2024
HUMAN SYSTEMS
CONFERENCE

Next Generation Platforms and the Evolving Role of the Human

March 21 – 22, 2024 | Arlington, VA | NDIA.org/HS24

Table of Contents

NDIA

WHO WE ARE

The National Defense Industrial Association is the trusted leader in defense and national security associations. As a 501(c)(3) corporate and individual membership association, NDIA engages thoughtful and innovative leaders to exchange ideas, information, and capabilities that lead to the development of the best policies, practices, products, and technologies to ensure the safety and security of our nation. NDIA's membership embodies the full spectrum of corporate, government, academic, and individual stakeholders who form a vigorous, responsive, and collaborative community in support of defense and national security. For more than 100 years, NDIA and its predecessor organizations have been at the heart of the mission by dedicating their time, expertise, and energy to ensuring our warfighters have the best training, equipment, and support. Human Systems

Who We Are

Leadership and Committees

Lillian Asiala, PhD
Division Chair

Stuart Michelson, PhD
Deputy Chair

NDIA's Human Systems Division promotes the exchange of technical information and discussions between government, industry, and academia, and the expansion of research and development in areas related to the human as a system whose performance must be integrated into any military systems. To this end, the division will serve as an infrastructure by providing a variety of ways for government, industry, and academia to collaborate to advance human performance in air, land, sea, space, and cyberspace through research, education, and consultation.

JOIN THE CONVERSATION

@NDIAToday   @NDIAMembership   NDIA.org/LinkedIn   @NDIAToday   @NDIAToday

Welcome to the Human Systems Conference

On behalf of the NDIA Human Systems Division, we welcome you to the Human Systems Conference!

The mission of the NDIA Human Systems Division is to advocate for the expansion of research and development in areas related to the human as a system, particularly in contexts in which the human must be integrated into a "system of systems." This conference provides representatives from Government, industry, and academia the opportunity to exchange technical information, learn about ongoing HSI-related research and development efforts, discuss advocacy efforts, and advance human performance in air, land, sea, space, and cyberspace.

The theme for the 2024 conference is "Next Generation Platforms and the Evolving Role of the Human." The role of the human within a system evolves as technology progresses. The ever-changing dynamic between humans and machines requires the involvement of the end-user across the entire product lifecycle, including concept development, implementation, delivery, and maintenance. This year, we will hear from several speakers about ongoing efforts to integrate consideration of the human in the technology-development process. Additionally, advances in policy to incorporate Human Systems Integration (HSI) planning in defense acquisition (such as the publication of DOD Instruction 5000.95) require supportive and informative discourse about how HSI can maximize the efficacy of DOD platforms across their lifecycles. This year, the conference will feature spoken presentations and panel discussions related to the implementation of HSI within defense platforms. We will also feature a briefing on a collaborative effort between the Division and the DoD's Joint HSI Working Group to expand an "HSI Practitioners' Frequently Asked Questions" list hosted on the DAU website. This list offers HSI guidance for designers and members of the acquisition community. Finally, we will hear from industry, Government, and academic partners about ongoing HSI work and how the evolving role of humans leads to new dynamics between warfighters and the systems they use. Some of the topics we can look forward to hearing about include Trust in Artificial Intelligence, Human-Machine Interfaces/Interaction, Virtual Reality Training, and Physiological Monitoring. Throughout the conference agenda, we have provided ample time for in-person networking.

Whether you submitted an abstract, served as a featured speaker or panelist, or supported conference-planning activities, we appreciate your contribution to the 2024 conference program. As we look toward the division's activities in 2025, we will continue our efforts to provide a space for advocacy and the exchange of information regarding the state-of-the-art in human systems integration. Please reach out to Stuart Michelson if you are interested in supporting the division.

We, the members of the Division, our speakers, panelists, presenters, and the Human Systems community, hope you find this year's conference to be a stimulating and worthwhile experience!

Lillian Asiala, PhD
Chair, Human Systems Division

Stuart Michelson, PhD
Deputy Chair, Human Systems Division

Schedule at a Glance

Thursday, March 21

Keynote Address
8:45 – 9:30 am

Advocacy & Metrics Panel
10:45 – 11:45 am

Plenary Presentation on HSI Challenges
1:00 – 1:45 pm

HSI Accessibility Panel
4:00 – 4:50 pm

Friday, March 22

COI Overview
8:40- – 9:10 am

PAE&T Session COI Brief
9:10 – 9:40 am

PS&WP Session COI Brief
12:10 – 12:40 pm

SI&CP Human Systems COI Brief
2:10 – 2:40 pm

Event Information

Location	George Mason University Arlington Campus 3351 Fairfax Dr. Arlington, VA 22201
WiFi	1) Connect to MASON wireless network using your device. 2) Go to itservice.gmu.edu The self-registration portal will open. 3) Create an account to get online.
Attire	Civilian: Business Military: Uniform of the Day
Survey and Participant List	You will receive via email a survey and list of participants (name and organization) after the conference. Please complete the survey to make our event even more successful in the future.

Event Contact

Harassment Statement

NDIA is committed to providing a professional environment free from physical, psychological and verbal harassment. NDIA will not tolerate harassment of any kind, including but not limited to harassment based on ethnicity, religion, disability, physical appearance, gender, or sexual orientation. This policy applies to all participants and attendees at NDIA conferences, meetings and events. Harassment includes offensive gestures and verbal comments, deliberate intimidation, stalking, following, inappropriate photography and recording, sustained disruption of talks or other events, inappropriate physical contact, and unwelcome attention. Participants requested to cease harassing behavior are expected to comply immediately, and failure will serve as grounds for revoking access to the NDIA event.

Event Code of Conduct

NDIA's Event Code of Conduct applies to all National Defense Industrial Association (NDIA), National Training & Simulation Association (NTSA), Emerging Technologies Institute (ETI), and Women In Defense (WID) meeting-related events, whether in person at public or private facilities, online, or during virtual events. NDIA, NTSA, ETI, and WID are committed to providing a productive and welcoming environment for all participants. Visit NDIA.org/CodeOfConduct to review the full policy.

Antitrust Statement

NDIA has a policy of strict compliance with federal and state antitrust laws. The antitrust laws prohibit competitors from engaging in actions that could result in an unreasonable restraint of trade. Consequently, NDIA members must avoid discussing certain topics when they are together at formal association membership, board, committee, and other meetings and in informal contacts with other industry members: prices, fees, rates, profit margins, or other terms or conditions of sale (including allowances, credit terms, and warranties); allocation of markets or customers or division of territories; or refusals to deal with or boycotts of suppliers, customers or other third parties, or topics that may lead participants not to deal with a particular supplier, customer or third party.

Agenda

7:30 am – 5:00 pm	**Registration** ART GALLERY

7:30 – 8:30 am	**Networking Breakfast** MULTIPURPOSE ROOM

8:30 – 8:45 am

Welcome and Introductory Remarks
AUDITORIUM

Lillian Asiala, PhD
Chair Human Systems Division, NDIA
Cognitive Scientist, Sonalysts, Inc.

8:45 – 9:30 am

Keynote Address
AUDITORIUM

Blaine Summers
Director, Joint Simulation Environment, Naval Air Warfare Center Aircraft Division

9:30 – 10:15 am

Platform Highlight
AUDITORIUM

Mary Quinn, PhD, PMP
Human Systems Chief Scientist, Leidos

10:15 – 10:45 am

Networking Break
MULTIPURPOSE ROOM

10:45 – 11:45 am

Advocacy & Metrics Panel
AUDITORIUM

Ben Schwartz
Vice President of Human-Centered Engineering, Monterey Technologies, Inc.
Moderator

Joseph Lyons, PhD
Senior Scientist for Human-Machine Teaming, Air Force Research Laboratory

CDR Brennan Cox, USN, PhD
Human Systems Integration Capability Manager, USSOCOM

Edwin Bundy, PhD
Program Manager (GS-15), Irregular Warfare Technical Support Directorate

11:45 am – 1:00 pm
Networking Lunch
MULITPURPOSE ROOM

1:00 – 1:45 pm
Plenary Presentation on HSI Challenges
AUDITORIUM

Chris DeLuca
Director, Specialty Engineering, OUSD(R&E)

1:45 – 2:30 pm
JHSIWG CBA Overview
AUDITORIUM

Napoleon Gaither
Program Analyst, U.S. Army Futures Command, DEVCOM Science & Technology Directorate

2:30 – 3:30 pm
Poster/Demo Session and Refreshment Break
MULTIPURPOSE ROOM

3:30 – 4:00 pm

HSD Support of the Joint HSI Working Group: HSI Frequently Asked Questions
AUDITORIUM

Hank Phillips
Director, LVC Simulation, Soar Technology

Scott Kozak
President, NeuroTracker

4:00 – 4:50 pm

Making HSI Accessible to Everyone – Why It Matters and How We Do It
AUDITORIUM

Ana Borja
Human Systems Integration, Human Factors Engineering Technical Warrant Holder,
Naval Information Warfare Systems Command

Daniel Wallace, PhD
Human Factors Engineering Technical Warrant Holder,
Naval Sea Systems Command (NAVSEA) O5W

Jim Pharmer, PhD
Chief Scientist, Human Systems Engineering Department,
Naval Air Warfare Center Training Systems Division

Gordon Gattie, PhD
Human Systems Integration Technical Warrant Holder, Naval Sea Systems Command

4:50 – 5:00 pm

Closing Remarks
AUDITORIUM

Lillian Asiala, PhD
Chair Human Systems Division, NDIA
Cognitive Scientist, Sonalysts, Inc.

5:00 – 6:30 pm

Networking Reception
MULTIPURPOSE ROOM

Friday, March 22

7:30 am – 3:45 pm

Registration
ART GALLERY

7:30 – 8:30 am

Networking Breakfast
MULTIPURPOSE ROOM

8:30 – 8:35 am

Welcome and Introductory Remarks
AUDITORIUM

Brig Gen Guy Walsh, USAF (Ret)
Executive Vice President, NDIA

8:35 – 8:40 am

Introduction to Day's Proceedings
AUDITORIUM

Stuart Michelson, PhD
Deputy Chair Human Systems Division, NDIA
Senior Research Scientist, Georgia Tech Research Institute

8:40 – 9:10 am

COI Overview
AUDITORIUM

Gaurav Sharma, PhD
Chief Scientist of the 711th Human Performance Wing, Air Force Research Laboratory,
Wright-Patterson Air Force Base

Session 1: Personalized Assessment, Education, and Training (PAE&T)
AUDITORIUM

Moderator: Hank Phillips, Director, LVC Simulation, Soar Technology

9:10 – 9:40 am

PAE&T Human Systems COI Brief
AUDITORIUM

Elizabeth Uhl, PhD
PAE&T Subarea Lead, Human Systems COI
Senior Research Psychologist, U.S. Army Research Institute

9:40 – 10:00 am

Enhancing Pilot Selection: Assessing a New Way to Measure Spatial Orientation in the Test of Basic Aviation Skills
AUDITORIUM

Cadet Adedapo Adeboyejo, USAF
2024 Class President, United States Air Force Academy

Cadet Ryan Trevino, USAF
Cadet, United States Air Force Academy

10:00 – 10:30 am

Networking Break
MULTIPURPOSE ROOM

10:30 – 10:50 am

Algorithmic Scenario Generations for Robust Human-Machine Interaction
AUDITORIUM

Stefanos Nikolaidis, PhD
Professor, University of Southern California

10:50 – 11:10 am

SAE G-45 HSI Committee Process Standards at HSI and Domain Levels
AUDITORIUM

Eric Stohr
Senior Human Factors System Engineer, Basic Commerce & Industries

11:10 am – 12:10 pm

Networking Lunch
MULTIPURPOSE ROOM

Session 2: Protection, Sustainment, and Warfighter Performance (PS&WP)
AUDITORIUM

Moderator: Brad Chedister, Chief Technology and Innovation Officer, DEFENSEWERX

12:10 – 12:40 pm

PS&WP Human Systems COI Brief
AUDITORIUM

Logan Williams, PhD
PS&WP Government Co-Chair, Human Systems Division, NDIA
Lead, Human Performance Medical Product Area, Air Force Research Laboratory

12:40 – 1:00 pm

Understanding the Implications of Cyber-Relevant Cognitive Vulnerabilities and Their Impacts on Protecting Space and Flight Systems from Cyber Attacks
AUDITORIUM

Lori Coombs
Senior Principal Technical Manager, NASA

1:00 – 1:20 pm

A Scalable Architecture for Integration of Flexible Hybrid Electronics Into Smart Textiles to Support Warfighter Monitoring, Communication, and Performance
AUDITORIUM

Jeffrey Bergman
Engineering Manager, Nextflex

1:20 – 1:40 pm

Exoskeletons: Practical Defense Applications for Wearable Robotics
AUDITORIUM

Tim Swift, PhD
Founder & CEO, Roam Robotics

1:40 – 2:10 pm

Networking Break
MULTIPURPOSE ROOM

WOMEN IN DEFENSE
2024 National Conference

September 24, 2024 | Arlington, VA
WomenInDefense.net

Session 3: System Interfaces & Cognitive Processes (SI&CP)
AUDITORIUM

Moderator: Mary Quinn, PhD, PMP, Human Systems Chief Scientist, Leidos

---

2:10 – 2:40 pm

SI&CP Human Systems COI Brief
AUDITORIUM

Mark Draper, PhD
SI&CP Government Co-Chair, Human Systems Division, NDIA
Lead Adaptive Warfighter Interfaces Core Technical Competency, Air Force Research Laboratory

2:40 – 3:00 pm

Understanding Trust in Next-Generation Human Systems Integration
AUDITORIUM

Janine Mator
Behavior Research Scientist, Leidos

3:00 – 3:20 pm

Improving Individual Trust in AI Systems by Exploiting Pre-Cooked Methods
AUDITORIUM

Stephen Gordon, PhD
Operations Manager, DCS Corporation

3:20 - 3:40 pm

Creating a Cognitive Load Tool (COLT) for Neuroadaptive Interfaces
AUDITORIUM

Kyle Hickerson
Human Factors Intern, Leidos

Ethan Irby
Junior Data Scientist, Leidos

3:40 – 3:45 pm

Closing Remarks
AUDITORIUM

Eric Sikorski
Lead Human Centered Engineer – Group Lead, MITRE

2024 MISSILE DEFENSE CONFERENCE
and Ronald Reagan Missile Defense Award Ceremony

NDIA

HOSTED BY:

2024 Department of the Air Force
Modeling and Simulation Summit

TRAINING IN A DIGITAL WORLD

This year's theme, *Training in a Digital World,* highlights the Department of the Air Force's drive to upskill personnel through digital training. The goal of the M&S Summit is to gather Air Force and Space Force M&S experts to learn about new M&S initiatives and techniques, network across military services and with industry experts, and to hear our technological leaders' perspectives on how M&S can transition more training from the real world to digital.

The 2024 DAF M&S Summit will provide a forum for shared information, ideas, and connection of M&S professionals across the DoD, industry, academia, and international partners. The three-day summit agenda includes:

- Eminent Keynote Speakers from Military, Government, and Industry Leaders
- Distinguished Panel Discussions and Q&A sessions
- Track Session Presentation Focus Areas

- VIP Tour for Distinguished Visitors
- M&S Industry Exhibition Hall
- Classified M&S Briefing Sessions
- M&S Tool Overview

Save the Date!   7 – 9 May 2024 | San Antonio, TX | DAFMSS.org

ORGANIZED BY: **NTSA**

Biographies

Blaine Summers

Director, Joint Simulation Environment

Mr. Blaine Summers serves as the Director for the Joint Simulation Environment (JSE). He leads a large cross-discipline team in the development of a high fidelity, Government-owned digital battlespace. JSE currently enables F-35 Initial Operational Test and Evaluation and provides world-class training for F-35 Weapon Schools and operational squadrons. Blaine represents Navy equities in joint USN-USAF leadership forums, shaping multi-billion dollar investments in support of warfighter needs.

Blaine began his Federal career supporting numerous DoD and Intelligence Community partners, leading teams in the rapid development and deployment of communication systems to tens of thousands of worldwide users.

Blaine forged partnerships across the DoD, founding a Cross-Service Working Group with members from all military branches, enhancing collaboration and aligning DoD investments in mobile technologies. Blaine's efforts resulted in a multi-platform flight clearance to enable rapid fielding of modified commercial technology to over 40 Naval aviation platforms. His accomplishments include delivering 715 mission planning and tactical execution assets to the F/A-18 community.

Blaine authored the Acquisition Strategy for an ACAT II unmanned systems program of record. His aggressive tailoring approach provided a strong foundation for program execution, ultimately securing $225M in program funding across the FYDP.

Blaine then served as the Future Capabilities Lead in PMA-299, Multi-Mission Helicopters. He was responsible for warfare analysis, requirements identification, resource planning, and future capability development for multiple ACAT IC programs. Blaine served a key leadership role in negotiating a $1.1B Capability Assurance Program with the Royal Australian Navy, establishing an international partnership to ensure continued investment in MH-60 tactical superiority.

Blaine most recently served as NAVAIR's Enterprise Deployment Lead for Systems Engineering Transformation. He was responsible for implementing digital engineering strategies across several Major Defense Acquisition Programs, leading an effort to transform Defense acquisition culture and dramatically increase the speed with which weapons systems are delivered to the fleet.

Blaine's education includes a Bachelor of Science degree in Computer Engineering from the University of Maryland Baltimore County, a Master of Science degree in Engineering Management from the Florida Institute of Technology, and a Graduate Certificate in Cyber Warfare from the Naval Postgraduate School. He is Defense Acquisition University Level 3 certified in Program Management and Engineering. Blaine is a graduate from the Executive Leadership Program and NAVAIR's Leadership Development Program.

Chris DeLuca

Director, Specialty Engineering, OUSD(R&E)

Mr. DeLuca has over 39 years of experience in DOD as a U.S. Army Colonel (R) and DoD GS-15/NH-IV Civilian, Level III qualified in Program Management, Systems Engineering and Test and Evaluation. His current assignment includes the following Specialty Engineering disciplines: Reliability & Maintainability; Manufacturing & Quality; Human Systems Integration; System Safety; and, Value Engineering. As a U.S. Army commissioned officer, he was in combat arms and acquisition, holding multiple command, leadership and staff positions including unit command, Army Program Acquisition Management Charters for Major (MDAP) and Non-Major (including rapid equipping and provisioning) Defense Acquisition Programs, and served on the Army Staff. As a DOD Civilian, Mr. DeLuca served as a Deputy Program Manager for a Major Automated Information System (MAIS)/ Defense Business System (DBS), directed systems engineering and developmental test and evaluation analysis teams at OSD for Space, Land Warfare and C4ISR MDAPs, MAIS and DBS programs, and served as the USD(R&E) Member of the Secretary of Defense Electromagnetic Spectrum Operations Cross Functional Team before his current assignment as Director, Specialty Engineering.

CDR Brennan Cox, USN, PhD

Human Systems Integration Capability Manager, USSOCOM

Commander Brennan D. Cox is the Human Systems Integration (HSI) Capability Manager for Special Operations Forces, Acquisitions, Technology, and Logistics (AT&L), Science and Technology (S&T), at Headquarters, United States Special Operations Command. Here, he manages and supports biotechnology,

human performance, and future-oriented S&T activities. Cox previously served as Deputy Director of the Naval Aerospace Medical Research Laboratory at Naval Aerospace Medical Research Laboratory at Naval Medical Research Unit Dayton, Assistant Professor of Operations Research at the Naval Postgraduate School, Head of Research Operations at the Naval Health Research Center, and Division Officer

of Operational Psychology at the Naval Aerospace Medical Institute. Throughout his career, he has engaged in research, consultation, and applied practice of HSI, with expertise in the personnel and training domains. He holds a PhD in Industrial and Organizational Psychology and an Executive Master of Business Administration, along with several defense-oriented education certificates.

Joseph Lyons, PhD

Senior Scientist for Human-Machine Teaming, Air Force Research Laboratory

Joseph B. Lyons, a member of the scientific and professional cadre of senior executives, is the Senior Scientist for Human-Machine Teaming, 711th Human Performance Wing, Human Effectiveness Directorate, Air Force Research Laboratory, Wright-Patterson AFB, Ohio. He serves as the principal scientific

authority and independent researcher in the research, development, adaptation, and application of Human-Machine Teaming.

Dr. Lyons began his career with the Air Force in 2005 in the Human Effectiveness Directorate, Wright-Patterson AFB, Ohio. Dr. Lyons has served as a thought leader for the DoD in the areas of trust in autonomy and Human-Machine Teaming. Dr. Lyons has published over 100 technical publications including 64 journal articles in outlets focused on human factors, human-machine

interaction, applied psychology, robotics, and organizational behavior. Dr. Lyons also served as Co-Editor for the 2020 book, Trust in Human-Robot Interaction. Dr. Lyons is an AFRL Fellow, a Fellow of the American Psychological Association, and a Fellow of the Society for Military Psychologists. Prior to assuming his current position, Dr. Lyons served as a Program Officer for the Air Force Office of Scientific Research and was a Principal Research Psychologist within the Human Effectiveness Directorate.

Edwin Bundy, PhD

Program Manager (GS-15), Irregular Warfare Technical Support Directorate

Dr. Bundy manages the Explosive Ordnance Disposal/ Explosives Operations (EOD/EXO) Subgroup for the Irregular Warfare Technical Support Directorate (IWTSD) within the U.S. Department of Defense. This directorate sits under the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD SO/LIC).

Dr. Bundy's current mission area focuses on developing advanced technologies for military Explosive Ordnance Disposal technicians and other personnel conducting high-risk explosives-related operations in irregular warfare and post-conflict environments. Dr. Bundy's expertise in the EOD, C-IED, UXO, and ERW arenas has been honed over a 40-year career spanning operational and research and development positions.

Dr. Bundy is an advisor to the International Association of Bomb Technicians and Investigators (IABTI) and U.S. Bomb Technician Association (USBTA), and a federal liaison to the National Bomb Squad Commander's Advisory Board (NBSCAB). Dr. Bundy is a Certified International Post Blast Investigator (CIPBI), former U.S. Army Master Explosive Ordnance Disposal (EOD) technician and holds PhDs. in both Education and Forensic Science.

Sponsor Descriptions

BAE SYSTEMS

PREMIER

BAE Systems, Inc. and its 35,000 people are part of a global defense, aerospace and security company with 89,600 employees worldwide in more than 40 countries. We deliver products and services for air, land, sea and space, as well as advanced electronics, security, information technology solutions, and customer support and services. Our dedication shows in everything we create and deliver—from advanced electronic systems to cyber operations and intelligence analysis, from combat vehicles to naval weapons, and from ship maintenance and modernization to vehicle upgrades and services. We push the limits of possibility to provide a critical advantage to our customers where it counts.

MONTEREY TECHNOLOGIES, INC.

REGISTRATION & LANYARD

Monterey Technologies, Inc. is a human engineering and software services company focused on applying human-centered systems engineering to the design and development of complex, critical systems. Our unique and valuable expertise in human factors engineering, human systems integration, and mission planning software development, testing, and integration enables warfighters and end-users to make better decisions faster. Spanning the continuum of Research, Analysis, Design, and Development, our human-centered approach to problem-solving ensures that we understand the human dimension before recommending technology solutions.

walkme — Digital Adoption Platform

NETWORKING LUNCH

WalkMe (WKME) pioneered the world's leading Digital Adoption Platform (DAP) so companies can effectively navigate the constant change brought on by technology. With WalkMe, organizations drive enterprise productivity and reduce risk by ensuring consistent, responsible, and efficient adoption of software and the workflows it powers. Our AI-driven platform sits on top of an organization's tech stack, identifies where people experience friction, and delivers the personalized guidance and automation needed to get the job done, right in the flow of work. Customers like IBM, Nestle, ThermoFisher Scientific, and the U.S. Dept. of Defense trust WalkMe to create the people-centric experiences required to boost the effectiveness of their workflows and maximize software ROI.

leidos

NETWORKING RECEPTION

Leidos is a Fortune 500® innovation company rapidly addressing the world's most vexing challenges in national security and health. The company's global workforce of 47,000 collaborates to create smarter technology solutions for customers in heavily regulated industries. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately $15.4 billion for the fiscal year ended December 29, 2023. For more information, visit www.leidos.com.

KPERFORM

SMALL BUSINESS ELITE

KPERFORM™ is a Brain Health & Longevity, Experiential & Exponential Technologies Company, which has introduced a new performance category integrating BRAINBODYVOICE™ (BBV) Systems for Operational Readiness. In simple terms, BBV Systems upgrades the human operating system by integrating the vocal process and is held to the highest thresholds and integrity of special operations warfighter performance, the most elite in human performance of our modern times. KPERFORM™ concentrates on human performance optimization, injury prevention and early disease intervention [HPOIPeDI] utilizing BBV Systems-based algorithms for the benefit of all, agnostic of age, gender, fitness level and belief systems.
