# DoD Budgets: Enacted and Projected

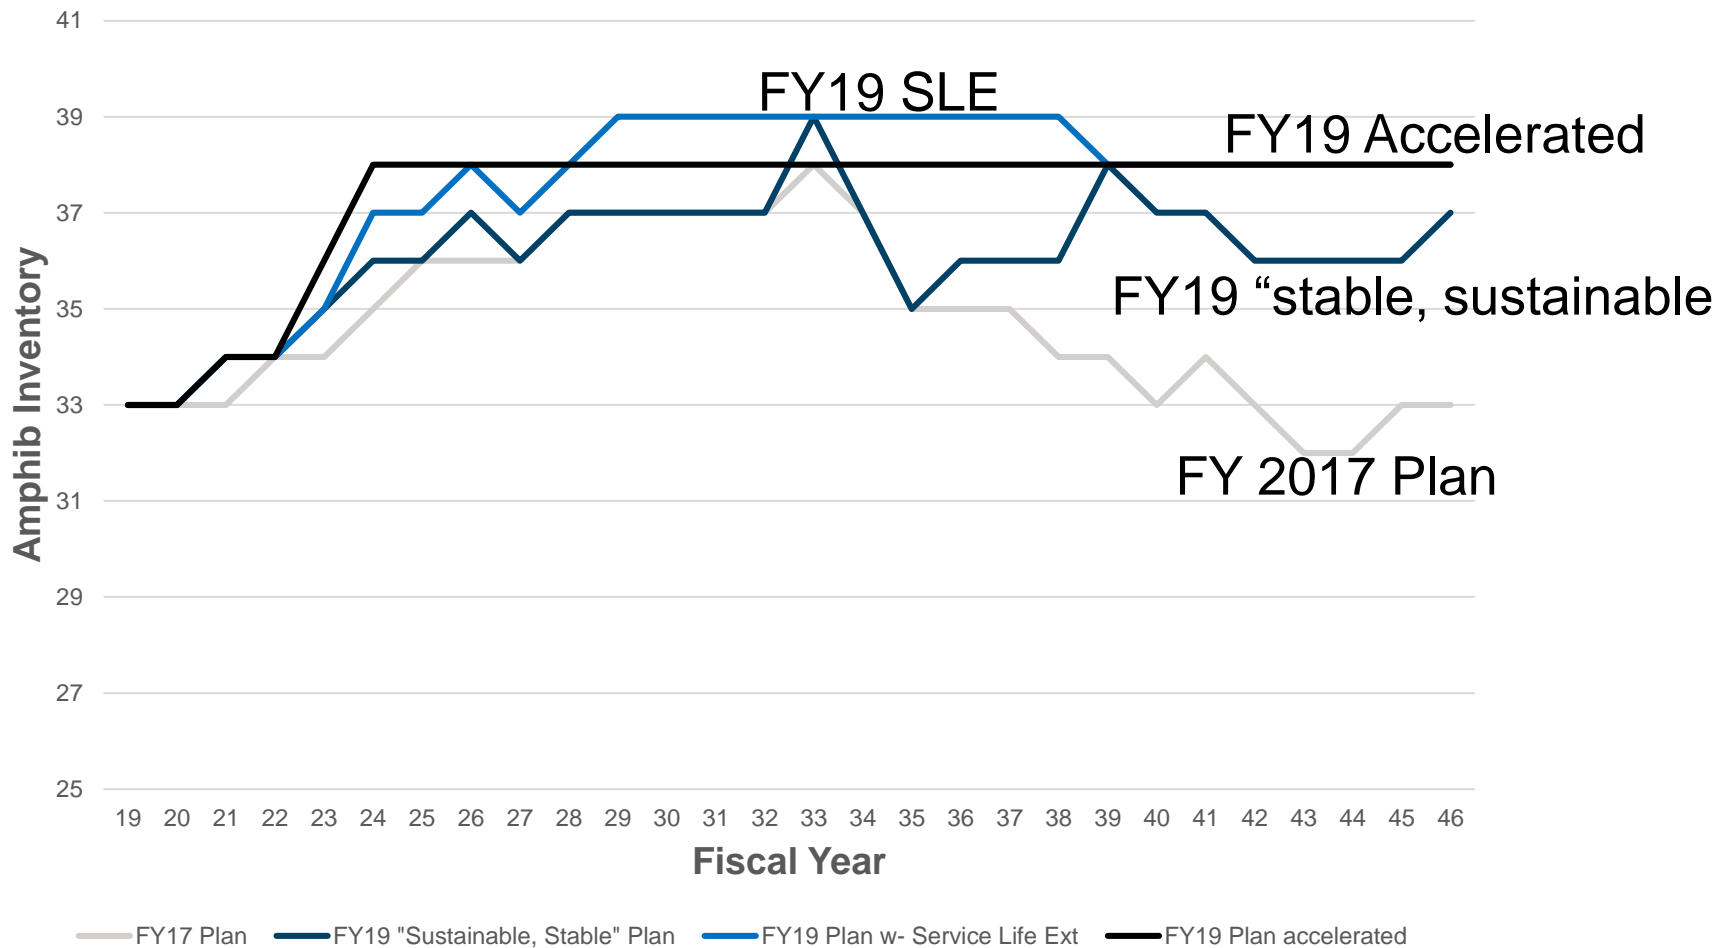

Flat in constant \$; "management reform" the solution

### Battle Force Ship Inventory: Four Construction Plans

## Amphib Inventory Under Four Long-Range Construction Plans

Peer (China, Russia) Conflict

---

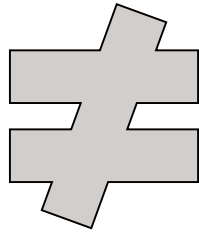

Dynamic Force Employment, to build a reserve of training, OPTEMPO, and maintenance

---

Unpredictable deployments

---

**Need survivability and lethality—high end ships only; limited deployments**

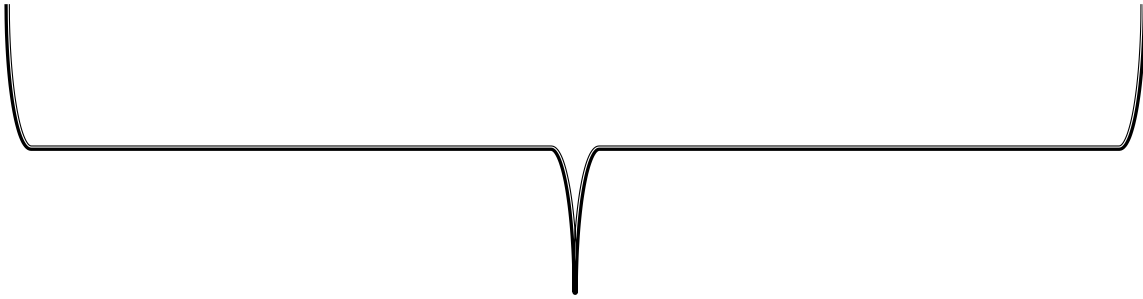

Crisis response, allied/partner engagement, on-going conflicts; COCOM requirements for 50 amphibs

---

O-FRP (maintenance cycles locked in, deployment window locked in)

---

**Need numbers—Use non-amphibs like EPFs, T-AKEs, ESDs/ESBs**

High-Low Mix
