WHY

HOW

WHEN

→ Telcordia's Testing Experience

**NETWORK AND
SYSTEM
INTEROPERABILITY**

**STANDARDS AND
REGULATORY
COMPLIANCE**

**PERFORMANCE AND
RELIABILITY
ASSESSMENT**

**REQUIREMENTS
VALIDATION**

→ Desired Test Tool Characteristics

→ Track test status

- Management dashboard
- Centralized up-to-date status
- Customized views

→ Partition data

- Functional areas
- Multiple vendors

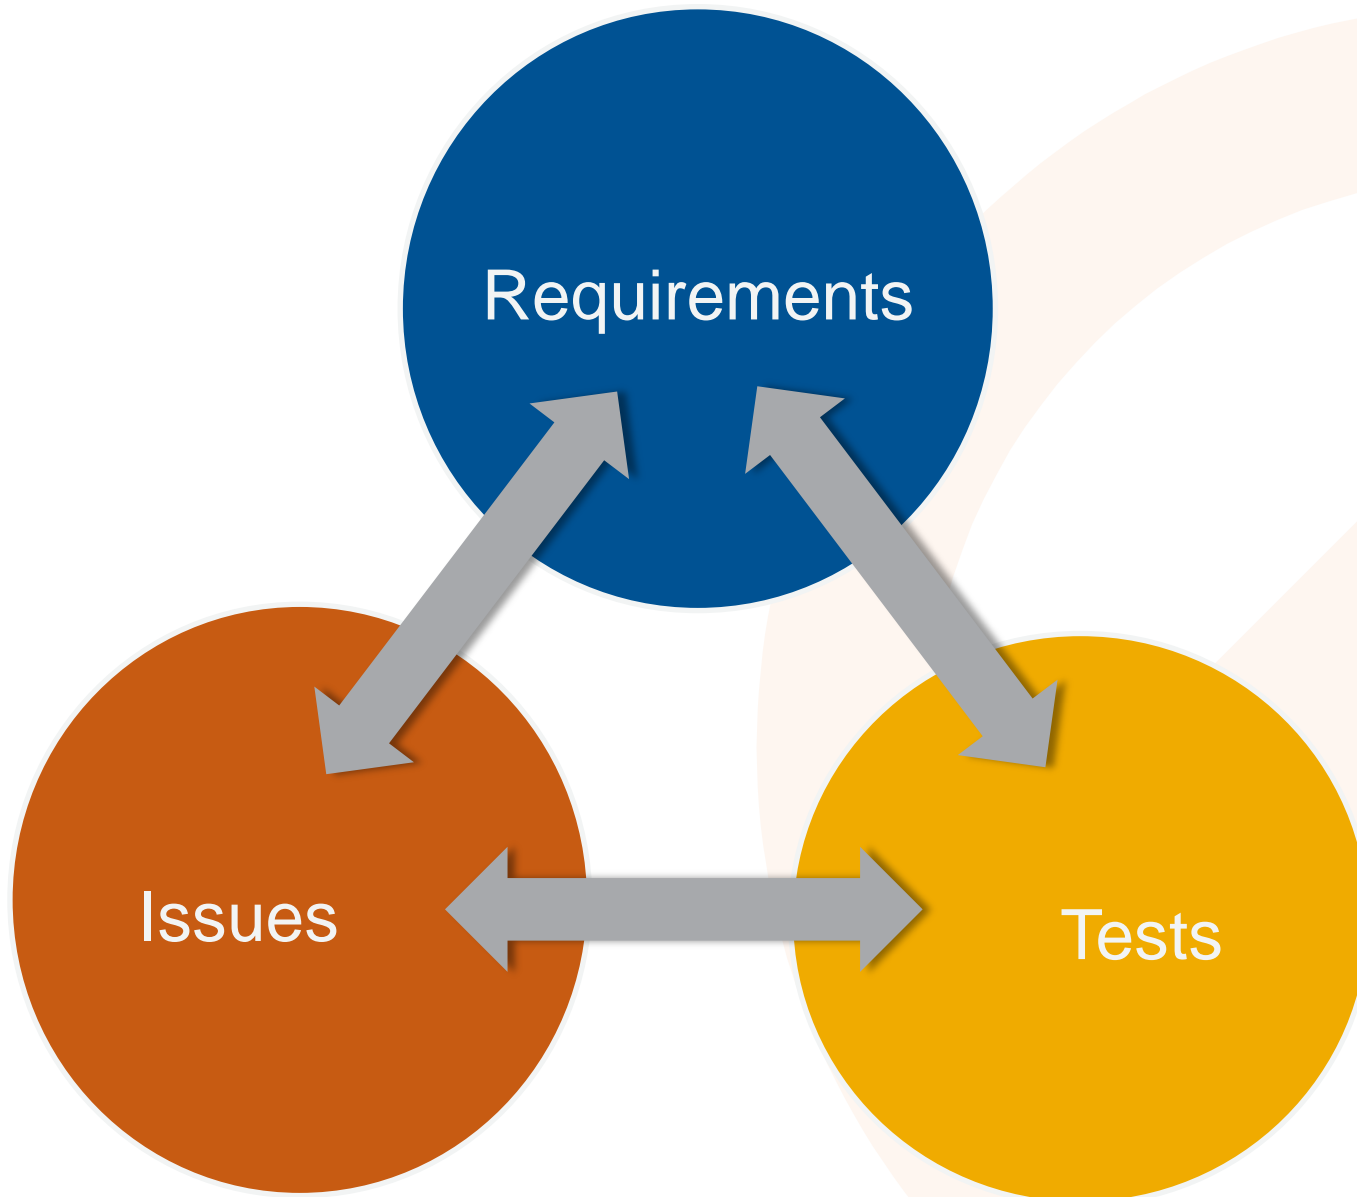

→ Ease of use

- Minimal training
- Low overhead
- Easy import/export capabilities
- Web access

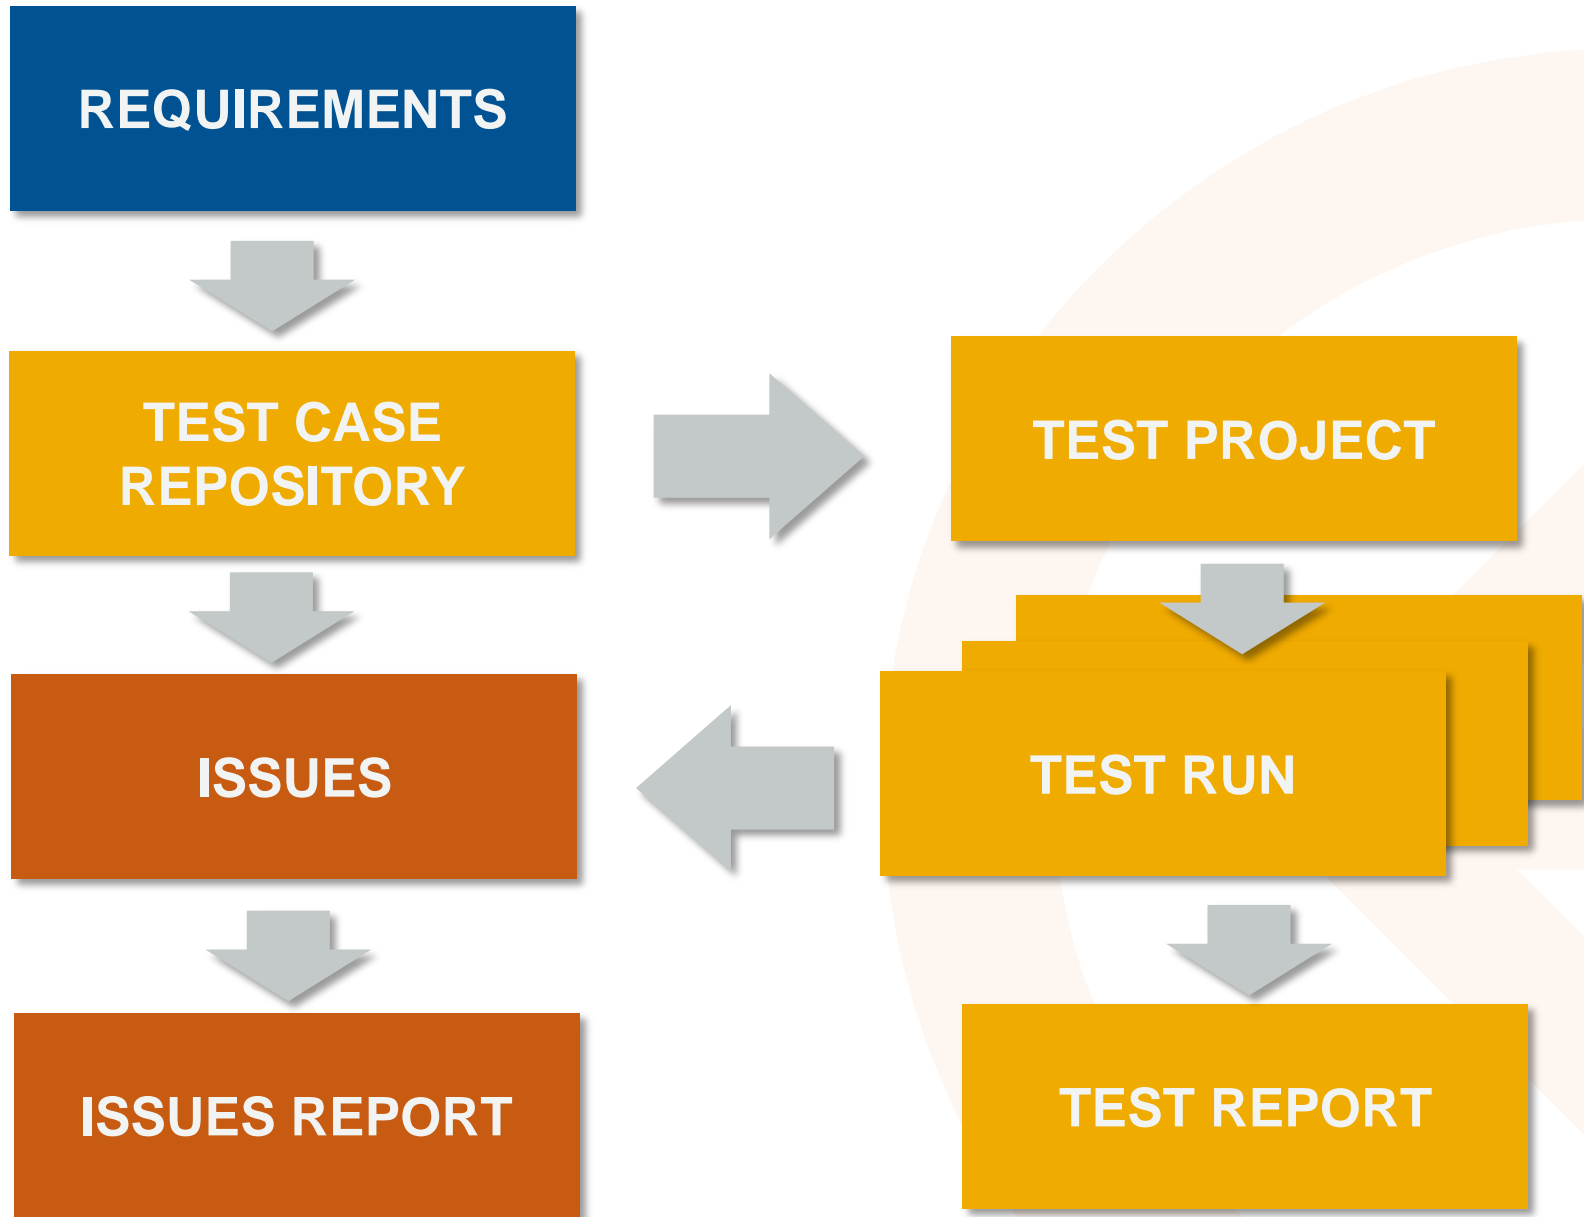

→ Flexible

- Modular test projects and test libraries
- Reuse of existing test materials

Logical Testing Triangle

Logical Sequences

Typical Steps

➔ Enter requirements

➔ Enter test cases

➔ FOR EACH TEST RUN

➔ Select test cases

➔ Perform and record results

➔ Analyze results

Requirements Form

R, N, O, ...

Requirement:	1
Requirement Type:	R
Requirement Text:	Update Configuration Management tools to reflect pending Disconnect
Category:	Option 1 Option 2
<input type="button" value="Update"/>	

SIMPLE TEXT

Test Case Form

<----CLICK UPDATE AFTER MAKING CHANGES!

Owner	Lou Miller
Title	Provisioner Review
Description	Provisioner reviews, approves and routes to Configuration Manager work queue for network design
Category	--
Status	Draft
Status ChangeLog	
Associated Issues	
Requirement(s)	1 1.1.9.19 2.1.1.1 2.1.1.1.A 2.1.1.1.B
Test Setup	Start with work order in Provisioning work queue
	Attached Files(0): Attach File: <input type="button" value="Browse..."/> Detach File: <input type="button" value=""/>
Test Procedure	

ONE OR MORE REQUIREMENTS

ADDITIONAL FILES, IF NEEDED

Test Case Form (Continued)

	<p>Attached Files(0):</p> <p>Attach File: <input type="text"/> <input type="button" value="Browse..."/></p> <p>Detach File: <input type="text"/></p>
Expected Results	<pre>Work Order routed to Configuration Manager work queue;</pre>
Tester Name	<input type="text" value="-"/>
Comments	

USEFUL FOR TEST IMPROVEMENTS OR GENERAL ISSUES

Test Run Summary Report

REPORT**

Implementation Details

→ Three tiered architecture

→ Web GUI

→ Application

→ Database

→ Scalable

→ Number of users

→ Speed

→ Geography

Additional Thoughts

➔ **Tailor tool to the job**

➔ **Need processes around the tool**

➔ **Simple is better**

Summary of Test Tool Attributes

→ Imposes desired rigor

→ Easy to use

→ Easy to customize

Q & A
