New Subcontracting Goals = More Attention

- Aggressiveness of Subcontracting Plan goals during source selection
- Follow-through on that Subcontracting Plan treated as a contract deliverable
- Likelihood of invoking Liquidated Damages Clause (52.219-16):
 - Contracting Officer determines “Good Faith Effort” of contractor to meet goals
 - Dollar-for-dollar consideration required: “The amount of probable damages attributable to the Contractor’s failure to comply, shall be an amount equal to the actual dollar amount by which the Contractor failed to achieve each subcontract goal”

Subcontracting Plan vs. Participation Plan

- Not required from Small Businesses
- Percentage of subcontracts
- Acceptable/Unacceptable
- Incorporated into Contract at award
- Reported in eSRS, CPARS
- Provides subcontracting commitment
- Required from all offerors
- Percentage of entire effort
- Rated Factor
- Not incorporated
- Perhaps CPARS
- Provides magnitude

Most participation plans are prepared incorrectly –

Industry still playing “Catch-Up” to learn what belongs in a Participation Plan

PARTICIPATION PLAN BASICS

- Base all percentage calculations on percentage of total contract value (TCV)
- If proposing on a multiple award contract, choose a percentage of the TCV (20%, 30%) as the total award amount so that you have a base against which to calculate your participation levels
- State the dollars and percentage of TCV planned for each subcontractor, broken out by the base and any option years
- State the dollars and percentages (of TCV) that are planned for SB and each of the subcategories of SB, also by base year and each option year

PARTICIPATION PLAN BASICS

- The plan should state the NAICS and the description of the work to be performed by each subcontractor
- The plan will identify the subcontractors by name, address and CAGE code, will contain and will contain signed teaming agreements stating the level of planned participation for each subcontractor within their teaming agreement
- A table showing the planned levels of participation for SB and the socioeconomic groups vs. the goals of the solicitation shall be included
- Past performance against participation goals should be addressed
- Dollars to a subcontractor belonging to multiple socioeconomic groups gets to be counted toward the goal for each socioeconomic group to which they belong
