

#### Engineering Data Visualization Efforts for Engineered Resilient Systems Sebastien Jourdain - R&D Engineer

sebastien.jourdain@kitware.com

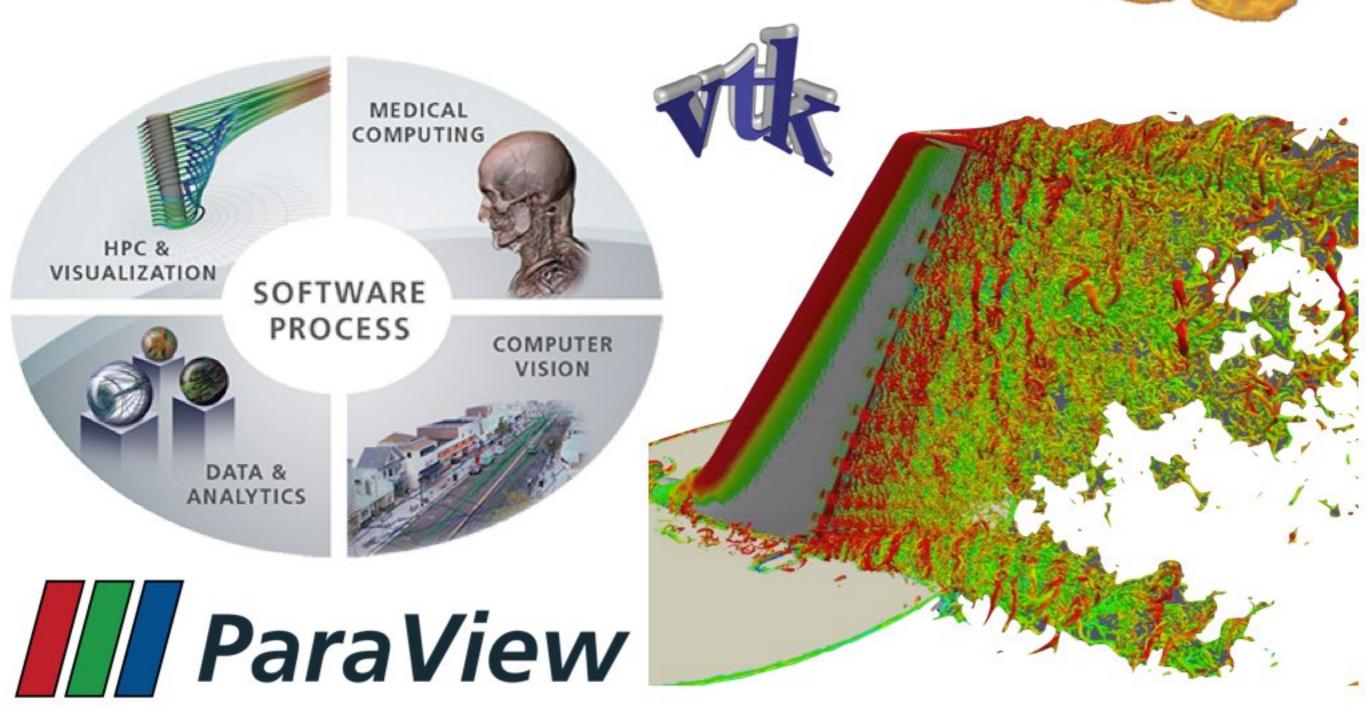

#### **New Visualization?**

- Technology evolves
- Need to embrace today's communication media

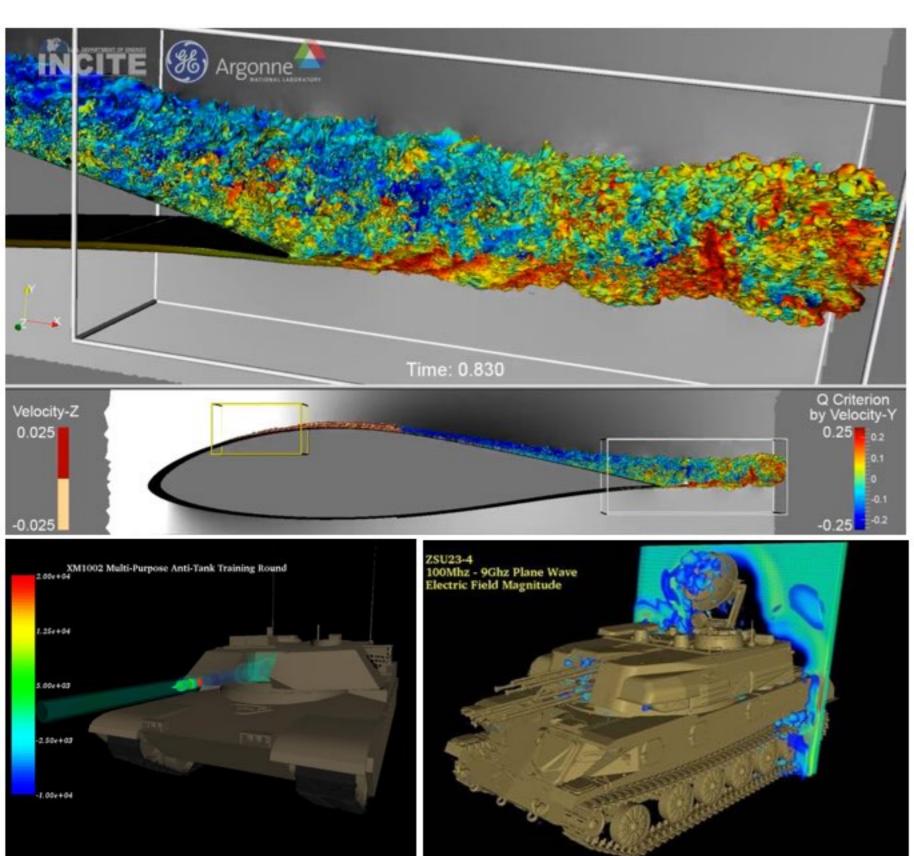

#### Great history of Open Source and Visualization

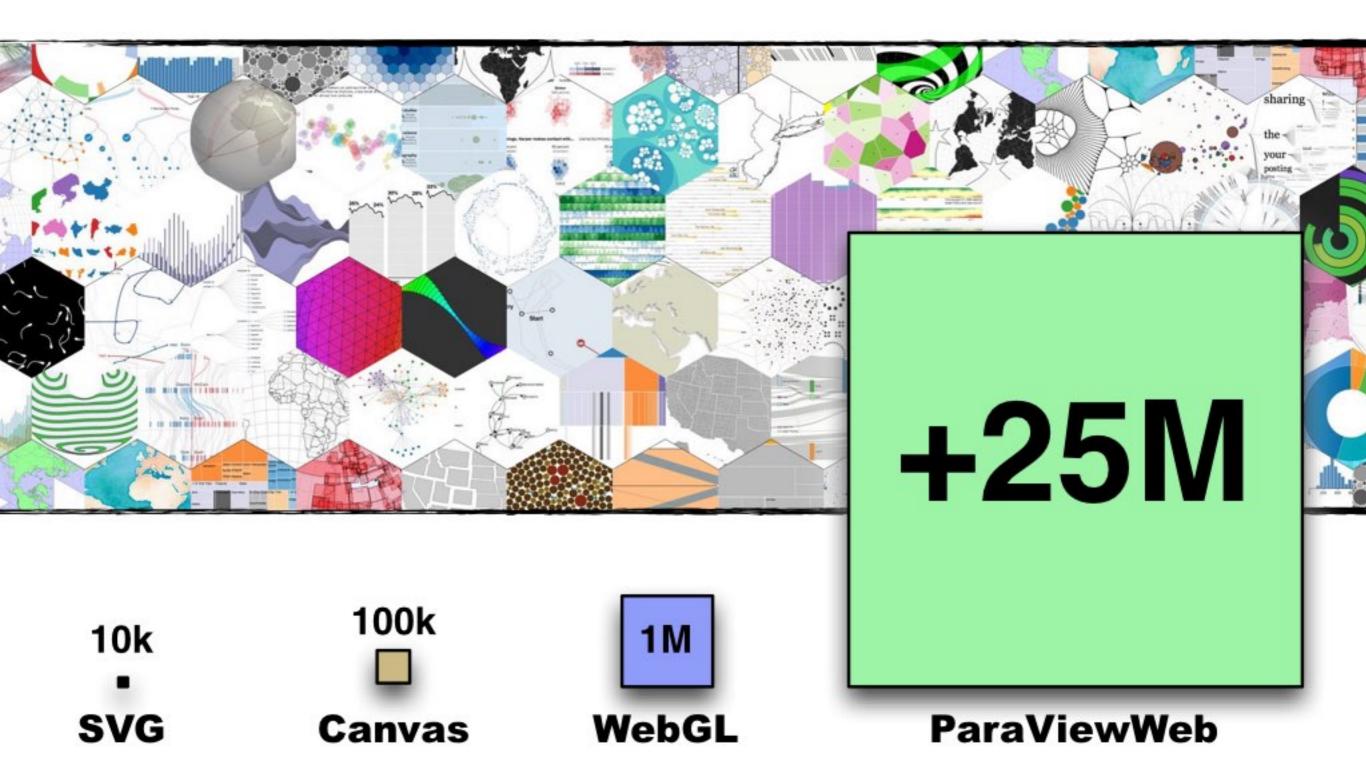

### Trade-offs analytic platform

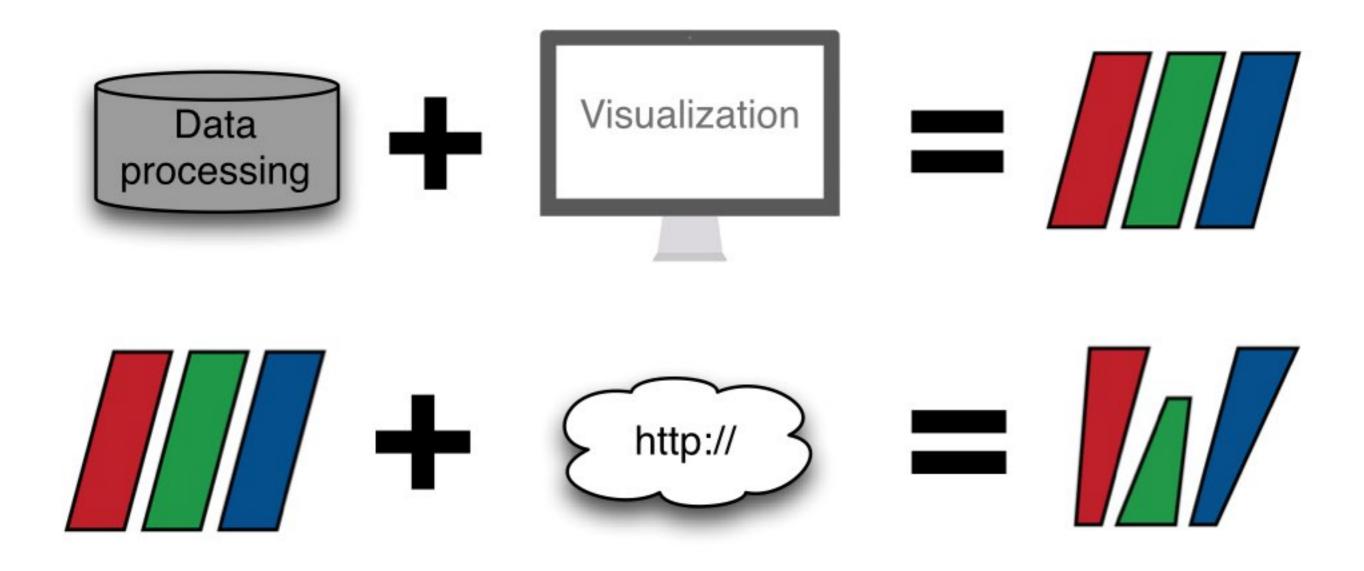

- Look at millions of variations
- Need to handle big data
- Provides various analytic tools
- Web as communication media
  - Ease of access
  - Ease of delivery

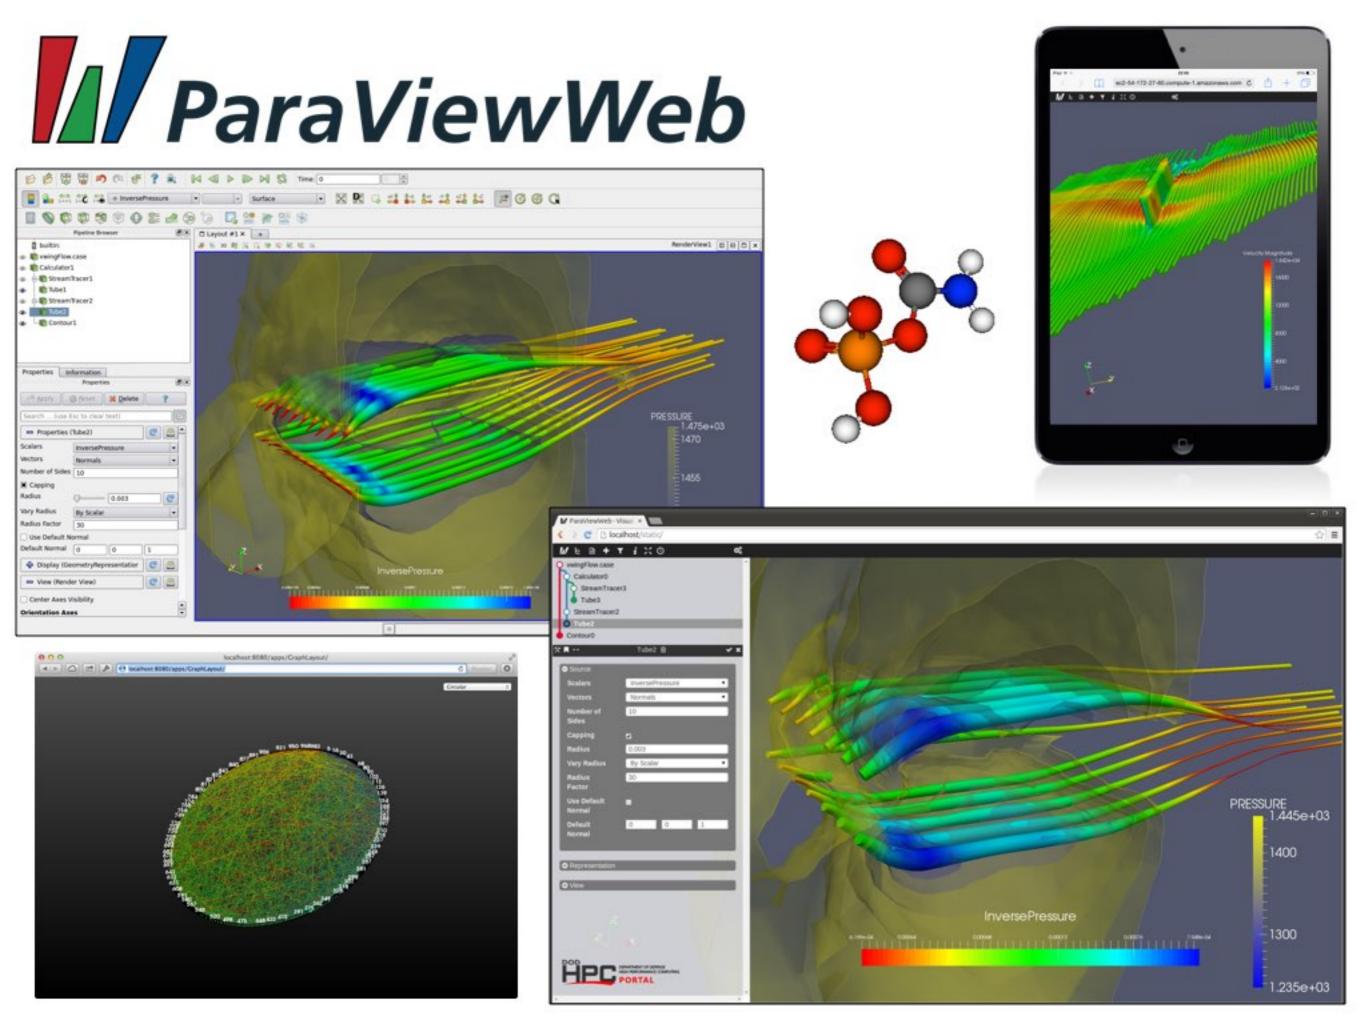

#### Visualization on the Web?

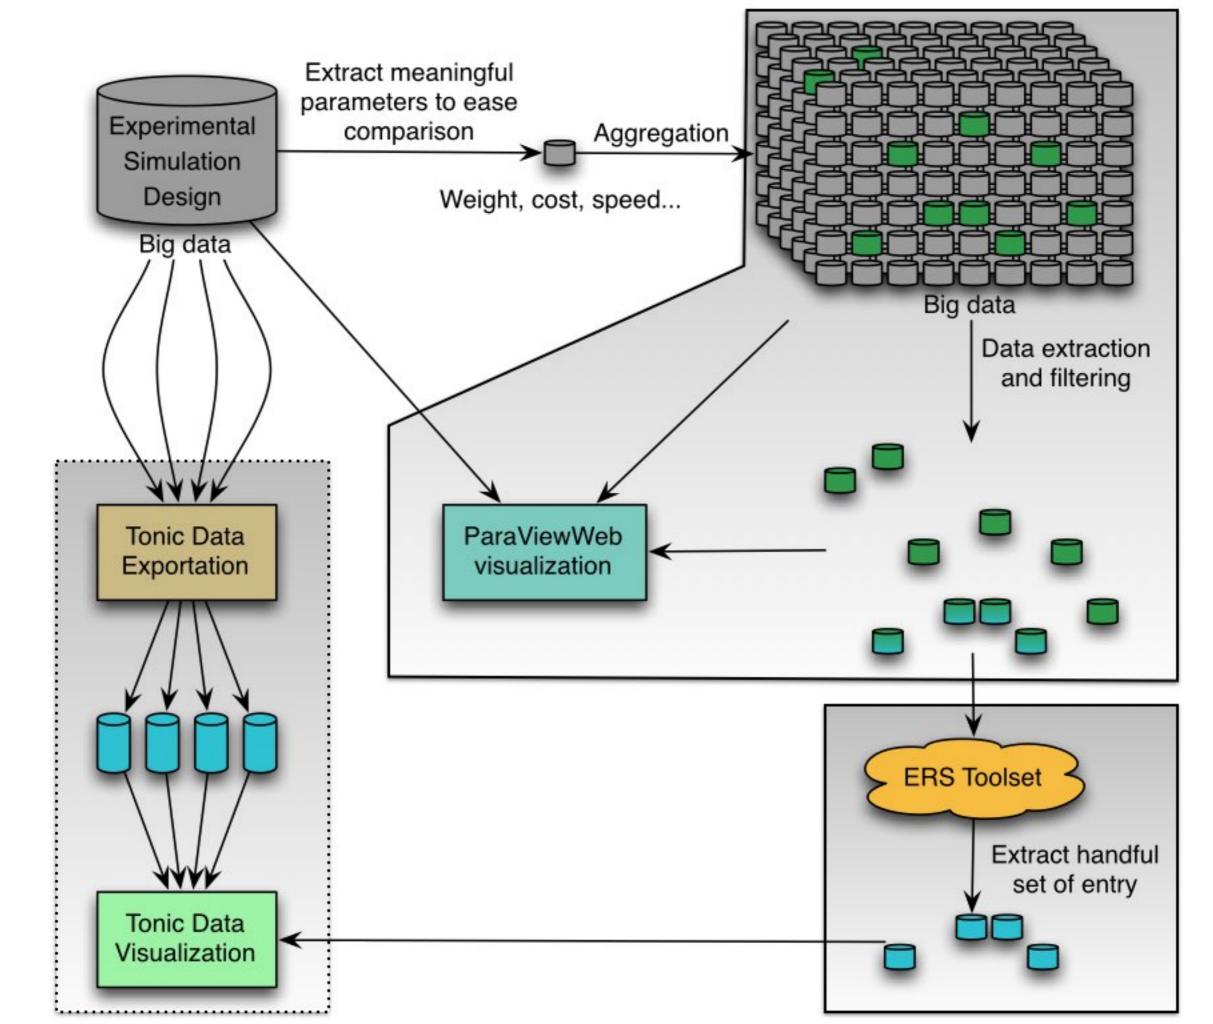

#### ParaViewWeb

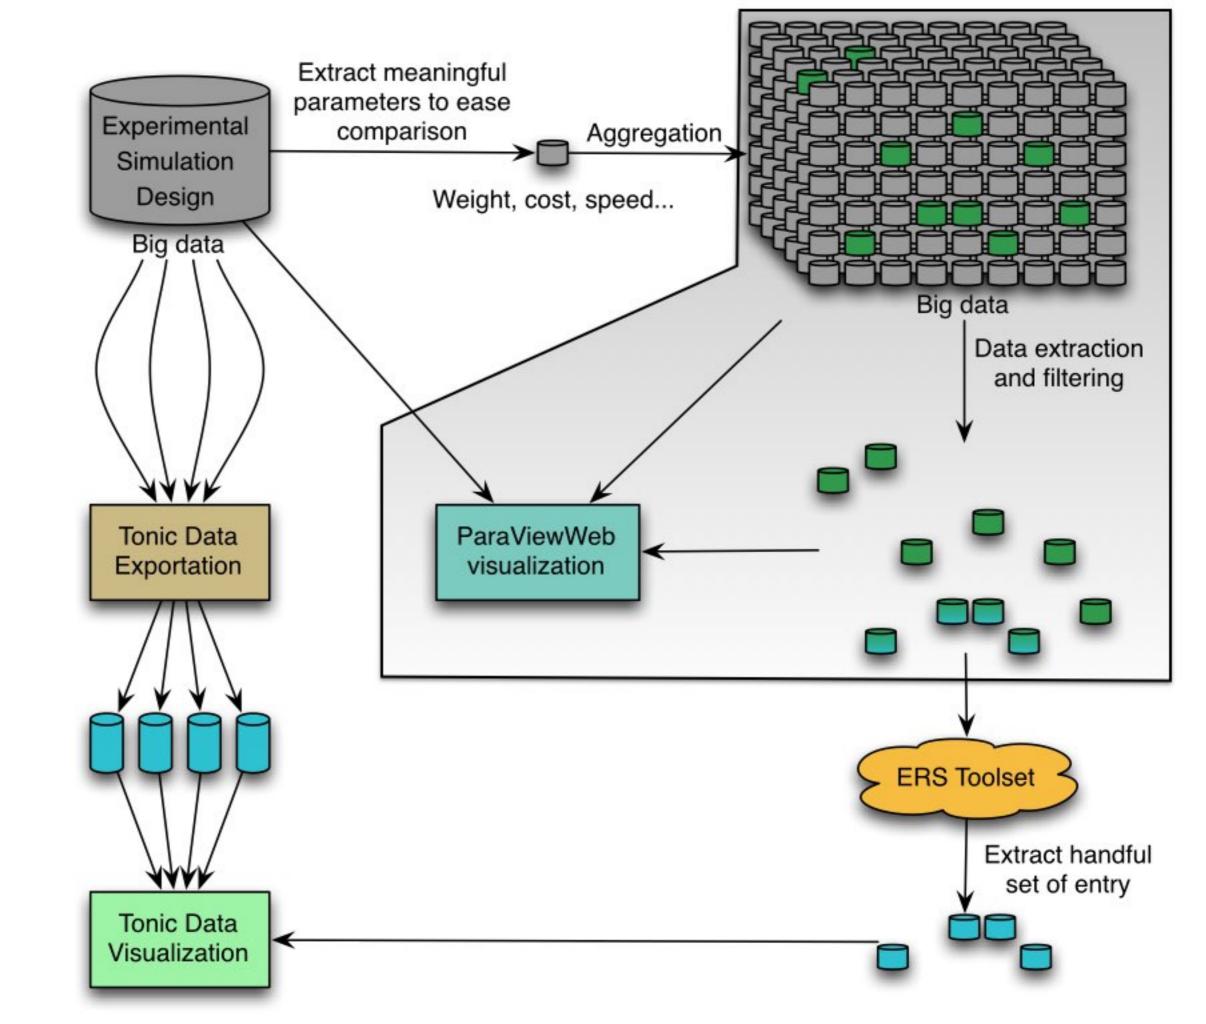

ParaViewWeb is ParaView but shaped to be driven and used within a Web environment.

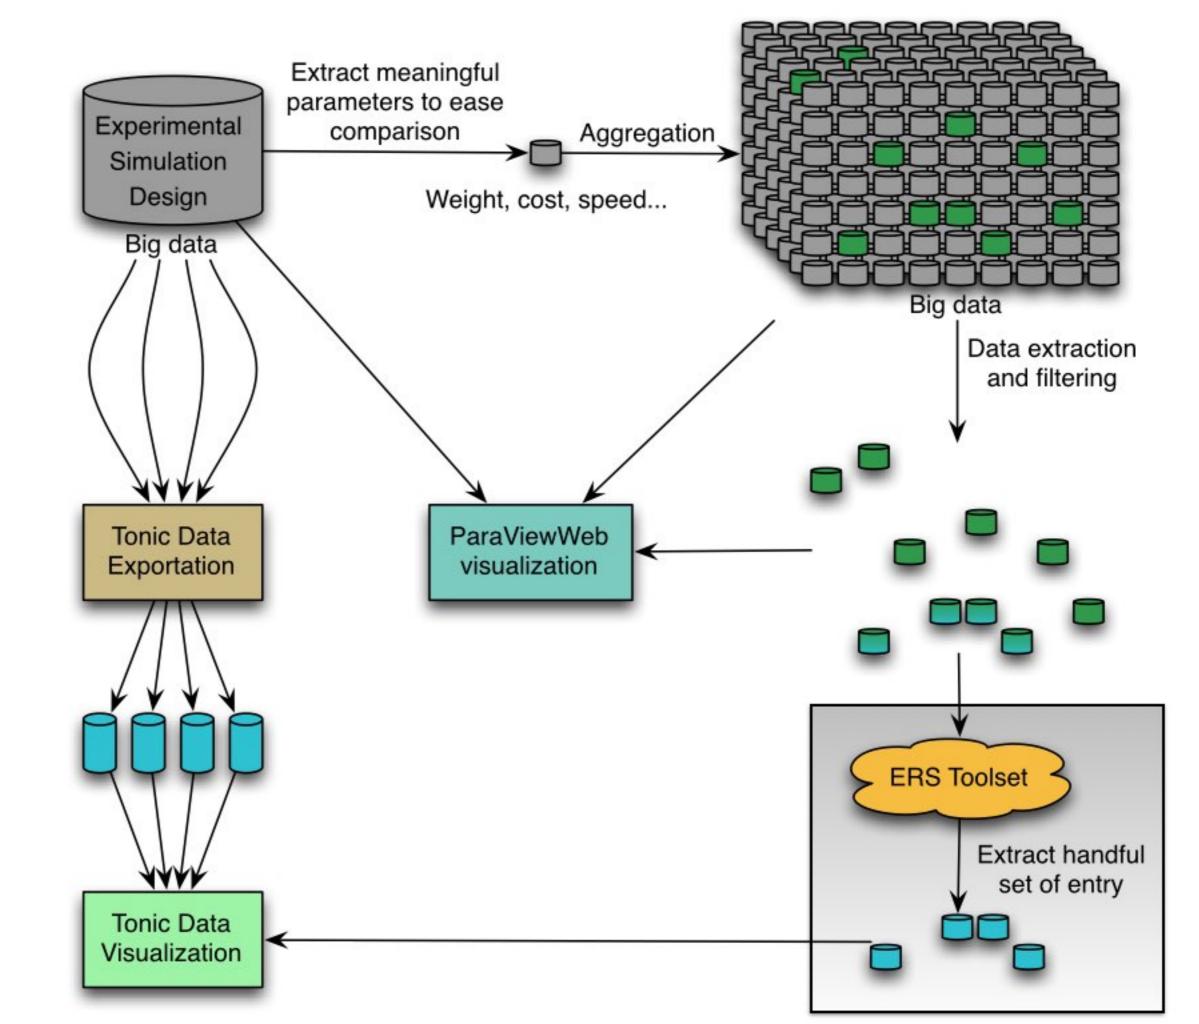

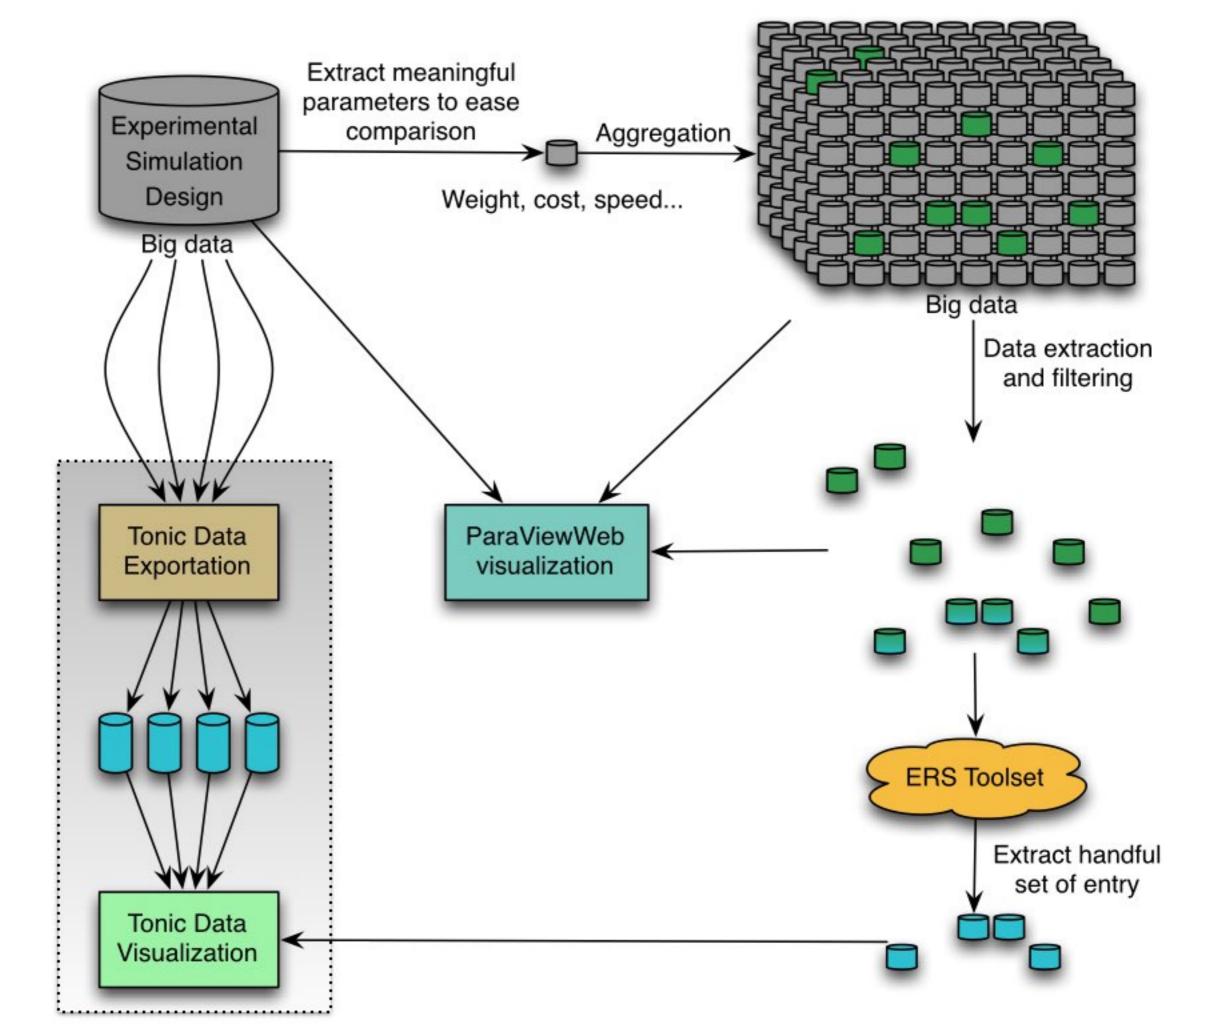

## **Trade Studio**

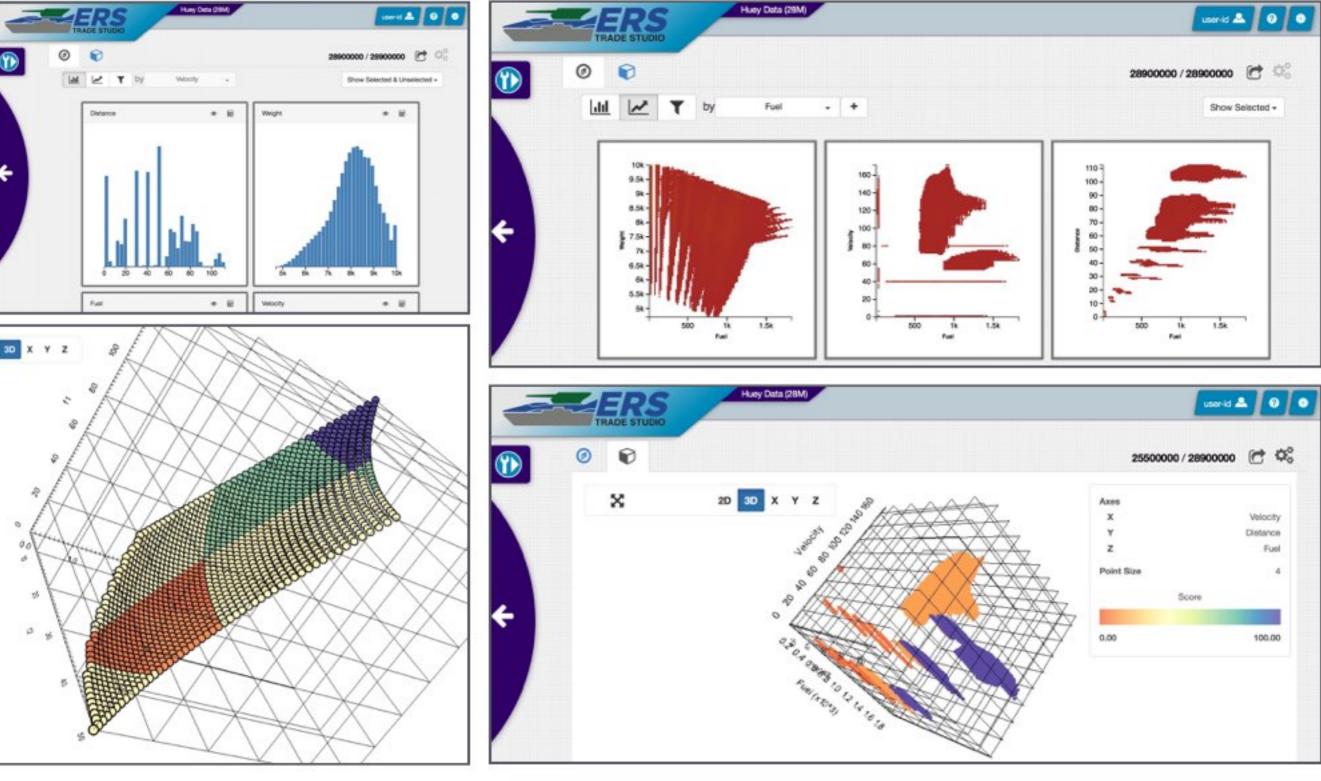

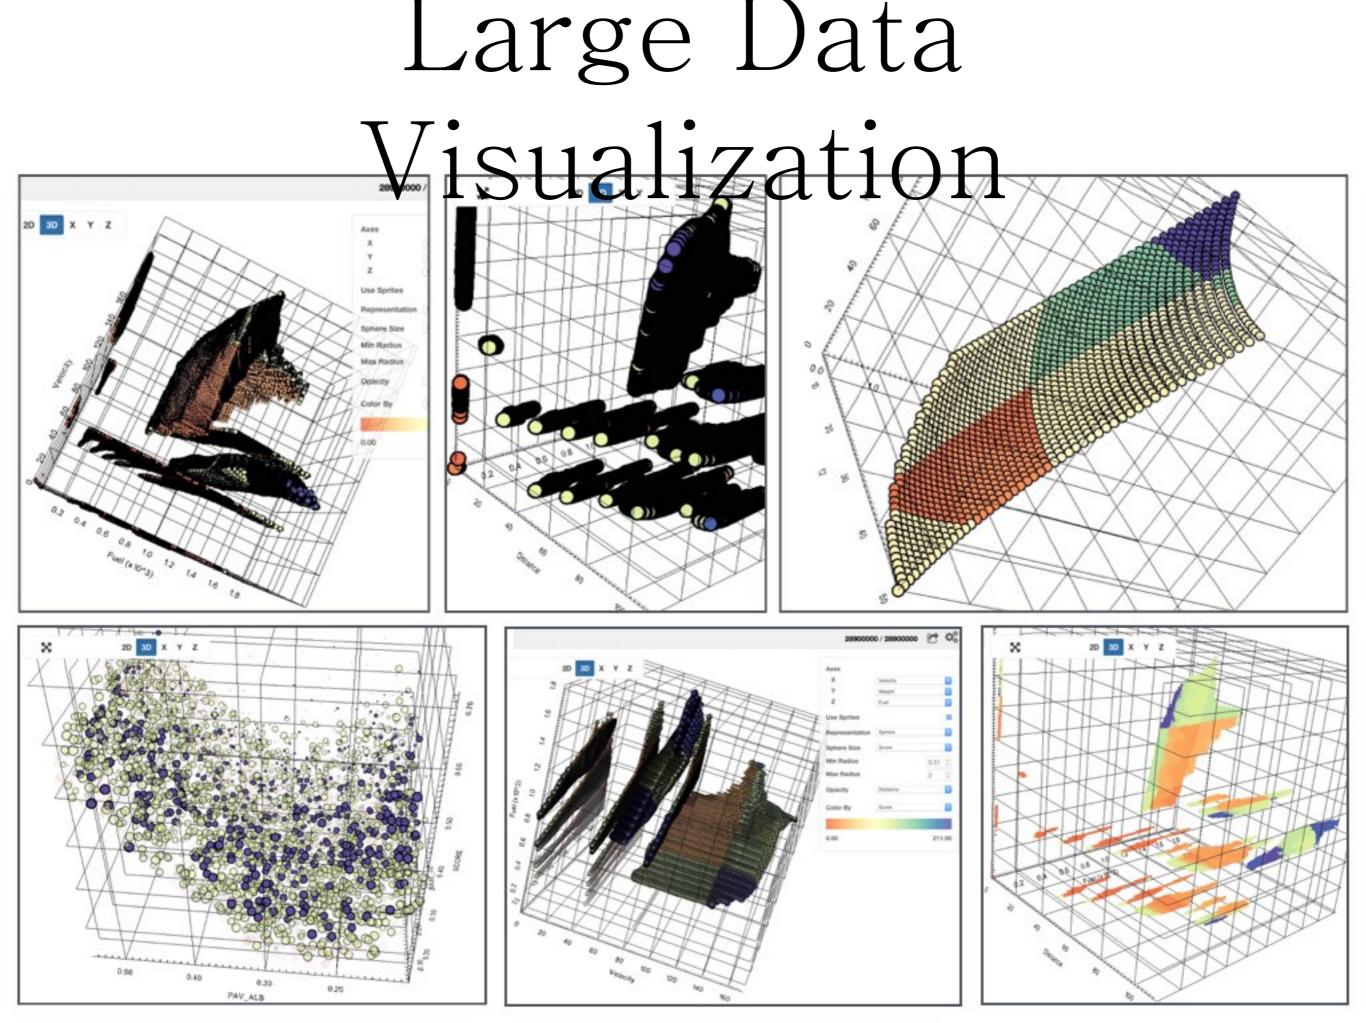

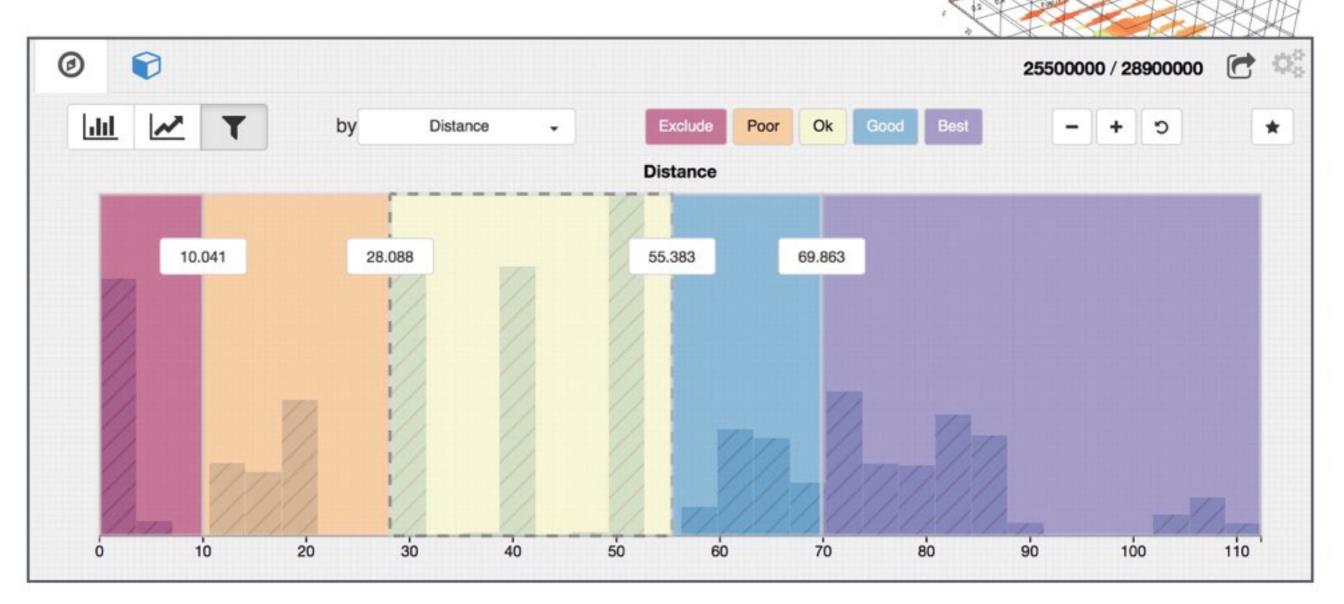

#### Large Data Visualization

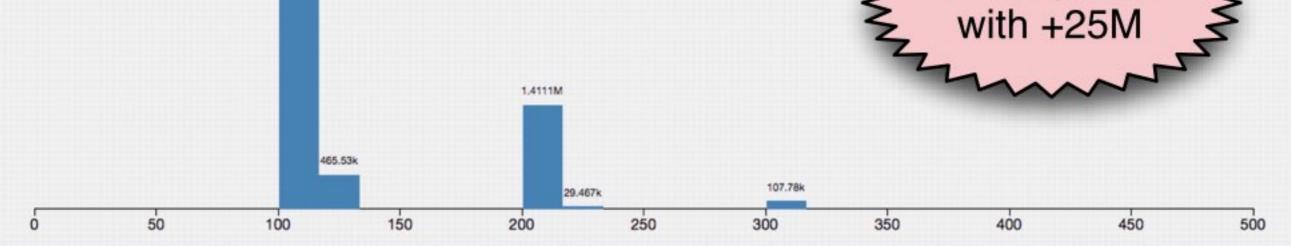

#### Data filtering and

- A way to express your interest
  - Parameter annotation
  - Score generation

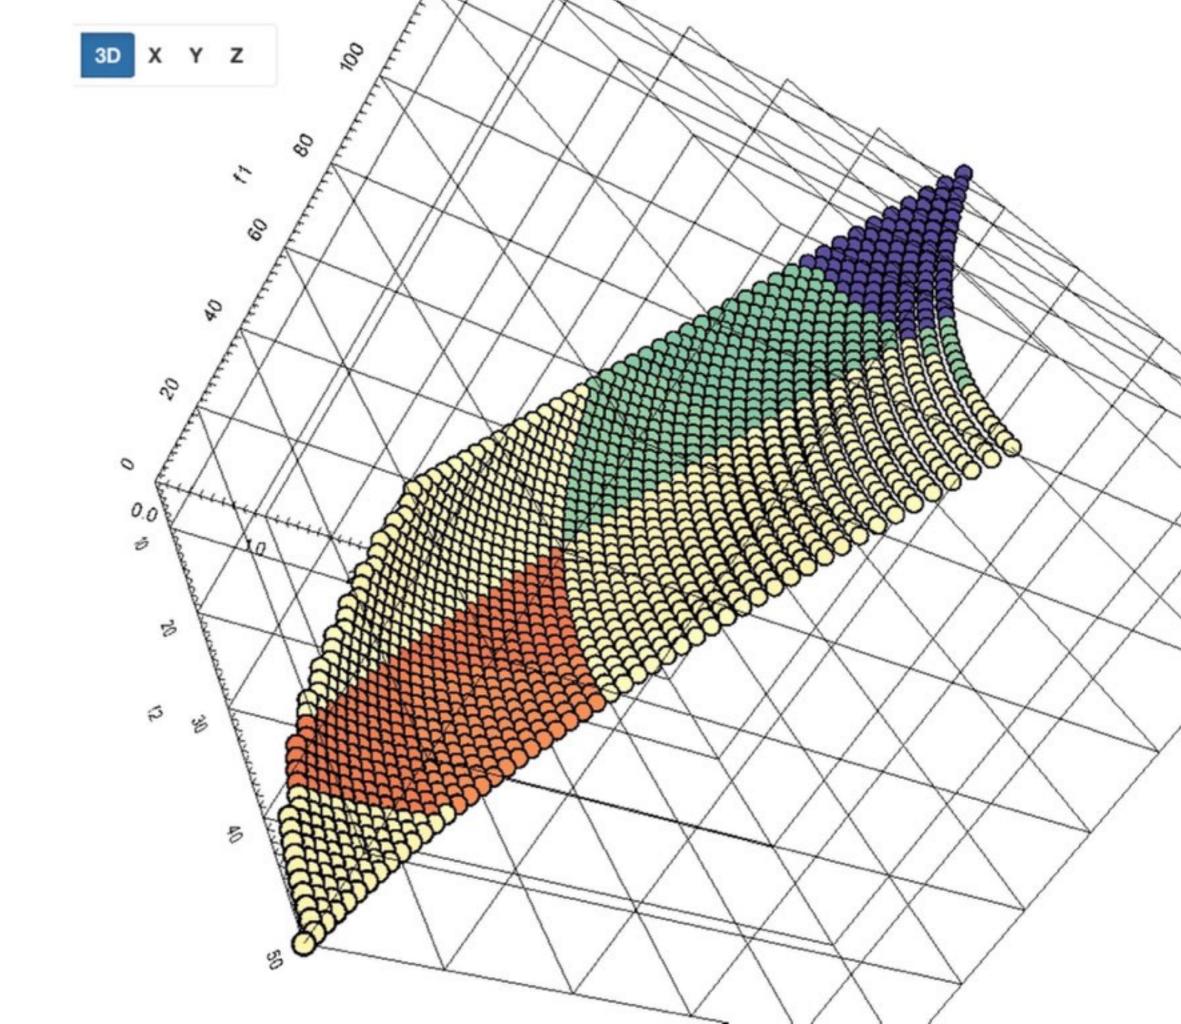

#### Data filtering and extraction • Score distribution

# Region tagging

#### Data extraction

- Reached manageable data size
  - Other tools and visualizations
  - Fine grained data analysis
  - Further drill down
- Other tools

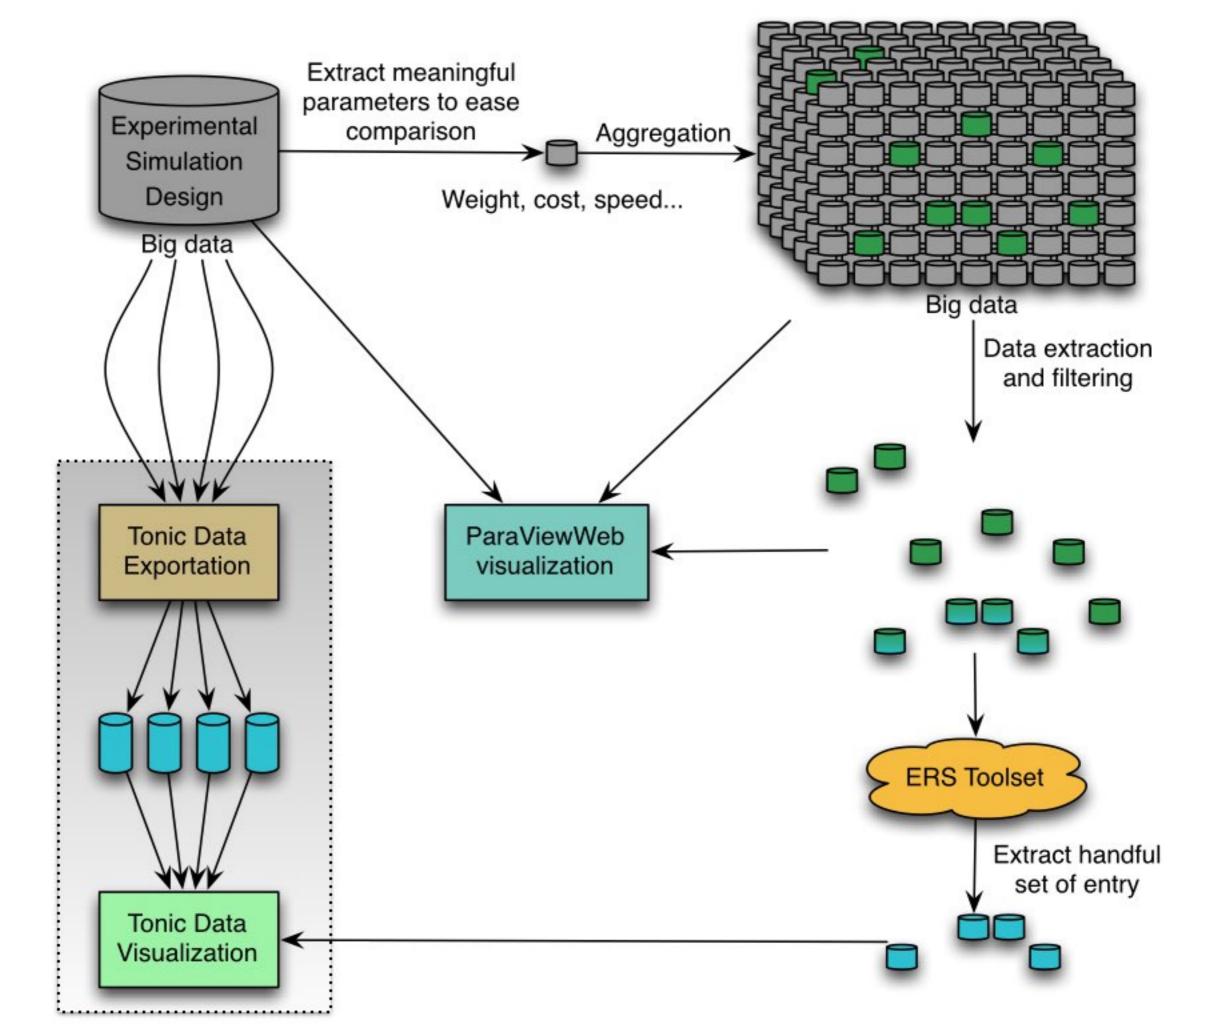

#### Reach a set of solutions

#### Interested to look back?

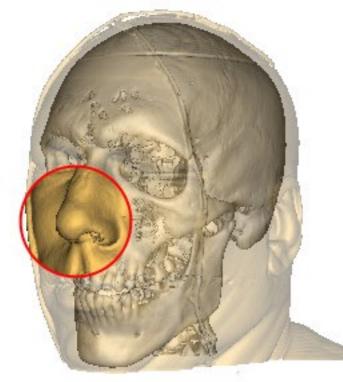

#### Looking at the original data

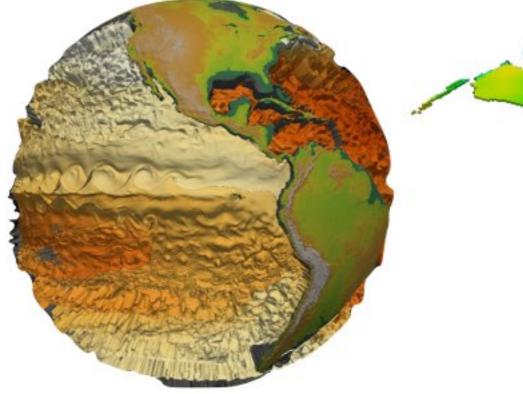

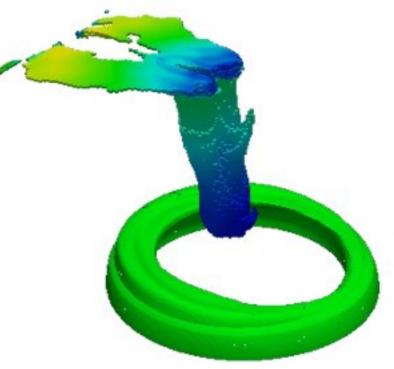

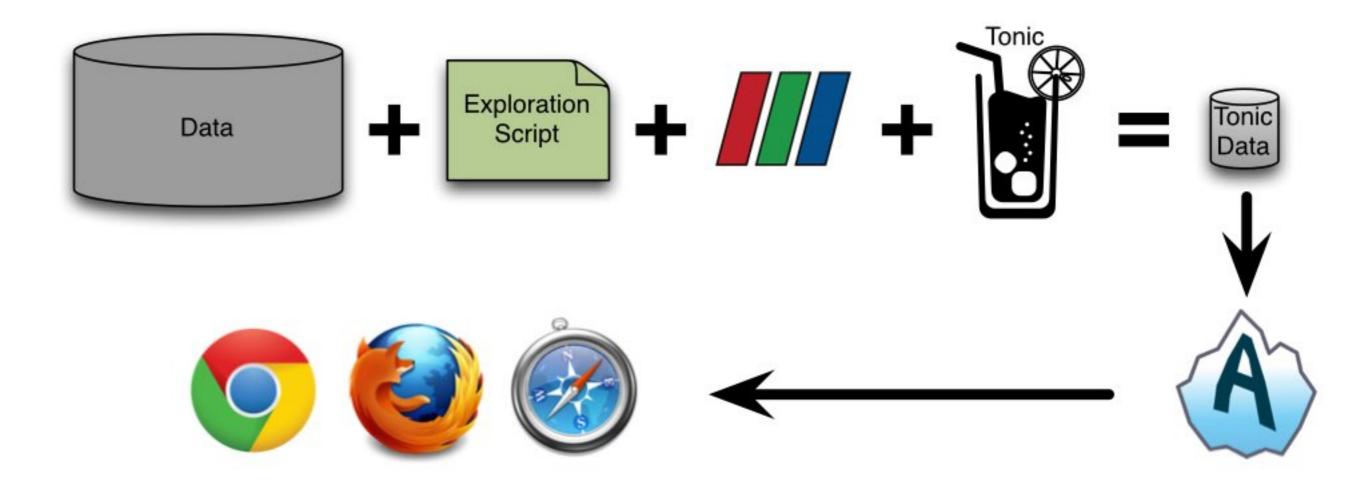

- Tool for reducing original data size to produce interactive 3D visualization
- Extract rendering information for deferred Web rendering (composition, coloring, alpha blending…)
- Visualization designed for the web

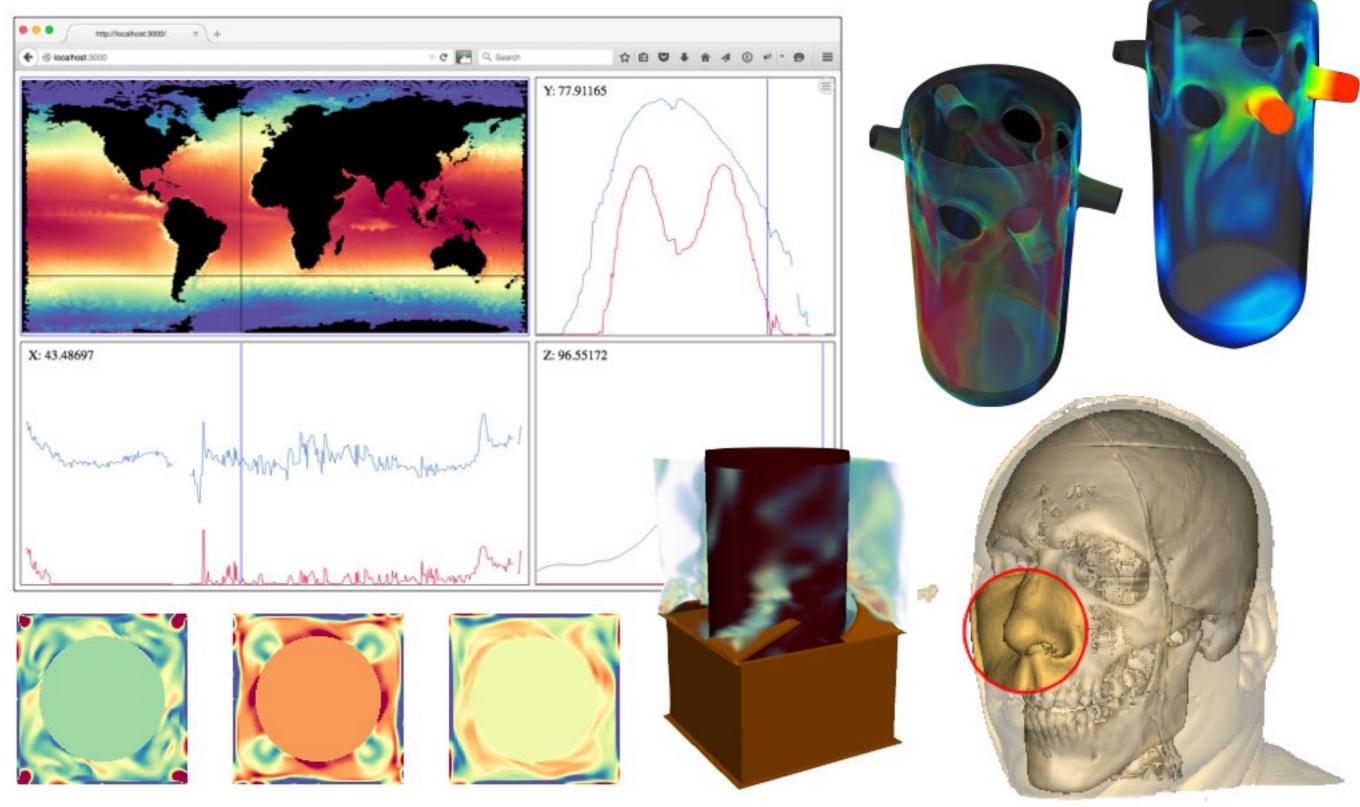

#### Conclusion

- ERS Large Data Visualization and Analysis system
  - Enabling Big Data (+ 25M) for driving data analysis and visualization
- ParaViewWeb a good fit for big data
  - Framework for data processing and visualization
- Tonic & ArcticViewer
  - Another approach for interactive web visualization
