MEDIA PRODUCTION CENTER ENTERPRISE (MPC-E)

The MPC Enterprise is a socio-technical system comprised of interdependent resources of Soldiers, information, processes, and technologies that must interact with each other and their environment in full support of the MISO mission. This automated environment enables MISO forces to be responsive, adaptive, and effective in the complex nature of conflicts while supporting global persistent engagement strategies and providing a Common Operating Picture (COP) for various levels of Command. The enterprise system will act as a central repository for the analytically intensive MISO/CA atmospheric data collected on mission which provides visibility within the context of a fluid and dynamic collaborative information environment through the COP.
