On behalf of the Commander for U.S. Special Operations Command, Gen. Richard Clarke, welcome to the 2022 Special Operations

Forces Industry Conference. We are excited to co-host this important annual event with the National Defense Industry Association.

First, I want to thank you for your support of our Special Operations Forces over the past year. While there have been significant challenges, you have collectively made herculean efforts to ensure our forces received the equipment and services required to fulfill their mission. To those of you that are new to supporting SOF, we look forward to learning more about mutual opportunities.

This year's theme, "Campaigning With Partners For Integrated Deterrence," highlights three important messages. First, this

campaign will require the resilience and innovation of our industry base. We'll rely on partners, both international and commercial, and you can rely on us, to find solutions to SOF's most critical problems. Finally, integrated deterrence implies that the technologies and processes that made us successful in the past may not guarantee success in the future. This conference marks an opportunity to mutually adapt to this new environment.

While we adapted to the environment over the past two years with a virtual format, we are excited to be back live for this year's conference. USSOCOM is again proudly partnering with the city of Tampa, Florida, and Mayor Jane Castor. Tampa is the home to our headquarters and many businesses, organizations and local communities that support active-duty and retired SOF. We appreciate the mayor's continued engagement, and we look forward to inviting all our worldwide partners to experience this great city. Please take advantage of the full conference by visiting the exhibits and booths outside the convention

center in adjoining hotels and along the waterfront.

We specifically designed SOFIC 2022 to take the best-in-class virtual engagement we've all learned to leverage over the past two years and combine it with the tried-and-true in-person SOFIC collaboration that has made this a pre-eminent event. We are honored to include keynote remarks from our Commander and the Under Secretary of Defense for Research & Engineering, a panel with our Theater Commanders, and an Industry Executive presentation. There are multiple direct engagement opportunities throughout the week with our Program Executive Officers, our Director for Science and Technology, and the command's Chief Data Officer and Chief Information Officer.

Again, thank you for attending SOFIC 2022 and for your steadfast commitment to supporting our SOF.

James H. Smith
Acquisition Executive
U.S. Special Operations Command

Welcome to the 2022 Special Operations Forces Industry Conference (SOFIC). SOFIC is the single most important opportunity for

NDIA the SOF community to interact with industry and collaborate on the challenges, initiatives, and way-ahead in delivering the most cutting-edge capabilities into the hands of SOF operators.

The theme of this year's SOFIC, "Campaigning with Partners for Integrated Deterrence," will cover topics such as artificial intelligence, machine learning, big data analytics, and everything on which our SOF community can collaborate to ensure success.

With the terrific agenda we have lined up, you will not want to miss any of the sessions this week. Speakers from industry, USSOCOM, and key government offices will provide the information you will need to succeed in conducting business with USSOCOM. These esteemed speakers will share their unique perspectives from which you will learn about challenges, trends, and capability gaps facing the force now and into the future.

Make sure to visit the Exhibit Hall where you will be able to network and view some of the SOF industry's newest and best products and services. Back by popular demand is the IGNITE Pavilion which we have expanded to its own dedicated exhibit hall at the JW Marriott. You'll also want to check out the outdoor exhibits at

SOFlanding and SOFsail. Across the SOFIC campus, there are more than 550 companies signed up to showcase the latest in SOF equipment and capabilities – this is an opportunity not to be missed.

Thank you to our Premier Sponsors: Bank of America, Carahsoft, GDIT, ARMA A General Dynamics Company, L3Harris, Lockheed Martin, Palantir, Peraton, SAIC, and Verizon.

We hope you enjoy this year's programming and the connections you will make as a participant of 2022 SOFIC.

David L. Norquist
President & Chief Executive Officer
National Defense Industrial Association

UNMANNED & UNMATCHED

Wherever U.S. or allied forces need to operate, Mojave does, too. A rugged, robust exterior, meshed with state-of-the-art software and internals, mean Mojave delivers cutting-edge ISR, unprecedented payloads and game-changing endurance from short- and semi-improved runways. If you've got a soccer field, a grass strip or a dirt road, you've got a high-performing UAS.

Proclamation

Jane Castor, Mayor

WHEREAS, the United States Special Operations Command (USSOCOM) is the worldwide headquarters for Special Operations Forces of the United States Military; and

WHEREAS, USSOCOM is located at MacDill Air Force Base in Tampa, Florida, and its military members, civilian employees, and their families reside and contribute greatly to our community; and

WHEREAS, USSOCOM is hosting Special Operations Forces Week from May 16-20, 2022, at the Tampa Convention Center and surrounding areas, bringing together United States Special Operations Forces and International Partners; and

WHEREAS, this conference week is held in conjunction with the Special Operations Forces Industry Conference, which USSOCOM co-hosts with the National Defense Industrial Association (NDIA) from May 16-20, 2022, bringing together hundreds of businesses and corporations with United States Special Operations Forces leadership; and

WHEREAS, the City of Tampa is extremely proud of USSOCOM and the outstanding job its military forces and civilian employees are performing locally and worldwide; and

WHEREAS, the City of Tampa is honored to host the attendees visiting from across the world, and the corporate and business sectors presenting at the Special Operations Forces Industry Conference.

NOW, THEREFORE, I, Jane Castor, by virtue of the authority vested in me as Mayor of the city of Tampa, Florida, do hereby proclaim May 16-20, 2022 as

"2022 SPECIAL OPERATIONS FORCES WEEK"

in the city of Tampa, Florida, and urge all citizens to join me in welcoming all those attending and in thanking them for the extraordinary efforts they are making on our nation's behalf.

Dated in Tampa, Florida, this 16th day of May, 2022.

Jane Castor
Mayor

Fast Switching Booster Amplifiers Deliver Results

The **NIGHTHAWK** and **RAVEN** Tactical Booster Amplifiers use AR Modular RF's Fast Switching technology, targeted to support modern waveforms and offering 20 Watts of Output Power.

The amplifiers are built around an architecture that supports T/R Switching in under 2 μ s – all with zero operator interface required, delivering a true plug-and-play radio agnostic performance.

High Power, faster switching, and ease of operation make **NIGHTHAWK** and **RAVEN** unmatched in the field of booster amplifiers.

Call AR Modular RF today for more information.

Fully Automatic Operation

- Fast Auto-Detect T/R Switching
- Harmonic Suppression

Minimum Form Factor

- Suitable for Vehicle, Dismounted, & Mobile Applications
- IP67 Rated

Key Features

- NGV Compatible Screen Interface
- Radio & Waveform Agnostic
 - AM, FM, Narrowband, Wideband, MANET
- Fixed Gain, Linear
- Protections:
 - Input Overdrive
 - Antenna Mismatch
 - Over Temperature

Future Features

- Tethered Operation for Remote Monitor & Control
- Customizable default settings
- Configurable Gain

Key Specifications

REGISTRATION BADGES

During the registration check-in, you will be issued a conference badge that must be worn for ALL SOFIC official conference programming, no exceptions. There will be no admittance into the Tampa Convention Center without a conference badge. Any special events that were added to your registration will be noted on the badge, including the Gala.

SOFIC Conference badges will only be available for pick-up onsite and must be worn at all 2022 SOFIC functions. To gain access to the events for which you have registered, you must show your issued registration badge. Please be prepared to present a valid picture ID, proof of COVID vaccination or negative test when picking up your registration badge

WEAPONS AND PROHIBITED ITEMS

No personal firearms or ammunition will be permitted during 2022 SOFIC. This includes ALL SOFIC EVENTS held at the Tampa Convention

Center, JW Marriott Tampa Water Street, Tampa Marriott Water Street, and the Tampa Westin Waterside.

Guests, including law enforcement personnel not present in an official capacity, are prohibited from bringing weapons into the TCC. The TCC does not provide lockers of any type. Weapons include, but are not limited to, the following: firearms, explosives, stun guns, handcuffs, brass knuckles, sticks, clubs, batons, martial arts instruments, pepper spray, tear gas and knives. Guests found in possession of the above-mentioned items will be asked to remove the item from the TCC or dispose of it. Guests who refuse to comply will not be permitted entry into the TCC.

The only firearms allowed at the Tampa Convention Center or JW Marriott Tampa Water Street, during SOFIC, must belong on display by exhibitors. All firearms displayed by

exhibitors must have the firing pins removed and have been inspected.

Off Duty Law Enforcement Officers will NOT be allowed to bring firearms into the Tampa Convention Center during SOFIC.

Any person licensed by the state of Florida to carry a concealed weapon is hereby notified that they shall not carry their firearm during 2022 SOFIC.

BAG CHECK

All bags will be searched. Please be sure to leave sufficient time to get through security and registration or leave large bags back in your hotel room or personal vehicle.

COVID-19 SOFIC

The policy for 2022 SOFIC is as follows: all Attendees, exhibitors, speakers, NDIA staff participating in the event must be fully vaccinated or show proof of a negative COVID-19 test that has been administered no more than 72 hours prior to badge pick-up, or for USSOCOM personal have attested. "Fully vaccinated" means that an individual has received the second dose of a two-dose vaccine series (Pfizer-BioNTech, Moderna, AstraZeneca-SK Bio) or a single-dose vaccine from Johnson & Johnson/Janssen at least two weeks prior to the event. Only the vaccines noted above, which have been approved by the World Health Organization (WHO), shall be acceptable to meet the full vaccination requirement.

SafeExpo

NDIA has partnered with SafeExpo for attendees to upload their proof of vaccination. The link will remain open until Friday, May 13 at 8:00 pm EDT. The following negative tests will be accepted: Rapid Antigen, Rapid PCR, and Regular PCR, and must be administered by a medical professional. All tests must be generated by an official lab, pharmacy, or medical clinic. Proof of antibodies or any home administered tests will not be accepted. On-site verification will

Networking the Future

5G SOLUTIONS

FOR COMPLEX MISSIONS

Today's Special Operations Forces require more data, quick decisions, and enhanced security. As a leading technology innovator and solution provider of mobile communications, Oceus delivers the most advanced 5G private networks. Military and government customers depend on our solutions for on-demand high-speed voice, video and data communications in any environment.

Oceus' 5G Deployable, Enterprise & Cloud-Based Solutions Deliver:

- Extensive broadband connectivity with dedicated and dynamic spectrum
- Massive MIMO
- Network slicing

For Wireless IoT Devices & Applications, Our Edge Computing Capabilities Provide:

- Enhanced Mobile Broadband (eMBB)
- Ultra Reliable Low Latency Communications (URLLC)
- Massive Machine Type Communications (mMTC)

USSOCOM Industrial Security will provide an overview of facility clearances for new companies wishing to do business with USSOCOM

1:00 – 2:00 pm

Communications with Industry

TCC Rooms 122-123

Acquisition Professionals from SOF AT&L

SOF AT&L Contracting Officers and Program Managers will conduct roundtable exchanges with attendees on the different communication medium (e.g., FedBizOpps, Industry Days, etc.) used to forecast or discuss new requirements with industry, as well as discuss the limitations on communications during the formal source selection process. The intent of these exchanges is to provide industry with insight on the left and right limits of Government communication during the acquisition process and to gain insight from industry on areas where SOF AT&L can improve in its communication with industry. Specific emphasis will be given to the communications during the Market Research and Pre-Solicitation Phase, i.e. responding to Government Requests for Information (RFI's), sources sought, etc. **This session is closed to the media and requires advanced registration (2 per company max).**

1:05 – 1:45 pm

SOFWERX Overview

TCC Rooms 124-125/Virtual

Leslie Babich and Glen Cullen

SOFWERX Director Leslie Babich will team up with Glen Cullen from USSOCOM Acquisition Agility to provide an overview of how industry, academia and laboratories can leverage the SOFWERX platform to do business with USSOCOM to help solve challenging Warfighter problems.

2:00 – 2:30 pm

Networking Break

TCC Ballroom Foyer

2:30 – 3:10 pm

OSD Director of Small Business

TCC Rooms 124-125/Virtual

Farooq Mitha

Join Mr. Farooq Mitha, Director of the Department of Defense Office of Small Business Programs, for a session focusing on the DOD's small business programs and priorities.

2:30 – 3:30 pm

CRADA Crash Course

TCC Rooms 118-119

Vince Seiferd

SOF AT&L will present the basic construct of a Cooperative Research and Development Agreement (CRADA) and the process for entering into a CRADA with USSOCOM. An interactive discussion will follow the presentation. It will include the value of entering into the agreement and the criteria SOF AT&L uses in determining if it is the right tool for the Industry-proposed work and what Industry can do to improve the CRADA tool and process. This will be a video presentation followed by a live Q&A.

2:30 – 3:30 pm

RFP Sections L&M

TCC Rooms 122-123

Acquisition Professionals from SOF AT&L

SOF AT&L Contracting Officers and Program Managers will conduct roundtable exchanges with attendees on Sections L and M of USSOCOM request For Proposals, highlighting keys to submitting successful proposals. Emphasis will be given to Industry's proposal response to Compensation for Professional Employees (Reference FAR 52.222-46). **This session is closed to the media and requires advanced registration (2 per company max).**

11:30 am – 12:00 pm**Lunch on Own***Visit Food Trucks in SOFlanding***12:00 – 1:00 pm****S&T Overview***TCC Rooms 124-125/Virtual***Lisa Sanders, Director of Science & Technology, USSOCOM**

Ms. Lisa R. Sanders is the Director of Science and Technology (S&T). She is responsible for all S&T funded activities. The S&T Directorate focuses on integrating S&T efforts across the SOF enterprise. This includes ensuring that capability gaps are aligned with technology enablers and developers, ongoing efforts are integrated with transition partners, additional innovation that is required to address S&T gaps is identified, and disruptive technology solutions are assessed for their impact and potential benefit to the SOF mission set and SOF operator of the future. S&T priorities are aligned with the USSOCOM Commander's Capabilities and Programming Guidance (CPG). S&T is focusing its efforts on these six Capability Focus Areas: Biotechnologies/ Human Interface; Hyper Enabled Operator; Network and Data Management; Next Generation Effects/Precision Strike; Next Generation Intelligence, Surveillance, and Reconnaissance/ Tactically Relevant Situational Awareness; and Next Generation Mobility.

COL Joseph Blanton, USA, leads the Program Executive Officer of Special Operations Forces Support Activity (SOFSA). PEO SOFSA's mission is to manage the capability development, modification and integration of SOF peculiar equipment on a variety of SOF rotary and fixed wing aircraft as well as ground vehicles and maritime vessels. SOFSA provides responsive, tailored contractor logistic support worldwide to Special Operations Forces Component Commands and Theater SOCs to enhance Theater Combatant Commander (COCOM) readiness and warfighting capabilities. PEO SOFSA supervises execution of a multi-year contract (max of 10 years) valued at \$8B. These briefing addresses key areas that the SOF GLSS prime contractor desires from industry. The briefing also informs industry of expeditionary logistics capability development requirements. These requirements will be executed by PM Expeditionary Support within PEO SOFSA.

Rolls-Royce Advanced Technologies

IRS Expertise

Rolls-Royce's infrared suppressor technology turns down the heat. Our technology has been rigorously flight-tested and is in service on the **AC-130W**, with a "plug and play" design for all legacy **C-130** variants, and has been on the **MH-47** for more than a decade, performing exceptionally for over 200,000 flight hours. This battlefield experience has proven that you don't have to choose between reliability and performance – we're providing both. Our system has also flown on the **CV-22**, and we have developed designs for the **AC-130J** and **V-280** Valor as well.

Continuous Power & Thermal Management

Directed Energy applications require instantaneous power, continuous operations and reliable thermal management – all in a compact package. **ColdFire™**, Rolls-Royce's Integrated Power and Thermal Management System, provides that and more.

Designed, developed and tested by Rolls-Royce LibertyWorks in Indianapolis, ColdFire has been proven in field and lab tests. The system's deep-magazine capabilities enable directed energy operators to move past current low-power, low duty-cycle demonstrations by solving the difficult challenges of integrating consistent high-power output. Testing has proven the system's scalability to higher power levels required to meet the evolving threats faced by Soldiers, Sailors, Airmen, Marines and Guardians.

Geoffrey Downer

Mr. Geoffrey Downer leads the Program Executive Office for Rotary Wing (PEO-RW). The PEO is responsible for providing rapid and focused acquisition, research and development, and life-cycle logistics support to the operators of the US Army Special Operations Aviation Command and the 160th Special Operations Aviation Regiment, which provides SOF rotary-wing capability to the joint force. PEO-RW provides the most advanced rotary wing aircraft, mission equipment, and training systems available to the U.S. military by continuing to focus on technologies that ensure operators have a comparative advantage against all potential threats. PEO-RW accomplishes this critical mission with a three-part strategy focused on readiness, recapitalization, and investments in lethality and survivability. The rotary wing fleet consists of the MH-47G Chinook, MH-60M Black Hawk, and the A/MH-6M Little Bird.

Executive Office for Fixed Wing (PEO-FW). PEO-FW's mission is to deliver special operations manned and unmanned fixed wing airpower capabilities at the speed of need to provide a winning advantage to SOF, the Joint Force, and our Nation. To meet this mission, the PEO teams with SOF operators, various government support organizations, and industry partners to rapidly develop, test, field, and sustain an array of fixed wing capabilities. This includes advanced technology sensors, defensive systems, precision strike capabilities, advanced avionics, and mission systems to meet National Defense Strategy and Counter Violent Extremists Organization objectives.

GENERAL RICHARD D. CLARKE **Commander, USSOCOM**

General Richard D. Clarke currently serves as the 12th Commander of U.S. Special Operations Command (USSOCOM)

headquartered at MacDill Air Force Base, FL.

Prior to assuming command of USSOCOM, General Clarke served as Director for Strategic Plans and Policy (J5), Joint Staff, the Pentagon, Washington, D.C.

General Clarke's other assignments as a general officer include: Deputy Commanding General for Operations, 10th Mountain

Division from 2011 to 2013; the 74th Commandant of Cadets, United States Military Academy at West Point from 2013 to 2014; and the Commander of the 82nd Airborne Division.

His formative and key, Army and special operations, assignments include: Director of Operations, Joint Special Operations Command from 2009 to 2011. Eight years in the 75th Ranger Regiment first as a company commander, then as a battalion commander, and finally as the regimental commander. He also served as commander of 3rd Battalion, 504th Parachute Infantry Regiment, 82nd Airborne Division.

General Clarke has led Soldiers at all levels in Airborne, Ranger, Mechanized and Light Infantry units in five different divisions, the 173rd Airborne Brigade, and the 75th Ranger Regiment in the United States, Europe, Iraq and Afghanistan. His deployments while serving in the aforementioned positions include Operations Desert Shield and Desert Storm, Operation

Joint Guardian in Macedonia, three deployments in support of Operation Enduring Freedom, four deployments in support of Operation Iraqi Freedom, and one deployment as the commander of the Combined Joint Forces Land Component Command - Operation Inherent Resolve.

General Clarke was born in Germany and raised in an Army family. He is a graduate of the United States Military Academy at West Point, NY, and was commissioned into the Infantry in 1984. He holds a Bachelor of Science degree from West Point and a Master of Business Administration from Benedictine College. He is a distinguished graduate of the National War College earning a master's degree in Security and Strategic Studies.

JAMES H. SMITH **Acquisition Executive,** **USSOCOM**

James H. Smith, a member of the Senior Executive Service, is the Acquisition Executive, U.S. Special Operations

Command, MacDill Air Force Base, Florida. He is responsible for all special operations forces acquisition, technology and logistics.

Mr. Smith graduated from the U.S. Military Academy in 1986 and was commissioned as a second lieutenant in the infantry. He served initially with the Third Infantry Division in Kitzingen, Germany, as Bradley Platoon Leader, Heavy Mortar Platoon Leader and Company Executive Officer. He then served as the Second Brigade's Assistant Operations Officer and Rifle Company Commander in Fifth Battalion, 21st Infantry Regiment of the Seventh Infantry

Division (Light). Following receipt of a Master of Science degree in 1995, he served as Associate Professor in the Department of Civil and Mechanical Engineering and as Battalion Executive Officer of First Battalion, First Infantry Regiment at the U.S. Military Academy.

His acquisition assignments include Chief, Firepower Division, Combat Developments Directorate, U.S. Army Infantry Center; Assistant Product Manager, Soldier Power; Deputy Technology Product Manager, Objective Force Warrior; Chief, Interoperability, Headquarters Department of the Army G8; Product Manager, Soldier Sensors and Lasers, Program Executive Office Soldier; and Program Executive 44 Officer, Special Operations Forces Warrior Systems, followed by Military Deputy to the U.S. Special Operations Command Acquisition Executive. Prior to his current assignment, he was the Deputy Director for Acquisition, Headquarters USSOCOM.

Mr. Smith is a graduate of the Infantry Officer Basic and Advanced Courses, the U.S. Army Command Staff College, the U.S. Army War College and the Executive Program Manager's Course. He is registered as a Professional Engineer in Virginia.

Mr. Smith retired from active duty in 2013. Immediately upon his military retirement, he was appointed to the Senior Executive Service and selected to serve as the Deputy Director for Acquisition, Special Operations Research, Development and Acquisition Center, USSOCOM, MacDill AFB.

DAVID L. NORQUIST **President & Chief Executive** **Officer, National Defense** **Industrial Association**

Mr. David L. Norquist served as the 34th Deputy Defense Secretary from July 31, 2019, until Feb. 9, 2021.

Mr. Norquist was born November 24,

1966, in Concord, Massachusetts. He is a 1989 graduate of the University of Michigan, where he received a Bachelor of Arts in Political Science and a Master's Degree in Public Policy. He also holds a Master's Degree in National Security Studies from Georgetown University and is a Certified Government Financial Manager (CGFM).

Mr. Norquist has 30 years of experience in federal financial management and national security. He began his career as a Presidential Management Fellow and a Program Budget Analyst for the Department of the Army. During his eight years with the Army, he worked at Army Headquarters, U.S. Army Intelligence and Security Command, and as the Director of Resource Management at Menwith Hill Station in the United Kingdom. In 1997 he became a professional staff member on the House Appropriations Committee, Subcommittee on Defense. He served from 2002-2006 as the Deputy Under Secretary of Defense in the Office of the Comptroller, where he received the Secretary of Defense Medal for Outstanding Public Service.

In 2006, Mr. Norquist was selected by President George W. Bush to be Chief Financial Officer at the Department of Homeland Security (DHS). He was the first Senate-confirmed Chief Financial Officer for the Department. For his leadership, he received the Secretary of Homeland Security Outstanding Service Medal.

Prior to his current tour in the Department of Defense (DOD) Mr. Norquist was a Partner with Kearney and Company, a certified public accounting (CPA) firm focused exclusively on the federal government.

Mr. Norquist was appointed as the

Under Secretary of Defense (Comptroller)/ Chief Financial Officer on June 2, 2017, and served as the principal advisor to the Secretary of Defense on all budgetary and financial matters. He supported the National Defense Strategy (NDS) through the development and execution of the Department's annual budget of more than \$680 billion. Mr. Norquist strengthened accountability to the taxpayer by implementing DOD's first department-wide financial statement audit.

He and his wife, Stephanie, reside in Virginia with their three children.

HEIDI SHYU **Under Secretary of Defense** **for Research and Engineering** **(OUSD(R&E))**

Ms. Heidi Shyu is the Under Secretary of Defense for Research and Engineering (OUSD(R&E)). In this role, she serves as the Chief Technology Officer for the

Department of Defense (DoD), mandated with ensuring the technological superiority of the U.S. military, and is responsible for the research, development, and prototyping activities across the DoD enterprise. She also oversees the activities of the Defense Advanced Research Projects Agency (DARPA), the Missile Defense Agency (MDA), the Defense Innovation Unit (DIU), the Space Development Agency (SDA), the DoD Laboratory and Engineering Center enterprise, and the Under Secretariat staff focused on developing advanced technology and capability for the U.S. military.

Previously, she served as the Assistant Secretary of the Army for Acquisition, Logistics and Technology (ASA(ALT)), from September 2012 to January 2016. Prior to this, she was Acting ASA(ALT) beginning in June 2011 and appointed the Principal Deputy in November 2010. As the ASA(ALT), she served as the Army Acquisition Executive, the Senior Procurement Executive, the Science Advisor to the Secretary of the Army, and the Army's Senior Research and Development official. She had principal responsibility for all Department of the

Army matters related to logistics. Ms. Shyu also led the execution of the Army's acquisition function and the acquisition management system. Her responsibilities included providing oversight for the life cycle management and sustainment of Army weapons systems and equipment from research and development through test and evaluation, acquisition, logistics, fielding, and disposition.

Prior to her government service, Ms. Shyu was the Vice President of Technology Strategy for Raytheon Company's Space and Airborne Systems.

Ms. Shyu holds a Bachelor of Science Degree in Mathematics from the University of New Brunswick (UNB) in Canada, a Master of Science Degree in Mathematics from the University of Toronto, Master of Science Degree in System Science (Electrical Engineering) from UCLA, and the Engineer Degree from UCLA. She received an Honorary Doctorate of Science from the UNB. She is also a graduate of the UCLA Executive Management Course Program.

A member of the Air Force Scientific Advisory Board from 2000 to 2010, she served as the Vice Chairman from 2003 to 2005 and Chairman from 2005 to 2008. Ms. Shyu is a member of the National Academy of Engineering and AIAA Honorary Fellow.

LEIGH PALMER **Senior Vice President,** **Defense, General Dynamics** **Information Technology**

Leigh Palmer is GDIT's senior vice president for the defense division. She oversees a \$3B+ business portfolio comprised of 9,000 employees and the delivery of

mission-critical services and solutions to the U.S. Department of Defense and other government customers. Leigh previously served as GDIT's senior vice president for the national security division, which supported programs in the homeland security and intelligence communities.

At GDIT, Leigh has led multiple strategic initiatives increasing technology capability for the Special Operation Forces. These

A soldier in full combat gear, including a camouflage helmet with a night vision device, is aiming a SIGSAUER handgun. The soldier is wearing a camouflage uniform and tactical gear. The background is blurred, suggesting an outdoor setting.

SIGSAUER[®]

sigauer.com

have included programs tied to data analytics where actionable information has been fused and disseminated to the warfighter; information security that has safeguarded data about our deployed forces; and information operations in response to the rise of information warfare. Leigh also oversees BICES, the premier global coalition information-sharing mechanism in use today.

Her priorities are aligned with SOCOM objectives to include advancing the mobility of a global mission force, empowering the cyber ecosystem, and operationalizing innovation.

Currently, Leigh's team is developing critical C5ISR tools for Joint Special Operations Command and modernizing enterprise IT at the USSOCOM headquarters for the J6X staff. Additionally, her team is delivering mobility, cloud migration and special project capabilities at AFSOC's Special Warfare Technical Integration Support Center.

Leigh earned a bachelor's degree from Virginia Tech and a master's degree from the University of Pennsylvania.

PETER JOSEPH TRAGAKIS
Director, Communications Systems and Chief Information Officer, USSOCOM

Mr. Peter J. Tragakis, a member of the Senior Executive Service, is the Director, Communications Systems and Chief Information Officer

for the U.S. Special Operations Command (USSOCOM), MacDill Air Force Base, Florida. He is responsible for developing USSOCOM's Information Technology strategy as well as executing the Command's C4 acquisition program. Mr. Tragakis is also responsible for operating and maintaining USSOCOM's global SOF Information Enterprise providing support to more than 90,000 special operations personnel.

A native of Danvers, Massachusetts, Mr. Tragakis enlisted in the US Army Reserves in 1986. He received his commission in 1990 through the Army Reserve Officer Training Corps at Bryant College in Smithfield, RI. Prior to this assignment, he was the Vice President of ARMA Global Incorporated, a wholly owned subsidiary of General Dynamics Information Technology. He has served in command

and staff positions within the C4I arena throughout his career and deployed in support of OPERATION JOINT GUARD, ENDURING FREEDOM, and IRAQI FREEDOM.

THOMAS "THOM" KENNEY
United States Special Operations Command Chief Data Officer/ Director of SOF Artificial Intelligence

As a direct report to the Commander, Mr. Kenney is the Chief Data Officer/Director of SOF AI for U.S. Special Operations Command. His primary duty is to

accelerate digital capabilities for the entire SOF

enterprise through collaborative efforts with Industry, Academia, DoD, and other Government Agencies. Mr. Kenney is a serial entrepreneur as both a Chief Executive Officer and Chief Technology Officer, with deep experience in start-ups and turnarounds. Over the past 20 years, he served on or led senior executive teams and corporate boards that have delivered nearly \$3B in value to investors and shareholders through multiple exits via acquisition by private equity and Fortune

Most recently, Mr. Kenney led companies and teams to develop advanced cloud computing applications that employ AI and machine learning techniques for systems that measure in the hundreds of millions of users worldwide. Mr. Kenney has over two decades of enlisted and officer experience in the Army Reserve and National Guard, including multiple combat deployments to Afghanistan and Africa as a Civil Affairs officer. He has participated in several multi-national exercises and taught civil-military techniques to foreign partners in Hungary and Poland as a part of NATO education programs. Mr. Kenney also serves as a technical advisor and board member within the DOD and industry focusing on developing cloud, data, and AI capabilities.

WILLIAM J. INNES
Deputy Director, Acquisition,
USSOCOM

William J. Innes, a member of the Senior Executive Service, is the Deputy Director, Acquisition, U.S. Special Operations Command, MacDill Air Force Base,

Florida. He is the principal advisor to the Special Operations Acquisition Executive and is responsible for oversight and policy for special operations forces acquisition, technology and logistics.

Mr. Innes entered civil service upon graduation from Parks College of St. Louis University in 1993 and subsequent positions in industry. His initial Air Force assignment was in 1997 to the San Antonio Air Logistics Center, Kelly AFB, Texas, providing engineering support to the propulsion directorate and later the C-17 Globemaster III program on-site at Charleston AFB, South Carolina. Following a short period at the Warner Robins Air Logistics Center, Georgia, he was assigned to the Aeronautical Systems Center, Wright-

Patterson AFB, Ohio, supporting the F-22 Raptor program as Chief Sustainment Engineer. This led to his selection as the CV-22 Osprey Chief Engineer at Patuxent River Naval Air Station, Maryland. Mr. Innes then broadened his career as a Senior Defense Analyst in the Office of the Secretary of Defense, Acquisition, Technology and Logistics

(Industrial Policy) in Crystal City, Virginia. In 2009, he volunteered for a 12-month assignment to Kabul, Afghanistan, supporting Operation Enduring Freedom where he supported the U.S. Army and the U.S. Agency for International Development as a Program Manager for infrastructure projects throughout the country. Upon completion of the deployment, Mr. Innes returned to the Air Force and the CV-22 program, taking on the role of Deputy Program Manager. In 2012, he was assigned to U.S. Transportation Command as a Program Management Division Chief for a portfolio of transportation enabling Information Technology programs. He was promoted to SES and assigned as Deputy Director, Acquisition for U.S. Special Operations Command in May 2019.

BeaverFit is the global leader in indoor/outdoor, portable and customized functional fitness training solutions. BeaverFit products include integrated rigs, shipping container Performance Lockers, fitness trailers, and unique storage solutions. Our mission is to solve training challenges, innovate through intelligent engineering and provide durable equipment that satisfies any and all performance goals.

ANTENNA SOLUTIONS

Stay Safe and Connected Using STI-CO®'s Robust and Innovative Mission Critical Antenna Systems

Looking to increase connectivity with a custom covert antenna solution?
We specialize in designing custom mobile covert and multi-band solutions

- Additive manufacturing and rapid prototyping
- Wideband and multiband antenna designs
- Mobile platform covert antennas
- Line of Sight covert antennas
- Tactical antenna solutions for field deployment
- Real world antenna optimization

Stop by the STI-CO® SOFIC booth #240 to learn more.

135 Madison Avenue, Floor 10, Floor 10
New York, NY 10016

For those who serve and protect, Dataminr's First Alert capability provides critical, early indicators of breaking events – in real time – enabling the fastest response. Visit us at: <https://www.dataminr.com/public-sector>.

David Clark Company Incorporated

BOOTH: 551

360 Franklin Street, Worcester, MA
01604

<http://www.davidclark.com>

David Clark Company is dedicated to the development and manufacture of quality communication products. We provide government with wired and wireless headset intercom systems, with radio interface capability, for high noise applications requiring hearing protection and clear communications. The Series 900 Digital Communication System is designed to stand up to the harshest air, land, and sea environments and most challenging missions.

Dead Air Silencers

BOOTH: 1810

5 South Main Street, Kamas, UT 84036

Dead Air Silencers was founded by silencer veterans in 2014, and has been a leading innovator in the suppressor industry ever since. Staying true to their mission statement “No Quarter”, Dead Air focuses on bringing the best materials, designers and manufacturing techniques to the market. This “Never Settle” attitude has led to some of the most sought-after products and accessories to date.

DeepSig Inc.

BOOTH: J310

1700 17th St. N., Suite 1260 Arlington, VA
22209

DeepSig is applying deep learning AI to dramatically improve wireless in both defense and commercial markets. OmniSIG is a signal detection and classification software product that provides 1000X speed increase with reduced SWaP for threat warning, ISR, EW, SIGINT, and cyber intrusion detection. An SDK enables rapid system training of new signals. OmniPHY learns waveforms that are optimized for a mission needs such as UAV data links and is also being used to improve 5G performance and SWaP.

DefendTex Military Products Pty Ltd

BOOTH: 635

Dandenong South, Victoria, Australia

DefendTex is an established leader in multi domain asymmetric warfare solutions. Innovation drives the development of cost effective capabilities to deliver combat mass designed to significantly increase the strike range, survivability and lethality of existing systems. DefendTex leverages a strong commitment to R&D combined with state of the art facilities to deliver world leading capabilities to the war fighter.

Defense Threat Reduction Agency (DTRA)

BOOTH: 22

Devo Technology Inc

BOOTH: J105

255 Main Street, Suite 702
Cambridge, MA 02142

Devo is the only cloud-native logging and security analytics platform that empowers public sector IT and cybersecurity teams to log, detect, investigate, hunt and stop threats to safeguard government and citizens. The Devo Platform provides unrivaled scale to collect all of your data without compromise, speed to give you immediate access and answers, and clarity to focus on the signals that matter most, all at significant savings over other solutions.

Dexter Edward, LLC

BOOTH: 1652

13873 Park Center Road, Suite 329
Herndon, VA 20171

www.dexterredward.com

Dexter Edward is the premiere integrator of encrypted, traceless communications and collaboration networks built over public infrastructure. We provide leading-edge solutions well-adapted for team/low-vis comms, obfuscated data transport, and managed attribution/OPSEC. Our solutions can protect military source operations, persistent surveillance & secure sensor exfiltration, OSINT operations, remote advise-and-assist missions, battlefield intelligence prep, and more mission-critical operations.

D-Fend Solutions

BOOTH: 735

13 Zarchin st., Ra'anana, 4366241 Israel

D-Fend Solutions is the leading counter-drone takeover technology provider, helping organizations to take control of drone incidents in complex environments. EnforceAir executes cyber takeovers of rogue drones for safe landings and safe outcomes. D-Fend Solutions facilitates continuity by ensuring the smooth flow of communications, commerce, transportation and everyday life.

PROUD SOFIC SPONSOR

Digital Force Technologies

BOOTH: 328

6779 Mesa Ridge Rd., Suite 150,
San Diego, CA 92121

Digital Force Technologies designs, manufactures, and deploys unique sensor and surveillance solutions for military, industrial, and executive protection customers. Areas of expertise include integrated sensor systems, advanced camera and imaging devices, quick-deploy force protection systems, and rapid product development.

Digital Receiver Technology

BOOTH: 405

12409 Milestone Center Drive,
Germantown, MD 20876

DRT designs/manufactures RF and DSP-based products for Municipal, County, State, Federal and Military investigative/intelligence collection organizations for support of technical surveil-

lance and tactical operations. DRT's software-defined nature of product enables a single system to target numerous communication protocols. A full line of both transmit and receive products are available.

DigitalCM, LLC

BOOTH: 654

13510 Prestige Place, Suite 103,
Tampa, FL 33635
www.digitalcm.com

DigitalCM is an immersive solutions provider translating decades of firsthand operational experience into the design of a robust, and modular suite of Extended Reality operational and training platform solutions. Our platforms allow users to build custom tailored immersive training, mission planning and/or rehearsal capabilities quickly and specific to the context they must operate within and challenges they must overcome.

DIS | Ampex & Delta Digital Video

BOOTH: 1752

747 Dresher Road, Suite 125
Horsham, PA 19044-2247
<http://www.deltadigitalvideo.com>

Ampex produces ruggedized data acquisition units, recorders, file-servers and network data storage systems used in flight-test, ISR and mis-

sion applications. Delta Digital Video produces high quality video compression and video scan conversion products for aerospace, defense, law enforcement and remote monitoring applications. Both companies are subsidiaries of Delta Information Systems, a fast-growing, strategic collection of companies.

DittoLive Inc.

BOOTH: J201

548 Market Street PMB 20272,
San Francisco, CA 94104

Ditto is a cross-platform peer-to-peer database that allows apps to sync with and even without internet. The Ditto Intelligent Edge Platform enables nearly any type of edge computing system to share data real-time in a mesh without a central server or hardware, processing information at the edge. This provides maximum flexibility to solve the toughest data communications challenges by enabling real-time mission feedback loops and reducing processing time between system/mission data updates.

DLA Corporate Events

BOOTH: 414

8725 John J Kingman Rd, Ft Belvoir, VA
22060

As the Nation's combat logistics support agency, the Defense Logistics Agency provides innovative logistics, acquisition, and technical solutions. DLA provides nearly all consumable items

America's military forces need to operate: food, fuel and energy, uniforms, medical supplies, construction and barrier equipment, and spare parts. DLA also provides reutilization, disposition, cataloging, and document automation & production services.

DoD CIO's DIB Cybersecurity Program

BOOTH: 20

1550 Crystal Drive, Arlington, VA 22202
DoD's Defense Industrial Base Cybersecurity (DIB CS) program was established to enhance and supplement DIB participants' capabilities to safeguard DoD information that resides on, or transits, DIB unclassified information systems. Through this public-private cyber security information sharing partnership, DoD and DIB participants share cyber threat information to identify and respond to adversary activity.

eMagin Corporation**BOOTH: 124**

700 South Drive, Suite 201 Hopewell
Junction, NY 12533

<http://www.emagin.com>

eMagin's OLED microdisplays are battlefield proven for over 20 years and used in a wide range of military applications worldwide including night-vision systems, head mounted pilot display systems and high end simulation and training applications. Founded in 1996, we are the leading manufacturer of active-matrix Organic LED (AM-OLED) Microdisplays on Silicon. Our displays provide image and are designed and manufactured in the U.S.A.

EnerSys, Inc.**BOOTH: 444**

301 Maple Ave West Suite 500, Vienna, VA
22180

<http://www.enersys.com>

EnerSys, the world's largest manufacturer of industrial batteries, offers complete VRLA, Li-Ion, Lithium Primary Reserve and NiCad stored energy solutions for the aerospace and defense industry. EnerSys batteries for military tactical ground vehicles, aircraft, submarines, soldier portable applications and weapons systems are known for their superior quality and innovative technology.

Enveil**BOOTH: J401**

8171 Maple Lawn Blvd, Ste 240
Fulton, MD 20759-2536

Enveil is a pioneering Privacy Enhancing Technology company protecting Data in Use. Powered by homomorphic encryption, Enveil's NIAP/CSfC-certified ZeroReveal® solutions protect the content of your search, analytic, or machine learning model, extending the boundary of trusted compute by allowing data to be securely processed with sensitive indicators while remaining in the untrusted domain.

Epiq Solutions**BOOTH: 1001**3740 Industrial Avenue,
Rolling Meadows, IL60008
<http://www.epiqsolutions.com>

Epiq Solutions develops embeddable software-defined radio RF systems and sensors optimal for mission critical SOF/SMU applications in EW, SIGINT, CYBER and comms. For 11+ years, government-focused industries have trusted our radically small SDR RF transceiver modules and sensing tools that lead the way in low SWaP, such as the Sidekiq Z2 SDR + CPU that is only 8 gm and 2W. We have the RF tools you need to put 5G/4G/3G/2G, Wi-Fi and P25 sensing in the palm of your hand with no ITAR restrictions.

Equinox Innovative Systems**BOOTH: J408**8901 Herrmann Drive, Columbia, MD
21045
www.equinoxinnovativesystems.com

Equinox Innovative Systems is an industry leader in multi-rotor drone technology, integration, and innovation. The EIS core team offers unparalleled capabilities in the areas of RF engineering, electro-mechanical airframe integration, and systems engineering. EIS product offerings optimize the balance between flight time, power, bandwidth, and payload capacity to deliver consistently superior solutions. EIS is a veteran owned small business and a turn-key provider of drone solutions.

Equitus Corporation**BOOTH: 950**2170 Rainbow Drive, Clearwater, FL
33765
www.sc2corp.com

Born from extensive military experience, Equitus is a new generation of intelligence systems that deliver artificial intelligence and an advanced graph data fabric in a family of interoperable intelligence platforms. From Equitus deployable intelligence kits to Equitus cloud enterprise, our ready-to-operate platforms are open-architecture, open-standard, open-scaling,

and provide a unique foundation for next-generation AI and beyond.

Espre Technologies**BOOTH: 214**1775 Tysons Blvd Suite 5165, Tysons, VA
22102

Espre Technologies is developing a resilient, ultrasecure, LPI/LPD communication platform for edge applications and IoT. Our solution provides PHY layer encryption of commercial wireless solution IEEE 802.11x, UWB, and 3GPP 4G/NR. Key features include deep learning threat detection, 16x16 MIMO capability, and featureless transmission. Prototypes available for Xilinx MPSoC & RFSoc, and PackRF in late summer. Our 28nm SoC ASIC chipset based on our SDR design is scheduled for tapeout in Fall '22.

Esri**BOOTH: 852**380 New York St, Redlands, CA 92373
<http://www.esri.com>

Esri, the global leader in geographic information systems (GIS), helps defense organizations achieve operational superiority across all domains. Esri's ArcGIS is open and secure and provides a framework to dynamically integrate all mission data. Staff can enhance their planning with world class analytical capabilities that model the real world and its impact on operations. This analysis enables commanders to visualize and exert command and control across all warfighting functions and echelons.

Esroe Limited**BOOTH: 1023**Unit 1A, Ground Floor, Bramble House,
Furzehall Farm, 112 Wickham Rd,
Fareham, PO16 7JH United Kingdom

ESROE is a spin out of the Defence Science and Technology Laboratory, an agency of the UK MoD, specializing in EW, specifically the detection and identification of radar signals (ESM). ESROE developed MicroESM, the World's smallest radar ESM. A complete system weighs less than 10 lbs. The system can be operated by a single soldier, but can also be configured for manned and unmanned light aircraft/vehicles.

The latest MicroESM development networks the sensors to locate radar signals.

Intellisense Systems, Inc. (ISI) is a small business committed to providing innovative, timely, and cost-effective solutions for our defense customers in cutting-edge sensors, information processor, optoelectronic instrumentations, augmented intelligence, and visualization technologies. With well-rounded technical expertise and well-established processes and certifications, ISI has built an in-house engineering and production facility and infrastructure to support technology transition.

Intelsat General Corporation

BOOTH: 1101, P304

7900 Tysons One Place, McLean, VA

22102

<http://www.intelsatgeneral.com>

As the foundational architects of satellite technology, Intelsat operates the world's most trusted satellite telecom network. We apply our unparalleled expertise and global scale to connect people, businesses, governments and communities, no matter how difficult the challenge. Intelsat is building the future of global communications with the world's first hybrid, multi-orbit, software-defined 5G network designed for simple, seamless, and secure coverage precisely when and where most need it.

International Armored Group

BOOTH: 213

5840 US 1 Highway South, St. Augustine,
FL 32086

<http://www.interarmored.com>

For over 25 years, International Armored Group has proudly manufactured the highest quality armored vehicles available on the market. We offer over 80 models of commercial armored vehicles, as well as a wide variety of special purpose tactical armored vehicles for Military and Law Enforcement Agencies.

Ipsolon Research, Inc.

BOOTH: 214

5 S Market St, Suite 400

Frederick, MD 21701

We specialize in small form factor high performance Software Defined Radios. Our SDRs are suitable for development but designed for deployment in harsh environments. Our specialty is wideband radios with demanding DSP applications. We have SDRs with up to 16 TX/RX channels and clocking subsystems to support

phase coherent comms and sensor applications. New Ipsolon SDRs have integrated RF Front Ends covering 0 -18 GHz, advanced multimodule coherency and GPS disciplined clocks.

Iris Technology Corporation

BOOTH: 1350

PO Box 15115, Irvine, CA 92623

<http://www.iristechnology.com>

In business over 35 years, Iris Technology designs and manufactures man-portable to FOB-level solar and hybrid power solutions for the warfighter. These technologies are applicable to communications and intelligence systems, expeditionary and base operations, military vehicles, and space platforms. Our unique design approach allows for design reuse, the highest efficiencies, and scalability – from 1 Watt to 10 kW.

IrvinGQ

BOOTH: 1055

Bettws Road, Llangeinor, Bridgend CF32
8PL United Kingdom

Following successful live drops in multiple configurations from C130, IrvinGQ are showcasing their new and highly capable Rapid Rig/De-Rig, Aerial Delivery System, "ATAX", which is transforming the capability and speed at which military assets can be deployed. Celebrating their centenary, IrvinGQ (formerly Airborne Systems 'Europe'), is the world's most trusted design and manufacturing resource for Personnel Parachutes, Aerial Delivery solutions and Corner Reflector Naval Decoy Systems.

ITility, LLC

BOOTH: 1950

14840 Conference Center Drive, Suite 100
Chantilly, VA 20151

<http://www.itality.com>

ITility provides information technology modernization and expertise for our federal and military customers. Our team of experienced professionals are driven to improve readiness and develop the next generation of SOF operators. Their experience and creativity ensure outcomes that have significance for each of our SOCOM customers in Program and Project Management, Realistic Military Training, SOF Cyber Operations, R&D, Engineering, and Systems Integration.

J3Seven

BOOTH: 635

8 Danbullan Street, Smithfield,
Queensland 4878 Australia

Our vision is to be the leader in developing and delivering tomorrow's solutions for today's challenges, to ensure Australia's security and safeguard our way of life. Our mission is to deliver world-class CBRNE and exploitation products, training and maintenance to the Commonwealth of Australia, through thought leadership, innovative solutions, and strong partnerships.

PROUD SOFIC SPONSOR

Jacobs Technology**BOOTH: 1743**5401 W Kennedy Blvd, Tampa, FL 33609
<http://www.usog.jacobs.com>

Jacobs has provided continuous exceptional support to USSOCOM since 1997, giving us a comprehensive understanding of the SOF environment and an exceptional ability to support the fielding, deployment, and operational effectiveness of SOF warfighters and USSOCOM programs. Through effective cross-sharing of capabilities across our company, we apply our expertise in innovative ways to provide optimized solutions to support the Command's greatest asset: the SOF warrior.

Jameson**BOOTH: 545**

1451 Old North Main Street, Clover, SC 29710

www.spartacogroup.com

Jameson proudly serves our troops domestically and around the world. For over 30 years our expeditionary shelter lights have been used extensively throughout all branches of the U.S. military. Today, our expanded line of high-performance lighting products also serves the needs of first responders, emergency personnel, law enforcement, and humanitarian efforts. Wherever The Job Takes You, Count On Jameson.

JEM Engineering**BOOTH: 1403**

8683 Cherry Lane, Laurel, MD 20707

JEM Engineering, centrally located between Baltimore and Washington, DC, specializes in quick-reaction custom antenna development, novel antenna products, and rapid radio frequency (RF) testing services. The engineers at JEM have decades of combined experience in the development and validation of antennas, microwave circuits, phased arrays and associated electronics. We cover a spectrum from 2 MHz to 40 GHz. Our products are suitable for both government and commercial applications.

JFD Limited**BOOTH: P415**Enterprise Drive, Westhill, AB32 6TQ
United Kingdom<https://www.jfdglobal.com/>

JFD is the world leading underwater capability provider, serving the commercial and defence markets with innovative diving, submarine and hyperbaric rescue, technical solutions and services. Operating worldwide, the company is the world's leading provider of submarine rescue capability, an established provider of submarine escape training and at the forefront of Hyperbaric Rescue, along with being the leading supplier of commercial and defence diving equipment and saturation diving systems.

JGW Group / JFD Limited**BOOTH: 539**1801 Robert Fulton Drive, Suite 400,
Reston, VA 20191<http://www.jgwgroup.com>

JGW Group expertise in the DoD: marketing/sales, training, consulting, proposal preparation and management, business development, and contractual intelligence. Our focus areas include Aerospace, Force Protection, CBRNE and Defense.

Joint Collective Training**BOOTH: 25**

7701 Tampa Point Blvd, Tampa, FL 33621

United States Special Operations Command (USSOCOM) J3-Joint Collective Training (J3-JCT) Division provides Joint Special Operations Forces (SOF) collective training and integrates SOF into Joint Force exercises to facilitate Joint SOF Headquarters (HQ) readiness and Conventional Force-SOF Integration, Interoperability, and Interdependence (CF-SOF I3). This training supports Geographic Combatant Command (GCC) demands for the full range of special operations core activities.

Joint Special Operations University (JSOU)**BOOTH: 13**7701 Tampa Point Blvd, MacDill AFB
Tampa, FL 33621

The Joint Special Operations University (JSOU) serves as the USSOCOM lead component for all matters pertaining to Joint SOF education. JSOU provides operational and strategic level special operations education and research to Special Operations Forces and the joint, interagency, and international communities in support of USSOCOM objectives. In addition to offering 30 courses and being the home to the Joint SOF Senior Enlisted Academy, JSOU supports scholarly research and publishes monographs written by and for the SOF community through the JSOU Press. JSOU is an accredited institution with its academic standards and curriculum evaluated by the Accrediting Council for Continuing Education & Training (ACCET), a national agency recognized by the U.S. Department of Education.

Juggernaut.Case**BOOTH: 1513**16460 N 91st Street, Scottsdale, AZ
85260-1563

Juggernaut.Case is the industry commercial-off-the-shelf (COTS) standard for bringing digital connectivity to the dismantled warfighter or first responder. Juggernaut's mission to ruggedize smartphones and tablets for the battlefield or rugged environment is fulfilled with its diverse products designed, engineered and assembled in the United States. With over 100,000 cases/mounts deployed, we PROTECT - MOUNT - CONNECT for all of your missions. <https://www.juggernautcase.com/>

KGM Technologies**BOOTH: J309**4900 Avalon Ridge Parkway, Peachtree
Corners, GA 30071 Georgiawww.kgm-tech.com

KGM's 42,000sqft state-of-the-art manufacturing facility focuses on cutting-edge technology innovation, research, development & fabrication. KGM is the largest weapon suppressor company in the US.

Kirintec Inc.**BOOTH: 1023**Kirintec Ltd, 10 Old Gloucester Road
Ross on Wye, HR9 5PB United Kingdomwww.kirintec.com

Kirintec specialise in the design and production of innovative technology solutions, for CEMA, (Cyber & Electromagnetic Activities) Counter-IED and Counter-UAS. We engineer and deliver battle proven capabilities across the world and our EOD equipment is in daily use globally. We use this experience to continually innovate and solve today's security threats. We work with many users in the defence and security sector including military, Government and non-Government organisations.

Klas Government**BOOTH: 1213**450 Springpark Place, Suite 1200
Herndon, VA 20170<http://www.klastelecom.com>

Klas Government makes the world's most powerful technology for the tactical edge. We provide rugged, low size, weight and power (SWaP) deployable communications solutions to meet the needs of government and military communicators in any operational environment. Klas Government enables customers to communicate more and carry less by delivering tactical and executive communications systems specifically designed for ultimate flexibility, scalability and portability.

Knight's Armament Company**BOOTH: 316**

701 Columbia Blvd., Titusville, FL 32780

Knight's Armament Company is a premier US firearms manufacturer, producing exceptional 5.56mm and 7.62mm firearms and derivative firearms, designed specifically for the rigors of military application. These same qualities are present in our products for law enforcement and personal use. Suppressors, accessories, handguards, mounting solutions, and electro-optics produced by the Knight's family of companies will also be on display.

Kord Defence Pty Ltd**BOOTH: 635****Unit 6, 65 Tennant Street, FYSHWICK, ACT2609 Australia**

Kord Defence provides mobile interface control solutions for operators in the Military, Homeland Security and Law Enforcement markets. We design, develop and produce programmable, push-button control systems that enable soldiers and other operators to keep "head up, eyes on target, hands on weapon"®. Our patented technology (Kord® Interface Technology or KordIT) helps people in hazardous and stressful situations to operate complex electronic equipment quickly, instinctively, and safely.

KW Micro Power Inc.**BOOTH: 1544****14350 Nw 56th Ct, Suite 108, Opa Locka, FL 33054**

KW Micro Power (KWMP) - a Florida Company was established to develop a line of small auxiliary power units (APUs) for the General/Commercial Aviation and Military communities. Our goal was to develop a reliable low cost gas turbine engine generator that would rely on a gear-less and oil-less system to produce high speed electrical power. This 30 Kw modular power system is readily scalable to megawatt class applications.

KWA Performance Industries**BOOTH: P311****18571 E. Gale Ave, City of Industry, CA 91748**

KWA is the leading manufacturer of 6mm training platforms for use in force-on-force and scenario-based weapons training.

Kymeta Government Solutions**BOOTH: 342****12277 134th Court NE Suite 100, Redmond, WA 98052****www.kymetacorp.com**

Kymeta is unlocking the potential of broadband satellite connectivity, combined with cellular networks, to satisfy the overwhelming demand for comms-on-the-move and making mobile global. Kymeta's unique, complete turnkey bundled connectivity solutions in tandem with its flat-panel satellite antenna, the first of its kind, and Kymeta services provide revolutionary mobile connectivity on satellite and hybrid satellite-cellular networks globally.

PROUD SOFIC SPONSOR

L3Harris Technologies**BOOTH: 813, SP23, P600****1025 West NASA Blvd, Melbourne, FL 32919****http://www.harris.com**

L3Harris Technologies is an agile global aerospace and defense technology innovator, delivering end-to-end solutions that meet customers' mission-critical needs. The company provides advanced defense and commercial technologies across space, air, land, sea and cyber domains.

Landguard Systems**BOOTH: 211****3030 N Rocky Point Dr W, #150, Tampa, FL 33607****www.landguardsystems.com**

Landguard Systems specializes in designing and manufacturing custom radio systems that enable our government, defense and law enforcement customers to track, locate and protect their crucial operation assets. We are experts in producing small size, low energy devices and our commitment to providing high delivery performance, 24/7 operational assistance, and industry-leading user training ensures our customers are supported every step of the way.

Leidos**BOOTH: 1405****1750 Presidents Street, Reston, VA 20190****http://www.leidos.com**

Leidos is a Fortune 500® technology, engineering, and science solutions and services leader working to solve the world's toughest challenges in the defense, intelligence, civil, and health markets. The company's 43,000 employees support vital missions for government and commercial customers. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$13.7 billion for the fiscal year ended December 31, 2021. For more information, visit www.leidos.com

Lenco Armored Vehicles**BOOTH: 1934****10 Betnr Industrial Drive, Pittsfield, MA 01201**

Lenco Armored Vehicles is the Nation's leading designer and manufacturer of tactical armored security vehicles. Lenco Armored Trucks meet the needs of S.W.A.T., Homeland Security, Counter-Terrorism, Force Protection, Military Police, HAZMAT Team and Dignitary Protection applications. A growing number of high-profile U.S. agencies around the globe are using our armored vehicles for dangerous law enforcement and military operations, citizen rescue and personnel/cargo delivery missions.

LEONARDO DRS**BOOTH: 835, SP5****2345 Crystal Drive Suite 1000, Arlington, VA 22202**

Leonardo DRS is a defense solutions provider, a leading technology innovator, and supplier of integrated products, services and support to military forces, the intelligence community, and defense contractors worldwide. The company is organized into Advanced Sensor Technologies, Network Computing and Communications, and Integrated Mission Systems segments. Headquartered in Arlington, Virginia, Leonardo DRS is a wholly owned subsidiary of Leonardo S.p.A.

•FEATURED ON SOFICTV

Leupold**BOOTH: 947****14400 NW Greenbrier Parkway, Beaverton, OR 97006****www.leupold.com**

Founded in Oregon more than a century ago, Leupold & Stevens, Inc. is a fifth-generation, family-owned company that designs, machines and assembles its riflescopes, mounting systems, tactical/Gold Ring spotting scopes, and performance eyewear in the USA. The product lines include rifle, handgun and spotting scopes; binoculars; rangefinders; mounting systems; and optical tools, accessories, and pro gear.

Lind Electronics**BOOTH: 1754****14850 Deveau Place, Minnetonka, MN 55345****http://www.lindelectronics.com**

Lind Electronics is a leading manufacturer of portable power and custom cabling solutions for military, public safety, and aerospace markets. A provider of MIL-STD power adapters, BB-2590 SMBUS battery chargers, USB adapters, and COTS solutions engineered with a rugged design for use in harsh environments. A Portable Power Specialists for Mobile Computing.

Liquid Robotics**BOOTH: 405****460 Herndon Parkway, Herndon, VA 20170****www.liquid-robotics.com**

Liquid Robotics, a Boeing company, designs and manufactures the Wave Glider®, the most experienced and proven Uncrewed Surface Vehicle (USV). Powered by wave and solar energy, the Wave Glider stays on mission 24x7 for several months at a time, providing real-time data for long-endurance, persistent maritime access, surveillance, and communications. The Wave Glider is a key component of Boeing's seabed-to-space network to make missions safer and operations more efficient.

LiquidPiston, Inc.**BOOTH: 152****1292A Blue Hills Ave, Bloomfield, CT 06002-1301****liquidpiston.com**

LiquidPiston, Inc. (LPI) develops advanced rotary internal combustion engines based on the company's patented thermodynamic cycle and novel rotary engine architecture. Our engines are compact, powerful, quiet, efficient, low-vibration, multi-fuel capable and scalable from 1HP to over 1000 HP.

LitePOWER Movie Quiet Generators**BOOTH: P701****4906 Cash Rd., Dallas, TX 75247**

LitePOWER Movie Quiet generators were designed for use in the Motion Picture and Entertainment industries but can be used at any location where extremely low noise level and portability are important. Most recently they are being used in the SOF community for their

lightweight portability and low noise levels in support of bare-base builds. We are a Veteran owned small business and our machines are designed and built in Dallas, TX using as many local small businesses as possible. Come and see one of our generators for yourself at SOFIC.

LMT Defense

BOOTH: 1819

Arlington, VA 22202

<http://www.msab.com>

MSAB's sole focus is a quality forensic solution that creates secure and trusted results for end users. The core business today produces a world class product called XRY which has the capability to recover deleted data from mobile devices; smart-phones, drones, mobile phones, 3G modems, GPS and Tablet devices. Building on that foundation we have released XAMN to provide smartphone analytics to our customer base. XEC is our administrative platform to manage updates and logistics.

Msubs

BOOTH: 1023

42 Sisna Park Rd, PL6 7FH, PL6 7FH

United Kingdom

MSubs is a UK SME that specializes in the design, manufacture, & operation of manned and unmanned submersibles for military and commercial markets, as well as commercial machine automation, unmanned surface vehicles and higher-level autonomy. We are a world leader in the rapid design and delivery of specialist prototype marine vehicles. Our vehicles are in service

with both the US Navy & USSOCOM. MSubs has been awarded a UK DASA contract to provide the RN with its first XLUUV trial platform.

MVP Robotics

BOOTH: 338

55 Old Bedford Road, Lincoln, MA 01773

MVP is a robotics & engineering startup that specializes in developing high-performance robotic solutions for sports & tactical operations. MVP has continued developing their patented robotic system to create HEKTR (Humanoid Engageable Kinetic Training Robot) a remote-control, fully armored, all-terrain, responsive live-fire target (reaches 20 mph) & provides instantaneous feedback to the shooter—filling the realistic training needs of the warfighter. MVP is eligible for sole-source acquisition.

NAC Semi

BOOTH: 244

1790 Commerce Ave N, Saint Petersburg, FL 33716

NAC Semi is a global electronic component design services & distribution company. NAC bridges the gap between the catalog houses and large fulfillment distributors. NAC's linecard supports the design needs of customers in specific market segments like Power, Mil-Aero, Hi-Temp Industrial, EV Tech, & Alternative Energy. NAC specializes in solving supply chain problems, providing demand creation distribution services, and building mutually beneficial partnerships with customers and suppliers.

Nammo AS

BOOTH: 1635

Enggata 41, Raufoss, 2830 Norway

<http://www.nammo.com>

NanoFlowX

BOOTH: J410

2150 Chenault Dr., Carrollton, TX 75006

NanoFlowX provides custom formulated electronic nanocoatings replacing outdated conformal /Parylene processes with a DIY, 2 step, 2-minute, non-masking, reworkable, low odor solution. Our easy-to-use nanocoating protects electronic equipment, devices and components against salt spray, dust, humidity and corrosion in harsh environments significantly reducing repairs, maintenance and replacement costs. NanoFlowX, helping to increase resiliency to all current and future technologies.

NanTenna

BOOTH: J517

2825 Business Ctr Blvd, Suite A6

Melbourne, FL 32940

NanTenna produces an industry leading UHF TACSAT antenna for stationary or the move satellite communications. Our capability crushes traditional expectations that antennas need to be tall for optimum performance. Due to the integration of unique antenna design elements, coupled with a magneto-dielectric composite, we have improved; dBic gain, accessible radio channels, usable bandwidth and operational use"

NASA SEWP

BOOTH: 5

10210 Greenbelt Road, Suite 200

Lanham, MD 20706

NASA SEWP (Solutions for Enterprise-Wide Procurement) is a GWAC (Government-Wide Acquisition Contract) of pre-competitively contracted that provides the latest in Information & Communications Technology (ICT) products and services for all Federal Agencies and their approved contractors. SEWP offers the best value and a low 0.34% surcharge, plus fast, easy ordering using our on-line tools.

National Armaments Consortium (NAC)

BOOTH: 946

315 Sigma Drive, Summerville, SC 29483

<http://www.nwec-dotc.org/>

The National Armaments Consortium (NAC) serves as the industry partner for the Department of Defense Ordnance Technology Consortium's (DOTC) and the Aviation and Missile Technology Consortium (AMTC). Our robust, transparent, and unique collaboration approach, once considered a novel and unrealistic concept, has evolved into a well-established process through which our DoD stakeholders acquire the innovative Armament technologies needed to maintain U.S. technological superiority.

National Defense Industrial Association (NDIA)

BOOTH: 1A

precision. All Primary Arms Optics products come with a comprehensive lifetime warranty. •SEE OUR AD ON PAGE 50

Primordial Labs

BOOTH: J304

157 Church St., Floor 19 New Haven, CT 06510

Primordial Labs is developing Scipio, a tactical AI assistant for sUAS that reduces the time from launch to actionable intelligence. Mission planning for sUAS is time consuming and leaves operators with the burden of manually controlling sensors in order to execute ISR objectives. Scipio takes objectives from the warfighter through a natural language voice interface and interprets their intent in order to automate the planning and execution of a full ISR mission for both the platform & sensors.

ProDIGIQ, Inc.

BOOTH: J308

26500 W. Agoura Road, Ste 102-796 Calabasas, CA 91302-1952

ProDIGIQ is an innovative technology company that focuses on providing software solutions for the aviation industry. All ProDIGIQ's solutions are 100% designed, built and supported in the United States. ProDIGIQ's enterprise-level software suite automates operations, maintenance, and safety management to provide real-time situational awareness and a common operational picture. Our intuitive software solutions also handle intelligent flight scheduling and advanced qualification program management.

Raider Outboards

BOOTH: 1954

1885 Armstrong Drive, Titusville, FL 32780

<http://www.raideroutboards.com>

Raider Outboards will feature a Raider 40 HP and Raider 50 HP multi-fuel/submersible outboard motors. We will also exhibit the Safety Jet; allowing to change from propeller to Jet Pump within 10 minutes. The Safety Jet provides safety in training; protection against debris from hurricanes; protection of people and sea life. A new Raider Outboards oil will be featured with ethanol shield additive allowing fuel to remain in the outboard for over one year.

RAIDER Targetry Pty Ltd

BOOTH: 635

21 Enterprise st, Kunda Park, Queensland4556 Australia

RAIDER Targetry develops and supplies highly configurable moving and static targetry that empowers our customers to train their full operational capability from structured to green field locations. Our technologies are used by government and miltech OEMs for live-fire and live simulation training, OT&E, RMAs and V&V.

Ranger Industries, LLC

BOOTH: 501

1894 East Williams Street, Suite 4, #490 Carson City, NV 89701

<http://www.rangerindustriesllc.com>

We provide high quality custom made challenge coins, lapel pins, badges, patches, etc. We produce our products domestically & off-shore to meet your design or budget requirements. They are used to commemorate unit affiliation, achievements, performance awards, deployments, safety or attendance recognition, corporate branding & more. Clients include U.S. & Foreign Governments, U.S. Military, Corporations, Civilian, etc. We are a SDVOSB, Officially Licensed with Army, USMC, Navy, USAF, USSF & USCG

Rank One Computing**BOOTH: 212****1290 N Broadway, Ste 1200****Denver, CO 80203**

Rank One Computing (ROC) works with government and military customers, delivering facial recognition and video analytics to verify identities, protect and monitor sensitive sites, and control access to key locations. ROC will be demonstrating our ROC Watch Live Alerting platform that is built on ROC's AI/ML SDK 2.0. ROC's latest SDK provides industry leading AI/ML-based face recognition, object detection (including vehicles, weapons, and persons), OCR, and license plate recognition. ROC's solutions are integrated with leading UAS platforms to improve situational awareness.

Raptor Photonics**BOOTH: 125****3020 Business Park Drive, Suite F****Norcross, GA 30071**

Raptor is a UK-based, specialist camera company, designing and manufacturing compact, ruggedized, SWaP enabled low light (day and night vision) camera systems. Designed to MilSpec standards, our integrated systems work in very harsh conditions in mission-critical applications used for seeing, targeting and countermeasures capabilities. Raptor offers VIS, VNIR and SWIR options on handheld monoculars and rail/tripod mounted systems using a selection of optimised fixed and motorised lenses.

Raven Advisory LLC**BOOTH: 1148****4400 Bragg Blvd, Fayetteville, NC 28303**

Raven Advisory LLC owns Gryphon Group & Raven Medical. Raven Advisory provides private, corporate, and government sector professional services and supports domestic and international requirements for training, risk management, security, consulting, logistical support, and specialized manufacturing. Raven is a multi-dimensional integrator for traditional services and cutting-edge technology, specifically in UMS, UAS, cUAS, cyber, digital data management and signature reduction.

Real Time Robotics**BOOTH: J220****4250 Heyer Ave, Castro Valley, CA 94536**

Real Time Robotics newest drone sets the industry standard for portability. Our HERA drone is small enough to fit in a backpack, yet powerful enough to lift 33-lb payloads, mount 4 gimbaled payloads simultaneously, delivering 360-degree FOV for every payload, and ensure data transparency and security. HERA simply sets the world records in almost all critical features which is unprecedented in drone history. Come see the future of the drone industry at Booth J220 in the Marriott SOFIC Ignite.

ReconRobotics, Inc.**BOOTH: 1922****5251 W. 73rd St. Suite A, Edina, MN 55439****<http://www.reconrobotics.com>**

ReconRobotics is the world leader in tactical micro-robot systems. Worldwide, nearly 4,000

Throwbot® and Recon Scout® robots have been deployed by the US military and international friendly forces, and 400+ law enforcement agencies. The 3-pound Throwbot and Recon Scout systems protect tactical operators and warfighters by providing immediate situational awareness and greater standoff distance.

Red Research Group**BOOTH: 1242****285 Pinehurst Ave, Unit E Southern****Pines, NC 28387****Regent Craft****BOOTH: SP30****111 South Bedford Street, Suite 200****Burlington, MA 01803**

Regent is developing "seaglidors": all-electric Wing-In-Ground (WIG) vehicles for high-speed, low-signature, and low-cost maritime mobility. Seaglidors transition to wing-borne flight from a hydrofoil which retracts for flight and landings. Seaglidors' capabilities support missions where traditional sealift and airlift platforms have limited flexibility and/or are operationally constrained.

Resolute ISR**BOOTH: 1843****3679 Bowen Rd, Howell, MI 48855**

Resolute ISR, Inc. is a Nevada corporation started in 2020 and is a 100% Owned Subsidiary of Heligroup Holdings, Inc. Resolute ISR is the focused OEM on building, deploying and supporting the Resolute Eagle UAS.

Reveal Technology**BOOTH: J419****712 Wisconsin Street, San Francisco, CA****94107**

Farsight is Reveal Technology's premier software platform designed to give disconnected and distributed teams access to actionable ISR, rapid modeling, and advanced analytics at the tactical edge. Users can automatically process UAS data to build near real-time 3D models meshed with AI analytics. Farsight integrates with ATAK and is interoperable with legacy, current, and future UAS platforms. Developed alongside DoD Special Operators, Farsight is affordable, customizable, and easy to learn.

RevGo Global**BOOTH: SP24****12007 Sunrise Valley Drive, Suite 450****Reston, VA 20191**

RevGo Global combines new generation GaN and GaAs transistors with unique power combining technology, volume production-oriented system design, and strict reliability control to create the most compact, cost-effective, field-proven VSAT, BUCs, LNBs, and transceivers. An O3b mPOWER Certified Partner, RevGo designs and manufactures RF products for satellite earth stations, VSAT, and mobile applications with the most efficient Size, Weight, Power and Quality (SWPaQ) combinations in the industry.

Revision**BOOTH: 1540****7 Corporate Drive, Essex, VT 05452**

Revision develops and delivers purpose-built eye protection for military and tactical use worldwide. Revision specializes in integration for the optimum and necessary balance of protection and performance. To that end, Revision brings together the most advanced expertise, state-of-the-art technology, and finest technical minds.

Ribbon Communications**BOOTH 347****4 Technology Park Dr. Westford, MA****01886**

Ribbon Communications (Nasdaq: RBBN) delivers communications software, IP and optical networking solutions to service providers, enterprises and critical infrastructure sectors. Our innovative, end-to-end solutions portfolio delivers unparalleled scale, performance and agility, including core to edge software-centric solutions, cloud-native offers, leading-edge security and analytics tools, along with IP and optical networking solutions for 5G. To learn more about Ribbon visit rbbn.com.

Rigaku Analytical Devices**BOOTH: 2121****30 Upton Drive, Suite 2****Wilmington, MA 01887-1017**

Used for the identification and detection of illegal drugs, explosives, and chemical threats, our rugged family of products includes the Rigaku ResQ and the new Rigaku ResQ CQL handheld 1064nm Raman analyzers. Both instruments feature an expandable and comprehensive library, simple software, and advanced features – including 4C Technology for automatic threat recipe alerts. Users benefit from free software and library updates, as well as 24/7 Reachback Support for the life of their analyzer.

RIVA Networks Inc**BOOTH: SP11****Princeton Park, 1100 Cornwall Road****Monmouth junction, NJ 08852****www.riva-networks.com**

RIVA Networks designs, builds and hosts advanced mobile phone solutions for the DoD and IC. RIVA's has partnered with Equinox Innovative Systems building "cell towers in the sky" with a tethered UAV. The key to maximum LTE or 5G range is the height of the cell tower antenna. Tethered at 100+ feet the UAV creates a 1 mile coverage area where voice, text, file sharing and HD video can be shared with devices within the bubble. RIVA and Equinox have proven performance records in the DoD and the IC.

Robotican**BOOTH: 735****Omer Industrial Park, Building 8D,****Omer, 8496500 Israel**

Robotican Established in 2013 in the city of Beer-Sheva at the south part of Israel by PHD's

from the Beer-Sheva university and experienced engineers coming from the Military industries. The company's expertise are autonomous unmanned robots & drones as unique solutions for challenging missions. Nowadays, Robotican focuses on its 2 main products: the Rooster a revolutionary hybrid unmanned system for indoor and underground reconnaissance missions, and the Goshawk an autonomous interceptor drone for catching & retrieving hostile drones & small unmanned aerial vehicles.

Rocke Solid Marine

SparkCognition Government Systems

BOOTH: J205

12708 Riata Vista Circle, Suite A-116 Austin, TX 78727

SparkCognition Government Systems (SGS) is the first full-spectrum artificial intelligence (AI) company devoted entirely to the government and national defense mission, applying next-generation AI systems to address critical national security initiatives. Our distinguished team consists

of longstanding authorities at the intersection of AI and defense, which makes SGS well-suited to help you stay mission-ready.

Special Operations Warrior Foundation

BOOTH: 7A

1137 Marbella Plaza Drive, Tampa, FL 33619

<http://www.specialops.org>

Special Operations Warrior Foundation ensures complete post-secondary educational support and additional educational opportunities "cradle to career," for eligible surviving children of fallen Special Operations Forces and children of all Medal of Honor recipients; and provides immediate financial assistance to severely wounded, ill, and injured Special Operations personnel — today and in the future.

Special Operators' Booster Club

BOOTH: 401

7701 Tampa Point Blvd., MacDill AFB, FL 33621

The Special Operators' Booster Club supports its members and families by providing funds for social, professional, recreational, and charitable programs and activities to enhance esprit de corps throughout USSOCOM in hopes of preserving the memories kindled by mutual experience of service within Special Operations Forces worldwide.

Special Ops Xcursions

BOOTH: 3A

P.O. Box 90716, Nashville, TN 37209

Special Ops Xcursions is a 501(c)3 nonprofit that provides active duty Special Operations Warriors & their families with outdoor adventures. Events include; hunting, fishing, shooting trap and skeet, archery, live music, family retreats, and camping. At our events, we seek an atmosphere of relaxation and camaraderie, 1:1 ratio of guests to guides, and all programs are free to the service men and families who join us. "From the fight to the field, one hunt at a time!"

Special Services Group, LLC

BOOTH: 205

PO Box 825, Denair, CA 95316

<http://specialservicesgroup.us/>

SSG provides technical and tactical solutions for asymmetrical and mobile environments. SSG recently released a new revolutionary line of low SWaP-C video compressors, designed and manufactured exclusively in house. Our innovative solutions include compressor, camera, modem, recording and PTZ functionality integrated together into previously impossible form factors and concealments. SSG also offers TTL devices including miniature tags, covert audio systems, covert video solutions and RF sensors.

Spectra Group

BOOTH: 1023

Bridge Court Barn, Kingstone, HFD HR2 gES United Kingdom

<http://www.spectra-group.co.uk>

Spectra Group, providers of secure satellite voice and data communications, in locations with limited or compromised infrastructure, presents Slingshot®, a lightweight and cost-effective system that enables SATCOM on in-service tactical radios. Using Inmarsat's L-TAC™ service, SlingShot achieves beyond line of sight, command and control, comms on the move. Man-pack, Vehicle-mounted, Maritime and Aviation configurations with omnidirectional antenna, deliver genuine COTM over 1000s+ kms.

Speedbox

BOOTH: J418

375 Whippoorwill Ln, Ridgeland, MS 39157

www.speedbox.us

Built to withstand the rigorous use of our military around the globe, the Speedboxes are heavy-duty rolling containers with 40- and 70-gallon capacities. They are made to use as a system, specifically for fast mobilization and palletization on the 463-L pallet, so each container nests, mates, and interlocks with each other. Our rugged containers are lockable, wind/water-proof, shatter-resistant, and have solid no-flat tires, all with a 300lb carrying capacity.

Spry Squared Pty Ltd

BOOTH: 635

218b Holbrooks Rd, Underdale, SA 5032 Australia

Who's Watching Your Firmware? Firmware monitoring, malware detection and alerting tool. Has your firmware been compromise? Or have a Supply Chain issue? Spry Squared is a Technology Solutions Integrator headquartered in Denver, Colorado with international office in Adelaide, Australia. We provided clients with Best in Class Cybersecurity Solutions, Vulnerability Management, Managed IT Services, IT Professional Services, Recruiting Services and technology products. www.sprysquared.com/firmware

Spyderco

BOOTH: 1902

820 Spyderco Way, Golden, CO 80403

<http://spyderco.com>

More than 40 years ago, Spyderco literally invented the modern folding tactical knife, introducing now-common features like pocket clips, serrated edges, and one-handed opening capability. That spirit of innovation and an uncompromising commitment to quality are still the heart of our distinctive line of folding knives, fixed-blades and sharpeners. Spyderco is the first and most trusted choice of armed professionals and first responders worldwide. GSA Contract Holder - FSS GS-07F-9342S

Squarehead Technology, Inc.

BOOTH: 250

580 Herndon Parkway, Suite 350
Herndon, VA 20170

Squarehead Technology specializes in “all things” acoustic. Our microphone arrays create precision audio capture highlighting acoustic events. Utilizing advanced beamforming techniques to filter and reduce unwanted sound, our systems identify where noise is coming from, and focuses on that sound. Our markets are Surveillance – capturing audio, making it intelligible, Drone Detection – identifying near field threats, and Condition Monitoring – identifying hardware issues prior to failure.

SR Technologies

BOOTH: 1100

1613 NW 136 Avenue, Building C

Sunrise, FL 33323

<http://www.srtrl.com>

SR Technologies is a wireless engineering company providing specialized, wireless communications exploitation, geo-location, and RF enabled cyber tools for the U.S. Government DoD and Intelligence Community. Our subject matter expertise areas include mobile satellite communications, cellular, and Wi-Fi enabled devices and networks. SRT's hardware has legacy capacity in the find, fix, finish and ISR mission areas and is now being employed in the Offensive Cyber domain.

St. Michael's Inc.

BOOTH: 755

13580 Groupe Dr, Suite 201, Woodbridge, VA 22192

<http://www.stmichaelsinc.com>

St. Michael's is a Service-Disabled Veteran-Owned Small Business with a record of providing exceptional financial management, acquisition, and administrative services across USSOCOM, including TSOCs, Service Components, and other units. We are employee-owned, which means our clients receive services from St. Michael's owners! Our staff approaches tasks with an ownership mentality. We look forward to demonstrating our core values of Excellence, Dependability, Teamwork, Candor, and Commitment!

StartGuides

BOOTH: 752

655 South Washington Street,
Alexandria, VA 22314

StartGuides delivers essential information at the point of need with intuitive, well-organized, instructional apps. Modernize training with visually appealing, self-paced learning that works any time, anywhere. Transform the speed & effectiveness of your training, lower costs & increase readiness.

Stealth Electric Bikes Pty Ltd

BOOTH: 635

2/800 Princes Hwy., Springvale, Victoria
3171 Australia

Stealth Electric Bikes (Stealth) is an Australian manufacturer of high powered electric mountain bikes suitable for combat personnel recovery and reconnaissance. As the turnkey solution for tactical short to mid-range land mobility, they provide an energy efficient, negligible sound/heat signature, low profile, lightweight, all terrain system for individual soldiers. All bikes are engineered and manufactured in Victoria, Australia.

Steelrock Technologies Limited

BOOTH: 1023

12 Upper Berkeley St, London, W1H 7QD
United Kingdom

SteelRock is a leading provider of innovative technology platforms, services, and solutions for UAS and C-UAS applications. Designed and engineered in the UK, our products set unrivalled standards for performance, safety, and operational reliability. NightFighter is a man-portable C-UAS system that uses advanced RF effector technology to neutralise a wide range of autonomous threats. NightFighter can be integrated into a total C-UAS solution combining detection and tracking with neutralisation.

STI-CO® Antenna Solutions

BOOTH: 240

11 Cobham Dr., Orchard Park, NY 14127

Stay safe and connected with the right mission critical antenna system. STI-CO® specializes in designing and manufacturing to your specifications. Our custom, high performance antenna systems combine over 50 years of expertise with the latest in technology for your surveillance, military, transportation and tactical applications. STI-CO® proudly engineers, manufactures and is headquartered in the USA. We are a small woman-owned business and are Buy America compliant.

•SEE OUR AD ON PAGE 61

Strategic Robotic Systems

BOOTH: 555

14842 NE 95th Street Redmond,
Redmond, WA 98052

An innovator in underwater technology, Strategic Robotic Systems has engineered the FUSION™ underwater vehicle as the next-generation defense platform. The FUSION. UUV is an expeditionary hybrid AUV/ROV with a bespoke suite of high-end sensors delivering a highly capable and intelligent system. A self-contained (no generator required) system augmented by clever automation and supervisory control through an unparalleled, intuitive user interface sets the benchmark in UUVs.

Strategic Solutions Unlimited, Inc

BOOTH: 1335

225 Gray St., Fayetteville, NC 28301

<http://www.ssuinc.us>

SSU is an SDVOSB that provides our clients with superior and cutting-edge solutions through our intelligence services, risk and security management, training, and Expeditionary Structures. SSU offers plug and play Modular Composite Shelter Systems (MCSS) that are suitable for exploitation and biometric laboratories, operations centers, communication hubs and includes a approved SCIF variant configurable to meet our client requirements. Stop by our booth to see the MCSS shelter on display.

Sub U Systems

BOOTH: 954

151 Fries Mill Road, Suite 506

Turnersville, NJ 08012

Sub U Systems is a technology leader in the development of small, rugged IP routers, switches, computers, integrated IP-based appliances, Software Definable Networking Appliances™ (SDN-A™) and NSA Commercial Solutions for Classified (CSfC) Solutions. We are the only manufacturer of customer mission/application-specific CSfC custom Comprised Solutions, and we are pioneering the military and government use of SDN-As.

Subsalve USA Corporation

BOOTH: 1904

P.O. Box 2030, North Kingstown, RI

02852

<http://www.subsalve.com>

Subsalve USA and AEF-AVON part of the PERFORMANCE INFLATABLES group are the world leaders in engineered inflatables, specializing in buoyancy and liquid containment, providing the best products and solutions to end users worldwide. All products are manufactured in the USA. In our ISO 9001 Certified facilities.

SureFire, LLC

BOOTH: 942

18300 Mt. Baldy Circle, Fountain Valley,
CA 92708

<http://www.surefire.com>

Located in Fountain Valley, California, SureFire LLC is the leading manufacturer of high-performance flashlights, weapon-mounted lights and other tactical equipment for those who go in harm's way, or anyone who demands the ultimate in quality, innovation and performance. SureFire illumination tools are used by more SWAT teams and elite special operations groups than any other brand. SureFire is an ISO 9001:2015-certified company.

Surmet Corporation

BOOTH: J318

31 B Street, Burlington, MA 01803

Surmet is vertically integrated manufacturer of ALON® and Spinel Transparent Ceramic products, and supplier of Lightweight Transparent

Armor and Durable Vis-MWIR Sensor Windows. ALON Transparent Armor provides over 50% weight and thickness reduction over glass armor and is fielded in military helicopters. ALON and Spinel Sensor Windows and Optics are fielded in Aircraft-based Reconnaissance systems. Surmet is a pioneer in IR Optics Materials, Optical Coatings, and Precision Optics Fabrication.

SURVICE Engineering Company

BOOTH: 1646

4695 Millennium Drive, Belcamp, MD 21017-1505

<http://www.survice.com>

The SURVICE Engineering Company has supported the DoD community for over 40 years with engineering services and advanced technologies. With our partner, Malloy Aeronautics, SURVICE has become a widely recognized Group 1-3 tactical unmanned aerial system (UAS) innovator producing the affordable, squad-deployable, highly capable, NDAA-compliant Tactical Resupply Vehicle (TRV) family of UASs featuring precedent-setting autonomous mission planning, payload diversity & capacity, and flight durations.

SWL Robotics

BOOTH: 1544

12214 SW 128 Street, Miami, FL 33186

SWL Robotics is a marine robotics firm based in Miami, FL established in 2011. SWL has developed a multi-component drone system able to provide reconnaissance and early warning alerts in coastal marine environments; The Tiburon USV, FR-10 USV, and 360-ROV. The Tiburon USV (debuting at SOFIC) is designed to operate in shallow water environments. The drone system is capable of encrypted satcom or 4G communication. Our crafts are fully electric or hybrid electric systems.

Syncopated Engineering

BOOTH: 744

6940 Columbia Gateway Dr, Suite 120 Columbia, MD 21046

Syncopated Engineering is a creative solution provider of embedded systems for wireless communications, signal processing and machine learning. Our CIELOTM family of wideband Cognitive Radio products enables intelligent wireless applications capable of multiple "radio personalities" with the same radio platform. Products include Mockingbird RF Signal Emulator, IoT Gateway, Wireless Ethernet Bridge with DSA, and Hornet Geolocation Swarm.

System Innovation Group

BOOTH: J107

3682 N Wickham Rd, #B1-261 Melbourne, FL 32935

Specializing in cellular tech solns for industrial/government apps, tactical systems for 1st responders/combat vehicles, fixed-site comms solutions, air-to-ground communications platforms, and man-packable capabilities for low-vis applications.

Systems Technology Inc - PARASIM

BOOTH: 1809

13766 S. Hawthorne Blvd., Hawthorne, CA 90250

<http://www.systemstech.com>

PARASIM® is a state-of-the-art Virtual Reality Parachute simulator that saves lives and rehearses for mission success. With real-world scenes and actual parachute dynamics, PARASIM rehearses canopy control for all types of weather and a wide range of canopies. Systems can be networked together for interactive team training. With nearly 400 systems worldwide, PARASIM is used extensively throughout the US military airborne and aviation communities. "Get Mission Ready and Rehearse Success!"

•FEATURED ON SOFICTV

SyTech Corporation

BOOTH: 1711

6121 Lincolnia Rd, Suite 200

Alexandria, VA 22312

<http://www.sytechcorp.com>

SyTech RIOS combines voice, video & data communications within a secure, easy-to-use graphical interface. SyTech introduces two new technologies for SOFIC 2022: 1) The RIOS ATAK Plugin enables push-to-talk communications among contacts, teams and tactical radios from within the ATAK interface. 2) SyTech's Linux-based RADIUS Radio and Digital Intercom System (RADIUS). RADIUS interconnects tactical radios, smartphones, computers, and crew stations for secure, interoperable communications.

T1G

BOOTH: 145

3100 Angeletti Road, Crawfordsville, AR 72327

T1G provides top-tier training, facilities, and resources designed to meet the unique and specific requirements that today's elite units and operators need to train effectively. T1G's unwavering mission is to provide world-class facilities and staffing. Our expertise in weapons and tactics, operational medicine, tactical driving, and dynamic entry supports advanced scenario development, Situational Training Exercises, and Full Mission Profiles for team to group-sized elements.

Tactical Environmental System, Inc.

BOOTH: 1648

1156 St. Rt. US 50, Milford, OH 45150

<http://www.tacticalsys.com>

Tactical Environmental Systems, Inc. is a Global HVAC Company that focuses on the ever-changing needs of today's military. TES is an OEM with the capability to engineer, design and manufacture any requirement in the HVAC industry which includes, but is not limited to, custom air conditioning, ground support systems, integrated trailer-ECU-generator, auxiliary power units, multi-fuel fired heaters and shelters.

Tactical Revolution

U.S. Army Special Operations Command (USASOC)**BOOTH: 10**2929 Desert Storm Dr., Fort Bragg,
NC28310

U.S. Army Special Operations Command (USASOC) provides our nation with the world's premier special operations units, capable of conducting and executing Special Warfare campaigns. USASOC is comprised of the 1st Special Forces Command, U.S. Army John F. Kennedy Special Warfare Center and School, U.S. Army Special Operations Aviation Command, and the 75th Ranger Regiment.

U.S. Marine Corps Special Operations Command MARSOC**BOOTH: 11**

Box 555341, Camp Pendleton, CA 92055

U.S. Marine Corps Special Operations Command (MARSOC) recruits, trains, equips, and deploys task-organized, scalable, expeditionary Marine Corps Special Operations Forces worldwide to accomplish special operations missions assigned by the Commander of U.S. Special Operations Command (USSOCOM) and/or Geographic Combatant Commanders via the Theater Special Operations Commands. Marine Special Operations Forces are specially selected and trained to conduct Special Operations Force core activities to include Direct Action, Special Reconnaissance, Preparation of the Environment, Security Force Assistance, Counter-Terrorism, Foreign Internal

Defense, and Counter Insurgency Operations while supporting Counter Proliferation and Unconventional Warfare in hostile, denied, and politically sensitive environments. MARSOC possesses an organic intelligence fusion capability that exists all the way down to the team level, enabling faster decision cycles and more effective operations. MARSOC maintains the ability to conduct special operations throughout the globe with a focus on the PACOM, CENTCOM, and AFRICOM areas of operations.

uAvionix Corp **BOOTH: J317**

880 Harrison St SE, Leesburg, VA 20175
uAvionix provides safety solutions to the unmanned aviation industry in order to aid in the integration of Unmanned Aircraft Systems (UAS) into National Airspace Systems (NAS). uAvionix offers low SWaP TSO and DoD AIMS certified and uncertified avionics for General Aviation (GA), Airport Surface Vehicles and the UAS in both civil and military market domains. uAvionix is backed by investors at DC Capital Partners.

UAVTEK **BOOTH: SP1**

Harvest Barn Farm, Aldsworth, Cheltenham Gloucestershire, GL54 3QR United Kingdom

UAVTEK is a UK based manufacturer and designer of unmanned systems, specialising in both hardware and software solutions. UAVTEK has a fleet of aerial, ground, and surface water vehicles, which all function using our unique control system which remains the same, whatever the vehicle type. This means the operators can easily prevent skill fade and decrease the overall training burden.

UFP Technologies **BOOTH: 645**

2995 Wall Triana Highway, Suite B4 Huntsville, AL 35824

UFP Technologies is a producer of innovative, custom-engineered case and inserts, tool control kits, and uniform gear for the aerospace and defense industries. The company works as an extension of its customers' R&D and manufacturing teams to provide highly engineered solutions using advanced materials and processes. Our aerospace and defense facilities in Huntsville, AL and Kissimmee, FL specialize in the rapid design, prototype, and production of solutions for mission critical applications.

UK Defence & Security Exports **BOOTH: 1023**

Old Admiralty Building, Admiralty Place London, SW1A 2DY United Kingdom

<http://www.ukti.gov.uk/dso>
United Kingdom Defence & Security Exports (UKDSE) provides the essential Government-to-Government dimension to company-led marketing campaigns in the export of Defence and Security equipment. Drawing on the wider Department of International Trade experience

of trade promotion and working closely with the UK Ministry of Defence and Armed Forces, UK Defence & Security Exports helps build defence-to-defence and wider Gov-to-Gov relations, and provides access to specialist support.

Ultimate Training Munitions

BOOTH: 1346, SP16

55 Readington Road, North Branch, NJ 08876

UTM offers the safest, most reliable and most accurate non-lethal training available. The UTM System consists of marking and blank ammunition rounds, conversions, personal protective equipment and portable training facilities, enabling better preparation to accomplish your mission. Using your own firearm, you will experience full function and unsurpassed realism with the freedom to train in any environment. Training...as real as it gets!

Ultra Armor by DefenderShield

BOOTH: J301

1499 Beach Dr SE, Saint Petersburg, FL 33701

Ultra Armor is a custom-developed Radiofrequency (RF) shielding technology made up of a composite metal material that blocks frequencies up to 90 GHz, protecting from more frequencies than any other shielding in the world, including C-band and high-band 5G millimeter waves that go higher than past cellular networks. Enclosing any radio-based electronic devices or weapons in our custom shielded bags will ensure complete protection from RF hacking and EMP attacks.

UNIT Solutions

BOOTH: 230

1340 Home Ave., Suite E Akron, OH 44310
Manufacturer of the Non-Lethal UNIT4 Training System. Improve lethality and readiness by training everyday with the UNIT4 Training Rifle. Contract manufactured by LMT with military grade materials, the UNIT4 offers complete training realism and fidelity with an ATF approved non-firearm. The UNIT4 puts training back in the hands of small unit leaders and allows for training at any time on any footprint. No Arms Room. No ASP. No Range Control. #TrainHere #TrainNow

United States Marine, Inc. **BOOTH: 1852**

10011 Lorraine Rd., Gulfport, MS 39503
