TRANSPORTATION CORPS

At a Glance

Army Logistics is the processes, resources, and systems involved in generating, transporting, sustaining, and redeploying or reallocating materiel and personnel.

There are 3 basic branches of Logistics – Transportation, Quartermaster, and Ordnance. Logistics personnel make up approximately 24% of the Total Army Force (Active Duty, National Guard, and Reserves)

TWV Operational Concept

Scope

Tactical Wheeled Vehicles are present in all units and are used for unit mobility, sustainment and mobile platforms for other warfighting capabilities. They support all phases of Multi-Domain Operations from the Strategic Support Area to the Close Area.

Requirements

- TWVs in Multi-Domain Operations must:
- Enable future formations to conduct independent, distributed, and echeloned maneuver while operating disconnected over exposed and extended LOCs
 - Provide enhanced sustainment throughput across the force to include semi-autonomous and autonomous systems
 - Possess greater organic protection capability, mobility, and communication equipment commensurate with supported forces
