commercial capabilities and T&E strategy, integration, execution
 - Enabler for PM to optimized AS & IMS for multiple vendors
- **Developed TEMP Review Guidebook**
 - Focused review on the critical commercial T&E, acceptance testing, qualification testing, and interfaces with vendor(s) and OT
- **Developed Test Plan Template**
 - Allows flexible inputs that accommodates commercial T&E practices as lead or as oversight
- **Early demonstrations (bid sample) of vendor systems prior to acquisition**
- **Early user inputs to T&E and user input to programmatic decisions**

OTIA Review T&E Process

- **OTIA provides end-to-end test event planning/review process for all OTIA programs**
- **Process includes lines of responsibility and periodic gate reviews with entrance and exit criteria to ensure proposed and planned tests successfully progress**
- **Process may be tailored for individual test events**
- **Supports DHS Acquisition Directive 102-01**
- **Process is repeatable, adaptable, and scalable**

Enclose in RFP -- ensures linkage of Test Events

OTIA T&E: Tailorable / Scalable

Time line is **scalable**

Gate Reviews are **tailorable**

Process is **repeatable**

Conclusions

- **DHS is leveraging commercial acquisition approach to balance cost and schedule while maintaining critical capabilities**
- **SE is using agile systems analysis approach to focus engineering efforts on key areas**
- **DT&E is gaining synergy with vendors and Operational testing to improve:**
 - Speed, scope, and completeness
 - Quality to program office decisions and capability to the Border Patrol
- **Aggressively pursuing artifacts and processes to improve commercial-based T&E for CBP**

Questions

Systems Analysis

- **OTIA acquires systems that are comprised of elements that may be commercially sourced or may require development**
 - Commercial/Non-Developmental Item (Coml/NDI)
 - Adapted (from Coml/NDI)
 - Development
- **Acquisition, technical and business approaches and insights differ for each system element type**
 - Coml/NDI – no design, no development, **acceptance testing**, vendor CM, and high cost certainty
 - Adapted – no design, ECP, **limited DT**, vendor CM, and medium cost certainty
 - Development – design, development, integration, **test**, full CM, and low cost certainty

One Size Does Not Fit All

Trade Security

- **108.5 million conveyance vehicles inspected**
- **56,000 foreign examinations of cargo**
- **2,500 security validations in 90 countries**

Drug Seizures

- **1.5 million pounds of drugs seized at ports of entry**
- **1.3 million pounds of marijuana and cocaine seized by Air and Marine agents**
- **Significant increases over FY 2008:**
 - Heroin seizures rose 316% along the border
 - Cocaine seizures rose 53% at ports of entry, 18% along the border
 - Marijuana seizures rose 19% at ports of entry, 58% along the border
