Air Force Engineering Enterprise Cross Cutting Strategic Direction

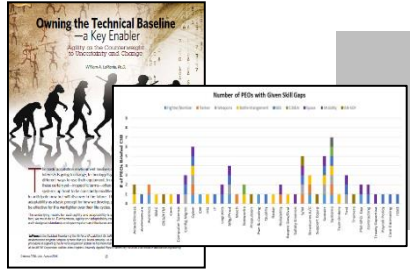

Key Leadership Focus Areas

Own Technical
Baseline

Open Systems

Modeling &
Simulation

Cyber

- Regain Gov't Control of Pgms
- Informed Decision Making
- Skill-gap Identify/Mitigate

- Industry Consensus Tech Solutions
- Open Key-Interfaces
- Service Oriented Architectures
- Common Messaging Language

- Joint Simulation Environment
- Inventory M&S + Develop Regmts
- Enable Experimentation/Prototyping

- Cyber Campaign Plan
- Cyber Workforce
- Risk Id & Management
- Process & Policy Dev

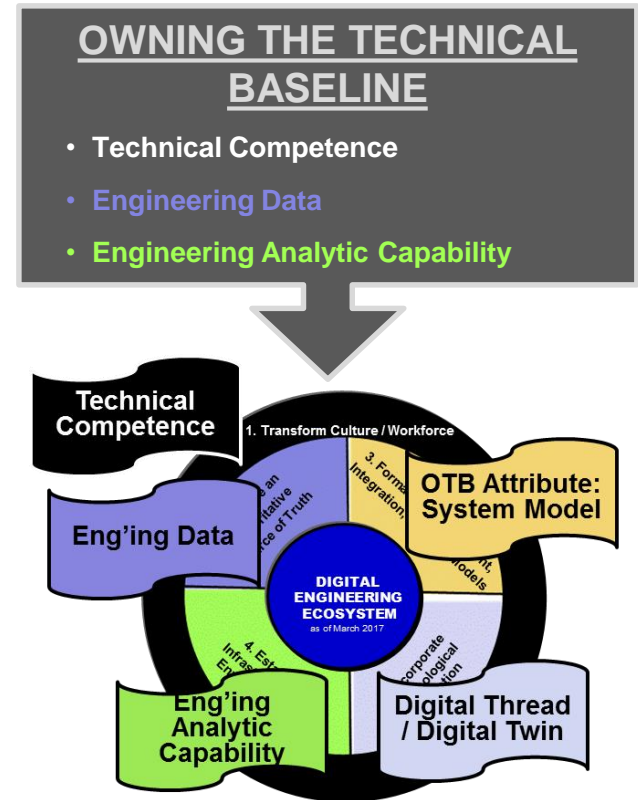

The AF EE Challenge Problem

Digital Engineering

- Given complexity, uncertainty and the lack of agility have diminished Air Force Acquisition's ability to meet mission needs
- How do we establish an all digital authoritative source of life cycle technical data for every weapon system
- In order to deliver more capability more rapidly than ever before

**Digital Engineering ≈
Owning the Technical Baseline DIGITALLY**

The End

Breaking Barriers ... Since 1947
