U.S. AIR FORCE

# The Cost of Energy

*Energy is a significant portion of the budget*

**U.S. AIR FORCE**

# *Coming out of the weeds by 30,000 feet or so...*

**Air Force 30-Year Strategy lays out four Emerging Global Threats. Each one shapes how we think about energy at the Air Force.**

- **Rapidly emerging technological breakthroughs**
- **Geopolitical Instability**
- **Wide range of operating environments**
- **Increasing importance and vulnerability of global commons**

U.S. AIR FORCE

# *What does the Air Force of the Future look like?*

## STRATEGIC AGILITY

Resiliency  
Adaptability  
Flexibility  
Partnerships  
Inclusiveness

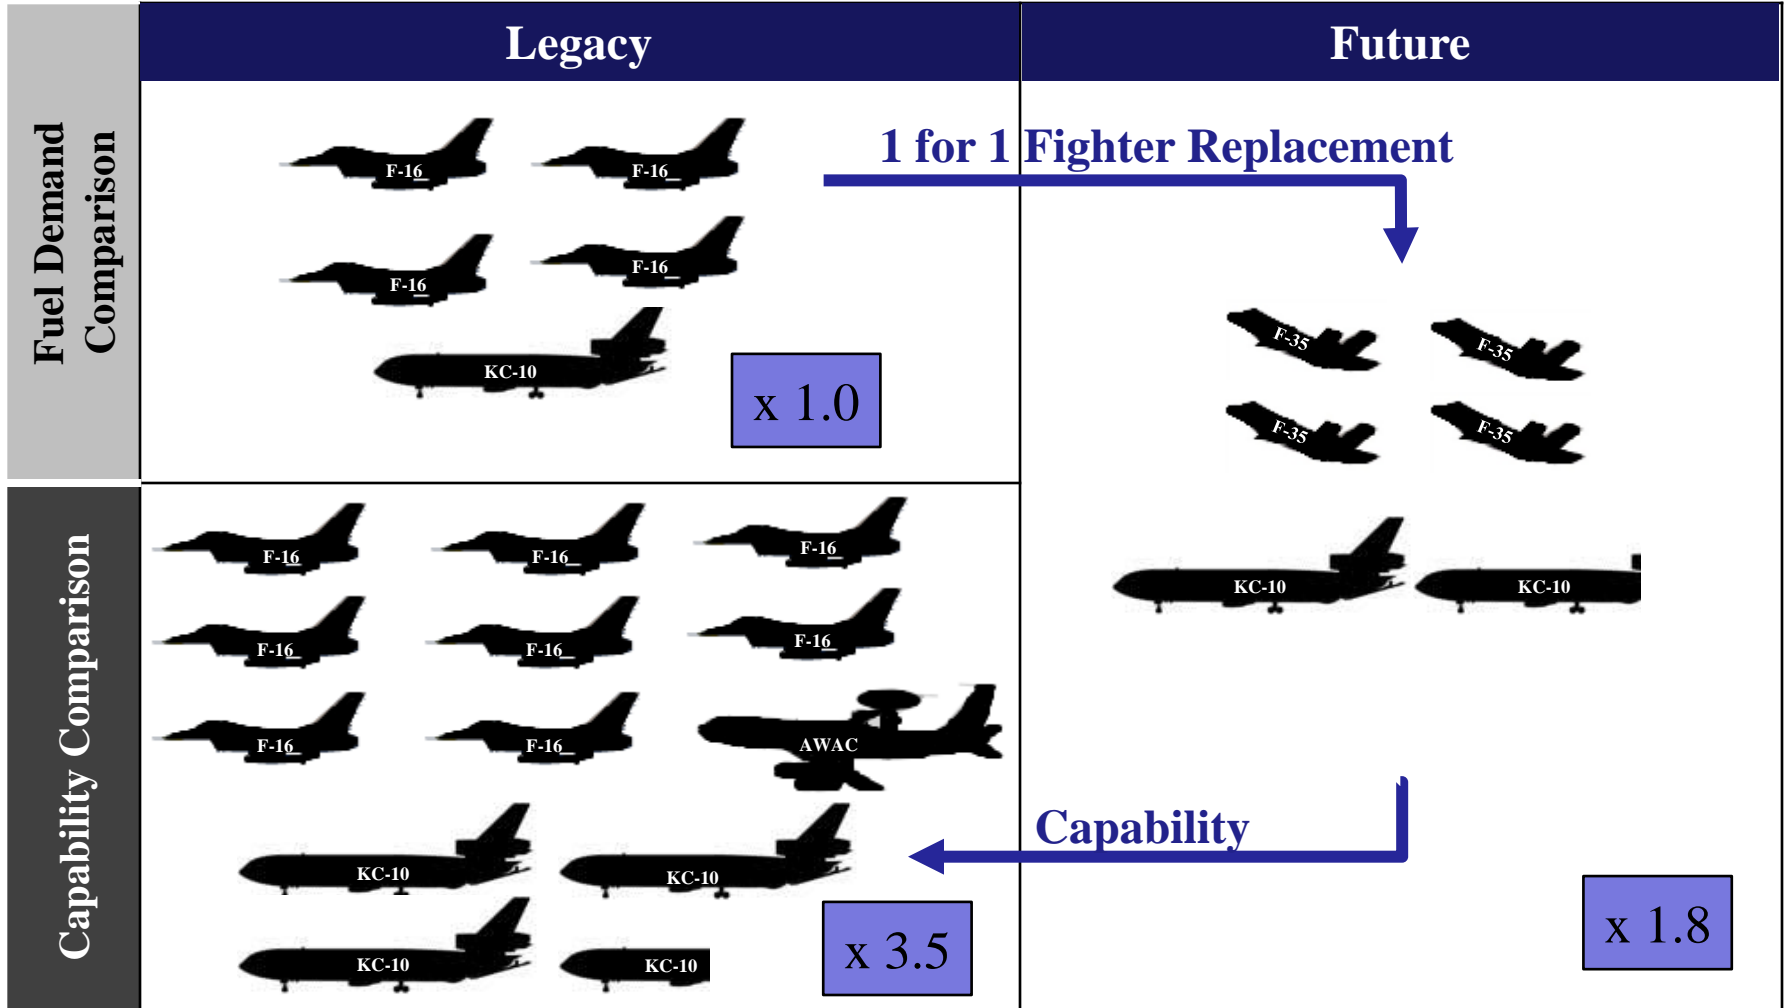

*Mission Assurance through Energy Assurance*

*Integrity - Service - Excellence*

# How we operate will change...

U.S. AIR FORCE

U.S. AIR FORCE

# *We Don't Fight Separately*

## M2A2 Bradley Fighting Vehicle

C-5M

## Army Ground Combat Vehicle

C-5M

*Operational considerations can be driven by other services force structure and procurements*

U.S. AIR FORCE

# Why, What, and How

Geopolitical Cost

Mission Cost

Financial Cost

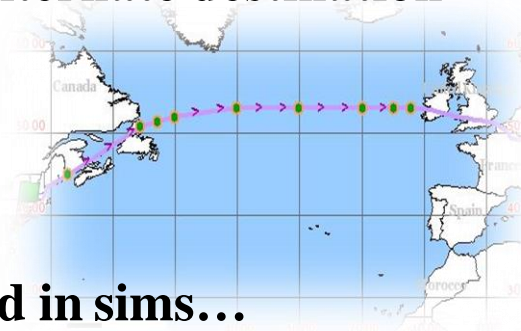

Environmental Cost

# *Fuel Efficiency Initiatives*

**U.S. AIR FORCE**

- **MAJCOM Policy:** AFI's, Ground Power Unit usage, Alternate destination fuel requirements...
- **Operations:** Air refueling optimization, Optimized diplomatic cleared routings ...
- **Training:** More requirements and currencies completed in sims...
- **Aircraft:** Weight reduction, aircrew electronic publications...
- **Wargames:** Unified Engagement, Futures...
- **Investments:** Integrated air refueling simulator, KC-135 Propulsion Upgrade Program, ...
- **NextGen:** Airspace access and efficient flight operations

*Initiatives realize absolute savings & cost avoidance*

*Integrity - Service - Excellence*

# *MAF Policy/Low-Cost Initiatives*

**U.S. AIR FORCE**

<b>Initiative</b>	<b>Start date</b>	<b>FY 15 Savings (Gal/\$)</b>	
Optimized Diplomatic Clearance Routes	Oct 07	0.06M	\$0.22M
Aircraft Weight Reductions	Feb 09	0.43M	\$1.58M
Reduce KC-135 Zero Fuel Weight	Jan 10	1.70M	\$6.27M
Reduced APU Use	Aug 10	0.22M	\$0.81M
Contingency Fuel Reduction (15 Min)	Sep 10	0.71M	\$2.61M
Overfuel Elimination/Precise Fuel Loading	Sep 10	0.16M	\$0.58M
Mission Indexed Flying / ACFP Overlay	Oct 10	2.76M	\$10.2M
Alternate Fuel Requirements Change	Jun 11	0.25M	\$0.92M
Category I Fuel Elimination	Oct 11	0.64M	\$2.38M
MAF Cost Avoidance Tankering	Jul 12	n/a	\$14.1M
Surfing Aircraft Vortices for Energy (\$AVE)	Sep 12	>FY15	>FY15
KC-135 Landing Weight Reductions	Aug 13	0.33M	\$1.2M

***FY15 Projected Savings/Cost Avoid ~ 7.3M Gal/\$40.9M***

*Integrity - Service - Excellence*

# *Examining Alternative Fuels*

U.S. AIR FORCE

U.S. AIR FORCE C-17A  
AF SERIAL NO. 07-7170  
SERVICE THIS AIRCRAFT  
WITH GRADE JP-4, 5, 8, 8+100,  
JET A, A-1, B OR NATO FUEL GRADE  
F-34, F-35, F-37, F-40, F-44

*Significant experience with using different fuels  
– it's an operational necessity*

# *Approach to Technology*

**U.S. AIR FORCE**

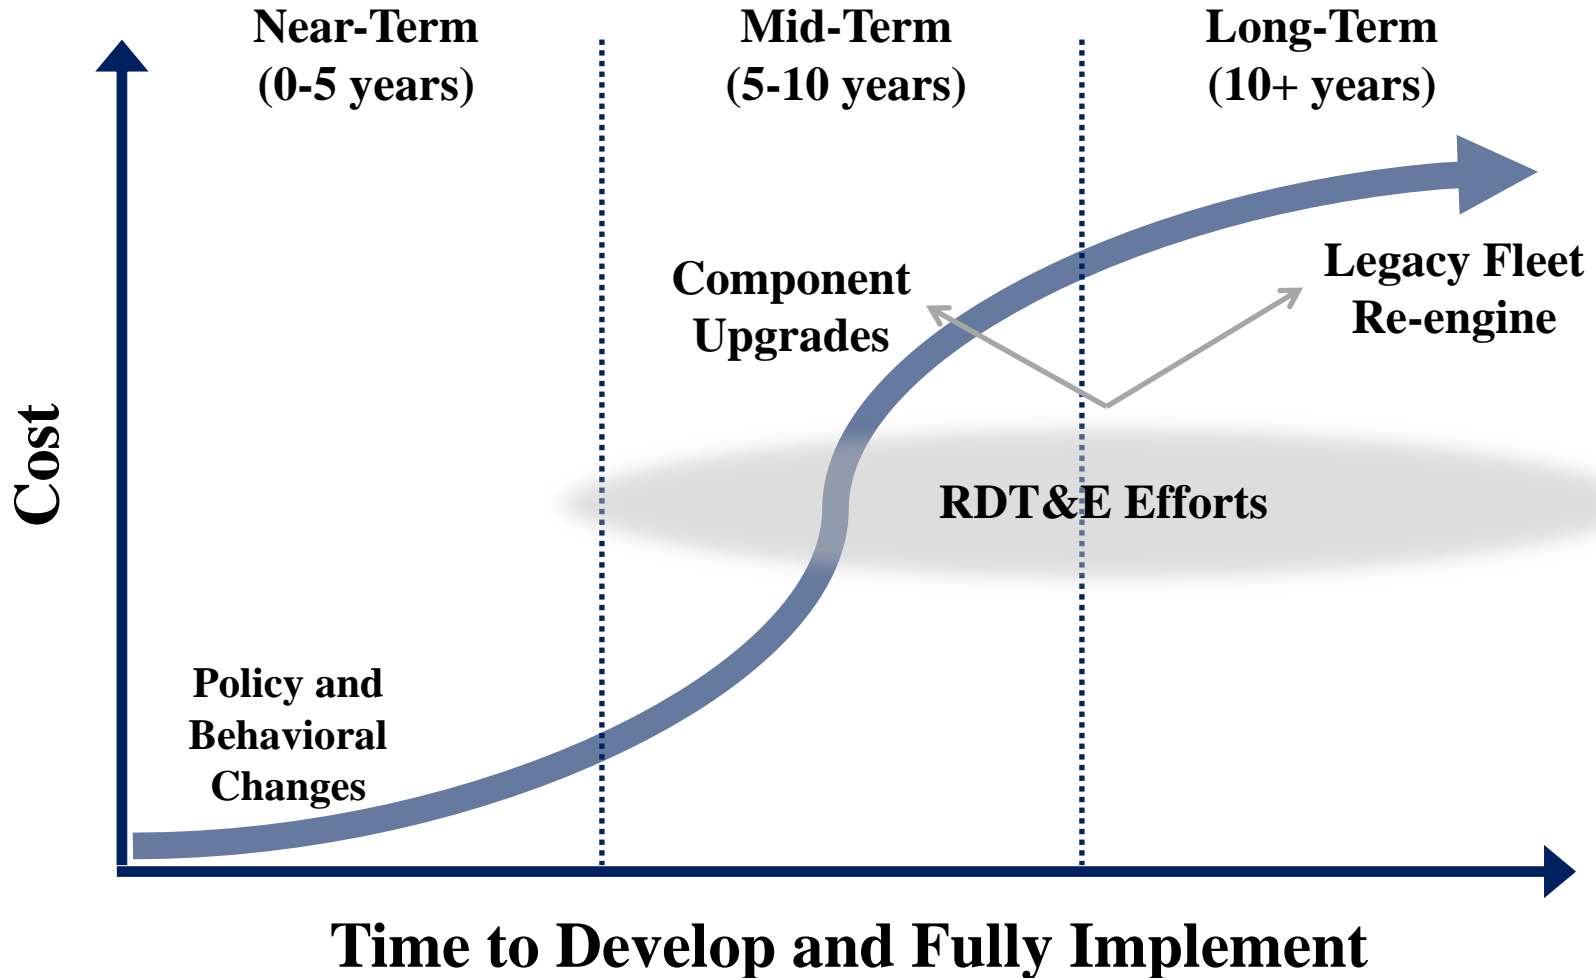

- **Three priority categories:**
  - **Technology Leader**
  - **Fast Follower**
  - **Technology Watcher**
  
- **Current technology initiatives include:**
  - **Aircraft and engine design**
  - **Renewable energy**
  - **Microgrids**
  - **Best practices in planning & operations**

*Air Force focuses on core capabilities in innovation*

# Utilizing Technology

# Fuel Assessment and Evaluation

U.S. AIR FORCE

Fuel Composition

Specification Properties

Emissions Evaluations

Component/Rig Testing – Operability/Durability

Adv Combustion Research – Fuels/Emissions & Operability

## Motivation

- Conversion to commercial Jet A completed (2014)
- Challenges of jet fuel changes
  - Linking changes in fuel composition to performance
  - Updating consensus-based specifications
  - Complex logistics infrastructure
  - Specialty fuels for hypersonics, missiles

## Key Events and Demonstrations

- FY14: JP-8 spec change to reduce allowable FSII but maintain icing inhibition and reduce maintenance
- FY14: 3<sup>rd</sup> alternative fuel approved for Jet A based on AFRL data (previous in 2009, 2011)
- FY14: Next Gen JP-7 for hypersonics ops & testing
- FY15: SAE E31 draft ARP for particulates (soot) released for ballot
- FY15: Complete sustainment program for JPTS thermal stability instrumentation (for U-2)
- FY16: Fuel Microbial Sensor

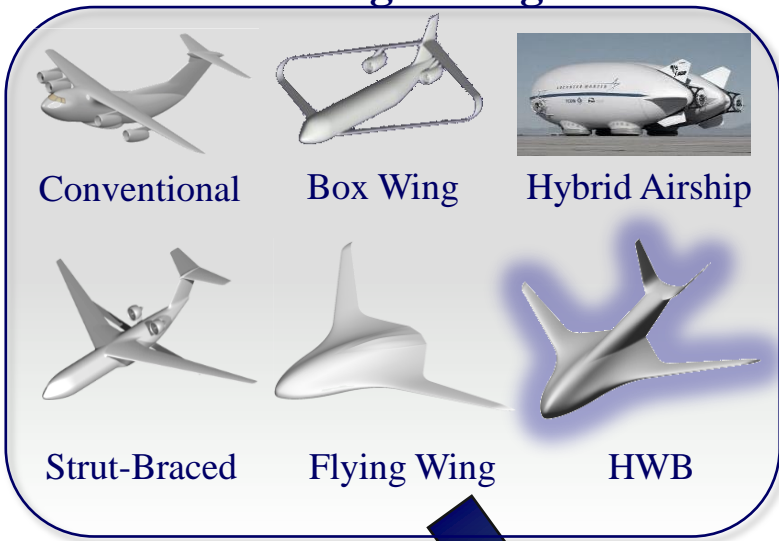

# Revolutionary Configurations for Energy Efficiency

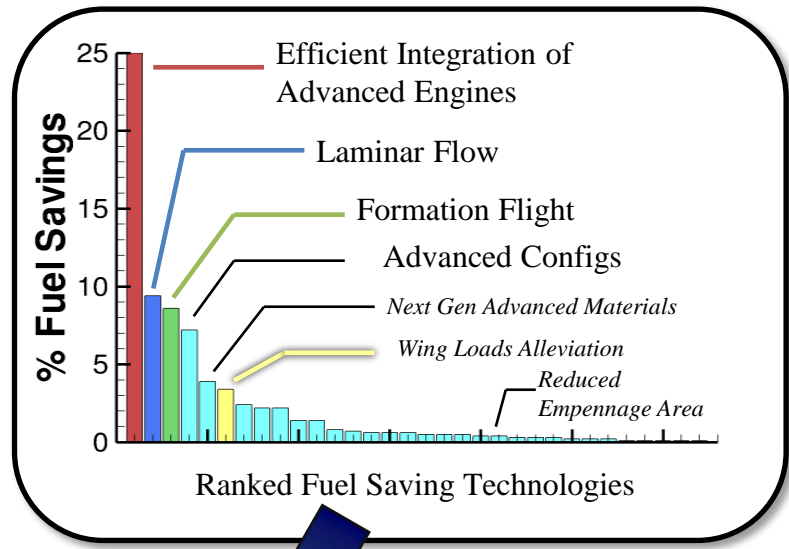

U.S. AIR FORCE

## Phase I: Develop 90% Fuel Savings Fleet & Rank Highest Pay-Off Fuel Saving Technologies

### Best Performing Configuration

### Highest Payoff Technologies

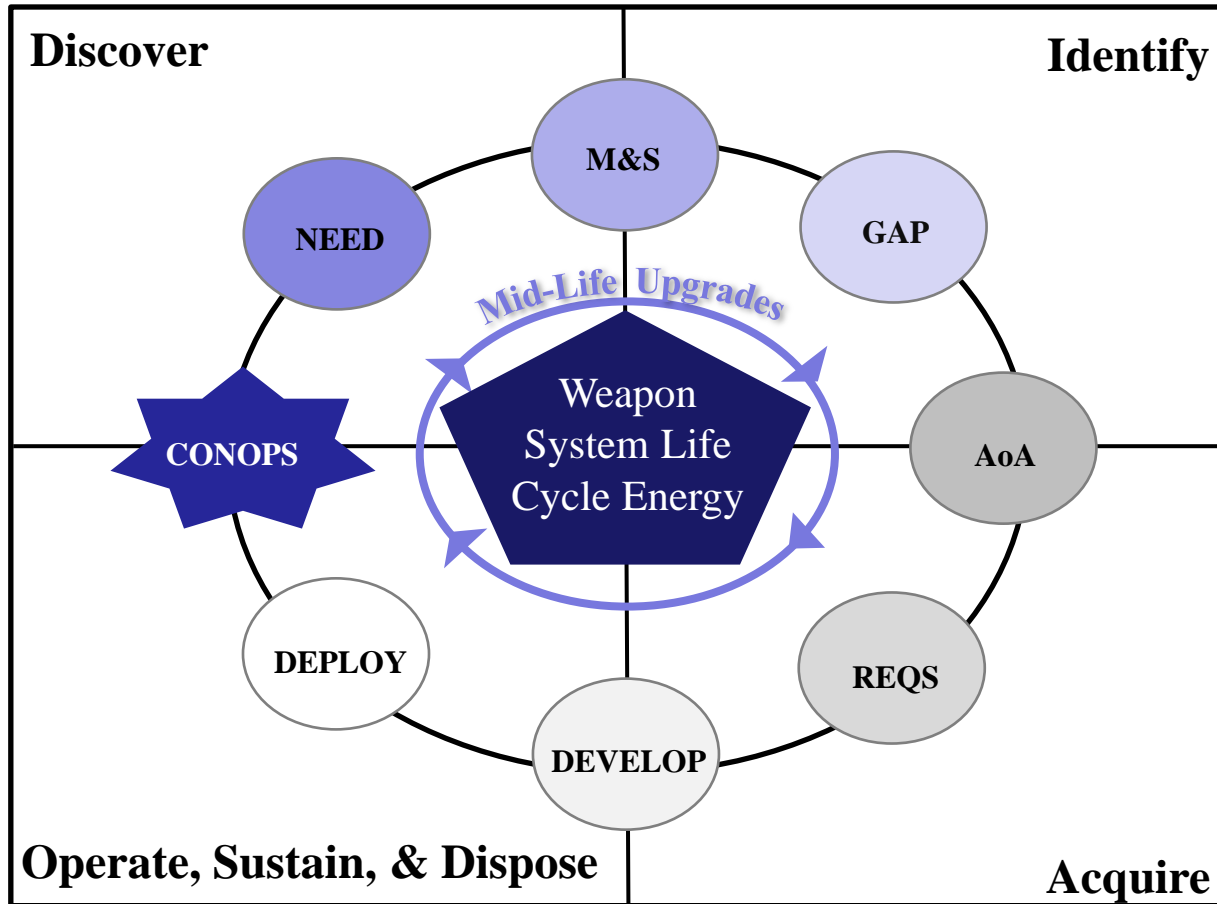

## Phase II: Mature Technologies & Configurations

*Integrity - Service - Excellence*

# *When do we address energy?*

*Once an asset is deployed,  
opportunities for energy efficiencies are limited*

U.S. AIR FORCE

# Conclusion

We must have millions of gallons of gasoline a day to do our job!

- Gen Hap Arnold

**U.S. AIR FORCE**
