

SPECIAL OPERATIONS FORCES INDUSTRY CONFERENCE

Mr. David Breede
Program Executive Officer

**SPECIAL RECONNAISSANCE,
SURVEILLANCE, AND
EXPLOITATION**

SPECIAL RECONNAISSANCE, SURVEILLANCE, AND EXPLOITATION

Program Executive Office Special Reconnaissance, Surveillance, and Exploitation

SOF PRIORITIES

Ensure SOF Readiness

Right People / Skills / Capabilities

Help Our Nation Win

*Provide a Diverse Portfolio of Capabilities
Sustainment Focused on Readiness*

Continue To Build Relationships

*Components; Industry; International; & Intelligence Community
You Can't Surge Trust*

Prepare For The Future

*Accept & Adapt to Rapidly Evolving Future
Develop Concepts That Challenge Our Organizational Construct*

Preserve Our Force and Families

Take Care of Our People

Program Executive Office Special Reconnaissance, Surveillance, and Exploitation

PEO SRSE MISSION

Be the recognized and trusted experts for the acquisition of state of the art technical collection and exploitation capabilities for advanced surveillance, reconnaissance, and intelligence systems for the Special Operations Warfighter.

- **Agile Acquisition – Rapid Fielding & In-Theater Support**
 - Quick Reaction Capability
 - Rapid Prototyping
- **Extensive Network of Partners to Assist & Advise**
 - Intelligence Community
 - Service Labs / PEOs
 - Department of Energy

Program Executive Office Special Reconnaissance, Surveillance, and Exploitation

TECHNICAL COLLECTION SYSTEMS

Hostile Forces – Tagging, Tracking, and Locating (HF-TTL)

Program Executive Office Special Reconnaissance, Surveillance, and Exploitation

PEO SRSE

Intelligence Preparation of the (Acquisition) Battlefield

Define The Environment

- Iraq/Afghanistan to Global Outlook
- Unpredictable Stability
- Uncertain / Evolving Budget

Opportunities

- More Contact with Partner Nations
- Leverage Components; Government Labs;
- Industry

Future Missions

- Support to Foreign / Irregular Forces
- Tailor Portfolio Capabilities for Blue / Green / 'Other'
- Equip & Train Forces
- Transnational Organized Crime

SPECIAL OPERATIONS FORCES INDUSTRY CONFERENCE

Program Manager RAPID CAPABILITY INSERTION

SPECIAL RECONNAISSANCE, SURVEILLANCE, AND EXPLOITATION

Program Manager Rapid Capability Insertion

RCI Portfolio

- 72 Active Projects
- Portfolio Supports SRSE PoRs
- Tactical Exploitation of National Capabilities (TENCAP) Projects

Key Events

- Two Annual Program Management Reviews
- Annual Gap Analysis / Broad Agency Announcement
- Trident Spectre Exercise

Near 50% Reduction in Size and Power Consumption on TTL Device(s)

Program Manager

Rapid Capability Insertion

Development Effort:

- Rapid Prototype TTL Capabilities And Reconnaissance Devices Through Applied R&D
- Improve Sensor SWAP-C For Use On Group 2 And 3 UAS
- Serve As Command's TENCAP Office And Leverage Existing And Future Space-Related Technologies

ACQUISITION STRATEGY

- Rapid Prototyping, Technology Demonstrations, Combat Evaluations

PERIOD OF PERFORMANCE

- Project Dependent: Focused on 12-18 Month Project Development Cycle

MILESTONES

- Project Dependent

POINT OF CONTACT

- Technology & Industry Liaison Office
- TILO@SOCOM.mil
- 813-826-9482

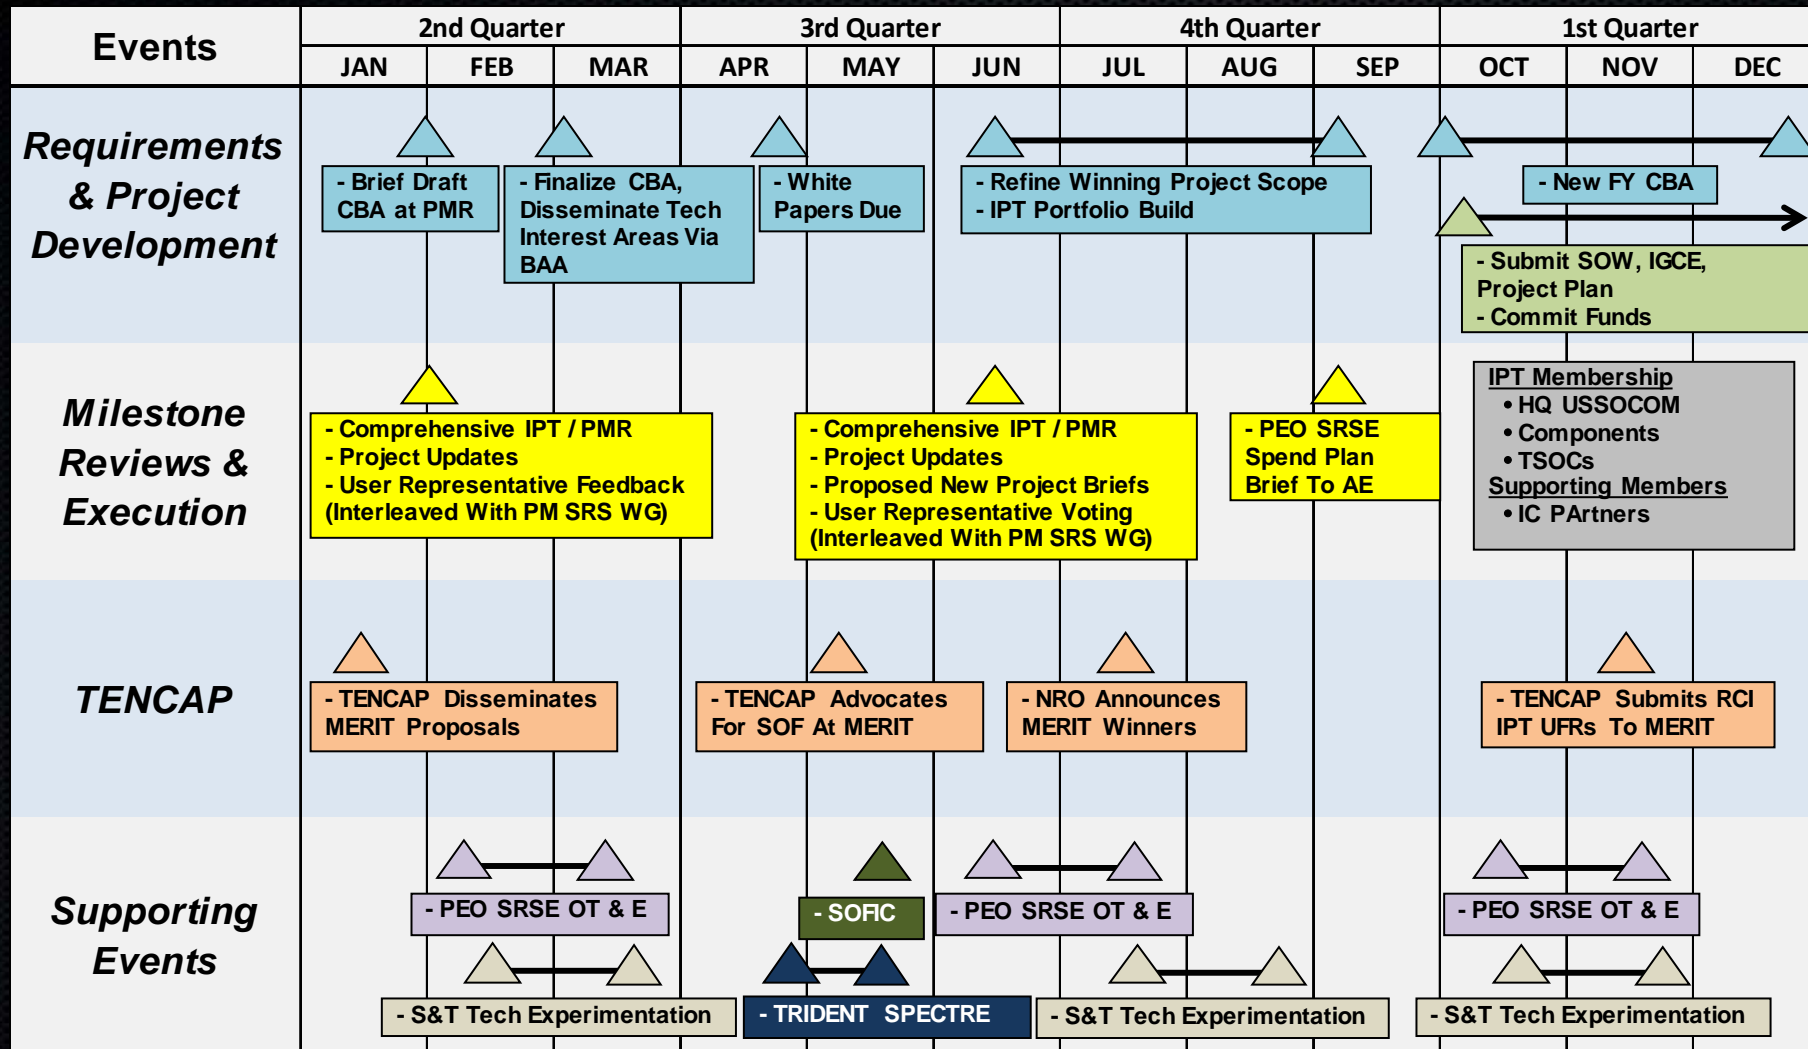

FUNDING

APPROP	FY17	FY18
• O&M	\$ 0.0M	\$ 0.0M
• PROC	\$ 0.0M	\$ 0.0M
• RDT&E	\$ 33.6M	\$ 35.2M

CURRENT CONTRACT/OEM

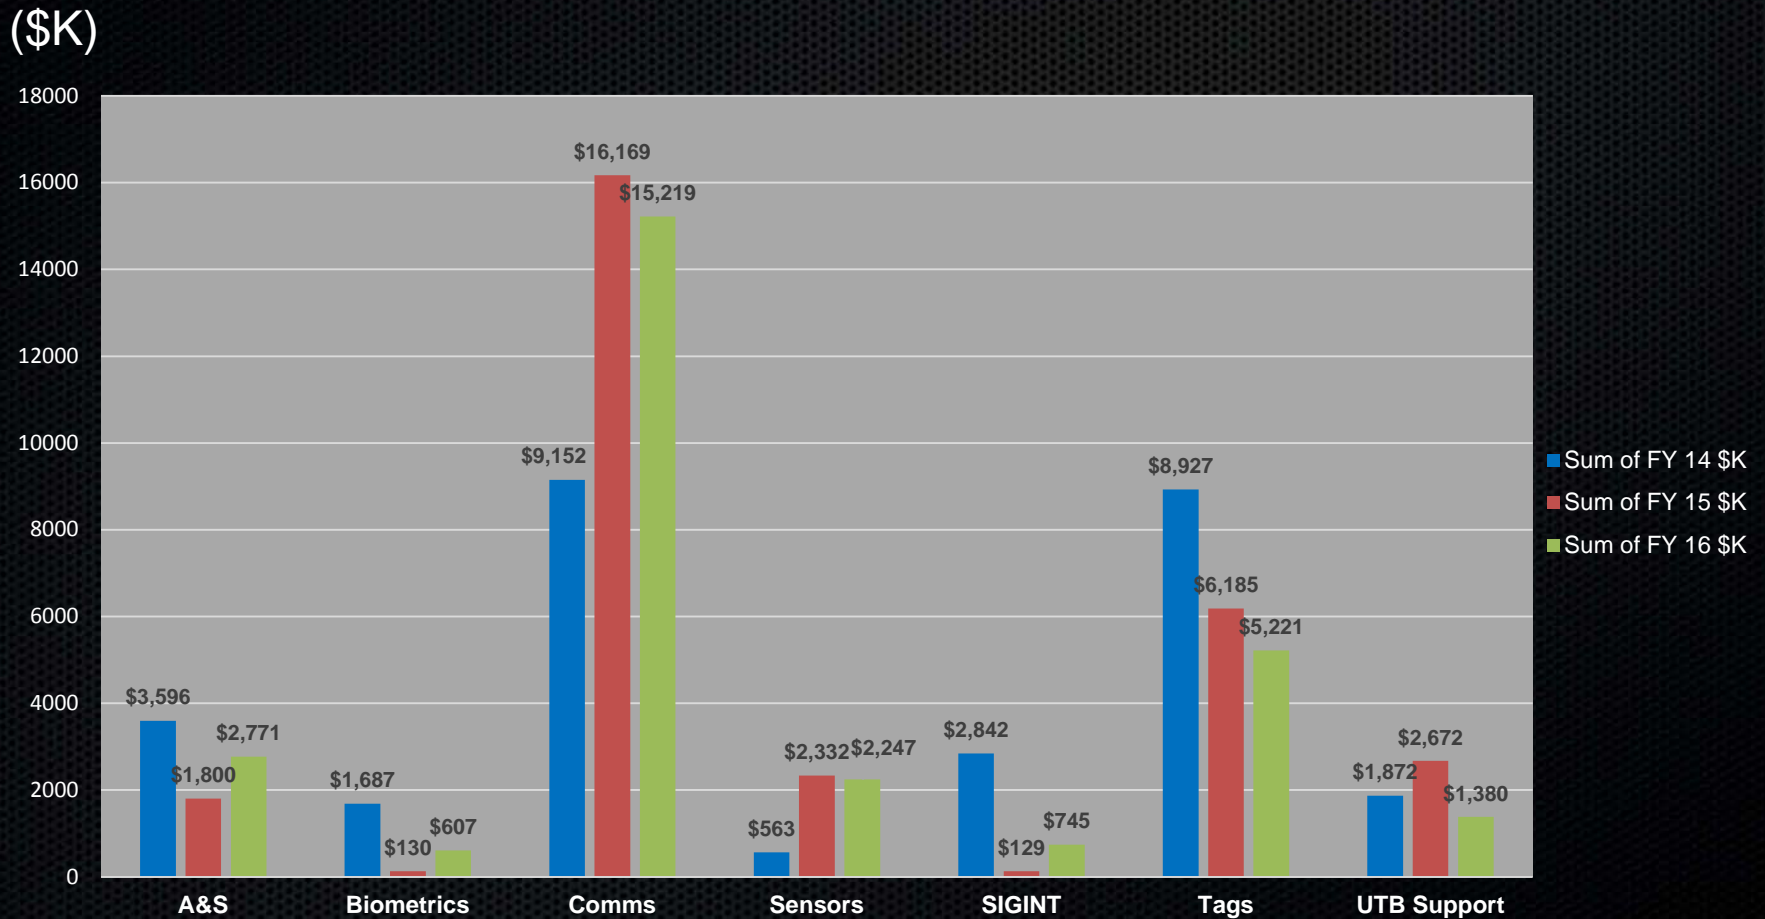

- Project Dependent

Program Manager Rapid Capability Insertion

Program Manager Rapid Capability Insertion

FY14 - FY16 Investments

Program Manager Rapid Capability Insertion

Capability Insertion Opportunities

- **SRSE Program of Record Priorities**
- **Strike balance w/ Leap-Ahead Tech vs. Rapid Incremental Steps**
- **Novel Combinations of Existing Technologies**
- **Modular / Multi-Use Components**
- **Size, Weight and Power Reductions**
- **Interoperability With Legacy Systems**

Program Manager Rapid Capability Insertion

Why Should You Care?

- RCI Enables Tech Entry Point Into SRSE Programs of Record
- Annually Refreshing Capability Gaps
- Low Barrier To Entry: Broad Agency Announcement
- RCI Partners with Numerous Other Departments and Agencies
- Typical Year: 20-30 Contract Awards, Roughly Half Small Businesses

Tips for a Successful BAA Proposal

- Propose A Phased Development
- ~12-18 Months Start to Finish
- ~\$1M Effort
- BAA located on FBO.GOV: Search for “USSOCOM-BAAST”
 - SRSE requirements are located in Appendix G-1

Program Manager Technical Collection and Communications

Capability Insertion Opportunities

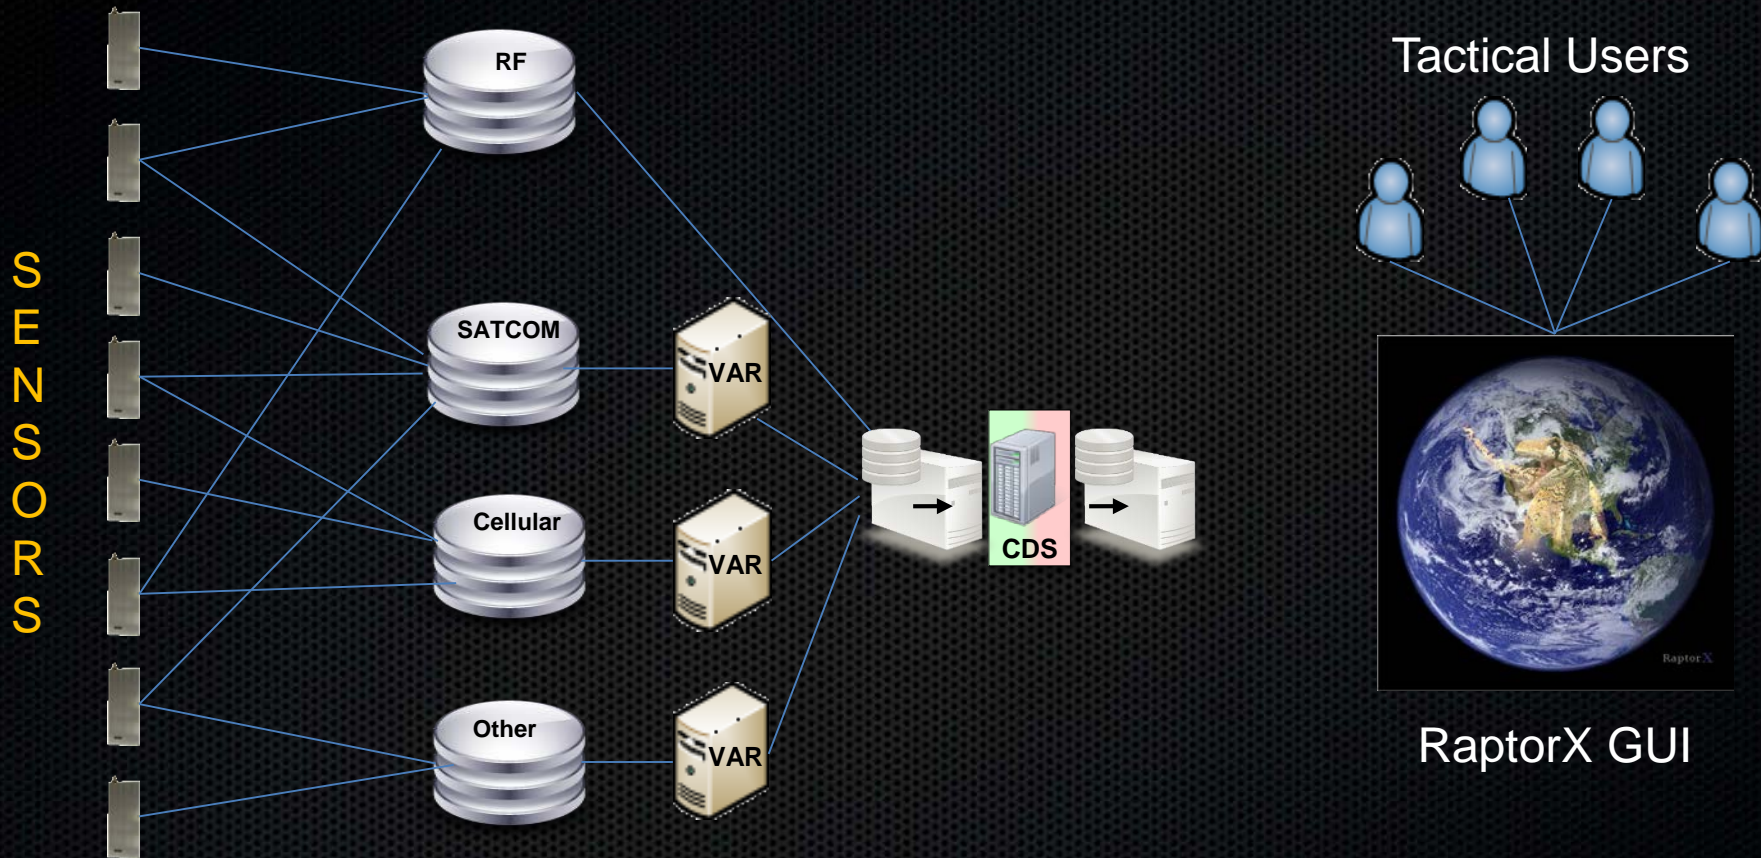

- **Size, Weight and Power Reductions**
- **Balancing Tailoring with Configuration Management**
- **Interoperability with Legacy Systems**
- **Modular / Multi-Use Components**
- **Technology Refresh in Fluid Environment**
- **Data Transfer Capabilities**
- **Image and Video Compression Techniques**

Program Manager Technical Collection and Communications

Capability Insertion Opportunities (cont.)

- **Tagging, Tracking, and Locating (TTL) Technologies that can be used on Persons and Objects**
- **Items Critical to Mission Success but often not Part of the Initial Design**
- **Affordable TVS/RSTA Capabilities for UGS / Surveillance Systems**
- **BFT Technology that is M-Code Compliant**
- **Miniaturized Data Transport Segments for Long Distance Transfers**

KeyMaker TTL and UGS Data Dissemination

- Provides a system for standardized, consolidated, command and control of technical collection tools
- Allows data to be shared for wide distribution in support of operational requirements while ensuring control of the distribution always remains with the sensor/tags owner

- **Rapid Detection, Location and ID Of Forensic Evidence**
- **Stand-off/Remote Facial Recognition And Iris Capture**
- **Dustless Latent Print Collection**
- **Triage**

Sensitive Site Exploitation

General Considerations

- **Average User - Proficient in Mobile Electronics (24 to 35 years old)**
- **SWAP-C**
- **Software**
 - Non-Proprietary
 - Windows 10 Preferred
 - Compliant w/ Intelligence Community Databases
- **Ruggedized (*MIL STD 810-G*)**
- **Reduce User Workload**
- **Training Accomplished in One Eight Hour Session**
- **Limited Time on Objective**
- **Logistics**
 - Shipping and Storage
 - DOT Compliant (Lithium Ion Batteries, etc...)
 - Shelf Life

Events

- **Business Process:**

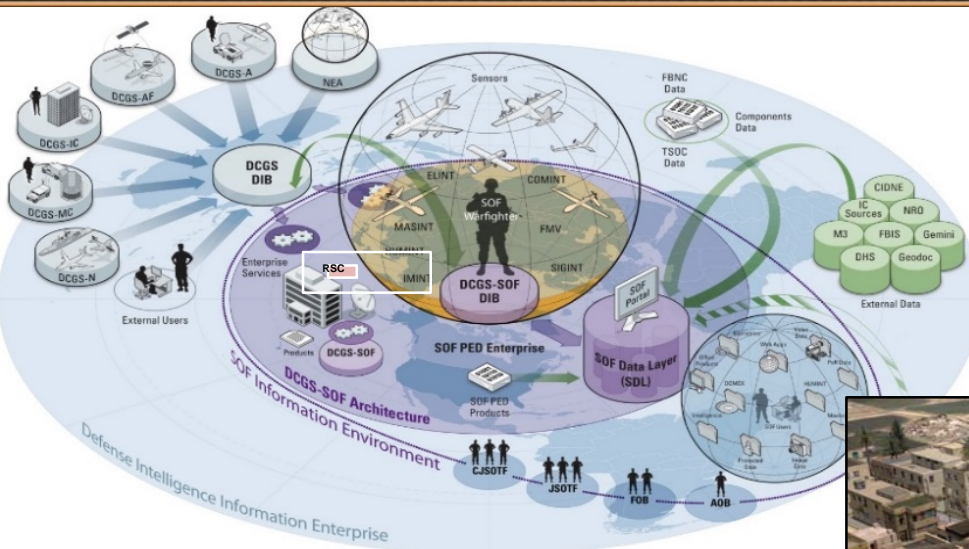

Upcoming Events:

- **Capability Collaboration Engagement – September 26, 2017**
- **Tactical Biometric Event (TBE) – March 2018**
 - RFI TBE 18 – June 2017
 - TILO for TBE 18 – September 2017
- **Technical Experiment – Tentative March 2018**

CURRENT CONTRACT/OEM

- Multiple: HW, SW, IT, Technical Management Support
- Foreign Comparative Test (FCT)
- SBIR, Rapid Innovation Fund

Integrated Survey Program (ISP)

UNCLASSIFIED

Description:

- CJCS CONPLAN support to Tier Units and Theater Special Operations Commands
- Conducts technical surveys to provide detailed tactical planning data for contingency planning and crisis response
- Surveys US Facilities abroad, Ports & Harbors, and Commercial Vessels

Operational Mission:

- Disconnected Survey Collection
- Dissemination to Garrison and Deployed SOF Users as well as DoD / IC and Interagency
- Data Sharing with Coalition Partners

Milestones:

- GO ISP mobile application for disconnected operations and distributed data management
- Ongoing test and evaluation of mobile devices to speed collection: objective +/- 1% accuracy
- Enterprise GIS data services

SOF Planning, Rehearsal & Execution Preparation (SOFPREP)

Description:

- Produces Enhanced GEOINT (maps, imagery, and terrain data) and 3D Scene Visualization Databases
- Manages SOCOM's most comprehensive repository of SOF-common Geospatial Data
- Databases support Component Simulators, JTAC Rehearsal Systems, Mission Planning, Virtual Battlespace, and 3D Globes

Operational Mission:

- Garrison system for Geospatial-Intelligence Data Processing, Exploitation and Dissemination
- Operational Intelligence support for Mission Rehearsal and Planning

Milestones:

- Evolutionary Technology Insertions

DCGS SOF Enterprise/All Source Information Fusion

Description:

- The Enterprise provides infrastructure and processing capability to allow for worldwide SOF intelligence information sharing
- All Source Information Fusion will provide the intelligence analytical tools via a global and disconnected architecture

Operational Mission:

- Part of a family of systems providing Intelligence, Surveillance, and Reconnaissance (ISR) Processing, Exploitation, and Dissemination (PED) and analytical capabilities at the Joint Task Force level and below
- Interconnect the warfighter and sensors to find and fix High Value Targets of interest
- Provide a network-enabled interoperable construct allowing continual unimpeded sharing of intelligence data, information and services

Milestones:

- User evaluation of All-Source Analytical Environment capability
- Completed User Guide & instructor led new equipment training
- Successful interoperability testing ant Unified Vision 16 & Enterprise Challenge 16

Full Motion Video Processing, Exploitation & Dissemination

Description:

- Provides PED capabilities in garrison and deployed tactical environments of manned and unmanned sensors

Operational Mission:

- Intelligence processing of collected data from various manned and unmanned ISR platforms & sensors
- Near-real-time find-fix-finish-exploit-analyze (F3EA) intelligence operations on a 24/7/365 basis at all levels of warfare (Strategic, Operational, Tactical)

Milestones:

- Full Rate Production Decision, Sept 2012
- Completed CERP of Intelligence Formal Training Unit facility
- Delivered hardware to support 11th SOIS increase in mission capacity
- Completed site survey for communications & systems requirements CERP

Silent Dagger Processing, Exploitation & Dissemination

Description:

- Provides Signals Intelligence (SIGINT) exploitation capability in both garrison and deployable environments
- Silent Dagger has fielded 231 garrison workstations and 101 deployable nodes

Operational Mission:

- Provides SOF SIGINT elements a robust, organic, scalable capability for garrison and tactical SIGINT Processing, Exploitation and Dissemination
- Interconnect the warfighter and sensors to find and fix High Value Targets of interest

Milestones:

- Milestone C, Feb 2011
- Program Parameter Change Dec 2014
- Fielded Garrison workstations for SOCKOR and 2 Deployable kits for AVSPECWARCOM
- Completed partial CERP of component hardware

Joint Threat Warning System (JTWS)

Mission:

Synchronize acquisition of signals intelligence across the ground, air and maritime domains. Develop and field interoperable, networked sensors based upon open hardware and software architectures to enable the common operating picture and feed data into all-source analysis tools.

JTWS Sub-programs:

- Air
- Ground
- Maritime
- Precision Geo-Location (PGL)

Priorities:

- Be positioned to rapidly respond to dynamic mission requirements and threat picture
- Technical Insertion Of Emerging / Maturing Technologies
- Modular and Scalable Cross-Domain Solutions

ACQUISITION STRATEGY

- Incremental Procurement of COTS/GOTS/NDI with Technical Insertions and Planned Program Improvements

PERIOD OF PERFORMANCE

- Annually Fields Initial Variants, Capital Equipment Replacement, and Technology Insertions in support of SOCOM Components

MILESTONES

- Fielding: Annually
- User Testing: Prior to Fielding
- New Equipment Trng: Continuous
- Fielding/Deployment: Continuous

JTWS Air 2 System

Description:

- JTWS-Air 2 is the Second Increment of Upgraded Capability for the Air Sub-program
- Enhanced Situational Awareness & Tactical SIGINT Collection Capability

Operational Mission:

- Detect & Collect Simple and Complex Signals of Interest (SOI)
- Incorporates New Threat SOI, Tactical / Enterprise Net-centric Operations, Reach Back & Increased DF accuracy
- Provide Intelligence Broadcast Data & Collaborative Tactical Networking Tools
- Precision Geo-location

Milestones:

- Flight Testing: AC-U / AC-W / MC-H (with ETI #1) – Complete
MC-J Basic – Complete
- F&DR (MC-J Basic): Complete

JTWS Air Nite System

Description:

- Scalable Situational Awareness & Threat Warning for Space Limited Aircraft
- Platform Agnostic
 - Carry-on/Carry-off
 - Power Flexible
 - Multi-Box Design
 - Expandable: Ethernet, RF, and Power for additional Components / Sub-systems

Operational Mission:

- Detect and Collect Narrow-band SOI
- Integrate Companion Sub-systems for Complex Signals of Interest and DF
- Map Display & Mature Software Interface
- Small Footprint / Low SWaP

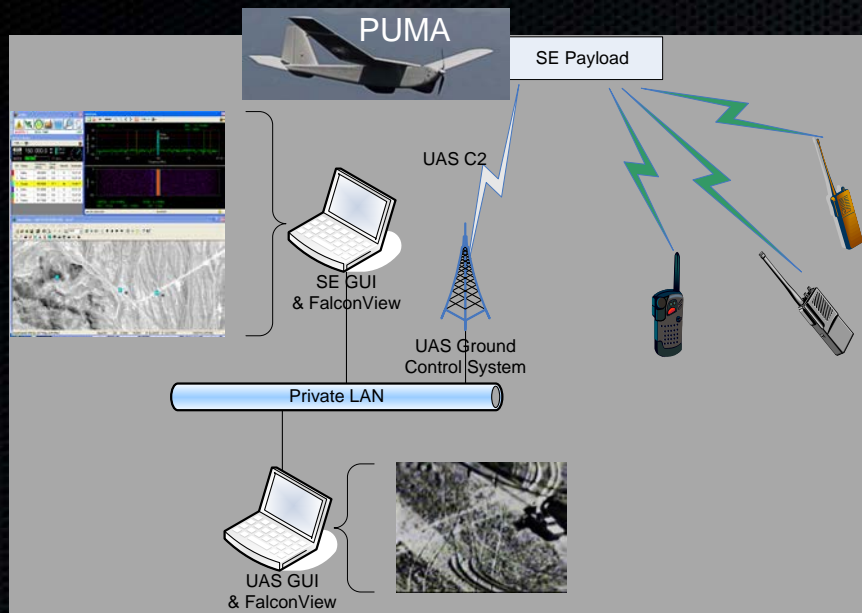

Milestones:

- Airborne Demonstration and Evaluation: MAR 2016
- MIL-STD 810 Tested: JUN 2016
- CV-22 Integration w/ Direction Finding: 4QFY17

JTWS Air UAS

5/24/2017

UNCLASSIFIED

Description:

- The Silent Echo payload is an ongoing developmental effort for JTWS AIR UAS
- Development began in 2009 leveraging advanced SIGINT technologies and capabilities
- Primarily onboard Puma UAS platform

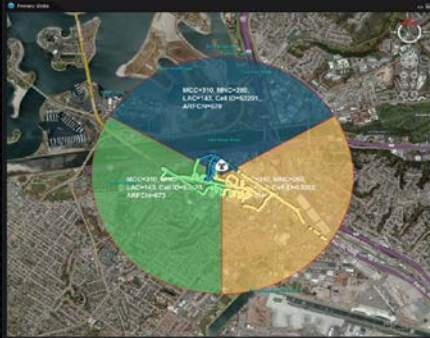

Operational Mission:

- Perform SIGINT operations
- Maintain UAS core payloads

Milestones:

- Silent Echo 10.4 Completed Test – July 2016
- Silent Echo 10.6 Final Testing – April 2017

JTWS Ground SIGINT Kit Body Worn System

Description:

The current Body Worn solution is the Cutlass

• Characteristics:

- VHF/UHF Direction Finding
- Relatively Low Size, Weight, and Power

Operational Mission:

- The Body Worn system provides Threat Warning, Force Protection, and a Situational Awareness toolbox consisting of SIGINT capabilities which are man-packable

Milestones:

- RFI to be sent out Q3FY17 for replacement kit

JTWS Ground SIGINT Kit Static System

UNCLASSIFIED

Description:

STATIC-2

- All the capability, half the size and cost
- Planned Fielding 4QFY17
- Satellite Communications Suite
- Silent Dagger Compatible
- 2 cases @ 150lbs each & DTECH

Operational Mission:

- Simple/Complex Signal Survey & Other Missions
- Tactical Storage / Wideband Record / Playback

Milestones:

- DT and OT planned for summer 2017
- Smaller 'Static-Lite' variant for future development/delivery

JTWS Ground SIGINT Kit Mobile System

Description:

Mobile

- HF/VHF/UHF DF Receiver
- Total sensor weight < 50 lb
- Total sensor power < 150 W

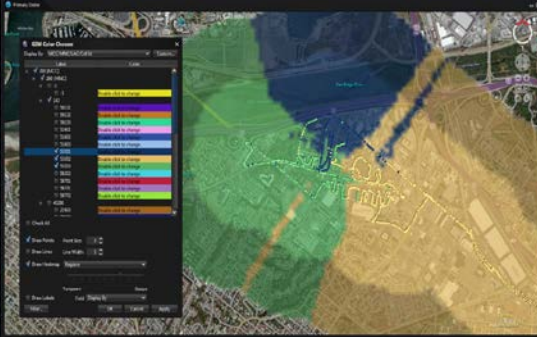

Operational Mission:

- Simple/Complex Signal Survey & Other Missions
- Provides Threat Warning, Force Protection, and Situational Awareness
- Mounts in vehicles

Milestones:

- RCI funded contract for Mobile system development
- Early development test FY16/17

JTWS Maritime System

Description:

- Maritime System will be Carry-on/Carry-Off SIGINT Capabilities for Standard and Non-standard Platforms While Maintaining Low SWaP
- Testing to validate newly developed solution

Operational Mission:

- Configurable, Ruggedized, Low-profile Capabilities Performing Simultaneous Survey, Detection, DF, Processing of Intelligence Information, and Other Missions
- Support Find, Fix, and Finish Operations

Milestones:

- Kraken and Corsair Selected for DT and OT
- Scheduled Fielding End of CY 2017

JTWS Precision Geo-location System

Description:

- Ruggedized and Handheld Devices Capable of Processing Frequency Measurements
- Self-configurable and Supports Numerous Protocols
- Stand-Alone Mode for Collecting Signal Measurements & Geographical Coordinates

Operational Mission:

- Geo-locate Signals of Interest (SOI) for Vehicle, Man-packable and Aerial Components
- Survey, Location Identification, DF, and other missions

Milestones:

- Executed \$42.6M in PROC for CERP investments in FY16-FY17
- Obtained two F&DRs for six sensors
- Trained 30 Cryptologic Operators in FY16
- DT/OT completed on 22 sensors
