Panel Focus

Not an open forum / discussion on the generic topic of interoperability ……

…… rather an update on two specific OSD funded interoperability projects

- **IOP Maturation & Propagation Strategy**
- **Common Software Architecture for RAS Controllers**

Process

- White papers from NAMC members expressing interest
- Kick-off meetings in late Sept with Government and NAMC Industry representatives / community of interest (COI)
- Core Team members selected and formed in October
- In-person, mid-term review meetings of core teams and closely held Government advisers in Feb
- Initial draft of findings and "strawman" recommendations for socialization with Government stakeholders and industry COI
- Release of final draft version 1.0 in mid/late April for comment
- Publish final reports in early/mid May 2015

Agenda

IOP Maturation & Propagation

- Overview of the RAS Interoperability Profiles (IOP)
  Mark Mazzara, PEO CS & CSS

- Government Open Standards Success Factors
  Dr. Michael Moore, SWRI

- Accelerating Industry Adoption
  Frank Lentine, QinetiQ

A Common Software Architecture for RAS Controllers

Kurt Bruck, QinetiQ
