

USSOCOM

Agile Acquisition and SOFWERX Initiatives

Mr. Anthony Davis

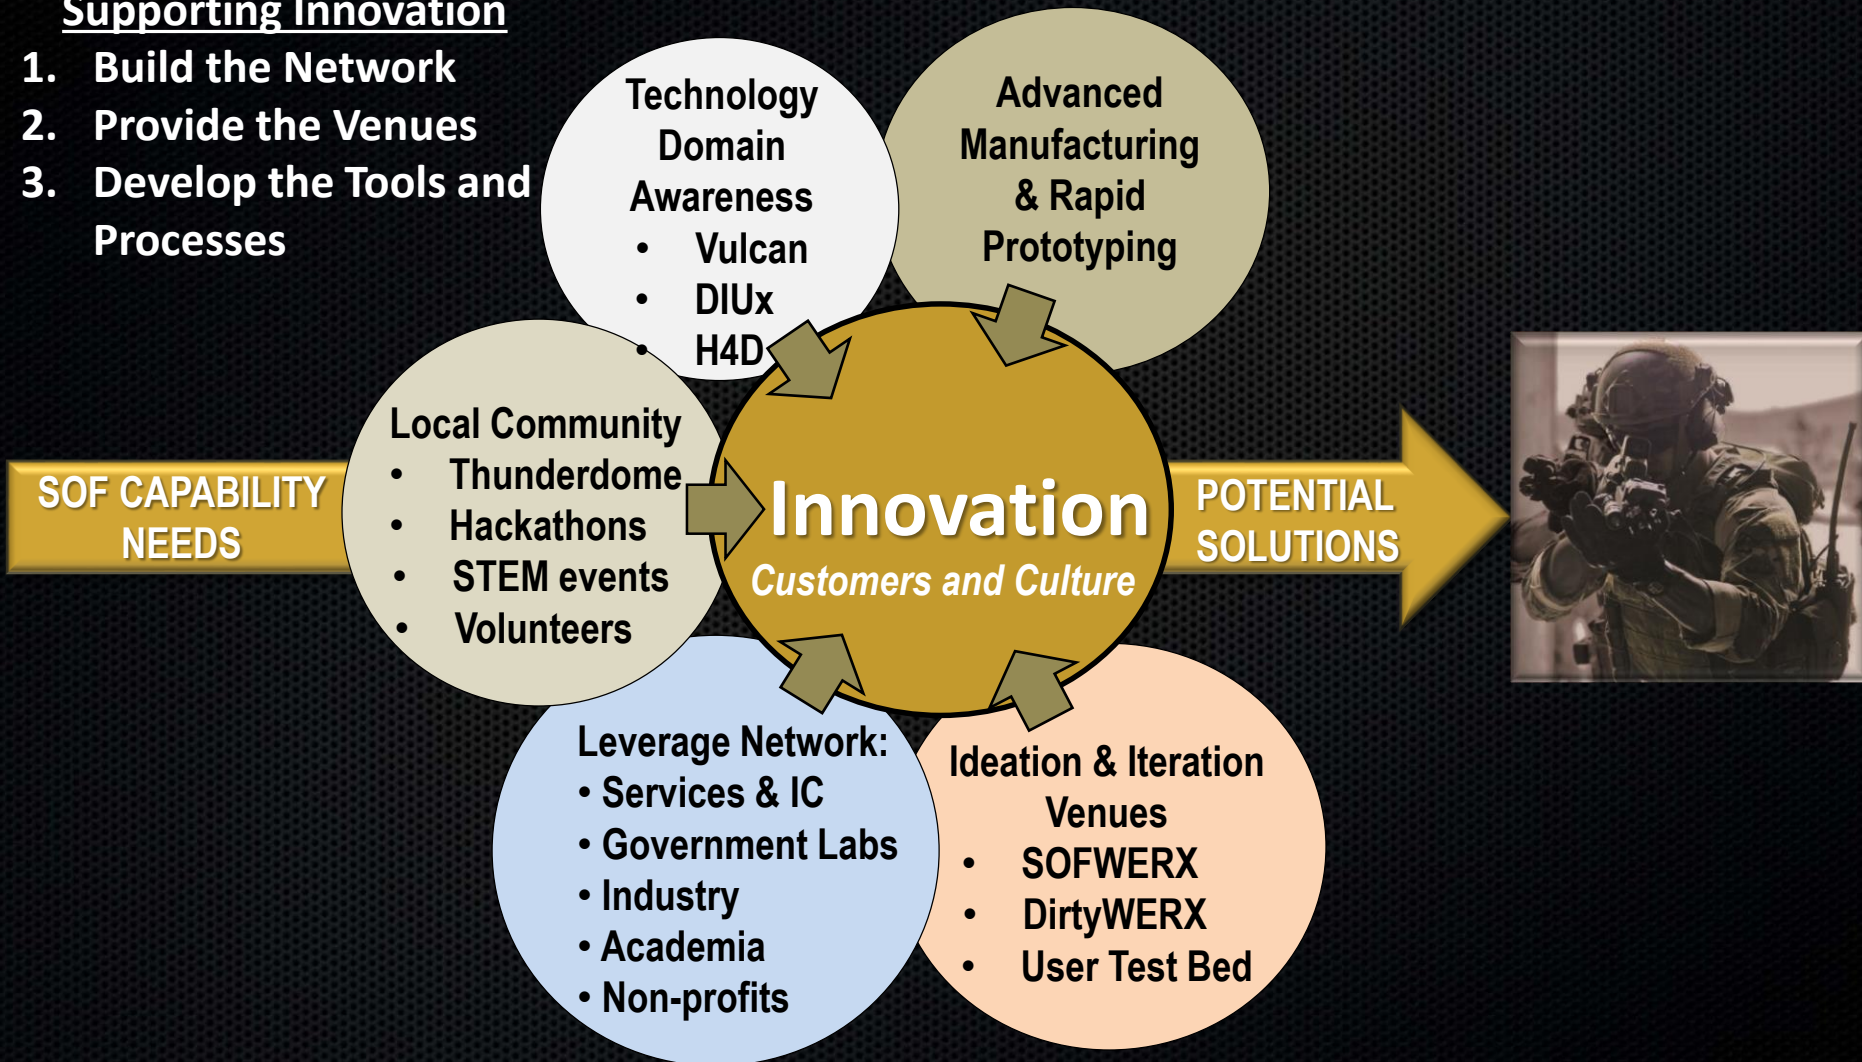

Director, Acquisition Agility

Acquisition Agility Ecosystem

Supporting Innovation

1. Build the Network
2. Provide the Venues
3. Develop the Tools and Processes

Innovation Thrives in a Marketplace

SOFWERX

Network Engagement

Mini Robotics

CO-INVENTION

OpenWERX Challenges

EDUCATION WITH AT&L

TECHNOLOGY AWARENESS

HACKATHONS

Growing the next GENERATION

Capability Collaboration Events

RAPID Prototyping

Creative Staffing Model

DoD Interns: Recruit promising talent and develop with challenging roles and experience

Industry Fellowships: Leverage industry expertise, and share development opportunities

University Interns: Quickly bring in skilled workforce and expose to DoD culture and challenges

Apps for next Industry Fellow class due by Feb 21, 2017
<http://www.sofwerx.org/ussocom-industry-fellowship/>

Rapid Agile Prototyping Series (RAPS)

Control / Carriage of Precision Weapon

MedRZR Improved Litter Carrying Capability

SAASM GPS PUCK Receiver Kit

Cubesat Payload Prototyping Lab

Replacement of the Forward Area Manifold (FAM) Cart

Extending SOF's Small Arms Capability

1208 Mission Set Review and Refresh

Single Man Flying Machines

OpenWERX Prize Challenges

Current Challenge:

FogBreaker: Boat Pilot Augmented Reality

(<http://www.sofwerx.org/openwerx-boat-pilot-ar-challenge/>)

Boat Bow Bumper
Maritime Applied Physics Corp

DJI Phantom Exploits
Dunning-Kruger Experience

Biomimic Underwater Robot
Tampa Deep-Sea X-plorers

Monthly prize challenges

- First Thursday of each month
- \$3000/\$2000/\$1000 cash prizes
- <http://www.sofwerx.org/openwerx/>

Advanced Manufacturing (AM)

Objective: Empowered units & individuals solving problems & implementing solutions at the point of need

Additive Manufacturing & 3D Printing Design Training at Unit Sites

Advanced Manufacturing & Innovative Design

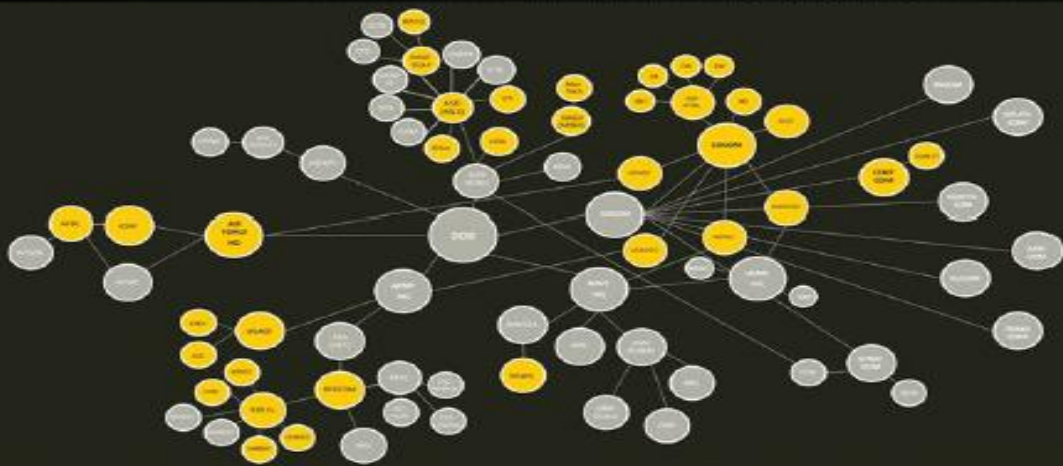

Enabling Production/Training through the SOF Advanced Manufacturing HQ Node

Vulcan--Technology Scouting Application

- Web-based capability to quickly capture a technology and upload to a secure, shared, searchable, central database
 - Makes everyone in command (+more than 20 partners) a SOF Tech Scout
 - Information is entered into “Scout Cards”
 - Social media-like technologies include trending, liking, and sharing technologies

Internal and External Vulcan Partners

- Government users can send technology developers one time tokens to log into Vulcan, enter technologies, provide updates, and respond to comments
- Government workflows support evaluation, assessment and scoring of submitted technologies, and sharing of results to individuals or teams across enterprise
- Each Scout Card has an associated timeline showing technology maturation across events each time it is interacted with (creation of scout card, government assessment, government evaluation, demonstration or experimentation, etc.)

Government Registration at <https://www.vulcan-sof.com>
